WELCOME TO THE SALE!

Welcome to Bieber Fever III.

Every year as we develop the offering, it is tough to decide how many and what to sell. Market fundamentals tell us that the national cow herd is the smallest it has been in 50 years, so we felt it was time to launch an offering of superior commercial females. For the first time ever, we are offering 480 commercial females. These females are backed by our reputation and the reputation of the consignors. We purchased a group of heifers last winter and calved them this spring to be able to offer a large group of coming three-year-old Red Angus cows. We have also coordinated with several good bull customers to offer some bred heifers in this sale.

We are also offering a group of registered bred heifers and bred cows. These bred heifers are a select group bred to our leading herd sires. As we do every sale, we offer a complete dispersal of an age group of registered cows. Some of these cows are the core cows that we purchased in the Basin acquisition. We have flushed several cows in this offering. For anyone interested in adding some top cows to their herd, here's a great opportunity.

Don't forget about two-year-old Red Angus bulls. This group has done as well on grass as any we have had in past years. The bulls are very impressive with several great herd bull prospects in the offering. Video of all the offering will be available through our website by November 15th.

The time to invest in the fastest growing breed in the USA is now. Our program has proven that we can offer any buyer plenty of opportunity to move a program forward.

As many of you know, we run video rather than bring the cattle through a sale ring. It has worked very well; therefore, video of each lot will be shown as that lot sells. The cattle will be displayed as usual, and we will be available to visit with you about any animal in the offering. We believe that this technique is both easier on the cattle and the help, and keeps the sale running smoothly.

We would like to thank you in advance for your interest in our breeding program. We are always humbled by your interest and support.

Craig and Peggy Bieber

Northern Kross Lodge Bed and Breakfast (Eureka)

605-577-6250 Located 14 miles from the Ranch, in the country. We recommend the Ramkota. It is located on the NW side of Aberdeen on Highway 281. You can take Highway 281 north approximately 19 miles to Highway 10. Then take Highway 10 west approximately 30 miles to the Ranch.

DELIVERY POLICY:

Free delivery on all bull purchases over \$3000, to central points up to 300 miles. Volume purchases of 5 or more bulls selling to one ranch delivered up to 500 miles. All bulls under \$3000 and females will be delivered at cost. Central points for delivery will include auction barns, vet clinics and ranches that offer to serve as a delivery point. We simply ask for your cooperation in arranging the delivery of your cattle. This will keep the cattle from being on the truck longer than necessary and help to get the bulls to you with the least possible stress and in the best possible condition.

HEALTH:

Ashley Vet Clinic, 701-288-3234, will be available on sale day. All cattle are on a complete vaccination program supervised by Ashley Vet Clinic. Bieber Red Angus participates in the South Dakota Animal Industry Board's Johnne's testing program and every cow in the herd past her second lactation has tested negative for Johnne's. In the past bulls have been tested for persistent BVD carriers and all tests were negative for a number of years. We have chosen not to test the bulls this year since no positives have been found in over 10 years. Bieber Red Angus participates in the Beef Quality Assurance (BQA) program. Heifer calves have been Bangs vaccinated.

GENETIC DEFECTS:

Every animal in the Bieber Red Angus production sale is guaranteed negative for the recessive gene associated with Osteopetrosis and Arthrogyriposis Multiplex (Curly Calf Syndrome) and Neuropathic Hydrocephalus (NH). With this guarantee, we provide our customers the opportunity to purchase their choice of cattle with very little risk. DNA samples have been collected on every animal in the sale with any known carrier in the first three generations and tested negative unless otherwise noted.

RETAINED INTEREST:

We are retaining 1/2 interest in all bulls in the sale. We are selling the remaining 1/2 interest, full possession, and full salvage value on these bulls. This option gives Bieber Red Angus Ranch the option to collect, use and market semen from the bull and does not restrict the purchaser from doing the same. This collection, unless agreed otherwise, would be done at the expense of Bieber Red Angus Ranch, at the buyer's convenience. Also at the time of purchase, the highest bidder on a retained interest bull may elect to purchase exclusive semen rights for 100% of the purchase price in addition to the purchased price on retained bulls. If a buyer elects to purchase exclusive semen rights, Bieber Red Angus Ranch interest then becomes in herd use only, but Bieber Red Angus Ranch retains all rights to use the bull within their herd.

BIRTH WEIGHTS/CALVING EASE:

All bulls are scored for calving ease with our three star (*) scoring system. Three stars (***) indicates that a particular bull can be used on heifers under standard conditions with little or no calving difficulty. Two stars (**) indicates that a particular bull should be used on growthy heifers or cows under stan-

dard conditions with little or no difficulty. One star (*) indicates that a particular bull be used on cows. These bulls will produce little difficulty when used on cows. Birth weights are highly affected by environmental factors. Research indicated that the inclusion of corn in cow diets will increase BW. Also contributing to higher BW were cold temperatures in the winter of 2002/2003. The University of Nebraska conducted a three-year study to research and evaluate effects of high and low temperatures during winter months on calves out of 384 two-year-old heifers. Average BW increased by 11 lbs. when temperatures were colder. The results agree with other studies that show calves born in the southern U.S. compared with calves born in the northern U.S. Weather plays an important role in BW and calving difficulty. We have adjusted the calving ease scores accordingly, taking into consideration what the calf ratioed on BW, pedigree and BW EPD.

FEEDING:

Feeding arrangements are available on all coming two-year-old bulls will be fed at a charge of \$3.00 per day. We will feed your purchases from sale day until you are ready to pick them up, or we will deliver them in the Spring with our spring bull deliveries. If you bulls stay here until spring and you give us ample notice we will have your purchases semen tested before we deliver your two-year-old bulls.

BREEDING SOUNDNESS EVALUATION:

Semen evaluations will be performed in November before the sale. We fully guarantee that these bulls will pass the Breeding Soundness Evaluation before the breeding season in 2012 if the bulls are managed properly. We ask for your understanding if a bull does not pass. Sometimes bulls that have passed do not pass later for various reason. Our ability to replace a two-year-old bull that has failed a semen evaluation is limited, but we will do our best to make sure you are satisfied. If you have any questions regarding Breeding Soundness Evaluation, feel free to call Craig or Dr. Dean Christensen at the Ashley Vet Clinic.

WEIGHTS:

Birth weights, weaning weights, yearling weights, and all other measurements are taken at appropriate times to produce sound and accurate comparisons within contemporary groups. We contemporary group our Red Angus calves based on the age of our cows. Calves out of two-year-old dams, three-year-old dams, and the main cowherd are all separate management groups and therefore are separate contemporary groups.

