Welcome...

Welcome to our annual sale. We have had a second year with moisture and it is a pleasant surprise. Hay is plentiful and cattle are trading at a profit for the cow calf producer. We were fortunate to have superior pasture for the summer and were quite relieved that we have enough cow hay. We will introduce a new sire that has a bright future ahead of him. He was named Pi in honor of his number and its significance in the math world. He is complete and if you want to travel full circle in the beef industry, circumference or area, you will need Pi. You can't manage what you don't measure, and the improvement by this sire will be measurable. It is already visible but the critical thing is the completeness and sustainability he brings. He will consistently improve all traits. He is ironclad maternally, proven calving ease and out-marbled his sire. My last hired man said I liked Pi more than my son Ben, but it's not true. We didn't even have calves yet.

We have already addressed the calving ease issues in this herd because it all starts with the live calf. It is more than birth weight and the Y Cross calves and their quality have shown that. You have more to work with here besides birth weight and it is all the way through the herd bull battery. We have a cow herd that can get it done in this environment. Our feed efficiency test results are great. These Herefords will do more with their feed than their colored counterparts and we know we make them better. Sensation was a dynamite AI sire and we already have females in production. 314A x 28X is a knockout punch...to be weaned this fall.

An odd feature which teaches us more about the disposition of these cattle is our brief halter breaking program. This has gone on forever here and there are very few bulls that have been missed. Generations of it has made a quiet cowherd and you would have to see it to believe it. Buy a bull, rope him, and when he stops to let you scratch him, you will know why. Due to the large number of AI calves, many of the bulls are not registered but they can be if the buyer so desires. All bulls have passed a semen test. These bulls were not developed with a high concentrate ration. We are lighter than usual and it will be to your advantage. You can get them bought cheaper and they last longer. It doesn't make sense unless you are here for the long haul. We are. The genetics have done the heavy lifting and the Hereford efficiency advantage is huge. These cattle are limit fed. Grass is the only thing you get all you want to eat around here. Our great gains come here on grass and that is what we have to sell. These cattle don't melt. We have kept this balanced trait selection program with you in mind. This group is outstanding in milk and marbling and they are important traits. *As always we strive to make this a logical, legitimate choice for outstanding range bulls.*

What we have here is a great challenge we look forward to going to the next level with this herd. We did buy one polled bull this spring and that part of our program will continue to grow. There are no fall calves this year but we are going to make that a small herd and are starting by adding heifers. We will start ET work again this fall. These bulls were taped and pictured in early September and are on the green side. The bull calves and females were not pictured at catalog time will all have videos on the website, wherecowmenbuybulls.com, in October. I have had easier sets to raise but libido is important. The old picture spot was planted to trees and corral renovation is in process. You will like the improvement by sale day that great range conditions can give us. The sale and bidding will be carried by DV Auction on the internet. We are offering several females this year which is the tip of the iceberg of the large number we will sell private treaty. Thanks to W4 for purchasing bred heifers. We will sell a large selection of heifer calves this fall including first daughters of Pi.

The children flourish and Janice teaches steadfastly. Mom is well and we're glad we have her. We do this because we love it and thanks for coming.

There is free delivery up to 300 miles on a \$4,000 purchase. We will cooperate on all deliveries.

Fifty dollar discount if bull is picked up within a week of the sale.

Cheyenne has several good motels:

We were looking for the right bull to enhance the large 157K influence from the last four years. For a bull that is quite a chunk and stays in good flesh he has low BW numbers and over 100 progeny to back it up. His dam had six natural and over 20 ET calves. We are using him to thicken progeny without increasing our mature cow size. We expect to be able to hold our milk numbers. He had 111 ribeye and marbling ratios in his contemporary group. He stands wide and the boys look like boys and the girls look like girls. His daughters have top notch udders. 12 sons sell.

Janice named him Pi (3.14) and it stuck. This 105Y son is the complete package, combining calving ease, performance, maternal power and carcass merit. His mom is a supercow at Coopers with the ability to consistently raise a great one. We are excited to have a new sire of his caliber here. Y Cross had 43 calves from black heifers this spring with bulls weighing 77 pounds and heifers 73 pounds. They not only calve easy, it's fast. He sires uniformity and they just get better. It will be quality at a new level. We gambled with over 75 calves born in the first 90. Come full circle to total performance. As they say "he had me from hello" demanding to be scratched right off the truck. Owned with Fisher, K7 and Cooper. Thanks Lowell.

