WHERE
COWMEN
BUY
BULLS

Welcome...

Welcome to our annual sale. We face challenging times with a promise of a much stronger cattle market than we have seen in recent times. Calf prices are steady at a high rate and cull bulls and females are setting new highs. Lower corn prices should help the profitability of the entire industry. We were fortunate to have sufficient pasture for the summer and were quite relieved that we have enough cow hay for the first time in recent history. We have four major new sires with half the offering by new blood. Our performance leader of the last three years, 763, has more sons than ever in this sale. As always we strive to make this a logical legitimate choice for outstanding range bulls.

An odd feature which teaches us more about the disposition of these cattle than anything is our brief halter breaking program. This has gone on forever here and there are very few bulls that have been missed. Generations of it has made a quiet cowherd and you would have to see it to believe it. Buy a bull, rope him, and when he stops to let you scratch him, you will know why. These bulls were not developed with a high concentrate ration. The genetics have done the heavy lifting and the Hereford efficiency advantage on their light, no melt ration is huge. These cattle are limit fed. Grass is the only thing you get all you want to eat around here. Our great gains come here on grass and that is what we have to sell. These cattle don't melt. We have kept this balanced trait selection program with you in mind. This group is outstanding in milk and marbling and with females of any color worth more this fall, they are important traits.

The performance is as real as we can make it and we are proud of this offering. It was a recovery year for us, and it has been a good one. I am stronger and much better than last year. I had great help through the winter and calving. Learning to manage to do what we have here is a great challenge we look forward to. These bulls were taped and pictured in early September while it was still hot and it hurt their looks. You will like the improvement by sale day that great range conditions can give us. The sale and bidding will be carried by DV Auction on the internet. We are offering several females this year which is the tip of the iceberg of the large number we will sell private treaty. The bred heifers are the very best we have ever offered and there are another twenty head available for sale private treaty.

The children flourish and Janice teaches steadfastly. Mom is spunky and we're glad we have her. We do this because we love it and thanks for coming.

There is free delivery up to 300 miles on a \$4,000 purchase.
We will cooperate on all deliveries.

One hundred dollar discount if bull is picked up within a week of the sale.

Cheyenne has several good motels:

We now have four calf crops and as you go through the pasture, both bull and heifer calves demand your attention. Outstanding carcass and growth numbers are his trademark. They are long bodied, short marked cattle, with pigment. His dam is a herd bull mother and his sire dominates marbling in the Hereford breed. Dam's average is 100 for BW on 8 head but indexes of 107 and 108 on weaning and yearling indexes. Progeny excel in both REA and IMF.

This outstanding 862U son has great muscle definition, loads of natural thickness, length of body and spring of rib. 072X is a red necked bull with breed leading numbers. Top bull in Cooper's sale for combining REA/MARB EPDs. He scanned a low rib ratio of 89, a 14.07 in REA and MARB ratio of 119. Dam is a top end 3162N daughter with a MM EPD of 31. Maternal half-brother to CL 1 DOMINO 955W that was the high selling bull in the Cooper Production sale in 2010. We were excited to be able to purchase a maternal brother to the top selling Hereford bull in Denver two years ago, 955W. First sons sell.

Tank "the old bull," has been a welcome addition to this herd. This outstanding sire owned by Paul Laubach has a tremendous amount to offer the Hereford breed. He has more depth and volume than most Hereford cattle, is well pigmented and moves great. He has great feet and a disposition to match. This bull offers more depth of rib and capacity which you can't measure with a number but we hope it will light your eyes up. Great sire group and last natural calf crop from this sire. Female side is as good as any with great carcass data behind him. Proven sire.

This is the most outstanding bull we have raised for some time. He has incredible muscle expression through the stifle, quarter and down his top. He is heavy boned, correct and travels smoothly. He has one big red eye and is certainly a herd bull. We flushed his full sister for Paul Laubach and another full sister was shown successfully by Jessie and was a Supreme Female Champion at the Laramie County Fair in 2005. At the SAREC Test this bull was -4 for feed efficiency, had an average daily gain of 3.43 and dry matter conversion was 4.99 per pound on a high roughage ration. What more do you want your Herefords to do? This bull's pedigree is our herd's history and this is why we are so excited about his results on the efficiency test. Maternal brother sells Lot 44.