WEANING WEIGHTS:

All naturally born calves born at Bieber Red Angus Ranch are raised without creep. We feel that this helps us select and breed for dams that have milking ability and sound udders. ET calves are on creep feed to express their full genetic potential.

INSURANCE:

Livestock insurance will be available on sale day.

SALE INFORMATION

AIR TRANSPORTATION:

Aberdeen is serviced by Delta Airlines. Huron and Pierre are serviced by Great Lakes Airlines which is affiliated with United and Frontier airlines.

INTERNET & ABSENTEE BIDDING:

We would prefer for each of you to be in attendance on sale day. Realistically, we know that there will be some scheduling conflicts and distance limitations. In these cases we have arranged for you to be able to participate in the sale on an absentee basis with a conference call dedicated to bidding. We will have available one phone line which can accommodate 20 to 30 bidders. Please call prior to the sale and register as a prospective buyer. We have limited capabilities to bid by phone during the sale. Your best option is to be in attendance at the sale, but if you cannot attend or feel more comfortable bidding yourself, we need to warn you of complications in the past with phone service, such as the volume and the rapid pace at which our sale moves. If we handle the bids for you, they will be done in the strictest of confidence. However, if you want to attempt bidding by phone, please make arrangements prior to sale day by calling Craig or Peggy. For internet bidding information, see DVAuction below. If you are unable to attend and you feel comfortable doing so, you can leave those bids with the Bieber family, auctioneer, or publication representatives. We handle many sight unseen bids and have very satisfied customers who feel confident in using that service. We prefer to have plenty of time to discuss your needs over the phone prior to sale day so that we may select the cattle that best fit your specs. We buy those animals just like you were sitting ringside with us. We also guarantee the cattle so that if they don't meet your ideals, you just return them to us. If possible, come by and evaluate the offering prior to sale day. We will post video of each lot on our website prior to the sale but may run into time limitations.

COLOR:

All animals are red unless otherwise indicated in the footnotes.

FOLLOWING SALE:

Everyone is invited to Dinner at Ron & Lois's after the sale. We will be serving Meyer Natural Angus Strip Loin cooked by our friend and partner Stu Campbell.

BREEDING DATA ON BRED FEMALES:

Breeding data on bred Females is verified by ultrasound. The sex of the pregnancy verified by ultrasound. These are called to the best of the vets ability depending on the embryo age.

UPDATED INFORMATION:

Scrotals and weights on all the bulls the week before the sale on our website or upon request. All other data not provided will be available upon request.

GAIN TESTING:

The summer born bulls were weaned October 17, 2011 and yearling weights were taken on May 15, 2012. All of the summer born bulls offered in the sale were placed on feed September 15, 2012

INFORMATION:

Supplement sheets will be available 11/20/2012 on the website or by request

SALE ORDER:

The sale order will be catalog order.

DVAuction
Broadcasting Real-Time Auctions

We are pleased to offer the Bieber Red Angus Sale broadcast "live" over the internet through DVAuction Services. To bid from your computer at home during the sale, complete this simple two step process.

- Visit the DVAuction web site at www.dvauction.com or call 402/474-5557. Register by entering a User Name and Password. Then enter your personal information on the next screen.
- Click on "Apply for Bidding." Select the Bieber Red Angus Sale from the list of sales and click "Apply." Complete the process by filling out the Banking and Lending information requested. DVAuction will contact you to let you know that you have been approved to bid and buy at the sale "live" from your computer at home. We will also provide you with a buyer number for the sale. After the sale Bieber Red Angus will contact you to make arrangements for payment and delivery of your on-line purchases.

Please Note: You must have high speed internet access (DSL, T-1, or Broadband) to be able to bid during the sale. Any questions, please contact DVAuction at (402)-474-5557 or e-mail support@dvauction.com. We recommend that you register by November 29th, 2012 for on-line bidding. Every attempt will be made to complete your application even if it is on sale day.

**Everyone is invited to dinner at Ron & Lois' after the sale.
We will be serving Meyer Natural Angus Strip Loin cooked
by our friend and partner Stu Campbell.**

% Rank	63%	99%	8%	12%	15%	3%	27%	39%	25%	31%	3%	8%	92%

Calf due 2/28/2013 sire by LSF Takeover 9943W

This leadoff heifer is an outstanding chance to invest in breed leading genetics and hit the ground running. Her cowline is the same Mimi line that produced Bieber Make Mimi 7249. This cowline is always represented at the front end of our sale, and this bred heifer will not disappoint. Her data makes the choice pretty easy, being in the upper end of the breed for growth, maternal and carcass. She sells bred to Takeover, and we think this is a cutting edge mating.

3 BIEBER ENCHANTRESS 360Y

% Rank	13%	29%	6%	3%	8%	1%	98%	94%	25%	5%	2%	4%	86%

Calf due 02/16/2013 sired by Bieber Hard Drive Y120

385Y has a prepotent pedigree with High Noon, a breed leader for growth and carcass; EXT 5233, a superior maternal sire; and tucked in down there as the maternal sire, Trendsetter 6074, a maternal efficiency leader. She is bred to Hard Drive Y120, who sold to Select Sires this past spring. The results of this mating will put any program at the front of the breed very quickly. You will be hard-pressed to find a heifer with more growth and carcass as good as this bred heifer.

4 BIEBER ENCHANTRESS 294Y

Born: 6/19/2011 Reg: 1441601 100% Red Angus 1A

Bull Calf due 01/30/2013 sired by Bieber Real McCoy Y124

This Roosevelt daughter is bred to Bieber Real McCoy Y124, our second-high selling bull this past spring. We saw him this past summer just after he was pulled from heifers, and he looked impressive after stacking up some very high conception rates on the heifers he was exposed to.

----- A Quote For Consideration -----

The Chinese use two brush strokes to write the word crisis.
 One brush stroke stands for danger; the other for opportunity. In
 a crisis, be aware of the danger but recognize the opportunity.
 —Richard M. Nixon (1913-1994)

RED ANGUS BRED HEIFERS

Lots 32 through 59 come from the Teichert Brothers in Cokeville, WY. The Teicherts, who run both registered Red and Black Angus, sold all their replacement heifers in 2012. The black heifers were exported to Russia. The red heifers ended up with us and have turned into a pretty good group of heifers. We bred them AI to Bieber Outrider W388 and cleaned up with Takeover 9943W. The Teicherts pride themselves on culling hard and tolerate no problems. You can expect these heifers to have good udders and be good-footed. They have been using top-notch AI sires, and we think you will be impressed with these bred heifers.

