Welcome...

Welcome to our annual sale. I have never seen enthusiasm or grass at these levels. It is history making ground we walk on and I am sure we will remember it fondly. I would encourage you to put your best genetics forward while the industry is in its growth phase. We had an opportunity last spring to tie into a great one in our purchase of 314A. It is exciting to have him here. We had a banner calf crop last year and look forward to you evaluating them sale day. This is a year of genetic exploration for us. We used six different outcross sires on our heifers and are introducing a new natural service sire, RCR Aurum Domino. It gives you a world of different choices to make. We thought it would add value to try a few polled Hereford sires on our heifers and keep our breeding program intact on the main cow herd. A major emphasis in this herd has always been to start with a live calf so we give major consideration to birth weight and calving ease.

It was interesting to note just glancing at the graphics from the recent genetic summit how important feed efficiency and disposition were. Those two things have been cornerstones of this operation for the last 10 years. We have been halter breaking all these bull calves since I was in high school and it really shows. We will put the disposition of this cowherd up against anything out there. Temple Grandin's latest comments on the far reaching effects on disposition and its impact on the product the consumer eats justifies what we have been doing for decades.

We have always known Hereford cattle were efficient in feed conversion and the results from SAREC prove that these cattle are not only good but great. The Lot 44 bull's negative 5.37 RFI (Relative Feed Intake) demonstrates just how outstanding these cattle are in an all breeds bull test. These cattle are all limit fed. Grass is the only thing you get you all you want to eat here. Our great gains come from grass and that is what we have to sell. We feel these cattle can transition to your environment and get the job done. The conservative way these cattle have been developed will have a direct effect on their improved longevity. We let the genetics do the heavy lifting.

I probably should just say what I said last year but louder; what a great market and opportunity stand in front of us. The effects of ample rainfall are astounding. These cattle look great and I am pleased not to make any excuses for them; other than the fall calves who have just run wild. Videos of all the bulls and photos of the females can be seen on our website, www.wherewomenbuybulls.com prior to sale day. This year's auction will again be carried by DV Auction on the internet, for live bidding and viewing. We are offering several females this year which are the tip of the iceberg to a large number we will sell by private treaty. We welcome the arrival of a great new herd sire CL 1 Domino 314A, who has been nicknamed π (Pi). We will offer a large number of heifer calves with breeding privileges to 314A.

We are thankful for the many blessings this year including rain, health and a new son-in-law, Travis Koch who married Stacia this summer and becoming grandparents by Christmas (Jessie and Robin). Janice teaches faithfully, Amy nears the end of vet school, Ben debates for Wyoming and Mom is well. We are in this business because we love it and want to thank you for coming to the sale.

There is free delivery up to 300 miles on a \$4,000 purchase. We will cooperate on all deliveries. A one hundred dollar discount is given for each bull that is picked up within a week of the sale. All bulls are guaranteed breeders and traditional rules of a Hereford auction apply.

Ted as we know him is our new natural service sire and this is his first calf crop to sell. We were looking for the right bull to enhance the large 157K influence from the last four years. For a bull that is quite a chunk and stays in good flesh he has low BW numbers and over 100 progeny to back it up. His dam had six natural and over 20 ET calves. We are using him to thicken progeny without increasing our mature cow size. We expect to be able to hold our milk numbers. He had 111 ribeye and marbling ratios in his contemporary group. He stands wide and the boys look like boys and the girls look like girls. Sixteen sons sell.

Grant was selected for his structure and phenotype. He had an easy disposition and held his birth weight in line for such a strong yearling weight. I have always AI'd heifers to him and after 90 calves he is still under breed average. His carcass numbers are balanced with a strong marbling of 0.37. His dam is truly a great cow with a perfect udder and tons of milk. She was shown 4 different years in Canada and each year she was a champion including Agribition Champion Female. The females by this bull have that look and extra muscling. Lot 44 set a high mark at SAREC this year with a negative 5.37 RFI and it speaks well of the efficiency of his progeny. His last crop was born this year and 11 sons sell.

