400+ Females Sell!

150 Registered Red Angus Cows!

50 March/April calving and 100 May/June calving. A complete dispersal of all our 2008 cows, including donors and the last cows purchased in the Basin acquisition.

200+ Commercial Red Angus Heifers!

These heifers are AI'd and come from some of our best customers. If you are looking for heifers, this will be an offering you have to see!

100+ Commercial Red Angus Cows!

These Cows come from Vander Linden Farms. If you are looking for young cows coming with their second calf, this will be an offering you can't miss!

PLUS... 100 Two-year-old Red Angus Bulls!

Our commitment to providing the best opportunity for profit is second to none. These bulls are stout, good looking with great EPDs and a history of prepotency behind them. Several ET full and half sibs to last spring's high sellers. Sons of Hard Drive's dam and sons of Basin Primrose 2043. **This fall offering will be the best we have ever offered!**

WELCOME TO THE SALE!

Welcome to Bieber Fever IX.

Every year comes with its challenges. It is likely that 2015/2016 will be no different. We have been dealing with falling cattle market since July and as I write this letter it has come back some and looks to be turning the corner. On the bright side we know many of you have done what we have and cleaned up some debt, improved you operation and bought better genetics. If we have been a part of your genetic progress we are grateful for your business. Since my parents Ron and Lois started, our leading goal has been to provide cattle that will make our customer more profitable. We study the cattle, and the data and constantly strive for a balance that we think makes sense. Every year it seems that we get a bit closer but in our mind we know they will never be perfect. We believe our offerings are as strong as they have ever been from top to bottom. In case anyone was wondering, we are not going to let up on bringing you cattle that are more consistent any time soon. We put in a little over 600 embryos this year and are expecting to wean 300 or more embryo transplant calves in 2016. We weaned right at 250 embryo transplant calves this year. Our goal in all of this was to build a cowherd that was second to none. We have been breeding over 300 heifers every year and with about 1/3 of them being ET's that raises the bar on the quality. We have been trying to identify the great cows early and put them in the donor pen to make better females. One of the side benefits is a great opportunity to buy bulls that are unequalled in quantity and quality. Our lead off bull is a great example of how successful our ET program had been. He sells leased to Genex and the new owner will be 50% partner in that lease. Very few programs give you the opportunity to have that kind of partnership right away, not to mention he has a full brother in the offering.

Our program has had focus that is second to none. It starts with the sires we use and how we use them with a common thread through the years. We use that focus in every part of our program to give you the consistency in your cowherd. This offering again includes more full and maternal brothers. We have always felt good seedstock in volume brings prices to a level every cattle producer can afford. I personally hope you take the time to do one of a couple of things. Come to the sale and look at the cattle or get on our website and take a look at our offering videos and bid on line. If you can't do that, call me or any one of our buyer representatives. We will give you our best advice and make sure you get what you are looking for.

I truly believe if you looking for Red Angus cattle that will fit your program we have them. We appreciate the opportunity for the time you have taken to look at this offering.

DELIVERY POLICY:

Free delivery on all purchases over \$3500 per lot, to central points to surrounding States. Volume purchases by one buyer of 5 lot over \$3500 average. All bulls and females under \$3500 will be delivered at cost. Central point for delivery will include auction barns, vet clinics and ranches that offer to serve as a delivery point. We simply ask for your cooperation in arranging the delivery of your cattle. This will keep the cattle from being on the truck longer than necessary and help to get the cattle to you with the least possible stress and in the best possible condition.

HEALTH:

Ashley Vet Clinic, 701-288-3234, will be available on sale day. All cattle are on a complete vaccination program supervised by Ashley Vet Clinic.

In the past bulls have been tested for persistent BVD carriers and all tests were negative for a number of years. We have chosen not to test the bulls this year since no positives have been found in over 10 years. Bieber Red Angus participates in the Beef Quality Assurance (BQA) program. Heifer calves have been Bangs vaccinated.

GENETIC DEFECTS:

Every animal in the Bieber Red Angus production sale is guaranteed negative for the recessive gene associated with Osteopetrosis(OS), Arthrogyrosis Multiplex(AM) (Curly Calf Syndrome), and Neuropathic Hydrocephalus (NH). With this guarantee, we provide our customers the opportunity to purchase their choice of cattle with very little risk. DNA samples have been collected on every animal in the sale with any known carrier in the first three generations and tested negative unless otherwise noted.

RETAINED INTEREST:

We are retaining 1/2 interest in all bulls in the sale. We are selling the remaining 1/2 interest, full possession, and full salvage value on these bulls. This option gives Bieber Red Angus Ranch the option to collect, use and market semen from the bull and does not restrict the purchaser from doing the same. This collection, unless agreed otherwise, would be done at the expense of Bieber Red Angus Ranch, at the buyer's convenience. Also at the time of purchase, the highest bidder on a retained interest bull may elect to purchase exclusive semen rights for 100% of the purchase price in addition to the purchased price on retained bulls. If a buyer elects to purchase exclusive semen rights, Bieber Red Angus Ranch interest then becomes in herd use only, but Bieber Red Angus Ranch retains all rights to use the bull within their herd.

BIRTHWEIGHTS/CALVING EASE:

We scored for calving ease with our three star (*) scoring system. Three stars (***) indicates that a particular bull can be used on heifers under standard conditions with little or no calving difficulty. Two stars (**) indicates that a particular bull should be used on growthy heifers or cows under standard conditions with little or no difficulty. One star (*) indicates that a particular bull be used on cows. These bulls will produce little difficulty when used on cows. This recommendation is a system we use to help our customer with calving ease selections.

Birth weights are highly affected by environmental factors. Research indicated that the inclusion of corn in cow diets will increase BW. Also contributing to higher BW were cold temperatures in the winter of 2002/2003. The University of Nebraska conducted a three-year-study to research and evaluate effects of high and low temperatures during winter months on calves out of 384 two-year-old heifers. Average BW increased by 11 lbs. when temperatures were colder. The results agree with other studies that show calves born in the southern U.S. compared with calves born in the northern U.S. Weather plays an important role in BW and calving difficulty. We have adjusted the calving ease scores accordingly, taking into consideration what the calf ratioed on BW, pedigree and CE EPD and BW EPD.

FEEDING:

Feeding arrangements are available on all yearling lots will be fed at a charge of \$3.50 per day. We will feed your purchases from sale day until you are ready to pick them up, or we will deliver them.

BREEDING SOUNDNESS EVALUATION:

Breeding Soundness evaluations will be performed in November before the sale. We fully guarantee that these bulls will pass the Breeding Soundness Evaluation before the breeding season in 2016 if the bulls are managed properly. We recommend that all bulls tested in this sale be tested 4 to 6 weeks prior to your breeding season. We ask for your understanding if a bull does not pass. Sometimes bulls that have passed do not pass later for various reason. We will do our best to make sure you are satisfied. If you have any questions regarding Breeding Soundness Evaluation, feel free to call Craig or Dr. Dean Christensen at the Ashley Vet Clinic.