Calf due 03/30/2013 sired by RHRA Gold Rush 402 17T
 This cow has long been a favorite of mine because of her moderation and style. Her record from BW to WW makes her a curve bender. We selected this cow to flush this past year because of her ability to bring in a big calf every fall. Her ME EPD makes her an outlier for the Red Angus breed.

Bull Calf due 03/23/2013 sired by RHRA Gold Rush 402 17T
 One cowline dominated the top cows in our acquisition of the Basin herd, and that was the Primrose line. This cow's ME number is not right in our opinion because we took her out of production for a year each time to flush her. Originally, the reason we took her out was because she was one of the more moderate cows in the herd. We really like the daughters that we have and expect that they will make sure that Primrose 4167 leaves a mark on the herd.

 Flushing this cow was a no-brainer since she posts a 110 MPPA, but we never got it done. We decided to sell every bred cow born before 2004, so she gets included. Connie has a daughter that we still have and will likely end up in the program. This cow needs to be a donor.

 There are only three other cows in the Red Angus breed that match her or are better on WW, YW, Marbling, and REA. Nine sons have sold for an average of \$7,027 to a very distinguished group of customers. The last son sold to Semex in our 2012 March Production Sale and is now being marketed in their worldwide roundup. This cowline has been a mainstay at Bieber Red Angus, and the daughters we have produced will replace this outstanding donor.

Heifer Calf due 03/08/2013 sired by Paringa Iron Ore E27
 Laura is another cow we talk about and should have flushed, but the opportunity never came up. Her Packer son sold last spring to Harrison Ranch and was one of the top Packer sons in the sale. This Cherokee Canyon daughter has the phenotype to surely be considered. Just because we didn't get enough of her life to flush her doesn't mean you shouldn't. A full sisters sells as 81.

THANK YOU for your support!

COMMERCIAL FEMALES

This year Bieber Red Angus Ranch is offering several groups of commercial bred heifers and cows from our ranch and bull customers. The details of each group are below. They will be sorted into uniform calving groups and sold in groups of 10. All these females have been on a good vaccination and nutrition program. Video will be available thru our website 10 days prior to the sale.

Lot 175 A, B, C, D, E; Lot 176 A, B, C, D, E
Lot 177 A, B, C, D, E; Lot 178 A, B, C, D, E
Lot 179 A, B, C, D, E

200 Red Angus Cows coming 3 year old cows; These cows are ultrasounded to calve from March 15 to May 15th and are bred to Bieber herdsires and a group of moderate calving high growth bulls. These young cows are mostly solid red with a few RWF. These cows originated from the Rapid Creek Ranch and were calved at Bieber Red Angus.

Lot 180 A, B, C, D, E

40 to 50 head of Red Angus heifers from Rick and Shelly Ammann, Wilmot, SD; The Ammanns have been using Red Angus since 1978. These Red Angus heifers are ultrasounded to calve March 10th to May 5th. They were AIed to Bieber H Hughes W109 and cleaned up with Basin Hobo 0545 sons, paternal brothers to the Hughes bull.

Lot 181 A, B, C, D, E

40 to 50 head of Red Angus heifer from Greg and Erica Kracht, Luverne, MN; These heifers originate from the Hoodoo Ranch in WY. The Kracht's heifers are ultrasounded to calve February 10 thru March 3rd. They are AI to Oly 903, Hughes W109, Red

Moon 6042, and Silver Bullet 4604P and cleaned up with easy calving Bieber Red Angus bulls, sired primary by Packer, Oly, and Outrider. The heifers are solid red.

Lot 182 A, B, C, D, E

40 to 50 head of F-1 baldy Herford X Red Angus heifers from Gene and Doretta Raap, Bristol, SD. These heifers were purchased from Oberlitner Farms and have Topp, K&B, and Simon Hereford genetics. The heifers are ultrasounded to calve starting February 10 thru March 30th. They are AIed to Bieber H Hughes W109 and cleaned up with Bieber Outrider W388. These heifers are primarily red baldy heifers.

Lot 183 A, B, C, D

Lot 184 A, B, C, D

80 head of Red Angus Heifers from SEC Partnership, Leola, SD; These heifers are ultrasounded to calve from March 10th to May 15th. These heifers were AIed to Bieber Outrider W388 and cleaned up with easy calving Bieber Red Angus bulls. The heifers originated from the Wangness, Miller, SD and Hughes, Java, SD herds. These heifers are solid red.

OUR THOUGHTS ON THE VALUE OF BULLS

Bull Purchase Price

Purchasing bulls is a critical management decision. The following table was developed assuming: annual bull maintenance costs of \$350 (operating costs plus a 10 percent risk of death loss), a 90 percent calf crop, and a salvage value of \$1,100. Several conclusions can be reached from this data:

Losing a bull in the first or second year is extremely costly on a per-calf basis and the loss overwhelms most of the genetic potential that might be derived from that sire's limited influence in the herd.

When possible, bulls should be servicing 25 or more females per season to allow the enterprise the flexibility to spend more on each bull purchased. Determining the price to be spent on a bull depends on the marketing target and the bull's ability to generate an advantage in excess of the additional cost per calf as purchase price increases. For example, a bull purchased for \$3,000 and used in a 1:25 scenario for four years must contribute more than \$5.56 per calf across all four calf crops to warrant the additional price as compared to a \$2,500 bull.

The national sire evaluation system allows producers to make reasonable comparisons between bulls and groups of bulls by estimating expected progeny differences for traits such as weaning weight, yearling weight and carcass weight. These estimates can then be assigned economic value by applying market prices. Some breed associations are now providing additional index values that are reasonable estimates of composition traits such as carcass value, maternal merit and feedlot performance.

Reprinted with permission from Cattle-Fax

DELIVERY POLICY:

Free delivery on all bull purchases over \$2500, to central points within 300 miles. Volume purchases of 5 or more bulls selling to one ranch delivered up to 500 miles. All bulls under \$2500 and females will be delivered to central points at cost. Central points for delivery will include auction barns, vet clinics and ranches that offer to serve as a delivery point. We simply ask for your cooperation in arranging the delivery of your bulls. This will keep the bulls from being on the truck longer than necessary and help to get the bulls to you with the least possible stress and in the best possible condition.

We are able to load out bulls during the sale, but request your patience while we sort and get your bulls to the loading area. Please let the clerks know if you plan to load out. They will notify the crew and direct you to the loading area. It would also be helpful if you would contact us in advance if you plan to haul your own so that we can research health testing requirements for your state.