Grant was selected for his structure and phenotype. He had an easy disposition and held his birth weight in line for such a strong yearling weight. I have always AI'd heifers to him and after 90 calves he is still under breed average. His carcass numbers are balanced with a strong marbling of 0.42. His dam is truly a great cow with a perfect udder and tons of milk. She was shown 4 different years in Canada and each year she was a champion including Agribition Champion Female. The females by this bull have that look and extra muscling. Last crop with five sons.

Uniformity of Line 1 cattle is huge in terms of the results of your breeding program and it helps to have a set to sell, not a group of individuals. Straight Line 1, he is extremely consistent and the bulls really look like Dad. He is very red and sires deep sided cattle with real muscle and a set of pants. He sires bone and is a puppy to handle. 52X is a ¾ brother to Tank and follows him in our program. Six sons sell and his first daughters did great. Owned with P&R Herefords, OK. Six sons sell.

This home raised sire helps celebrate a decade of L18 influence. His dam produced until 14, was flushed once, and has two young daughters in the herd. A full sister has been flushed to Tank. He is a big rugged bull that produces a great one when we let him. He had an RFI of a negative four which we thought was huge. With the cost of feed being able to do a lot with a little is paramount. He sires our kind of cattle ranchers need. Five sons sell.

Nation's number ONE calving ease bull—they come 5 to 10 days early, have vigor and aggression in their nursing ability. His calves have wide and long loins, thick topped, good muscle shape to the quarter and best of all "eye appeal." They stand on good bone, nice hair coats, wide based with good muscle shape to their top line. His daughters have calved and they may be his biggest asset. Good milk flow, level, small teats and good dispositions and they calve early. Great AI sire here. Pi will make them better and we were excited to see that in this calf crop. 10 sons sell.

This is our first son of the 150 bull from Dvoraks. I have liked this bull since he was a baby and we considered keeping him to use on our heifers. His dam is out of the great 9 cow that has such an impact on this sale. I expect him to be a great sire of calving ease, pigment and he is an outcross sire in this offering. The full brother on the cow might be this good; he was featured in our herd bull ad.

A perfect way to introduce the 314's is a prospect that already has enough natural thickness to maybe out-muscle his dad. 1C stands on above average bone and leg. He has a herd bull head with great pigment. He has been well taken care of but has a great future ahead. Dam was first heifer AI'd and to calve. Fertility is crucial. Pictures say a lot but seeing him is better. Dam traces directly to Homebuilder and grandma, 747, was flushed for export to Aukvale Herefords in England. A big shout out to Tom and John Kemp for trying our genetics and their success.

This calf was good when he was born but began rushing to the front of the pack at grass time. Dam is the only daughter of the 9 cow and a good one. We used her first son on heifers. He is exceptional in his length of body, carries himself well and is going to push the scales down. The Neon cattle were tops on ribeye and expect to see that in this calf. Maternal background is exceptional.

--------------	----------------	---------------	---------------	-----------------	--------------------

43C has herd bull credentials and is made to go with it. Our most complete Pi son to date he is smooth in his makeup and really strong when you get behind him. 34 has two big goggle eyes and he has good pigment and moves freely. Pi sons like him out of mature cows really showed us what we had and complete will be our next overused word, but he is. Grandam, 522, has been a huge asset having top bulls out of five different sires and her Pi son is as thick as any calf born. 34 has a 28X daughter with a Pi son that could be here. He is rock solid.

This heifer has the potential to get competitive in the show ring. She is clean fronted and wide. Her brother, Lot 5, performed exceptionally well and she is on the same track.

— BRED HEIFERS —

The bred heifer pasture now has two miles of fence with black bulls on the other side so they are either AI to 314A or black.

The Sensation daughters stole the show in my two year olds in 2014 and they are even better at three with Pi babies at side. This female is a chance for it to happen to you. Huge spread from birth to yearling and they breed on.

Her milk numbers and carcass EPDs make this heifer attractive before you see her. Tank daughters are worth having and I will let you get this close. She comes from a productive cow family. Grandam was an outstanding L18 daughter.

She is a deep sided 52X daughter that is going to be a mother cow. Long hiped and capacious, she is sweet. I may be in trouble when they find out she is in the sale.