WEIGHTS:

Birth weights, weaning weights, yearling weights, and all other measurements are taken at appropriate times to produce sound and accurate comparisons within contemporary groups. We contemporary group our Red Angus calves based on the age of our cows. Calves out of two-year-old dams, three-year-old dams, and the main cowherd are all separate management groups and therefore are separate contemporary groups.

INSURANCE:

Livestock insurance will be available on sale day. Please see information in catalog.

SALE INFORMATION

AIR TRANSPORTATION:

Aberdeen is serviced by Delta Airlines. Huron and Pierre are serviced by Great Lakes Airlines which is affiliated with United and Frontier airlines.

INTERNET & ABSENTEE BIDDING:

We would prefer for each of you to be in attendance on sale day. Realistically, we know that there will be some scheduling conflicts and distance limitations. In these cases we have arranged for you to be able to participate in the sale on an absentee basis with a conference call dedicated to bidding. We will have available one phone line and can accommodate 20 to 30 bidders. Please call prior to the sale and register as a prospective buyer. We have limited capabilities to bid by phone during the sale. Your best option is to be in attendance at the sale, but if you cannot attend or feel more comfortable bidding yourself, we need to warn you of complications in the past with phone service such as the volume and the rapid pace at which our sale moves. If we handle the bids for you, they will be done in the strictest of confidence. However, if you want to attempt bidding by phone, please make arrangements prior to sale day by calling Craig or Peggy. For internet bidding information, see DVAAuction below.

If unable to attend and you feel comfortable doing so, you can leave those bids with the Bieber family, Auctioneer, or publication representatives. We handle many sight unseen bids and have very satisfied customers who feel confident in using that service. We prefer to have plenty of time to discuss your needs over the phone prior to sale day so that we may select the cattle that best fit your specs. We buy those animals just like you were sitting ringside with us. We also guarantee the cattle so that if they don't meet your ideals, you just return them to us. If possible, come by and evaluate the offering prior to sale day. We will post video of each lot on our website prior to the sale but may run into time limitations.

COLOR:

All animals are red unless otherwise indicated in the footnotes.

FOLLOWING SALE:

Everyone is invited to Dinner at Ron & Lois's after the sale. We will be serving Strip Loin cooked by our friend and partner Stu Campbell.

BREEDING DATA ON BRED FEMALES:

Breeding data on bred Females is verified by ultrasound. The sex of the pregnancy and the date of calving is verified by ultrasound and is an estimate. Many years of ultrasound had proven it is 99% accurate. These are called to the best of veterinarian's ability depending on the embryo age. Some bred females have two sires to close to call by ultrasound and when that happens we have indicated that DNA will be necessary to determine that sire of the calf. Sometimes that birthdate clarify that sire but DNA is always recommended to determine the sire.

UPDATED INFORMATION:

Scrotals and weights on all the bulls the week before the sale on our website or upon request. All other data not provided will be available upon request.

GAIN TESTING:

The summer born bulls were weaned October 2014 and yearling weights were taken on May 2015. All of the summer born bulls were placed on feed in preparation for the sale September 2, 2015.

SALE ORDER: The sale order will be Registered Females, 1 thru 149, Commercial Females and then Bulls Lot 150 thru 255.

SIGHT UNSEEN: If you are unable to attend we encourage you to contact us or one of the buyer representatives. We have handled many sight unseen bids and guarantee your satisfaction as long as you visit with us to make sure the cattle you select meet your standards. We would prefer to have plenty of time to discuss your needs over the phone prior to sale day. If the cattle don't meet with your approval the cattle will need to be returned to us.

We are pleased to offer the Bieber Red Angus Sale broadcast "live" over the internet through DVAuction Services. To bid from your computer at home during the sale, complete this simple two step process.

- Visit the DVAuction web site at www.dvauction.com or call 402/474-5557. Register by entering a User Name and Password. Then enter your personal information on the next screen.
- Click on "Apply for Bidding." Select the Bieber Red Angus Sale from the list of sales and click "Apply." Complete the process by filling out the Banking and Lending information requested.

DVAuction will contact you to let you know that you have been approved to bid and buy at the sale "live" from your computer at home. We will also provide you with a buyer number for the sale.

After the sale Bieber Red Angus will contact you to make arrangements for payment and delivery of your on-line purchases.

Please Note: You must have high speed internet access (DSL, T-1, or Broadband) to be able to bid during the sale. Any questions, please contact DVAuction at (402)-474-5557 or e-mail support@dvauction.com. We recommend that you register by December 8th, 2011 for on-line bidding. Every attempt will be made to complete your application even if it is on sale day.

MEET THE PEOPLE OF

Bieber Red Angus

Ron Bieber: Founder of BRAR, range, pasture & alfalfa specialist, and cattle breeding.

Lois Bieber: Co-Founder of BRAR. Responsible for the sale meals and hospitality. Oversees all ranch activities.

Craig Bieber: CEO of Bieber Red Angus Ranch, handles all ranch activities

Peggy Bieber: Craig's partner and full time office staff, handles all bookkeeping, cattle records, and clerks the sale.

Craig Howard: Cowboss, AI technician, welder and equipment repairman.

Lindley Harrington Howard: Social media manager at BRAR. Past summer intern and day help hand. Helps clerk the sale. Craig Howard's wife.

Michael Chapman: Head Mechanic, herdsman, handles all cattle feeding.

Tom Churchwell: Herdsman, general ranch duties, light mechanics.

Dillon Spurr: Herdsman, general ranch duties.

Eric Payne: Day help hand. Eric and Megan are now living at Mina Lake and sells insurance. Check out page 51.

Megan Payne: Day help hand. Helps clerk the sale. Eric's wife.

Presley Lynn Payne: Newest member of the Bieber Red Angus Family and daughter of Eric and Megan Payne.

Kristin Harms: Office/all-around assistant. Graduated from Augustana College has a full time job at Raven Industries in Sioux Falls, SD. Helps clerk the sale. Married to Jake Harms 8/1/2015.

Jake Harms: Husband of Kristin Harms. Jake helps us out whenever he can.

Bieber Red Angus Interns: We have always believed that experience is the best teacher and in our internship program we look for individuals that help us through some of the more intensive times like calving and breeding. We look for a "can do" attitude and a commitment to the beef business. We are always looking for opportunities to share our operation with young people interested in the seedstock business. You may have seen some of these interns in the past year.

% Rank	68%	% Rank		68%								

Heifer calf due 3/9/2016 sired by sired by either LSF RAB EXCLUSIVE 2793Z OR BIEBER SPARTACUS A193. DNA Testing will be necessary to determine sire.
 Lot 1 is a great Romero daughter with a stout record to boot. She has posted a 110 MPPA. We just weaned 15 ET calves out of her and Bieber Hard Drive Y120 and they will be easy to find next spring. One of the things that Romero daughters are really noted for is their extremely easy fleshing ability which keeps them in the herd a long time. Rose 246U, her dam, and granddam all spent time in our donor pen. Lot 1 is definitely a cow that deserves a look if you are going to add a top cow. Because her due date falls on the line her calf will require DNA testing to determine sire but either way this heifer calf will end up in the keeper pen.

