SALE ORDER IS CATALOG ORDER!

Welcome to Bieber Fever IV.

We feel that this is one of the best sets of bulls we have ever sold, and we are beginning to think we say that every year. Our thoughts are that if the program is working this will happen. And we really think it is happening in our program. The sale cattle have come on well and we really think that this offering will be the best we have offered to date.

We know that a lot of you have expected to buy a bull from a certain part of the sale. Last year the bulls high up in the order were as solid as we have ever sold and this year they are even better. The bulls at the front are just as solid as they have been, but the bulls up the line are better than ever.

Progressive seedstock suppliers these days have a flair for advertising every alliance they can with a feedlot, cattle buyer or sale barn. The truth is our personal alliance with you, our customer, remains at the top of our priority list. We will continue to take the time necessary to explore new networking and marketing avenues/alliances so that you, our customer, will have access to some of the most progressive marketing opportunities in the country. Customer service is one of our highest priorities—get in touch with us via email or phone calls anytime concerning your calf crop or the cattle you purchase. If you want us to make a personal herd visit we urge you to let us know. Feel free to come to our place and explore our operation anytime as we also get to know you and yours. We still believe that one-on-one is the best way to get to know customers. Call Craig at 605/216.8169 to discuss your marketing options.

We have tested about half of the bulls with Pfizer's HD 50K. The EPDs are enhanced to reflect this testing, and the accuracies are higher than those of the bulls that are untested. We did this so that we can get a feel for whether or not the test has enough accuracy to continue to do and to improve the reliability of the EPDs. Greg Comstock from RAA and Larry Gran from Pfizer will be on hand on sale day to answer your questions. Feel free to ask any of us about that data.

Thank you for the interest in our program. We are always thankful for your support.

Craig

Located 14 miles from the Ranch, in the country.

DELIVERY POLICY:

Free delivery on all purchases over \$3000, to central points up to 300 miles. Volume purchases of 5 or lots selling to one ranch delivered up to 500 miles. All bulls under \$3000 and females will be delivered at cost. Central point for delivery will include auction barns, vet clinics and ranches that offer to serve as a delivery point. We simply ask for your cooperation in arranging the delivery of your cattle. This will keep the cattle from being on the truck longer than necessary and help to get the cattle to you with the least possible stress and in the best possible condition.

HEALTH:

Ashley Vet Clinic, 701-288-3234, will be available on sale day. All cattle are on a complete vaccination program supervised by Ashley Vet Clinic.

In the past bulls have been tested for persistent BVD carriers and all tests were negative for a number of years. We have chosen not to test the bulls this year since no positives have been found in over 10 years. Bieber Red Angus participates in the Beef Quality Assurance (BQA) program. Heifer calves have been Bangs vaccinated.

GENETIC DEFECTS:

Every animal in the Bieber Red Angus production sale is guaranteed negative for the recessive gene associated with Osteopetrosis and Arthrogyrosis Multiplex (Curly Calf Syndrome) and Neuropathic Hydrocephalus (NH). With this guarantee, we provide our customers the opportunity to purchase their choice of cattle with very little risk. DNA samples have been collected on every animal in the sale with any known carrier in the first three generations and tested negative unless otherwise noted.

RETAINED INTEREST:

We are retaining 1/2 interest in all bulls in the sale. We are selling the remaining 1/2 interest, full possession, and full salvage value on these bulls. This option gives Bieber Red Angus Ranch the option to collect, use and market semen from the bull and does not restrict the purchaser from doing the same. This collection, unless agreed otherwise, would be done at the expense of Bieber Red Angus Ranch, at the buyers convenience. Also at the time of purchase, the highest bidder on a retained interest bull may elect to purchase exclusive semen rights for 100% of the purchase price in addition to the purchased price on retained bulls. If a buyer elects to purchase exclusive semen rights, Bieber Red Angus Ranch interest then becomes in herd use only, but Bieber Red Angus Ranch retains all rights to use the bull within their herd.