Annual Bull Cost Per Weaned Calf Years Bull Used:

Purchase \$	1	2	3	4
\$2,000	102	43	24	14
\$2,500	124	54	31	19
\$3,000	147	66	39	25
\$3,500	169	77	46	31
\$4,000	\$191	\$88	\$53	\$36

* 25 cows per bull

We often get asked how much should we spend on a bull and the following article and commentary provide some insight to that question.

Many people tell us they can't afford to spend much on their bulls. This couldn't be further from the truth. The cost of running a good bull is the same cost as running a bad bull. A good bull will easily add 30-50 pounds to your average weaning weight. Even if the bull is only mated to 25 cows and you get a 95% calf crop with a modest \$1 per pound value, then the good bull will net \$712.50 to \$1187.50 per year above an average bull. With an average useful life of 4 years and an equal residual sales price, you can pay \$2800 to \$4750 more for the good bull over an average bull without a loss of profitability. This is before you consider that current prices on weaned calves are above the prices listed, good bulls last longer on average, have better resale and are often mated to more than 25 cows. Most operations would improve their bottom line by breeding to higher quality bulls.

Comments from Bieber Red Angus Ranch:

Cattle-Fax points out that \$500 more on a bull means that the bull needs to contribute \$5.56 per calf across 4 calf crops to warrant the additional price. If you do the math on a 600 lb. calf at \$1.40, it only takes a little over 5 pounds per calf to break even on the high priced bull. We have consistently found the real value of high priced bulls comes in added value to the heifers calves. Often this past fall and winter the difference between replacement quality heifers and average heifers was \$10 to \$20 dollars per hundred weight at the same auction on the same day. We have a customer that decided to support a breeder with a very short history and purchased two bulls. His bull battery contained three bulls from Bieber Red Angus Ranch and two from the young breeder. The herd runs with one bull per breeding pasture. This customer found out that the Bieber Red Angus Ranch bulls gave him an average 60 lbs. more per calf than the other breeder's bulls. This producer told us "I am tired of helping everyone else. From now on, I will be back to buy Bieber bulls to help myself. Your bulls are just bred better."

In 2011, a producer who works with his family commented that his father had refused to buy bulls and rented Angus bulls from a local small producer. This producer buys bull from the upper end of our program and others. This producer managed his cow and his father's cow very similarly but bred each of their own cows in separate pastures. When it came time to sell calves in the fall, the producer's calves weighed 250 lbs. more than his father's. His hard work and diligence in paid dividends to the tune of \$375 per calf. This operation spends between \$5000 to \$10,000 per bull and place a lot of value on good genetics.

Just one more fact to support the case for better bulls. Land Grant Universities have often shown that being a "low cost" producer is a key to survival in the cow/calf business. Ironically, the same research has shown that buying good bulls is the only area where low cost producers spend more money than high cost producers.

The initial reason we liked the Cattle-Fax article was that we want our customers to understand that taking care of a young bull the first year, and every year after, is worth it. It can be very costly if one loses a bull in the first year. Bulls really should be separated from the cows to reduce competition for resources. They require some added care throughout the year to function like a fine-tuned athlete for your breeding season. We can't stress enough that the cost per calf weaned will significantly decrease if bulls have proper care during the off season, particularly in the first year.

BIEBER RED ANGUS BULL DEVELOPMENT

We have learned a lot in 40 years of producing bulls customers come back for, like how to stack the right genetics to produce efficient, profitable cattle. The truth is, there is a lot more to it than mating the right cows to the right bulls. Every year we have customers tell us how our bulls stand up better compared to bulls from other breeders. We are very proud of how they stand up under reasonable conditions.

Cattle feeding is 1/3 skill, 1/3 science and 1/3 art. Feed too much and cattle get fat and will not hold up for our customers. Feed wrong and you lose out on a bull expressing his full genetic potential. We try to feed our bulls similarly to how we believe our customers will feed their calves. We start them on a 41meg ration (expected gain 1.5 to 2 ADG) and keep them on it for the first 45 days. That prepares the rumen flora to handle a higher meg ration. The bulls are next taken up to a 46meg ration (expected gain 2.25 to 2.7 ADG) for three weeks. At that time they are moved up to a 52meg ration (expected gain 3.2 to 3.5 ADG). We keep the bulls on that ration until they are scanned, and at that time they are moved back down to the 46 meg and kept there through the sale until delivery. We make a concerted effort to feed our bulls feed stuffs raised on our ranch and feed we feel our customers will have access to. Our ration consists of alfalfa hay, grass hay, barley silage, high moisture corn, wet distillers grain and mineral. We try to feed a least-cost ration.

When you look through the catalog you will see many bulls gaining between 3 and 4 pounds per day. They are not under fed. When you walk through the pens on sale day the bulls are not fat. The bulls are in good condition with plenty of muscle. We can talk about genetics all day, but if the bulls are overfed they just won't stand up in the long run.

The truth is it just makes sense to buy 43 years of experience.

2 YEAR OLD BULLS

The mark of a great bull is his ability to out-produce himself, and Roosevelt W384 looks like he may have gotten that done on his first calf crop. Y312's maternal granddam was the highest priced cow we ever bought, and she turned out to be a great investment. Y312 combines plenty of growth with a ton of cow power going back many generations on both sides.

Y310 has been a standout we have watched since weaning. You'll wear out a set of tires trying to find a bull as stout as this guy. Y310's dam has done an outstanding job with an MPPA of 106.7. Y310's scan data is very impressive with 124 IMF and 108 REA along with being in the top 8% TM, top 3% ME, and top 3% CEM. Buy him and keep the daughters; you can't go wrong.

Due to the scale going bad and us not catching it right away, we have a few bulls we didn't have accurate birth weights on. Unfortunately, Y347 is one of them. Don't discount him for it; his EPD's are accurate and make him look pretty good. Y347 has ME in the top 5% and with increased feed costs that is getting more important.

Meet Our Staff

Ron Bieber: Founder of BRAR, range, pasture & alfalfa specialist, and cattle breeding.

Lois Bieber: Head of the Kitchen and oversees all ranch activities and light bookkeeping.

Craig Bieber: CEO of Bieber Red Angus Ranch, handles all ranch activities

Peggy Bieber: Craig's partner and Full time office staff, handles all bookkeeping, and sale clerk.

Craig Howard: Cowboss, AI technician, welder and equipment repairman.

Kenny Meidinger: Equipment manager, responsible for feeding and forage at the ranch.

Michael Chapman: Herdsman, general ranch duties, light mechanics.

Steve Keyser: Intern from South Africa. Steve joined us in June and will be with us for a year.

Scott Marwick: Trainee from South Africa. Scott joined us in June and will be with us for a year.

Eric Payne: Day help hand. Eric and Megan are now living in Aberdeen.