This bull had me from hello with his easy manners. It might take two horses to move if he thinks his cows have gone far enough or you can walk up, halter him, and lead him to the trailer at the end of the season. All three sons from this flush were used on heifers, one by his breeder, and his dam was kept until she was 15. We used him with confidence to follow 763 and with the way he is bred the numbers coming out of Canada are stronger than listed. His daughters exceed expectations and cross well on the new Line One bulls.

We were extremely excited to be able to purchase possession in this outstanding sire. He has bred true to his numbers and has been used successfully on heifers. He is a tremendous individual that moves out well, is strong topped, stands on good feet and legs and really carries his muscling down well into his lower quarter. His dam was a highly sought after cow in the Hirsche dispersion; she is truly a great cow with a perfect udder and tons of milk. She has been shown four different years and each year was the Champion including Agribition Champion Female. I am very excited about the balance in his carcass EPDs and his first daughters are outstanding.

We went back to using this outstanding 4033 son because of his outstanding calf crop at Carl Shaffer's at Rock River. He is backed by one of our very best low birth weight and high milk families for three generations. First calves were born in 2010 and were good enough we bred more cows to him. Carl has not pampered this bull and you should try him.

This bull doesn't have to work out to look ripped. When you stack 4011 on Rancher you get an extremely powerful meaty prospect. He is a heifers first calf and we recommend him any place you can use him. He is straight in his top line and well above average for muscling. He is a top prospect. Top five percent milk, top twenty percent rib eye and top five percent marbling.

Wow! This goggle-eyed Ribstone son will be really easy to find. Cow 669 has already had a great son to Warren ranch and the 906 cow was one of our favorites. This bull has a tremendous maternal strength and a great upside on his yearling and weaning (top fifteen percent) potential. He is the kind of bull that would sire great baldy females.

EPDs: BW +1.9 WW +39 YW +65 MILK +29 M&G +48

This is one of the really cool Andy sons we have ever had to offer. He is double bred to 157K the marbling giant and goes back to L18, one of our performance sires. He is born prematurely out of a lump jaw heifer but had been raised on a foster dam and became an outstanding range bull prospect. Full pigment and a tremendous amount of milk behind this sire (top five percent milk), recommended for use on heifers.

WOW. You won't get a chance like this very often. Easily the choice of the 72X heifers last year she has the rib shape and capacity to build a herd around. This heifer is moderate framed with a deep body and full pigment. She is a powerful but beautiful cow.

This heifer is moderate framed with full pigment. You can expect a great udder from this cow family. She is well bred and will perform well. The milk will be great here. She is a great compliment to the best set of heifers we have offered. The 805 cows were tops.

Designed as an outcross pedigree. The combination of Line One femininity and Canadian performance meet beautifully here. She will be pretty all her life. She will be a great junior prospect. She has the best udders we have behind her.

This is probably too great a performance heifer to rule the show ring but her contribution to any herd where you sell by the pound is huge. She has exploded from a low BW heifer calf to the powerful heifer she is today. Exceptional pigment and smooth. She is an easy keeper and has had a little extra the other heifers haven't. She is polled with a great birth to weaning spread.

The sale cattle this year confirm the value of our L18 sons and this heifer's dam is a perfect example. What a beautiful two year old's calf! She is thick yet feminine and as smooth as they come with a nice neat front. Maternal power runs deep here.

Dam is a full sister to Lot 36. He is the most powerfully muscled bull in the sale. The dam is a splendid mother. 22S is a trait leader for nearly every trait measured and all indexes. This mating was designed for a best of the best and she could be it. Polled.

What a pretty picture. The two goggle eyes this heifer has complement her straight lines. We kept her maternal sister and she did a top job this year. Her sire, B Rancher 25 is a Rancher 592R son retained for use here. Moderate, but a cow in the making. Dam has an exceptional udder.
