BUY
BULLS**

Welcome...

Welcome to our Raw Data sale. A tremendous effort has been put forth to document the performance and validity of this group of bulls as worthy sires. Starting with real world cattle with accurate, actual birth weights all the way through gain test and ultrasound we offer you more than ever before. We have moved our date to be "buyer friendly" and more accessible with hunting and harvest winding down. Although we calve later now the extra three months let the bulls show their true potential. These bulls were raised out on grass and stayed there until Thanksgiving. We encourage you to come see them for yourselves.

They say cheese and wine get better with age. We believe the same is true with Hereford bulls. We have intentionally aged them with you in mind. We developed them slowly on a high roughage diet to keep them sound and encourage longevity for you. In February they were all sent to SAREC in Lingle, WY to the bull test. That is why we will call this the Raw Data sale. Every bull will be accompanied by average daily gain (ADG), feed:gain (F:G), residual feed intake (RFI) and carcass data (REA & IMF). You can't manage what you don't measure; and we have measured them all! We were very pleased with how the bulls performed and intend to use this information to continue to improve the genetics we are offering you. Allnutts in Walden have been using retained ownership and the offspring of these cattle feed exceptionally well. We are confident that these bulls will sire extremely efficient replacements that will perform in any environment, and the kind of calves that are in high demand with feeders and packers.

We believe in many things. The first is that a live calf is the only place for a cow to start. A significant trend in our last five years is calving ease. Not necessarily lower birth weights but cattle that are shaped right. We believe in hybrid vigor, it is one of the easiest and most proven benefits of using Hereford bulls. The baldy remains one of the best momma cows and we are pleased to provide half of that magic. We believe in genuine bulls - ones that are raised on their dams and raised in environments similar to yours. We aim to raise low maintenance cattle. We believe in cattle that can go to elevation. Last fall we sent five bulls to Brad Carnahan in Big Piney, WY (7,468 foot elevation). After spending the summer in the mountains as two-year old bulls they PAP tested 39, three 35's and one tested 34. He was checked three times by Dr. Tim Holt to make sure it was real! We know pounds and performance matter. We strive for a functional and visually appealing herd that will serve you well.

We stand behind these bulls and guarantee them to be sound and breeders. All bulls will be semen tested with health papers to go anywhere. Free delivery on \$4,000 purchase for 300 miles. We cooperate on deliveries and 50 dollars off on bulls picked up in a week. Internet bidding is carried by The Livestock Link.

Moving this sale was monumental. Logistics of it have overrun me and we hope to get dug out and have Long Haul calves on display sale day as well as our private treaty bred heifers. We calved almost all our 2016 and 2017 heifers and have several young cows for sale.

It was a big year for us. The rains were timed right and it made for a great grass year. Janice and I are blessed to have our family close and they are a tremendous asset in all we do. They have made us proud. Mom is well at 91 and tries to pray us through what she can't help us with.

Janice and I are still enjoying the privilege of providing these bulls for you. We are extremely grateful for your support of this program and continue to try to improve it for you. Thank you for your consideration.

We call him "Golden Ratio." The Golden Ratio is a mathematical ratio commonly found in nature. When used in design it fosters organic and natural looking compositions that are aesthetically pleasing to the eye. His offspring are extremely stylish, well-proportioned cattle that show up at the scales. In the 2018 calf crop he had 16 heifers and 16 bulls both indexing 101 at weaning and yearling. This is the third crop from this outstanding sire and easily his best. 13 sons sell.

Top notch, straight Line One herd sire. He is a paternal brother to 589C both out of 177R. 616 has many of the same great features of 589C but can be used on 314A daughters. Disposition is excellent and his progeny are heavy boned top performing individuals. 11 sons sell. Along with the 589C sons there are 24 grandsons of the great 177R bull. 177R is in the top 1% and 5% for udder suspension and teat size. He is also in the top 10% of the breed for WW EPD. We find his granddaughters extremely attractive, his sons to have a ton of top shape, and across the board you will find them extremely uniform. He now works for Allnutts in Walden and Wade can testify to the disposition claim.

This Line One prospect was a great find at L Bar W and was the standout bull in their first sale. His dam, 958W, has a great production record with BW ratio 102 and WW ratio 103 on 8 head. She is a daughter of the 440P Cooper cow that is the standard for great Line One females. Additionally, on the top side, he goes back to the 055X cow that might be as good of a cow that has ever walked at Cooper Hereford Ranch. He has extra length of body and really stretches his calves out. New genetics here with 5 sons selling.