Kristin Payne: Office/all-around assistant. Attending college in Sioux Falls, SD. Helps clerk the sale.

Megan Payne: Day help hand. Helps clerk the sale. Eric's wife.

Lindley Harrington Howard: Past summer help and day help hand. Helps clerk the sale. Craig Howard's wife.

THANK YOU
 for your support!

Video clips of the cattle will be available by
 November 15th. Visit

www.bieberredangus.com
 for details.

When Roosevelt was on test in 2009-10, he was my pick of the bulls. He exhibits depth of flank with lots of style and a great disposition. His sons last year were the 1st and 3rd high sellers last spring, and we have lots more where they came from. We really like the way his daughters look and are looking forward to calving them this coming spring. Roosevelt's service and progeny sell in this offering.

Rollin Deep Y118 was last spring's high selling bull. We sampled this young sire and have been pleased with the conception rate he has stacked up. We are flushing his dam at this time and expect that she is going to be a great one. Looking at his data, it is pretty hard to find sires that will put as many traits in the top 10% of the breed as Rollin Deep does. His phenotype is exactly his namesake: deep and easy moving. We expect that this sire will do great things. We have sampled him extensively and are planning to continue his use. His service sells in this offering.

We had the opportunity to purchase pasture rights on Epic R397 K at Milk Creek last fall. Epic puts a number of measurable traits right in the sweet spot. His pedigree makes him an outcross for us, and we really like the muscle, volume and growth we have seen in his progeny. Epic's service sells in this offering.

Takeover 9943W sold in Ludvigson's 2011 offering, and his kind and data impressed us. We will be offering the first sons next spring, but his calving ease has been excellent and we like the calves. Our thoughts are that Conquest x Packer is one of those synergistic matings that really produces progeny that are prepotent and offer lots of potential for profit. Takeover's service sells in this offering.

Samurai X22 was produced by our cooperator and friend Gene Rouse and sold to Select Sires. For years we looked for a Cheyenne son that we could tie into, and finally he showed up in our own offering, thanks to Gene. Samurai's first calves look outstanding this fall, and we are expecting great things. They have a lot of performance and very solid data to back them up. He has that Red Angus color that George Chiga indicated was the mark of leading herd sires in his time. Samurai's service sells.

Everyone is invited to dinner at Ron & Lois's after the sale. We will be serving Meyer Natural Angus Strip Loin cooked by our friend and partner Stu Campbell.

We took a look at Goldrush when he sold as a yearling and liked him, but thought he might be a little small. Boy, were we wrong. Gold Rush is impressive, and when we had the opportunity to buy walking rights last December when we took it. He is going to put some growth with muscle into cattle and do it in a pretty moderate package. Goldrush's service sells in this offering.

Hard Drive Y120 sold to Select Sires this past spring and was one of our favorites all year long. That hasn't stopped throughout the breeding season. Hard Drive was exposed to over fifty head this summer and came out of the pasture looking fit and ready for more. When you study Hard Drive's data you are pretty hard pressed to find a sire that will post as many traits in as high of percent rank as he does. Hard Drive's service sells in this offering.

EXT 8628 really pushed the envelope for growth, carcass and maternal. His daughters look like they are going to match the highly maternal traits this line is known for. Put EXT 8628's number for TM in a RAA search and only four bulls in the whole registry come up. One is his sire and another is a paternal brother. If you tried to design one, could you even come close to making him this good?

50 YEAR HISTORY OF BIEBER RED ANGUS

Ron Bieber

In July of 1961, my brother Leroy Bieber and I were looking for a place to produce good beef cattle. We purchased Julius Binder's and Frank Sieh's properties amounting to 2300 acres. In September of that year, I was called into the Army because of the Cuban missile crisis. While serving for ten months, Leroy and I purchased some available land from Jacob Jakober. This expanded our operation to 3600 acres. In the spring of 1962, we began tagging all cows and calves and started keeping weaning weight records. At that time, we were calving mostly Hereford cows bred to Hereford bulls. We also had a group of baldy calves that produced 60 pounds more than the Herefords. In 1964, Leroy and I split up our operations, and Leroy purchased a farmstead three miles west of our operation. In the late winter Lois and I purchased our first Shorthorn bull from Fred Kiesz.

March of 1966 brought a tremendous blizzard our way. By the time we got out to find the cattle, some were four feet below the snow and still alive. We pulled them out, rolled them on to a toboggan and pulled them home. We lost 30 Hereford cows, but were able to buy 35 Shorthorn cows later that spring that were bred to a polled Hereford bull. This led to progress in converting our entire cow herd to crossbred cattle. Soon we realized that systematic crossbreeding would result in superior weights, and our weaning weights went from 380 to 560 pounds in a period of ten years. Crossbred cows eliminated pinkeye, cancer eye and prolapse, and we consistently had better breed back.

In September of 1967, I decided that we would take a working vacation and go to Montana to search for the next cross on our cow herd. Our first stop was at Miles City to have a look at the USDA cattle research station, where an acquaintance had had success using Line 1 Herefords. Next, we took in the Montana Hereford tour, looking at numerous herds and meeting with lots of Hereford breeders. When I said we were considering using Red Angus, one of the Hereford breeders from western North Dakota said, "Red Angus are like women's hats—here today, gone tomorrow." Twenty years later he started using Red Angus, and he no longer produces Herefords.

In October of 1968, I saw an ad in the Western Livestock Reporter for the sale of 50 registered Red Angus cows in May, Idaho. When I arrived, Gene Cook took me around for a tour of his Red Angus herd. I selected 14 cows, which Gene had transported by a pot that was filled with feeder cattle headed to our area. The cows arrived in early December, and we were officially a Red Angus seedstock herd.

April of 1969 brought an opportunity to take another trip to Montana. Ora Erdmann from Erdmann Angus had sent ten bulls to the Stanford Bull Test Station in northwest Montana. The test had 300 or more Angus, Hereford, Shorthorn and Red Angus bulls, as I remember. Early one morning I fed the cattle and tagged new calves. I finished seeding the field east of the house. Ora Erdmann showed up just before noon, and with him was Dr. Harlan Ritchie, Animal Science professor from Michigan State University.

I loaded my bag in the single cab two-ton truck, and off we went to Montana: three men, luggage and lots of BS. The major conversation topics were cattle and genetics. It didn't take many miles down the road before we were engaged in an intense conversation concerning cattle breeding. After he found out we were using a good Shorthorn bull, Harlan said that there was a breeder in Michigan he knew who was interested in a large framed Shorthorn bull like we had. It turned out Harlan was not coming back with Ora and myself, so an opportunity to sell a high dollar herd sire was missed. Harlan is a very astute observer of animal breeding and has been known for years as a leading authority on cattle breeding. Ora Erdmann was in his 60s, a keen observer of cattle and a self-taught cattle breeder. His famous one-liner was "I don't want Shetland pony Angus."