BIRTHWEIGHTS/CALVING EASE:

We scored for calving ease with our three star (*) scoring system. Three stars (***) indicates that a particular bull can be used on heifers under standard conditions with little or no calving difficulty. Two stars (**) indicates that a particular bull should be

used on growthy heifers or cows under standard conditions with little or no difficulty. One star (*) indicates that a particular bull be used on cows. These bulls will produce little difficulty when used on cows. This recommendation is a system we use to help our customer with calving ease selections.

Birth weights are highly affected by environmental factors. Research indicated that the inclusion of corn in cow diets will increase BW. Also contributing to higher BW were cold temperatures in the winter of 2002/2003. The University of Nebraska conducted a three-year-study to research and evaluate effects of high and low temperatures during winter months on calves out of 384 two-year-old heifers. Average BW increased by 11 lbs. when temperatures were colder. The results agree with other studies that show calves born in the southern U.S. compared with calves born in the northern U.S. Weather plays an important role in BW and calving difficulty. We have adjusted the calving ease scores accordingly, taking into consideration what the calf ratioed on BW, pedigree and CE EPD and BW EPD.

FEEDING:

Feeding arrangements are available on all yearling lots will be fed at a charge of \$3.00 per day. We will feed your purchases from sale day until you are ready to pick them up, or we will deliver them.

BREEDING SOUNDNESS EVALUATION:

Breeding Soundness evaluations will be performed in February before the sale. We fully guarantee that these bulls will pass the Breeding Soundness Evaluation before the breeding season in 2012 if the bulls are managed properly. We recommend that all bulls tested in this sale be tested 4 to 6 weeks prior to your breeding season. We ask for your understanding if a bull does not pass. Sometimes bulls that have passed do not pass later for various reason. We will do our best to make sure you are satisfied. If you have any questions regarding Breeding Soundness Evaluation, feel free to call Craig or Dr. Dean Christensen at the Ashley Vet Clinic.

WEIGHTS:

Birth weights, weaning weights, yearling weights, and all other measurements are taken at appropriate times to produce sound and accurate comparisons within contemporary groups. We contemporary group our Red Angus calves based on the age of our cows. Calves out of two-year-old dams, three-year-old dams, and the main cowherd are all separate management groups and therefore are separate contemporary groups.

WEANING WEIGHTS:

All naturally born calves born at Bieber Red Angus Ranch are raised without creep. We feel that this helps us select and breed for dams that have milking ability and sound udders. ET calves are on creep feed to express their full genetic potential.

INSURANCE:

Livestock insurance will be available on sale day. Please see information 65.

SALE INFORMATION

AIR TRANSPORTATION:

Aberdeen is serviced by Delta Airlines. Huron and Pierre are serviced by Great Lakes Airlines which is affiliated with United and Frontier airlines.

INTERNET & ABSENTEE BIDDING:

We would prefer for each of you to be in attendance on sale day. Realistically, we know that there will be some scheduling conflicts and distance limitations. In these cases we have arranged for you to be able to participate in the sale on an absentee basis with a conference call dedicated to bidding. We will have available one phone line which can accommodate 20 to 30 bidders. Please call prior to the sale and register as a prospective buyer. We have limited capabilities to bid by phone during the sale. Your best option is to be in attendance at the sale, but if you cannot attend or feel more comfortable bidding yourself, we need to warn you of complications in the past with phone service, such as the volume and the rapid pace at which our sale moves. If we handle the bids for you, they will be done in the strictest of confidence. However, if you want to attempt bidding by phone, please make arrangements prior to sale day by calling Craig or Peggy. For internet bidding information, see DVAAuction below.

If you are unable to attend and you feel comfortable doing so, you can leave those bids with the Bieber family, auctioneer, or publication representatives. We handle many sight unseen bids and have very satisfied customers who feel confident in using that service. We prefer to have plenty of time to discuss your needs over the phone prior to sale day so that we may select the cattle that best fit your specs. We buy those animals just like you were sitting ringside with us. We also guarantee the cattle so that if they don't meet your ideals, you just return them to us. If possible, come by and evaluate the offering prior to sale day. We will post video of each lot on our website prior to the sale but may run into time limitations.

COLOR:

All animals are red unless otherwise indicated in the footnotes.

FOLLOWING SALE:

Everyone is invited to Dinner at Ron & Lois's after the sale. We will be serving strip loin.