% Rank	2%	% Rank		1%								

Unsexed calf due 4/7/2016 sired by SCHULER ENDURANCE 2101Z.
 Every year we sell every cow that is 7 and bred. Lot 3 was in the donor pen last year, consequently she was open and we decided years ago that is was our policy to not sell any open cows. We will have lots progeny to market and put in the replacement pen in the next two years as she was a prolific donor. Lot 3 has been one of the best EXT 5233 daughter we have owned. Don't miss she is in the top 2% for HerdBuilder and top 1% for Gridmaster. Lot 3 definitely qualifies as a donor in any herd.

% Rank	97%	% Rank		82%								

Bull calf due 2/19/2016 sired by BIEBER ROLLIN DEEP Y118.
 Lot 5 has a birth mark on her side. Jim Shirm always used to say that is where the egg was laying against the side of the straw on a frozen embryo. Yes this cow is the result of our ET program. Her dam was the dam to a bull Select Sires marketed for several years, Maximus 9663. Lot 5 hit a home run with a top bull calf her first year and we decide to flush her early. We now have 9 daughters in the herd and that makes it a little easier to see here offered. She has been flushed.

% Rank	84%	% Rank		33%								

Heifer calf due 2/18/2016 sired by BIEBER ROLLIN DEEP Y118.
 Some cows take a while to get noticed around here, if they don't have a top bull early and this cow is a prime example. Lot 2's first 2 calves were heifers and all retained in the herd. Her pedigree makes her an outcross to a lot of the Red Angus breed. She has a MPPA of 106 and has been in our donor pen the last year. She is very impressive individual and won't take long to find.

Unsexed calf due 4/6/2016 sired by BIEBER FEDERATION B544.
 This is a cow that we really struggle to let go. She is young and has great potential ahead of her. We need to sell a certain number of cows each year so we sell every cow that is 7, every spring calver with a due date of 4/1 or later and every May/June calver due after 6/10. That makes us give up some great young cows and Lot 6 is going to be missed.

Heifer calf due 2/14/2016 sired by BIEBER ROLLIN DEEP Y118.

Lot 7 is due bred to Rollin Deep Y118 and looking at the Roosevelt bull calf she just weaned this ought to be a sure shot. That bull calf will likely be at the top next spring. There isn't much this cow does wrong on the data and she should have been flushed.

Heifer calf due 2/19/2016 sired by BIEBER ROLLIN DEEP Y118.

Lot 9 is the kind of cow that always maintains great body condition and has passed both that and the ability to marble. She is in the top 2% for marbling. She has 3 daughters in the herd as well.

Bull calf due 3/6/2016 sired by LSF SRR TRIUMPH 3100A.

The 2008 born cows are the last of the Basin owned cattle to sell. The Basin acquisition really jumped our quality and it is tough to see these hard working cows go. This one has a MPPA of 106 and has done a great job.

Heifer calf due 2/20/2016 sired by **BIEBER SPARTACUS A193**.

BLACK. Lot 14 has been a donor and has much to her credit. Her first daughter produced a herd sire for Bachman Red Angus and then went missing in a blizzard in the winter of 2012-2013. She sent a son to Frank Zermeno, TX and we decide she needed to be in our ET program. We just weaned some progeny and think we have some very good prospect to not only replace her but also to top a sale. Lot 14 is sired by EXAR 263C a leading 1407 son which makes her an outcross to most any program. The heifer calf she is carrying will be a keeper regardless of whether she is red or black.

BIEBER RED ANGUS COMMERCIAL BRED HEIFERS

This year again, Bieber Red Angus Ranch is offering several groups of commercial bred heifers from our customers. The details of each group are below. They will be sorted into uniform calving groups and sold in groups of 5 or more. They will sell in tag order. Each group will be tagged in a series, so the winning bidder will have the right to buy the first 5 and as many as they want within that lot in increments of 5. All these females have been on a good vaccination and nutrition program. Video will be available thru our website 10 days prior to the sale. They will be tagged with individual IDs and will sell in order of tag number. This information along with ultrasounded calving dates will be available on sale day. We will announce sale order on sale day of these heifers. Please feel free to contact the producer any time before the sale.

Lot 270, 271, 272, 273, 274, 275, 276, 277, 278, 279, 280, 281, 282, 283, 284

Each lot will contain 5 heifers.

75 head of Red Angus heifer from Vander Linden Farms 605-880-3036

These heifers are sourced from 2 top quality herds in Montana and Wyoming by Todd. The heifers are all AI bred to Select Sire's RREDS Take Out 305A to calve March 1st. The heifers have been ultrasounded for pregnancy and are solid red in color.

Lot 285, 286, 287, 288, 289, 290, 291, 292, 293, 294

50 head of Red Angus heifer from Vander Linden Farms 605-880-3036

These heifers are sourced from top quality herds in Montana by Todd. The heifers are all AI bred to Select Sire's RREDS Take Out 305A to calve April 1st. The heifers are ultrasounded for pregnancy and are solid red in color.

Lot 295, 296, 297, 298, 299, 300, 301, 302, 303,

45 Red Angus heifers from Wade Moser cell 701-226-4269

THESE HEIFERS WILL NOT BE AT THE SALE AND SELL ON VIDEO. Video of the heifer will be available on our website. The heifers will sell on the video and deliver within 1 week of the sale from Bismarck, ND. These heifers are sourced from ND by Wade Moser from leading producers. The heifers are bull bred to Bieber Samurai X22 and STRA Makin Hay 124. Ultrasound information will be made available to purchaser. The Heifers are due to calve March 22 thru April 20. The heifers are solid red. These heifers will not be at the sale. They will be shipped from Wade's place after the sale. They will be gate cut not by individual tag number. Feel free to contact Wade to view the heifers before the sale.

Lot 305, 306, 307, 308, 309, 310, 311, 312, 313, 314, 315

55 head of Red Angus heifers from Mark Gross, Bridgewater, SD cell 605-366-3068. These are home raised heifers. The heifers start calving March 15th, pasture exposed to Bieber Red Angus bulls (Samurai sons) turned out for 50 days. These heifers are ultrasound measured for pregnancy and are solid red heifers. The Gross heifers have been managed by Bieber Red Angus and Bruce and Lynette Durham.

Lot 316, 317, 318, 319, 320, 321, 322, 323, 324

45 head of Red Angus heifers from Dusty Sturgeon, Starkes City, MO. 417-489-0039.

THESE HEIFERS WILL NOT BE AT THE SALE AND SELL ON VIDEO. Video of the heifer will be available on our website. The heifers will sell on the video and deliver within 1 week of the sale from Starkes City, MO near Joplin MO. They will be shipped from Dusty's place after the sale. They will be gate cut not by individual tag number. Dusty has sourced these heifers from Mark Gross, Randy Shulz, Larry Olson and Duane/Andrew Bueber, all longtime customer of Bieber Red Angus. These heifers will begin calving on February 20 and will calve for 25 days. They are all sired by Bieber Red Angus Bulls with a CED of 7 or higher. Feel free to contact Dusty to view the heifers before the sale.