In the late 1960s the beef cattle industry was changing rapidly. Suddenly performance records became important, and many cattlemen were looking for larger framed cattle. The pursuit of more frame and the introduction of continental breeds was recognized by keen observers of cattle breeding, like Harlan Ritchie, who realized frame could be detrimental to profitable beef production. That trip to Montana enlightened me and gave us contact with many leading cattle breeders in the beef industry.

In September of 1969, R.C. Buckner of Tyler, Texas, was having a Red Angus dispersion sale. Albert Erdmann and I made the trip in a two-ton truck to watch Buckner sell off 750 head of cattle. When we left, we ended up filling the truck with 20 head. After that, every chance we had we acquired more Red Angus cows and heifers. Soon our herd numbered 250 breeding females. In the fall of 1975 we sold our crossbred herd to Henderson Ranch of Lodgepole, South Dakota.

In 1975, we also had difficulty selling bulls, so we made the decision to have a production sale. That May we moved enough soil to form a level spot to put up an insulated Morton building. In those early years we provided information on birth weight, weaning weight, yearling weight and gain from weaning to yearling at each sale. Now we provide 12 EPDs and nine weights and measurements.

In the spring of 1983, we purchased the West Ranch from Harold Geffre. In the spring of 1988, we were able to purchase 800 acres from the Morrison Brothers, land that had run along the west side of our property. Then in the winter of 1989, we were offered the Jonathan Brenise place, which was 480 acres. We presently have enough land to run 800 cows.

PREPARATION KEY FOR SUCCESSFUL PURCHASES

By Bob Weber, Ph.D., Cow-calf Extension Specialist, Kansas State University

As the winter and spring bull-buying season approach, seedstock purchasers should do their home work to help ensure the bull(s) they purchase this year meet their needs. Preparedness is the key to making an informed purchase. Before you crack open the sale catalogs of seedstock suppliers, there are few resources and skills you should possess.

First, make sure you understand the use of Expected Progeny Differences (EPD) and selection indexes. While EPDs are not the only selection information you should consider, EPDs are the most effective tools available to describe the genetic differences between animals within and across herds. EPDs are much more effective genetic predictors than actual or adjusted performance records. If an EPD is available for a trait it should be used instead of an animal's own performance record for that trait. The EPD removes age and environmental effects that can bias a decision based on actual or adjusted performance records. Use Calving Ease (CE or CED) EPD, rather than birth weight (BW) EPD, if it's available to select bulls that minimize calving difficulty. CE EPD calculations include BW data and other sources of information that affect dystocia.

Not all EPDs are the same, so make sure you know the appropriate information for the breed of cattle you are purchasing. For a useful reference on EPDs and other genetic topics see the Beef Sire Selection Manual (<http://www.nbcec.org/producers/sire.html>) Obtain the breed average EPDs and a percentile rank table available from the most current genetic evaluation for the breed of interest. Percentile rank tables can be found on most breed association websites. These tools will enable you to compare the relative genetic merit of individual animals to other animals in the breed.

Second, make sure you know what traits you would like to improve in your herd? What breed(s) fit in your mating system? If you are using a crossbreeding system make sure the breed you selected fits your objectives. Other factors to consider are: keeping replacement heifers, endpoints for progeny marketing (weaning, back-grounded or in the beef). Assessment of these factors will help point you to the best breed for your

needs and the combinations of maternal/growth/carcass traits that best fit your operation and environment. Be sure to apply selection to traits that have direct economic importance in your production system.

Third, set a realistic budget for bull purchases. Like most things in life, price is driven by quality. Evaluation of a seedstock supplier's prior year sale averages will give you an idea of what to expect in terms of purchase costs. That said, prices over the last 12 months indicate that seedstock purchases are substantially more expensive, some as much as \$500 more, than in previous years. The increased bull cost is largely driven by increased development costs incurred by seedstock producers. The added purchase cost makes it even more important to make a well thought out decision.

Fourth, get to know your seedstock supplier and make sure he/she knows you and your operational goals. Seek out recommendations from your supplier well in advance of the sale. Once you receive the sale catalog make a short list of bulls (6-12 head) that fit your specifications. Arrive at the sale site early to inspect the bulls on your short list. Shorten this list of candidates based on conformation and updated data to identify your purchase candidates. Keep the sale order in mind. Stay focused on the bulls you selected earlier. Sticking to your plan will avoid impulse purchases. Remember: Failure to plan is planning to fail. Please contact your extension livestock specialist or me if you need help finding resources to aid in your sire selection activities.

BULL MORTALITY AND LOSS OF USE INSURANCE COVERAGE

Underwritten By:

Aegis Security
Insurance Company
PO Box 3153
Harrisburg, PA 17105-3153
AM BEST RATING: A VI

TERMS & CONDITIONS

Values Up to \$25,000
One Year Policy Term
Premium Fully Earned
\$150 Minimum Premium
Per Animal

Required Testing:

All bulls must be tested, certified and listed in the official catalog of a herd sale.

Please see the reverse side for further coverage information.

COVERAGE INCLUDES

Full Mortality:

100% of the value of the bull in the event of death or life-threatening injury.

Loss of Use:

80% of the value of the bull, less salvage value, of in the event of Loss of Use from an accident, illness, or disease that can clearly be diagnosed or identified to have occurred on a specified date.

25% of the value of the bull in the event of Loss of Use from an accident, illness, or disease if there is a diagnosis consistent with an accident, illness, or disease but no real evidence that provides clear diagnosis or identification.

Eric Payne
605-225-4270
PO Box 1540
Aberdeen, SD 57402

TERMS AND CONDITIONS

If you can't attend the sale & would like to buy cattle, call Craig (605-439-3628 / 605-216-8169 / 605-439-3545) before the sale. Tell us what you are looking for and we will assist in arrangement to help you participate in the offering.

We will call you after the sale and inform you of your purchases.

We guarantee your purchase will be satisfactory.

TELEPHONE BIDDING

We will have available telephone bidding by conference call. **If you wish to bid over the phone, please register before sale day.**

INTERNET BIDDING

See page 5 for information.

The Red Angus Assn. Terms and Conditions will apply if the terms and conditions printed here are not applicable.

BIDDING DISPUTES: The auctioneer in charge will settle any disputes as to bids, and his decision on such matters shall be final.