Uniformity of Line 1 cattle is huge in terms of the results of your breeding program and it helps to have a set to sell, not a group of individuals. Straight Line 1, he is extremely consistent and the bulls really look like Dad. He is very red and sires deep sided cattle with real muscle and a set of pants. He sires bone and is a puppy to handle. 52X is a ¾ brother to Tank and follows him in our program. First four fall bulls sold last year and 7 sons sell this year. Owned with P&R Herefords, OK.

This home raised sire helps celebrate a decade of L18 influence. His dam produced until 14, was flushed once, and has two young daughters in the herd. A full sister, dam of Lot 76 has been flushed to Tank. He is a big rugged bull that produces a great one when we let him with exceptional muscle expression and had an RFI of a negative four which we thought was huge till this year. With the cost of feed the last three years being able to do a lot with a little was paramount. He sires our kind of cattle with lots of bone.

On Target 22S was part of our grand experiment in outcross genetics. He is a trait leader in 13 traits with weaning data on 450 head. He possesses a complete performance package, offering calving ease, exceptional performance and outstanding carcass merit. All calves in this sale are from two year old heifers. He worked extremely well here but is barely a heifer bull in this herd.

Service sire for bred heifers. 314A is a son of a first calf heifer and out of 105Y's first calf crop. He is solid marked and fully pigmented, as are his sire and dam. He had the number one CEZ\$ in Cooper's sale. He is a complete package, combining calving ease, performance, maternal power and carcass merit. He has better marbling scores than his Dad. His numbers and picture speak for themselves. He is smooth through the shoulders with loads of natural thickness and muscle expression. Today, after being exposed to all these heifers he looks like a working bull. We hope he will grow into a "Give up nothing" sire. Disposition...flawless.

Another hallmark feature from Amy's 508 cow. She will turn ten next year and still has a great udder. She produces pigment as consistently as anybody does and has a herd bull prospect in this outstanding Sensation son. He is strong made down the top and has plenty of mass. We like him well enough to keep an interest. He is top 10% in the breed for birth weight.

One of my favorites from birth. He has all the calving ease and extra pigment of Sensation and was crossed with an outstanding L18 daughter, making him a great performance prospect. He was extremely sick and gained only one pound in January but has recovered to be one of the great prospective sires in this offering. Long top, deep sided, great dam, big testicles, he is all I can bring you in a herd bull prospect. We will retain an interest. He is top 5% for milk in the breed and the Dam has already produced sale toppers to Rabou Ranch and Lerwicks.

This is a herd bull prospect. He is the extreme definition of the total package. He was number 2 in rate of gain and number 2 in feed efficiency at SAREC which has him finishing with a composite score of number 1. His dam has a perfect udder and is our most consistently prolific cow. Her first son went to W-4 Ranch in Texas and her last daughter just calved this year, she always has light birth weight calves and it is great to see a high performance bull come out of a cow family like this. Don't miss the fact that there is a lot of length here. How valuable could this type of efficiency be for you?

His dam is the heaviest boned and heaviest muscled cow we own, but what is really extreme about her is her disposition. Cinnabear is one of the quietest cows we own. That disposition is coupled with her two pretty red eyes and one of the heaviest milking Neon cows we have. He has her full pigment and you will like him. Maternal brother was the second high seller to Meyers in Hamilton, CO last year.

His maternal brother last year was a carcass giant selling to Y Cross and this calf has always been thick topped without getting many extras. The fall calves had seen quite a bit of snow by February and were not pampered this summer. They have been on full feed since September and should change a lot by sale day. This cow family can really raise them.

2012 was in the first group exposed naturally to 314A. Should be a tremendous Line 1 nick when bred with 314. Her brother went to Dudleys as a herd sire two years ago and only because her dam is so young are we offering a female out of this cow family. She is a maternal sister to the fall bulls who were so well received last year and we look forward to the 52X females.