Lot 325, 326, 327, 328, 329,

25 head of Red Angus Heifers from Pearl Creek Cattle Company, Cavour, SD Ben Miner 605-354-1026 and Donnie Miner 605-354-7070. These heifer are home raised heifers bull bred to 3 Fusion sons. The heifers will begin calving Feb 21 thru March 15th. The Miners have been using our bull since 1999 and decide to offer bred heifer this year instead of selling open heifer calves.

"WE GIVE MULTIMIN[®] 90 AT BIRTH, BRANDING, BREEDING & ON ALL OF OUR BULLS"

Brock Kerr, DVM
Chad Kerr, DVM

Dodge City Veterinary Clinic
Dodge City, KS

Videos at YouTube
"Multimin USA" Channel

.....
We AI using **MULTIMIN[®] 90** on customers' heifers to help synch their program and we're seeing a 10% to 15% increase (from 55% to 70%) with settling rates and that's a **BIG DEAL**. In our bull breed programs with first calf heifers, we're seeing 96% to 97% conception rates and second calf heifers a rate of 94%—again that's really good! Before **MULTIMIN[®] 90** we were only seeing an 82% rate. On the herd health side we've seen some really impressive results on calf sickness, mortality and morbidity. And in our stocker cattle, we're using a lot less antibiotics.
.....

The Rancher's Guide to 50K

Bull selection is one of the most significant decisions ranchers make in terms of influencing the overall profitability of their operations; therefore, Red Angus strives to deliver reliable genetic predictions to stakeholders to ensure producers are making the most informed decisions possible in pursuit of production goals.

For years, ranchers utilizing Red Angus EPDs (Expected Progeny Differences) in their selection decisions have enjoyed the built-in reliability and risk reduction provided through the breed's early adoption of Total Herd Reporting (THR) data. To further advance EPD accuracy and reliability, Red Angus can now incorporate 50K genomic data.

For generations, animal breeders have relied on phenotypic measurements to determine what the animal possesses at the gene level. Now, with the inclusion of 50K genomic data, we can actually measure the impact of identified gene effects before the weight or measurement is ever recorded.

Red Angus' new 50K test proves to be a game changer.

- **Ensure your yearling heifer bulls are “calving-ease specialists.”**
- **Confirm your cowherd-building bulls have optimal genes for maternal traits.**
- **Make certain your carcass bulls are superior grid producers.**

Information gained from 50K genomic data and Total Herd Reporting data provides Red Angus stakeholders' EPDs with unsurpassed reliability.

BIEBER RED ANGUS BULL DEVELOPMENT

At Bieber Red Angus, we have learned a lot in 47 years of producing the type of bulls customers come back for year after year. Stacking the right genetics to produce efficient and profitable cattle has always been the Bieber way, but the truth is that there is a lot more to it than mating the right cows to the right bulls.

Developing bulls is 1/3 skill, 1/3 science and 1/3 art. Feed too much and cattle get fat and will not hold up for our customers. Feed wrong and you lose out on a bull expressing his full genetic potential. Every year we have customers tell us how our bulls stand up better compared to bulls from other breeders. We are very proud of the longevity these bulls have under reasonable conditions.

Our development program is designed to accomplish three goals: 1) feed at a moderate rate of growth to the point of full genetic expression, 2) develop bulls in a management program we believe is similar to how our customers will manage their calves and 3) use feed-stuffs raised on our ranch that are similar to what we feel our customers will have access to.

The program starts them on a high roughage diet (44 Mcal) for the first 45 days to allow calves a low-stress introduction to bunk feeding and diet change and to establishing a pecking order. The performance targets for this receiving phase are expected to be 1.5 to 2 lbs. of average daily gain (ADG). We feel that the receiving phase is the most important part of our development program because it prepares the rumen flora to handle diets with increasing amounts of energy.

After the initial receiving phase, the goal of the program is to slowly increase diet energy to properly develop muscle density and marbling deposition while maintaining sound structural and physiological development. At this point, bulls are stepped up to a 48-Mcal diet for three weeks and then a 52-Mcal diet for three weeks with a performance target of 2.25 to 2.7 lbs ADG.

The final stage of the program is to bring bulls to full genetic expression and reach a working level of body condition on a 57-Mcal diet with performance target of 3.2 to 3.5 lbs. ADG—to bring the customer that high-performance, stylish bull that the Bieber brand is known for.

After the collection of carcass scan data, the bulls are moved back down to the 48-Mcal diet and kept in a "holding pattern" through the sale until delivery. When you look through the catalog you will see many bulls gaining between 3 and 4 pounds per day. These bulls are not underfed; yet when you walk through the pens on sale day these bulls are not fat either. With 47 years of experience, we have found that elusive balance that so many others seek to find. We can talk about genetics all day, but if the bulls are overfed they just won't stand up in the long run.

The truth is it just makes sense to buy 47 years of experience. If you have questions concerning our bull development program, contact Craig or our consulting nutritionist Eric Mousel of High Plains Ranch Management Services 605/690-4974.

Bieber Deep End B597 reads just about as good across the board as one can make one. Deep End's dam is the dam of Hard Drive Y120 who sired around 180 calves we have just weaned this fall. The only other sire that comes close is Deep End's sire Bieber Rollin Deep Y118 with around 130 head. Bieber Deep End B597 sells leased to Genex and the Buyer will have possession after an inventory of semen is collected and also receive 50% of semen sales. The buyer's possession, dependent upon semen inventory, will be from May 1 to September 1 each year. Deep End B597 was used natural service in our herd and we will have progeny next year giving him a jump start on the predictability of his data. This bull brings together two top sire lines not to mention, two of what are some of the very top cowlines at Bieber Red Angus Ranch. A full brother also sells as lot 207. Deep End will be heading to Genex Hawkeye West early the week following the sale.

The Primrose cow has produced more herdsires than just about any cow in the Red Angus breed. Last Spring Lot 5 Bieber LETS ROLL B563 sold to Crump Red Angus, and topped the sale he is a full brother to this lot, 161. Primrose 2043 has over 70 progeny to date and countless daughters who have been flushed. We used this bull cleanup on two-year-olds this year.

Lot 163 is a full brother to the previous lot and to 167, 172, 176, 185, 187, 209, 215, and 241. His dam was in our ET program and sold in last year's sale as she reached 7 years of age. We sell every bred cow when she reaches the age of 7 and weans her calf. She sold to Trine Owen, TX who had been looking for a Primrose daughter for several year. We used this bull cleanup on cows this year.