TERMS: The terms of the sale are cash; the right of property shall not pass until after settlement is made. All settlements will be made with the clerks of the sale immediately following the conclusion of the sale and before any cattle will be released from the ranch.

RETAINED INTEREST: We are retaining 1/2 interest in all bulls in the sale. We are selling the remaining 1/2 interest, full possession, and full salvage value on these bulls. This option gives Bieber Red Angus Ranch the option to collect, use and market semen from the bull and does not restrict the purchaser from doing the same. This collection, unless agreed otherwise, would be done at the expense of Bieber Red Angus Ranch, at the buyer's convenience. Also at the time of purchase, the highest bidder on a retained interest bull may elect to purchase exclusive semen rights for 100% of the purchase price in addition to the purchased price on retained bulls. If a buyer elects to purchase exclusive semen rights, Bieber Red Angus Ranch interest then becomes in herd use only, but Bieber Red Angus Ranch retains all rights to use the bull within their herd.

SEMEN RIGHTS: Buyers receive semen rights proportional to the interest purchased. If you purchase a 1/2 interest, then you are entitled to 1/2 of the semen collections at cost provided that you indicate you want semen prior to collection. We intend to collect some of the bulls in the sale and sample them in our herd. We will cooperate with the buyer in collection of the bull. We prefer to collect most bulls after the first season of use and we will contact the buyer when we intend to collect the bull at a time convenient for the buyer.

PURCHASER'S RISK: Each animal becomes the risk of the purchaser as soon as sold. Animals will be fed, watered and cared for at the purchaser's risk for a reasonable time.

CERTIFICATE OF REGISTRY: A certificate of registry and transfer will be furnished for each animal sold as a registered animal, after settlement has been made.

HEALTH: All cattle will have official health certificates and will sell guaranteed exported to Canada. Canadian health certificates will be charged at cost on animals selling under \$4000.

ANNOUNCEMENTS: Changes of information contained in this catalog relating to the animals offered for the sale will be announced from the auction box and such announcements shall take precedence. Errors discovered in the catalog will be corrected by announcements at sale time, and such corrections will take precedence over the printed matter in this catalog.

BREEDER'S GUARANTEE: 1. All animals are guaranteed breeders, with the exception of: a) calves under twelve months of age; b) animals shown by Purchaser after sale (in cases of animals shown after purchase, the breeding guarantee, if any, shall be such as agreed upon between Seller and Buyer) c) Any open heifer that has been flushed for embryo transfer; or d) gross negligence or willful misconduct on the part of the Purchaser. 2. Bulls are guaranteed breeders if not allowed to run with the herd until at least 14 months of age. Any bull which either: a) settles 1/3 or more of the healthy cows he serves; b) is the sire of 20 or more animals; or c) settles cows by natural service and passes a fertility test made by a competent veterinarian during any 6 month period of trial (provided for in paragraph 2 of the section of these sale terms and conditions entitled "Options and Privileges of Return or Adjustment") shall be considered a breeder.

Any guarantee with respect to the ability to freeze semen shall be by separate agreement between Buyer and Seller.

Open females have not been served and are so guaranteed.

IDENTIFICATION: Each animal carries a readable tattoo. Tag numbers on the cattle correspond with lot and tattoo numbers in this catalog. Purchaser agrees to use full name of animal in advertising and on stall cards at shows.

OPTIONS AND PRIVILEGES OF RETURN OR ADJUSTMENT:

1. All claims for adjustment or refund must be made in writing either within six months of the sale date or no later than six months after the animal reaches 18 months of age, with the exception of claims involving defects or parentage.
2. In the event an animal is claimed to be a non-breeder, the animal may be returned to the farm of the Seller if in good condition and complying with the health requirements of the Seller's state. The Seller shall be entitled to six months' trial following the return of the animal in which to prove the animal is a breeder, the Seller shall, at the option of the Buyer, replace the animal with another of equal value or grant the Buyer a credit for use on any products marketed by the Seller. Such credit of the full purchase price shall in any case be deemed full satisfaction and settlement. Any expense incurred for transporting an animal claimed to be a non-breeder shall be the responsibility of the Purchaser, except that the Seller shall be responsible for the transportation costs in excess of the distance between the Purchaser's farm and the location where the sale took place. If the Seller proves the animal is a breeder, it shall be the obligation of the Purchaser to take delivery of the animal and pay all expense incurred for transportation.
3. If a female sold as "safe in calf" proves not to be in calf, the Purchaser may receive service from the bull previously used, if available, or if the bull is not available, the Seller shall be obligated to make a satisfactory adjustment on the purchase price upon return of the animal to the farm of the Seller. Any adjustment provided for herein shall absolve the Seller from further liability, except in case such female proves to be a non-breeder. If a female represented as "safe in calf" at time of sale to a certain bull proves to have been bred to a different bull, the Seller shall be obligated to take a satisfactory adjustment on the purchase price upon return of the animal to the farm of the Seller (adjustments shall not be considered to a breeding fee or an allocation of the purchase price to any unborn calf). Any expenses incurred for transportation shall be the responsibility of the Purchaser, except that the Seller shall be responsible for the transportation costs in excess to the distance between the Purchaser's farm and the location where the sale took place.
4. If a female sold as "served" proves not to be in calf, or if a female sold as "pasture-bred" proves not to be in calf, the Seller only guarantees such female to the breeder.
5. If a female sold as "open" proves to be with calf, the Purchaser may return the animal to the farm of the Seller prior to calving for a credit of the full purchase price or for another animal of equal value, whichever is acceptable to the Purchaser. It shall be the obligation of the Seller to bear any expense incurred for transportation.

LIABILITY: Neither owners, sale managers, clerks nor anyone connected with the sale assumes responsibility, legal or otherwise, for damages of any kind.

CONTRACT: The above terms and conditions shall constitute a contract between the buyer and seller of each animal sold.

IMPLIED WARRANTY: Except for those stated in the terms and conditions, there are no warranties, either expressed or implied, as to merchantability or fitness for a particular purpose with respect to the cattle being sold in this auction. The warranties set forth in terms and conditions are in lieu of all other warranties, either expressed or implied, and the remedies proved therein shall be the sole and exclusive remedy of the buyer, or any part claiming through buyer, for any breach of warranty or guarantee therein provided and all other obligations or liabilities.

We guarantee your purchase will be satisfactory.

Predicting Profit...

...The Ranchers Guide to EPDs

Cowherd Building Traits

Profit starts at Reproduction!

Placing selection pressure on traits that will have a direct impact on your marketed product (weaned calves, yearlings, carcasses sold in the meat) can certainly increase your revenue on a per calf basis. However, in order to achieve the higher goal of increased revenue per cow exposed, selection pressure must be placed on cow herd building traits.

