WHERE
COWMEN
BUY
BULLS

Welcome...

Welcome to our annual sale. It has been really dry this summer but we got rain when it counted and this country grew grass one more time. The market has realigned itself and we are pleased to have cattle still trading at profitable levels for all sectors. As we go to press we are trying to remodel the sale facility.

We are introducing a new gene pool and CL 1 Domino 314A; II "Pi", as we call him, and he delivered. Thanks to Janice for naming him; he was named for his number and its significance in the math world. He is complete and if you want to travel full circle in the beef industry, circumference or area you will need II. 65 calves born last year have both weaning and yearling indexes of 101 as a group. Unquestionably he is a superior calving ease sire. Look at his 104 ribeye and 106 IMF ratio (Intramuscular Fat) at Coopers to show you he is a total performance sire. He already has 151 progeny in 3 real cowherds and scan data on 31 head of his calves this spring for IMF which indexed 103. These cattle are moderate and it's the real deal. Calving ease is part of the package and he performs on every level. We are going to reap some great benefits from the unspoken trait, uniformity. On disposition he had me from hello and he transmits that trait. Life is full of surprises and he was a pleasant one and his progeny tell it well. We bought his brother this spring and he might be better.

Our emphasis is a live calf and calving ease because of great shape not low birth weight. We take care of this herd but rarely watch things being born. We don't have time to start or baby things along. They must be self-starters. "The perfect udder" is an overused phrase and we think you will find we have addressed that issue here. Across the breed huge strides have been made and we offer you our best product ever. We are still that odd outfit that halter-breaks and with generations of that tradition it makes a quiet cow herd. You would have to see it to believe it.

We are really excited about this year's UW SAREC results (thanks Steve Paisley). It was a small test but you can't manage what you don't measure and our data was great! If nothing else we know our cattle perform well on feed. The Hereford advantage is doing more with less, like buying the car that gets great mileage without sacrificing horse power. We sent 20 bulls to this test and all sire groups performed well. We will offer 16 bulls from the test in the sale; at yearling they were indexed separately from the rest of the group. Herefords will do more with their feed than their colored counterparts and we know we make them better.

There are 2 types of efficiency. 1- High intake, very high performing bulls that have high daily feed intakes with phenomenal performance 2- Low intake with moderate to high performance— these bulls typically rank towards the bottom of the group on daily intake, but have moderate to high performance on very little feed. If your goal is to produce replacement females for the herd that are going to spend their lives on shortgrass prairie range like we do; we would prefer to have a group of cows with moderate to low intakes, and above average performance. There are two types of efficiency, and it matters! We will be sharing data from our bulls with you from the catalog.

All bulls have passed a semen test. Our bulls are not developed on a high concentrate ration. Per usual these bulls are not as big as they could be but they are going to last longer. It makes sense if you are in it for the long haul, and we are. As in the past we let the genetics do the heavy lifting and the cattle will perform well for you in your environment. Cattle are limit fed and know how to hustle on grass. These cattle don't melt and we hope you can find something to fit your program.

The children flourish and Janice teaches steadfastly. Mom is well and we're glad to have her. We do this because we love it and thanks for coming. We would enjoy seeing you sale day and appreciate all that travel to the ranch. Chyenne has many good hotels for accommodations and if you need assistance in finding one let us know.

Sale and bidding will be carried by DV Auction on the internet. Thanks to W-4 for purchasing a large group of bred heifers. Females are always available private treaty. There is free delivery up to 300 miles on a \$4,000 purchase. We will cooperate on all deliveries. Fifty dollar discount if your bull is picked up within a week of the sale.

Not responsible for accidents.

Catalog layout & production by Hereford America.

We were looking for the right bull to enhance the large 157K influence from the last four years. For a bull that is quite a chunk and stays in good flesh he has low BW numbers and over 142 progeny to back it up. His dam had six natural and over 20 ET calves. We are using him to thicken progeny without increasing our mature cow size. We expect to be able to hold our milk numbers. He had 111 ribeye and marbling ratios in his contemporary group. He stands wide and the boys look like boys and the girls look like girls. His daughters have top notch udders. Five sons sell.

Janice named him Pi (3.14) and it stuck. This 105Y son is the complete package, combining calving ease, performance, maternal power and carcass merit. His mom was a supercow at Coopers with the ability to consistently raise a great one. We are excited to have a new sire of his caliber here. Y Cross had 43 calves from black heifers last spring with bulls weighing 77 pounds and heifers 73 pounds. They not only calve easy, it's fast. He sires uniformity and they just get better. Pi will sire quality at a new level. We gambled with over 75 calves born in the first 90. Come full circle to total performance. As they say "he had me from hello" demanding to be scratched right off the truck. Owned with Fisher, K7 and Cooper. Thanks Lowell. Selling 28 sons.

This outstanding 862U son has great muscle definition, loads of natural thickness, length of body and spring of rib. 072X is a red necked bull with breed leading numbers. Top bull in Cooper's sale for combining REA/MARB EPDs. He scanned a 14.07 in REA with a MARB ratio of 119. Dam is a top end 3162N daughter with a MM EPD of 31. Maternal half-brother to CL 1 DOMINO 955W that was the high selling bull in the Cooper Production sale in 2010. We were excited to be able to purchase a maternal brother to 955W, the top selling Hereford bull in Denver 2011. Selling two sons.

Home raised sire out of the highly predictable 524 cow. Her calves average WI 105 and YI 102. Both she and her daughter, 912 (dam of Lot 82), produce herd bulls no matter what we breed them to. Brothers working at Carl Shaffer's and Brock Beaver's. 27 calves WI 101 and YI 100. Not bad for the homeboy. He is a growth sire. Nine sons sell.

Uniformity of Line 1 cattle is huge in terms of the results of your breeding program and it helps to have a set to sell, not a group of individuals. Straight Line 1, he is extremely consistent and the bulls really look like Dad. He is very red and sires deep sided cattle with real muscle and a set of pants. He sires bone and is a puppy to handle. 52X is a 3/4 brother to Tank and follows him in our program. Six sons sell and his first daughters did great. Owned with P&R Herefords, OK. Eight sons sell.

Nation's number ONE calving ease bull—they come 5 to 10 days early with high vigor. His calves have wide and long loins, thick tops, good muscle shape to the quarter and best of all “eye appeal.” They stand on good bone, nice hair coats, wide based with good muscle shape to their top line. His daughters have calved and they may be his biggest asset. Good milk flow, level, small teats and good dispositions and they calve early. Great AI sire here. Pi will make them better and we were excited to see that in this calf crop. Three sons sell.

Nicknamed the Sheriff after our favorite Bronco, this bull is top notch. As a calf he always caught my eye and he is bred to be a low birth weight power house. Weaning index 118 and yearling index 103, he has a tremendous outcross pedigree for most of the cattle in this offering and certainly looks the part of a herd bull. Great pigment, structure and performance.