Lot 162 has had several maternal brothers that have been gathered up by some of our best customers. Leland Red Angus purchased one of the top brothers in March 2014 and another sold to Donnie and Ben Miner, SD. The Primrose cowline has provided us with a great deal of genetic lead time. A full brother sells as lot 197. Several full brothers sell as lots 163, 167, 172, 176, 185, 187, 209, 215, and 241. This is a great opportunity to buy a couple of full brother to turn out in your pasture. We used this bull cleanup on two-year-olds this year.

Lot 174 is a grandson of one of the leadoff cows and is a cow we flushed, lot 3 in this year's offering. This bull's dam is likely going to be a great one with two good ones to her credit and a future of great progeny. This is likely to be a lot out of a cow that will be in the Donor pen in time.

BULL MORTALITY *and* LOSS OF USE INSURANCE

Insurance Coverage Underwritten By:

Aegis Security Insurance Company
PO Box 3153, Harrisburg, PA 17105-3153
A.M. Best Rating: A VI

Option 1: Bull Mortality and Loss of Use Coverage

- Values:** Bulls valued up to \$25,000, not to exceed purchase price.
- Term:** One Year Policy Term
- Premium:** 12% of the Purchase Price
Premium Fully Earned
\$150 Minimum Premium Per Animal
- Testing:** All bulls must be tested, certified and listed in the official catalog of a herd sale.

Please see the reverse side for further coverage information.

Option 2: Bull Mortality Coverage

- Values:** Bulls valued up to \$25,000, not to exceed purchase price.
- Term:** Renewable One-Year Policy Term for Bulls 6 Month - 7 Years of age.
- Premium:** 5.5% of the Purchase Price
Premium Fully Earned
\$150 Minimum Premium Per Animal
- Testing:** Veterinarian examination and signed statement of health required for all bulls for which coverage is requested.

Full Mortality:

100% of the value of the bull in the event of death or life-threatening injury.

Loss of Use:

80% of the value of the bull, less salvage value, of in the event of Loss of Use from an accident, illness, or disease that can clearly be diagnosed or identified to have occurred on a specified date.

25% of the value of the bull in the event of Loss of Use from an accident, illness, or disease if there is a diagnosis consistent with an accident, illness, or disease but no real evidence that provides clear diagnosis or identification.

Full Mortality:

100% of the value of the bull in the event of death or life-threatening injury.

Bull Selection Simplified.

Building a cow herd?

- Combine low-expense traits (ME EPD) with acceptable revenue traits to breed efficiency into the cow herd.
- Improve fertility with selection pressure on HPG EPDs.
- Sleep through the night by selecting high-CEM EPDs.
- Improve longevity and lower replacement rates by selecting higher-than-average STAY EPDs.

Breeding virgin heifers?

- Select for CED EPD as the most meaningful predictor of calving ease. Red Angus' CED combines birthweight and other factors affecting calving-ease scores.

Selling calves or yearlings?

- Heavier payweights may be achieved by selecting higher WW EPDs, but...make sure heavier is what you want. Heavier weaning weights mean heavier payweights for calf feds. However, for those who background their calves, too much weaning weight could translate into yearlings that are too heavy when they enter the feed yard, and finish too heavy. **Overshooting performance goals can be just as detrimental as falling short.**
- Enhance your reputation - improve traits that impact feeder profits, such as carcass traits and post-weaning gain (YW).

Retaining Ownership?

- Docile and fast starting, Red Angus are easy to start on feed and keep on feed.
- Balance YW EPD of potential bulls with the existing cow herd to pinpoint needed improvement for post-weaning gains.
- Increase payweight with selection for improved CW EPD.

Selling on a Grid?

- Fine-tune marbling (MARB), rib eye area (REA), and back fat (FAT) EPDs to target value-based grids.
- Target YG 1 & 2 premiums and avoid YG 4 discounts by applying selection pressure on YG EPD.
- Optimize carcass weights to increase payweights while avoiding discounts for heavy weight carcasses.
- Balance Carcass EPDs against existing cow herd genetics:
 - Cowherds of higher continental influence may require additional selection pressure on marbling EPD to improve quality grade.
 - High-percentage British cowherds typically benefit from selection pressure to reduce YG and increase CW.

Ranch Tested. Rancher Trusted.

Thistle Ridge and Silver Spur purchase Rollin Deep Y118 in 2012. We decided this spring with the impact he was making on our program that we should walk the bull so we bought natural service from Thistle Ridge. Rollin Deep Y118 new picture shows he is a powerful sire that does the cow man things right. His pedigree is well known for producing power cattle with exceptional feet, udders, and fleshing ability. Rollin Deeps dam, Bieber Tilly 399W has become a centerpiece in our ET program and his sire, Bieber Roosevelt has become of cornerstone to our commercial customers producing thick cattle with great dispositions. Rollin Deep Y118 is the kind of bull that can leave positive impact in the breed for years to come. If you are looking for a bull that sires great phenotype, power and makes balanced cattle with the ability to flesh, breed back, stay sound and productive for the long haul. Look no further. Hughes has made a big impact in our program the last couple of years. Hughes is a sire that is being used on a national basis via AI and has topped multiple sale offerings. What makes Hughes really shine is his females. They are very feminine with a loads of capacity while staying very functional and we think they will make great cows. Semen Available thru Bieber Red Angus.

Hard Drive Y120 sold to Select Sires in our 2013 production sale. When you study Hard Drive's data you are pretty hard pressed to find a sire that will post as many traits in as high of percent rank as he does. Hard Drive has went lower on B₁ and high on growth so expect his progeny to be in high demand. We weaned over 180 Hard Drive calves this fall and we expect that he has a son or hopefully tow that will rise to the top in 2016.

Cyclone 9934W really caught our eye in 2011 at the Ludvigson Sale and Jon Marshall, TX, bought him. We talked to Jon about a possible lease on the bull and Cyclone has been used here naturally. He sired a high selling bull, Bieber Stormer Z433 who sold to Bachman Red Angus, MO and Accelerated Genetics. We continue to use Cyclone for his leading growth and carcass.

Profit \$implified...

Multi-breed EPD base simplifies selection

Since 2010, the Red Angus Association of America (RAAA) and the American Simmental Association (ASA) have combined their growth and carcass datasets to provide commercial producers with the most reliable EPDs in the beef industry. In the summer of 2012, RAAA and ASA adopted a common base for Growth (BW, WW, YW, Milk) and Carcass (MARB, YG, CW, REA, FAT) EPDs so that all animals registered in either RAAA or ASA can be directly compared – regardless of breed makeup.

What is BASE?

For decades, each breed association has presented EPDs in their own language (the base). Base is no more than a reference point for any trait against which subsequent generations of animals are compared. The establishment of a base ensures that the population future generations are compared to remains stable, which allows the breed's genetic trend to be accurately identified.

Raw Genetic Value + Base Adjustment = Published EPD

Study Percentile Ranks...

