#### Dear Beef Producers,

In our breeding program, we are always trying to improve our cattle, concentrating on the important traits of raising cattle with good fertility, milk, soundness and pounds. We select bulls with moderate birth weights, rapid growth, with a strong emphasis on udder quality and good dispositions. We don't push our cattle hard, so as to keep their feet sound and hope they can hold up better than a fat bull. We hope you can find the seedstock you are looking for and buy with confidence in our program.

Thanks to our customers and friends who take interest in our cattle.

Matt Bartling

#### Bull Breeding Guarantee

All bulls will be tested before the sale. We guarantee the first 60 days breeding season. If adjustment is necessary it will be made with a suitable replacement or credit in the next sale.

#### Mortality Insurance

We offer 6 months mortality insurance on our bulls (covers mortality, accident, sickness, disease). We will pay 2% and buyer pays 2% of the sale price. Buyer has the option to purchase 12 months insurance for 2% more. We recommend this insurance on all bulls left here for a period of time. Heifer insurance is available at buyer expense. We highly recommend this insurance as your protection for issues outside of our Bull Breeding Guarantee.

#### No Creep Feed

Big REA, very easy fleshing offspring, great dispositions. 27A is out of a 40U daughter that is tops for low BW and extra milk. I think his sons will produce cattle that will excel in the feedlot, as well as producing great females. Half-brother to 28B.

Tremendous ease of birth sire. Full brother to 43A that Stuber purchased in Ridder's 2014 sale. His dam is modest sized and a standout producer. I call this bull chubby. He is always in great shape. His calves are very deep bodied and look to be easy fleshing also. Our heifer bull the last two years.
