# BERRY BULLS ARE BETTER BULLS

The cows make the difference

## The Berry's

Monday, October 16, 2017 at the Ranch Cheyenne, Wyoming

Selling 68 Bulls

www.WhereCowmenBuyBulls.com

# This bull produces better mamas, not headaches

There's no mama like a Hereford-sired mama. Net income of \$51 more per cow per year and a 7% advantage in conception rate, compared to straight Angus females.\* All this from a bull that is known for its fertility and easy-going nature. Hereford bulls — better mamas and no headaches.

Hereford — gentle bulls making black better.

\* Bata from the Circle A Ranch Heterosis Project

## Welcome...

Welcome to our 2017 sale! We have been blessed with an average year for moisture, delivered in May and early June. Cattle have done very well and the market is letting us operate at profitable levels. The more people that own and feed Hereford influenced cattle, the stronger our reputation becomes as their efficiency and quality stand out. Selling hybrid vigor has become a valuable commodity.

We have improved our corral and watering system as well as revamped our feeding system and ration. We went retro and fed like we were in the 70's. We served a triticale (wheat x rye) silage, cold rolled oats and eventually added whole corn in April. We balanced the ration with a Purina protein pellet and ground hay. We fed a TMR (total mixed ration) coarsely ground in a vertical mixer twice a day. That was fed into the new bunkline feeder. The bulls did not get split off from the heifers and onto feed until late December. We are offering you a leaner, lighter product that is going to go farther and breed more cows. They were developed on grass and a bull developer pellet this summer. These cattle are limit fed and we let the genetics do the heavy lifting.

The bulls have walked miles. They are halter broke. Disposition in the cattle is exceptional. Dams of the sale bulls are not pampered and they work for us. An udder that does not work is a ticket out of here. Berry bulls are better bulls and the cows make the difference. Cows are expected to calve unassisted and calves start themselves. We think before you read any EPDs those are quite valuable traits. It is not stated in most footnotes but these cattle are significantly below breed average in birth weight and above in calving ease. Please take time and come early as 75 pairs are close sale day.

We are delighted to present such a uniform, outstanding set of bulls. We continue with what is now a highly proven sire in "Pi" (CL 1 Domino 314A) as we call him. He continues to impress as his first daughters become role model females. We have branded our third set of calves and we like the results. We offer for the first time a full set of half-brothers by a polled sire (11X) who offers more growth than we have been showing you and there are several herd bull prospects. Several calves by Al sires offer an out cross for our regular customers.

All bulls are semen tested and we will provide health papers to go anywhere. Free delivery on a \$4,000 purchase within three hundred miles of the ranch. We cooperate on deliveries. Fifty dollars off if bulls are picked up within a week. Sale is carried with DV Auction and will be available for your convenience online on sale day.

Janice retired after 27 years of teaching. It is a beautiful thing to have my partner back after many years of expanding young minds. All our kids living close enough to help is huge. The herd has increased, the grandkid count is now three. Ben moved to Ft. Collins to teach. Mom celebrated her 89th birthday and is in town doing well. We are grateful for all the work we get from Dusty and Sam Buffington.

Thanks for choosing to do business with us. We love what we do and are happy to send these bulls to do good work at your operation.

Janice named him Pi and it stuck. He deserves it. One calf looks like another and he is a well-rounded, complete sire. Fertile, gentle, easy moving, easy calving, extra rib, and the list, like Pi, does not stop. First daughters were predictably outstanding this spring both with quality of calves and a lot of milk. Y Cross at Horsecreek had 43 calves from black heifers, bulls avg. 77 lbs. and heifers 73 lbs. Start with more and end with more, we feel he makes Sensation better. Trait leader in five categories most notably for calving ease and birth weight, and then they grow. Owned with Cooper, Fisher and K7. 23 sons sell.

FPDs:

BW +1.8

Uniformity of Line 1 cattle is huge in terms of the results of your breeding program and it helps to have a set to sell, not a group of individuals. Straight Line 1, he is extremely consistent and the bulls really look like Dad. He is very red and sires deep sided cattle with real muscle and a set of pants. He sires bone and is a puppy to handle. 52X is a ¾ brother to Tank and follows him in our program. His BW EPD dropped under two but he remains a top carcass sire and daughters are udder improvers. Five sons sell. Now owned by Amos and Jessie Viter.

#### — REFERENCE SIRES —

Adding a polled sire like this was a big step for us and he is a welcome addition. He is a large framed bull with acceptable birth weights. Bulls have exceptional bone and like dad they will really be able to travel. Heifers are attractive with extra pigment. As a sire group they are outstanding and speak for themselves and will sire the pounds. Note a below breed average birth weight and a large yearling weight. Several herd bull prospects in the 11 sons to sell.

It is really easy to fall in love with these Pi and Sensation crosses when they have the extra pigment and style that this calf has. It sounds like a broken record but the exceptional calving ease and ability to sire great replacement females will follow this mating. His dam goes back to our highest performance female, 717.

Real deal is one of my favorite expressions for when you find one that has it all. How exciting that one of the top bulls to Rabou's in a past sale could sire a bull like this. There won't be any more red meat walk into the ring on sale day and the expression of muscle in every dimension is there when he walks. He got big fast and that's what counts. Dam is a moderate framed cow with extremely small teats and probably raises the highest percentage of her body weight of any dam in this sale. He and his dam are both moderate framed but explosive in their performance. He is a herd bull. Extra pigment is your bonus. Retaining an interest.

Dam, 640, is the prototype extra chunky, all red cow with two big red eyes and a silky udder. She breeds meat like she was at Arby's. He is made like her out of the great low birth weight sire Zam 15Z. He is as wild as anything I have ever raised and will be available private treaty. We would like to try him some ourselves as we aren't sure how the disposition thing got in. Light condition, awesome calf, and he was very small at birth.

121 has his age and the life of a fall calf here against him. We really coasted the fall calves all summer out on grass like the range bulls and he will be green as they come. Dam is a capacious female with correct udder and lots of milk. Grandam, 912, had nine calves and we used her first son. 45X had top bulls to Shaffer and Y Cross. Expect big weaning and yearling numbers.