Percentile ranks are an easy reference and therefore a powerful tool to assist you in becoming accustomed to the new multi-breed base. Red Angus EPD percentile ranks are presented along with all active animals' EPDs, and reference how animals compare within their respective Red Angus subpopulations, i.e. Sire Summary Sires, Active Dams, Non-Parent Bulls, etc. It's important to realize that although the multi-breed base allows for the direct comparison of Red Angus and Simmental EPDs, the percent ranks for Red Angus animals will continue to simply compare the genetics of Red Angus animals against other Red Angus. Thus, an animal that was in the top 10% for growth under the old Red Angus base will still be in the top 10% for growth in the new Red Angus multi-breed base.

Example:

In the past, you preferred to purchase bulls that had a -2.0 or lower BW EPD.

Since a -2.0 on the old RAAA base represented the top 20% for BW, you now need to use -2.7 as your critical selection threshold as that represents the top 20% for BW on the new multi-breed base.

Other Examples:

Previous Selection Threshold Old RAAA Base		New Selection Threshold New Multi-Breed Base	
EPD	% Rank	EPD	% Rank
36 WW EPD	40%	58 or higher WW EPD	40%
0.08 MARB EPD	50%	0.38 or higher MARB EPD	50%
0.24 REA EPD	20%	0.30 or higher REA EPD	20%

Predicting Profit...

...The Ranchers Guide to EPDs

Cowherd Building Traits

Profit starts at Reproduction!

Placing selection pressure on traits that will have a direct impact on your marketed product (weaned calves, yearlings, carcasses sold in the meat) can certainly increase your revenue on a per calf basis. However, in order to achieve the higher goal of increased revenue per cow exposed, selection pressure must be placed on cow herd building traits.

Profitable reproduction can be boiled down to success in these four Economically Relevant Traits:

Calving Ease Direct (CED): The expected progeny difference of calves being born unassisted from two year-old heifers. The Red Angus CED model accounts for contemporary group birth weight differences and calving ease scores.

Heifer Pregnancy (HPG): The expected progeny difference of heifers conceiving to calve at two years of age.

Calving Ease Maternal (CEM): The expected progeny difference of a given animal's daughters calving unassisted at two years of age.

Stayability (STAY): The expected progeny difference of a bull's daughters remaining in the herd until at least six years of age. Females that don't stay in the herd that long are losing money, and they also contribute to a higher rate of replacement females that the rancher can't cash crop.

Cows Eat Money! That's why Red Angus published the Mature Cow Maintenance Energy EPD (ME EPD), becoming the first beef breed to evaluate the expense side of the ranchers' profit equation. Here are the facts:

- ME predicts differences in maintenance energy requirements of mature daughters of a bull.
- Maintenance energy requirements are directly related to feed cost - often producers' largest single expense.
- The lower the ME EPD, the less feed daughters require to maintain body condition.
- ME can be used to ensure environmental fit, and to estimate additional feed required by increased growth & milk.

With a long standing commitment to better serve this continually changing beef industry, Red Angus has prepared for tomorrow's challenges through New & Improved Genetic Predictions (EPDs).

Red Angus has combined databases and subsequent EPD calculations with the American Simmental Association in order to simplify producers' use of crossbreeding programs by supplying them with true multi-breed EPDs. This enhancement enables Red Angus to provide reliable EPDs on all animals in the database, regardless of breed composition. Additionally, with the recent changes to carcass value Red Angus has added Carcass Weight and Yield Grade to its arsenal of ERTs.

EPDs are the most reliable predictors of an animal's true genetic merit. As the only major beef breed to mandate Total Herd Reporting (THR), Red Angus EPDs have the built in advantage of being calculated from 15 years of complete contemporary group data. EPDs have "fast-tracked" beef cattle improvement and removed much of the guesswork associated with selecting range bulls.

Lot 1 has been a standout since he was born. His dam is one of Gene House's, very best cows, posting average progeny ratios of WW 110 and IMF 137. Lot 1 is in the top 1% for both of the new indexes and posts some data that is really hard to match. His sire has been making us take notice and we like what we see in his calves. Overload is going to turn some heads on sale day.

1. **Lot Number** - This is the lot number of the animal. Cattle will have a white tag that will correspond to that number. Generally cattle will sell in Lot number order.

2. **Name** - This is the registered name of the animal. Generally we name bulls after the sire and females after the dam name.

3. **Born** - This is the birth date of the animal.

4. **Reg** - This is the Registration number of the animal. All Red Angus animals can be looked up on the Red Angus website at www.redangus.org and going to the animal search page and using this registration number.

5. **Breed** - This area has the breed composition and category as determined by the Red Angus Association of America. Breed Codes are AR-Red Angus SM-Simmental XX-Unknown. The Unknown cattle are largely cattle that we couldn't prove percentages of parents on the Durham herd. That unknown breed is either Simmental or Red Angus in the Durham foundation cattle.

- AR = RED ANGUS
- SM = SIMMENTAL
- UKN = UNKNOWN

6. **Category**

- 1A=100% Red Angus with no disqualifying features
- 1B=87% to 99.9% Red Angus with no disqualifying features
- II Equal to or greater than 87% up to and including 100% Angus blood content having one or more disqualifying characteristics. Disqualifying Features include scurs or horns, illegible white, black pigment, progeny of multiple sire groups, and missing birth date, or weaning weight and date
- III=Less than 87% Angus blood content

7. **Sire** - Sire of the animal

8. **Paternal Grand Sire** - Sire of the Sire

9. **Paternal Grand Dam** - Dam of the Sire

10. **Dam** - Dam of the animal

11. **Maternal Grand Sire** - Sire of the Dam

12. **Maternal Grand Dam** - Dam of the Dam

13. **MPPA** - Most Probable Producing Ability -- An estimate of a cow's future productivity for a trait (such as progeny weaning weight ratio) based on her past productivity. For example, a cow's MPPA for weaning ratio is calculated from the cow's average progeny weaning ratio, the number of her progeny with weaning record, and the repeatability of weaning weight.

14. **AoD** - Age of Dam at the time of weaning the progeny identified.

15. **ADG** - Average Daily Gain -- Measurement of daily body weight change over a specified period of time of an animal on a feed test.

16. **ADG Ratio** - Average Daily Gain Ratio - The ratio of the animal within its contemporary group. ET and Twins will be marked with a TW and ET. These animals have no contemporary group.

17. **WDA** - Weight Per Day of Age -- Weight of an individual divided by days of age

18. **WDA Ratio** - Weight Per Day of Age Ratio -- Weight of an individual divided by days of age. ET and Twins will be marked with a TW and ET. These animals have no contemporary group.

19. **AScr.** - Adjusted Scrotal Circumference--A measure of testes size obtained by measuring the distance around the testicles in the scrotum with a circular tape. Related to semen-producing capacity and is adjusted to Yearling age. Actual Scrotal Measurement are provided on a supplement sheet 1 week prior to the sale and at the sale.

20. **CE** - Calving Ease Score -- This is our recommendation for CE based upon the data and the pedigree. ** = Use on heifers. Expect less calving difficulty. * = Use on growing heifers and cows. Expect moderate calving difficulty on heifers and very little difficulty on cows. * = Use on cows. Expect difficulty on heifers and some to very little calving difficulty on cows.