Home raised sire we are proud of. We calved the first daughters of this young sire and the udders are impressive. He is clearly a calving ease sire that will give you performance as well as outstanding replacement females. His mother goes back to a Dam of Distinction, our great Sandyann 2000M cow, so great females were no surprise. He was used as a clean-up bull on our heifers for two years. 3 sons sell. Now owned by Skip Campbell.

We share this great young sire with Morell Ranches in California which means he sees Interstate 80 from here to the coast twice a year. We have nicknamed him "I-80." He is superior in his muscle pattern and you will find all his sons to have an exceptional pair of pants and deep bodies. Although he is rugged he has worked well on heifers the past two years. Sire, 10Y, has 6,076 recorded progeny and his dam was a prolific donor for Hoffmans with 127 calves. He is a balanced sire and his bulls and heifers are both outstanding. His first 29 calves indexed over 100 at both weaning and yearling. 17 sons sell.

I was so impressed with these calves I am certain we will need to use more semen. The calving ease and extra performance accented with great pigment makes these two sons selling real attractions. His dam has a near perfect udder with great suspension and small teats. Lander saw her when she was 8 and remarked how great her udder looked - as good if not better than any first calf heifer. Built Tuff is in the top 1% for Udder Suspension and has the top value for Teat Size EPDs in the breed- expect great udders.

The proof is in the pudding. When Lander saw these calves in the spring of 2017 it was clear he needed to include him in our polled genetic arsenal. His offspring are square hipped, big topped, and have lots of body and pigment. He ranks in the top 20% of the breed for 15 traits. He combines the genetics of the Horned and Polled Champion Bulls from the 2013 NWSS. He has the look. 2 sons sell.

Can I get an upgrade? Everything you liked about the old bull "11X" is still true - length, performance, power, bone and breed character. This new model is upgraded with even more calving ease, lower birth weight and increased carcass merit. We believe these Anchor bulls give you that horned look but with a polled option.

Not responsible for accidents.

Catalog layout & production by Hereford America.

Videos provided by The Livestock Link.

— SALE BULLS —

The Berry Hereford's 2019 set of 84 bulls performed exceptionally throughout their feed efficiency and RFI testing at SAREC. The group of bulls averaged 4.0 lb/day on a medium energy ration that was 55% roughage. That level of performance is impressive when you realize the energy level of the diet. Our test at SAREC has always emphasized a medium-energy, majority roughage diet. The intent of the study, and the diet energy level, is to provide a more rigorous feed efficiency test. By reducing the grain level and providing a moderate energy diet, it allows more opportunity for the bulls to separate themselves during the 85 day test. A high energy diet is intended to maximize performance. A moderate energy program is intended to create a more rigorous feed efficiency test – to allow those animals that are truly more efficient to better separate themselves and rise to the top.

Testing the efficiency of the entire group of bulls, and collecting performance, intake, efficiency, RFI and carcass data on the entire set, provides the most complete and thorough set of data not only for the Berry family, but for potential buyers. The important thing to keep in mind is that the entire group **AVERAGED 4.0 lb/day**. An exceptional average response. The group remained healthy throughout the test, and the carcass ultrasound also confirmed that it was a very uniform set of high performing bulls.

Wowzer. We were so impressed with this individual that we collected semen and have a large group of cows bred to him. He was big enough coming off test that we knew out in the field is where he should be. He stands on as much timber as any prospect we have raised and is backed by one of our most consistent dams, the great Cinnabear cow. Beyond all that power he has an incredible disposition just like his mother and brothers. Three sons to Allnutts, one to Brock Beavers and Gilmar Ranch. His performance matches his pedigree and he has everything to offer the breed. We will keep a part of this great young sire but feel he is worthy of your consideration. 70 lb. BW, 676 lb. WW, 1244 lb. YW, 133 REA ratio, actual 17.51 REA, top 5% REA, top 1% Carcass weight and \$CHB in breed.

Long Haul might be as complete a genetic package as there is. Genetically he is in the top 5% or better in the breed in 11 EPD traits and all 3 \$Profit Indexes. He is backed by some of the most proven Herefords in the breed. Phenotypically, he is extremely long and deep bodied, massive topped, stands on plenty of bone and has exceptional eye set. He combines low birth weight, performance, carcass merit, and maternal strength all in one package. He is a natural herd bull. His first calves are on the ground and they are everything and more than what we expected. We can't wait to show them to you. We are partnered with Churchill Cattle Company and Lerwick Brothers. Semen available.