Profitable reproduction can be boiled down to success in these four Economically Relevant Traits:

Calving Ease Direct (CED): The expected progeny difference of calves being born unassisted from two year-old heifers. The Red Angus CED model accounts for contemporary group birth weight differences and calving ease scores.

Heifer Pregnancy (HPG): The expected progeny difference of heifers conceiving to calve at two years of age.

Calving Ease Maternal (CEM): The expected progeny difference of a given animal's daughters calving unassisted at two years of age.

Stayability (STAY): The expected progeny difference of a bull's daughters remaining in the herd until at least six years of age. Females that don't stay in the herd that long are losing money, and they also contribute to a higher rate of replacement females that the rancher can't cash crop.

Cows Eat Money! That's why Red Angus published the Mature Cow Maintenance Energy EPD (ME EPD), becoming the first beef breed to evaluate the expense side of the ranchers' profit equation. Here are the facts:

- ME predicts differences in maintenance energy requirements of mature daughters of a bull.
- Maintenance energy requirements are directly related to feed cost - often producers' largest single expense.
- The lower the ME EPD, the less feed daughters require to maintain body condition.
- ME can be used to ensure environmental fit, and to estimate additional feed required by increased growth & milk.

With a long standing commitment to better serve this continually changing beef industry, Red Angus has prepared for tomorrow's challenges through New & Improved Genetic Predictions (EPDs).

Red Angus has combined databases and subsequent EPD calculations with the American Simmental Association in order to simplify producers' use of crossbreeding programs by supplying them with true multi-breed EPDs. This enhancement enables Red Angus to provide reliable EPDs on all animals in the database, regardless of breed composition. Additionally, with the recent changes to carcass value Red Angus has added Carcass Weight and Yield Grade to its arsenal of ERTs.

EPDs are the most reliable predictors of an animal's true genetic merit. As the only major beef breed to mandate Total Herd Reporting (THR), Red Angus EPDs have the built in advantage of being calculated from 15 years of complete contemporary group data. EPDs have "fast-tracked" beef cattle improvement and removed much of the guesswork associated with selecting range bulls.

GLOSSARY OF TERMS

EPD: Expected Progeny Difference. The expected difference (usually pounds) in performance of a bull's progeny when those progeny are compared to progeny of a sire with an EPD of zero for the trait in question. EPD values are relative. They do not indicate absolute levels of performance. Rather, they can be used to compare expected progeny performance of different bulls.

Acc: (ACCURACY): A measure of the reliability of an EPD. Accuracy values are reported as decimal numbers between zero and one. Values closer to one indicate larger amounts of available information and greater certainty that a bull's EPD will not change significantly as more progeny information becomes available.

CED EPD: Calving Ease Direct (percent). The probability that an animal's calves will be born without assistance to a two-year-old cow.

BW EPD: Birth Weight (pounds). An animal's expected progeny difference for birth weight of a calf. Progeny of sires with lower birth weight EPD values will generally be born with less calving difficulty.

WW EPD: Weaning Weight (pounds). An animal's expected progeny difference for 205-day, mature dam equivalent weaning weight. A sire's weight EPD is an indication of growth to weaning. It does not indicate milk production.

YW EPD: Yearling Weight (pounds). An animal's expected progeny difference for 365-day, mature dam equivalent yearling weight. The yearling weight EPD is a measure of growth from birth to a year of age.

Milk EPD: Maternal Milk (pounds). The expected difference (due to milk production alone) in weaning weight of calves out of a bull's daughters compared to calves from daughters of a bull with a zero.

EPD for maternal milk: Maternal milk EPD values are measured in pounds of calf weaned to indicate milking ability.

TM EPD: Weaning Weight Total Maternal (pounds). The expected overall difference in weaning weight of calves out of a bull's daughters compared to calves from daughters of a bull with a zero EPD for total maternal. The total maternal EPD is a measure of both growth and milking ability and is an indicator of the size of a calf a bull's daughter will wean.

ME EPD: Maintenance Energy. Used to select parents that will produce low consuming replacement females with lower energy requirements.

HPG EPD: The profitability that an animal's daughters will conceive to calve as two year olds.

CEM EPD: Calving Ease Total Maternal (percent). The probability that an animal's daughters will calve unassisted as two-year-olds.

Stay EPD: Stayability (percent). The probability that after an animal's daughters enter a herd, they will remain productive until the age of six. The EPD is primarily a measure of sustained fertility in female offspring.

MAR EPD: Carcass Marbling Score (score 2-10). Higher values tend to be associated with higher USDA quality grades on slaughter progeny.

REA EPD: Carcass Rib Eye Area (sq. inches). The expected difference in rib eye area measured between the 12th and 13th rib of a sire's progeny. Higher values may be an indication of higher lean meat yields on slaughter progeny.

ADG: The average daily gain during the test period beginning in late September and ending in mid January.

WDA: Weight per day of age from birth.

FEEDING:

Feeding arrangements are available. All coming Two-year-old Bulls will be fed at a charge of \$3.00 per day. We will feed your purchases from sale day until you are ready to pick them up or we will deliver them in the Spring with our spring bull deliveries. If your bulls stay here until spring and you give us ample notice, we will have your purchases semen tested before we deliver your two-year-old bulls.

BREEDING SOUNDNESS EVALUATION:

Semen evaluations will be performed in November before the sale. We fully guarantee that these bulls will pass the Breeding Soundness Evaluation before the breeding season in 2012 if the bulls are managed properly. We ask for your understanding if a bull does not pass. Sometimes bulls that have passed do not pass later for various reasons. Our ability to replace a two-year-old bull that has failed a semen evaluation is limited but we will do our best to make sure you are satisfied. If you have any questions regarding Breeding Soundness Evaluation, feel free to call Craig or Dr. Dean Christensen at the Ashley Vet Clinic.

RETAINED INTEREST POLICY:

We are retaining 1/2 interest in all bulls in the sale. We are selling the remaining 1/2 interest, full possession, and full salvage value on these bulls. This option gives Bieber Red Angus Ranch the option to collect, use and market semen from the bull and does not restrict the purchaser from doing the same. This collection, unless agreed otherwise, would be done at the expense of Bieber Red Angus Ranch, at the buyer's convenience. Also at the time of purchase, the highest bidder on a retained interest bull may elect to purchase exclusive semen rights for 100% of the purchase price in addition to the purchased price on retained bulls. If a buyer elects to purchase exclusive semen rights, Bieber Red Angus Ranch interest then becomes in-herd use only, but Bieber Red Angus Ranch retains all rights to use the bull within their herd.