21. **Grw. Sc.** - Growth Score -- This is our recommendation for growth based upon the data and the pedigree. G 6 = maximum growth rating, G 5 = high growth rating, G 4 = moderately high growth rating, G 3 = average growth rating, G 2 = below average growth rating, G 1 = low growth rating.

22. **DNA** test ran on this animal.

23. **EPD** - Expected Progeny Difference -- The difference in expected performance of future progeny of an individual, compared with expected performance of future progeny of an individual of average genetic merit in the base time frame for the genetic evaluation. EPDs are estimated from phenotypic merit of an individual and all of its relatives and are estimates of one-half the breeding values. EPDs are generally reported in units of measurement for the trait (e.g., lb., in., etc.).

24. **acc** - Accuracy -- A measure of the reliability of an EPD. Accuracy values are reported as decimal numbers between zero and one. Values closer to one indicate larger amounts of available information and greater certainty that a bull's EPD will not change significantly as more progeny information becomes available. Bieber Red Angus reports the accuracy values for sires since they have high accuracies. EPD are a more reliable estimate of performance than weight ratios or other measurements. Understanding ACCURACY. Red Angus EPDs are often presented with a corresponding accuracy value which measures the strength of the relationship between the genetic prediction (EPD) and true genetic value. Accuracies are reported as a decimal number from zero to one. As accuracy value approaches 1.0, the EPD is "accurately" or closely estimating the true genetic merit of an animal for a given trait. Although low-accuracy EPDs are less reliable when compared to those of proven sires, independent research demonstrates EPDs to be the most meaningful indicator of animals' true genetic merit. While "perfect" accuracies of 1.0, are never achieved, many heavily used Red Angus sires have accuracies greater than 0.9 (some as high as .99).

25. **%Rank** - This is the percentage rank of the EPD within the type of animal. Rank groups are Proven and Opportunity Sires, Active Dams and Non Parent under Two Years of Age.

26. **Wis** - Weight--The weight for that trait in that column adjusted to a constant days of age by Red Angus Association and Beef Improvement standards.

27. **Ratio** - Ratio--The ratio for that trait in that column within its contemporary group. ET and Twins will be marked with a TW and ET a have no contemporary group.

28. **CED** - Calving Ease Direct - predicts the probability of calves being born unassisted out of 2-year-old heifers. Producers want live calves - born unassisted. Selecting on actual birth weight is flawed; it is influenced by non-genetic factors such as nutrition and weather (ambient temperature). While BW EPD removes these non-genetic factors, Red Angus CED EPD is the best predictor of calving ease. The CED EPD includes variation in BW plus other influential genetic factors such as gestation length, calf shape, etc.

29. **Birth Weight EPD** - predicts the difference, in pounds, for birth weight, and is also used in the calculation of Red Angus' Calving Ease Direct (CED) EPD.

BW - Birth Weight (BW) -- The actual weight in pounds at birth.

30. **Weaning Weight EPD** - predicts the difference, in pounds, for weaning weight (adjusted to age of dam and a standard 205 days of age). This is an indicator of growth from birth to weaning.

WW - Weaning Weight-- The 205 adjusted weight. This is an indicator of growth up to weaning.

31. **Yearling Weight EPD** - predicts the expected difference, in pounds, for yearling weight (adjusted to a standard 365 days of age). This is an indicator of growth from birth to yearling.

YW - Yearling Weight --The 365 adjusted weight. This is a measure of growth from birth to yearling.

32. **Milk EPD** - (MILK) predicts the difference in maternal production of an individual animal's daughters as expressed by the weaning weight of their calves.

33. **TM** - Total Maternal EPD -- predicts the rancher's actual observation of weaning weights of calves raised by an animal's daughters. TM includes the daughter's milk EPD plus half of her genetic contribution to her calf's weaning weight EPD. The formula for TM EPD is: TM EPD = Milk EPD + 1/2 (WW EPD)

34. **ME** - Maintenance Energy - predicts differences in daughters' maintenance energy requirements and is expressed in Moal/Month. Recognizing that 70% of cow herd feed costs are burned up in maintaining weight and condition, Red Angus' ME EPD allows for the selection of bulls whose daughters will require less feed; thus, reducing cowherd expenses. Include selection pressure for ME EPD to ensure feed costs don't get out of line when selection is made for greater performance and production. At Bieber Red Angus we collect cow weight at weaning time to insure greater accuracy of this EPD.

35. **HPG** - Heifer Pregnancy - predicts the probability of heifers conceiving to calve at two years of age. Many breeds offer genetic predictions of yearling bull scrotal circumference as an indicator of age of puberty. While puberty is a prerequisite, many factors influence pregnancy rate. Red Angus HPG EPD offers a tool which selects for what is economically relevant to ranchers - pregnant heifers. At Bieber Red Angus we submit all heifer breeding data to insure the accuracy of this EPD.

36. **CEM** - Calving Ease Maternal (CEM) - predicts the probability of a given animal's daughters calving unassisted at two years of age. Replacement heifers should be able to calve on their own. Red Angus CEM EPD offers the industry's most reliable prediction to address that concern. It includes not only the predisposition for a female to calve unassisted, but also her contribution to her calf's traits (birth weight, calf shape, etc.) that make it more likely to be born unassisted.

37. **STAY** - Stayability (STAY) -- predicts the probability of a bull's daughters remaining productive until at least six years of age. Why six? That's how long it takes a female to break-even given all the expenses of development.

38. **MARB** - Marbling Score- predicts differences for carcass marbling score as expressed in marbling score units. Higher marbling scores are positively correlated with higher carcass quality grades.

39. **REA** - Rib Eye Area - predicts differences of carcass Rib Eye Area between the 12th and 13th rib. Increased Rib Eye Area has a beneficial effect on Yield Grade which also includes Carcass Weight and Fat Thickness.

40. **FAT** - 12th Rib Fat Thickness - predicts differences for carcass fat depth over the 12th rib, as expressed in inches. Increases in fat thickness has a detrimental effect on Yield Grade. Fat thickness measured in young seedstock, maybe an indicator of fleshing ability.

41. **HerdBuilder Index**
 As the name indicates, implementation of the HerdBuilder Index will assist producers in building profitable herds. The HerdBuilder Index is built using the following production scenario:

- Red Angus bulls mated to cows and heifers (resulting progeny ¼ Red Angus, ¾ Simmental)
- Replacement heifers retained from within the herd
- All progeny sold on a quality-based carcass grid.

42. **GridMaster Index**
 While Red Angus has traditionally been known as a superior maternal breed, those who have retained ownership in Red Angus calves know of their potential to excel in the feedyard and ultimately hang a premium carcass. The GridMaster Index is built using the following production scenario:

- Red Angus bulls mated to cows (resulting progeny ¼ Red Angus, ¾ Simmental)
- All progeny sold on a quality-based carcass grid.

43. **Footnote** - This is information we would like to point out about the lot. It may contain breeding information on bred cattle.

TERMS AND CONDITIONS

The Red Angus Assn. Terms and Conditions will apply if the terms and conditions printed here are not applicable.

BIDDING DISPUTES: The auctioneer in charge will settle any disputes as to bids, and his decision on such matters shall be final.

TERMS: The terms of the sale are cash; the right of property shall not pass until after settlement is made. All settlements will be made with the clerks of the sale immediately following the conclusion of the sale and before any cattle will be released from the ranch.

RETAINED INTEREST: We are retaining 1/2 interest in all bulls in the sale. We are selling the remaining 1/2 interest, full possession, and full salvage value on these bulls. This option gives Bieber Red Angus Ranch the option to collect, use and market semen from the bull and does not restrict the purchaser from doing the same. This collection, unless agreed otherwise, would be done at the expense of Bieber Red Angus Ranch, at the buyer's convenience. Also at the time of purchase, the highest bidder on a retained interest bull may elect to purchase exclusive semen rights for 100% of the purchase price in addition to the purchased price on retained bulls. If a buyer elects to purchase exclusive semen rights, Bieber Red Angus Ranch interest then becomes in herd use only, but Bieber Red Angus Ranch retains all rights to use the bull within their herd.

SEMEN RIGHTS: Buyers receive semen rights proportional to the interest purchased. If you purchase a 1/2 interest, then you are entitled to 1/2 of the semen collections at cost provided that you indicate you want semen prior to collection. We intend to collect some of the bulls in the sale and sample them in our herd. We will cooperate with the buyer in collection of the bull. We prefer to collect most bulls after the first season of use and we will contact the buyer when we intend to collect the bull at a time convenient for the buyer.

PURCHASER'S RISK: Each animal becomes the risk of the purchaser as soon as sold. Animals will be fed, watered and cared for at the purchaser's risk for a reasonable time.

CERTIFICATE OF REGISTRY: A certificate of registry and transfer will be furnished for each animal sold as a registered animal, after settlement has been made.

HEALTH: All cattle will have official health certificates and will sell guaranteed exported to Canada. Canadian health certificates will be charged at cost on animals selling under \$4000.

ANNOUNCEMENTS: Changes of information contained in this catalog relating to the animals offered for the sale will be announced from the auction box and such announcements shall take precedence. Errors discovered in the catalog will be corrected by announcements at sale time, and such corrections will take precedence over the printed matter in this catalog.

BREEDER'S GUARANTEE: 1. All animals are guaranteed breeders, with the exception of: a) calves under twelve months of age; b) animals shown by Purchaser after sale (in cases of animals shown after purchase, the breeding guarantee, if any, shall be such as agreed upon between Seller and Buyer) c) Any open heifer that has been flushed for embryo transfer; or d) gross negligence or willful misconduct on the part of the Purchaser. 2. Bulls are guaranteed breeders if not allowed to run with the herd until at least 14 months of age. Any bull which either: a) settles 1/3 or more of the healthy cows he serves; b) is the sire of 20 or more animals; or c) settles cows by natural service and passes a fertility test made by a competent veterinarian during any 6 month period of trial (provided for in paragraph 2 of the section of these sale terms and conditions entitled "Options and Privileges of Return or Adjustment") shall be considered a breeder.

Any guarantee with respect to the ability to freeze semen shall be by separate agreement between Buyer and Seller.

Open females have not been served and are so guaranteed.

If you can't attend the sale & would like to buy cattle, call Craig (605-439-3628 / 605-216-8169 / 605-439-3545) before the sale. Tell us what you are looking for and we will assist in arrangement to help you participate in the offering.

We will call you after the sale and inform you of your purchases.

We guarantee your purchase will be satisfactory.

TELEPHONE BIDDING

We will have available telephone bidding by conference call. **If you wish to bid over the phone, please register before sale day.**

INTERNET BIDDING

See page 3 for information.

IDENTIFICATION: Each animal carries a readable tattoo. Tag numbers on the cattle correspond with lot and tattoo numbers in this catalog. Purchaser agrees to use full name of animal in advertising and on stall cards at shows.

OPTIONS AND PRIVILEGES OF RETURN OR ADJUSTMENT:

1. All claims for adjustment or refund must be made in writing either within six months of the sale date or no later than six months after the animal reaches 18 months of age, with the exception of claims involving defects or parentage.
2. In the event an animal is claimed to be a non-breeder, the animal may be returned to the farm of the Seller if in good condition and complying with the health requirements of the Seller's state. The Seller shall be entitled to six months' trial following the return of the animal in which to prove the animal is a breeder, the Seller shall, at the option of the Buyer, replace the animal with another of equal value or grant the Buyer a credit for use on any products marketed by the Seller. Such credit of the full purchase price shall in any case be deemed full satisfaction and settlement. Any expense incurred for transporting an animal claimed to be a non-breeder shall be the responsibility of the Purchaser, except that the Seller shall be responsible for the transportation costs in excess of the distance between the Purchaser's farm and the location where the sale took place. If the Seller proves the animal is a breeder, it shall be the obligation of the Purchaser to take delivery of the animal and pay all expense incurred for transportation.
3. If a female sold as "safe in calf" proves not to be in calf, the Purchaser may receive service from the bull previously used, if available, or if the bull is not available, the Seller shall be obligated to make a satisfactory adjustment on the purchase price upon return of the animal to the farm of the Seller. Any adjustment provided for herein shall absolve the Seller from further liability, except in case such female proves to be a non-breeder. If a female represented as "safe in calf" at time of sale to a certain bull proves to have been bred to a different bull, the Seller shall be obligated to take a satisfactory adjustment on the purchase price upon return of the animal to the farm of the Seller (adjustments shall not be considered to a breeding fee or an allocation of the purchase price to any unborn calf). Any expenses incurred for transportation shall be the responsibility of the Purchaser, except that the Seller shall be responsible for the transportation costs in excess to the distance between the Purchaser's farm and the location where the sale took place.
4. If a female sold as "served" proves not to be in calf, or if a female sold as "pasture-bred" proves not to be in calf, the Seller only guarantees such female to the breeder.
5. If a female sold as "open" proves to be with calf, the Purchaser may return the animal to the farm of the Seller prior to calving for a credit of the full purchase price or for another animal of equal value, whichever is acceptable to the Purchaser. It shall be the obligation of the Seller to bear any expense incurred for transportation.

LIABILITY: Neither owners, sale managers, clerks nor anyone connected with the sale assumes responsibility, legal or otherwise, for damages of any kind.

CONTRACT: The above terms and conditions shall constitute a contract between the buyer and seller of each animal sold.

IMPLIED WARRANTY: Except for those stated in the terms and conditions, there are no warranties, either expressed or implied, as to merchantability or fitness for a particular purpose with respect to the cattle being sold in this auction. The warranties set forth in terms and conditions are in lieu of all other warranties, either expressed or implied, and the remedies proved therein shall be the sole and exclusive remedy of the buyer, or any part claiming through buyer, for any breach of warranty or guarantee therein provided and all other obligations or liabilities.

We guarantee your purchase will be satisfactory.