UPDATED INFORMATION, YEARLING WEIGHTS, AND ULTRASOUND DATA:

Yearling weights, frame scores, and pelvic measurements will be available on heifers the week prior to the sale. All yearling bulls will be ultrasounded, and updated carcass EPD information will be available the week before the sale or as soon as we receive it from the Red Angus Association of America. Yearling adjusted scrotal size on January 15, 2011 is printed in the catalog and an updated scrotal taken the week prior to the sale will be available. The scrotal in the catalog on all yearling bulls is adjusted by the Red Angus Association of America. We generally find actual scrotal measurements at sale time are typically 1 centimeter larger than the adjusted measurements. All other data not provided will be available upon request.

GAIN TESTING:

All bulls are gain tested for approximately 110-120 days. The spring born bulls were weaned in September and weighed off test January 19

INFORMATION:

Supplement sheets will be available 3-4-2013 on the website or by request.

SALE ORDER:

The sale order will be catalog order.

COOPERATORS:

In order to provide a better selection of cattle we have enlisted the following people who have herds that are aligned through genetics and management.
Dan Bormann - Huxley, IA - Red Angus
Gene Rouse - Huxley, IA - Red Angus
Fair Acres Stock Farms Lynn Ewald Waldorf, MN Red Angus

We are pleased to offer the Bieber Red Angus Sale broadcast "live" over the internet through DVAAuction Services. To bid from your computer at home during the sale, complete this simple two step process.

- Visit the DVAAuction web site at www.dvauction.com or call 402/474-5557. Register by entering a User Name and Password. Then enter your personal information on the next screen.
- Click on "Apply for Bidding." Select the Bieber Red Angus Sale from the list of sales and click "Apply." Complete the process by filling out the Banking and Lending information requested.

DVAAuction will contact you to let you know that you have been approved to bid and buy at the sale "live" from your computer at home. We will also provide you with a buyer number for the sale.

After the sale Bieber Red Angus will contact you to make arrangements for payment and delivery of your on-line purchases.

Please Note: You must have high speed internet access (DSL, T-1, or Broadband) to be able to bid during the sale. Any questions, please contact DVAAuction at (402)-474-5557 or e-mail support@dvauction.com. We recommend that you register by March 6, 2013 for on-line bidding. Every attempt will be made to complete your application even if it is on sale day.

What is Pfizer 50K and how do I use it?

Most of us have read how DNA has changed the game in Livestock Evaluation. Most of us have tried to read the scientific explanations on how it works. Simply put, cattle that excelled in specific traits were tested, and DNA identified the genes (or markers) that superior animals had in common.

For example, let's look at Weaning Weight (WW). Many thousands of animals with actual weaning weights recorded were evaluated with DNA. Some with very high weaning weights had the same gene markers in common, while some with poor weaning weights possessed an altogether different set of gene markers. We can now DNA test to investigate whether an animal outside the discovery group possess these favorable markers proven for superior weaning weight. The DNA possessed by a sire is directly correlated to his ability to transmit desirable traits to his offspring.

EPDs are good, DNA makes them better. EPDs work. They are the best information in the industry, but are inherently dynamic with something called "possible change", which says that EPDs can change significantly once progeny arrive. No fault of the system, because a pedigree prediction cannot describe which genes an animal actually got from its parents, as there are billions of possible combinations. When DNA for these favorable (or unfavorable) markers is applied to the calculation of EPDs for each trait, they become much more accurate. In fact, Pfizer HD 50K can make EPDs up to 6 times more accurate and predictable than a pedigree prediction alone.

Another way to look at it is with Progeny Equivalents. They describe how many progeny a bull would have to sire in order for his EPDs to reflect a comparable amount of accuracy:

	Genomic Accuracy	Progeny Equivalents Genomic
CEB	0.39	23
BW	0.39	13
WW	0.3	14
YW	0.32	15
CEM	0.26	23
MILK	0.26	15
CW	0.27	11
MARB	0.25	10
REA	0.24	9
FAT	0.36	26
YG	0.25	11

- Birth – BW EPD with 50K has the same accuracy as 13 progeny birth weights turned in on your bull.
- Weaning – WW EPD with 50K has the same accuracy as 14 progeny weaning weights on your bull.
- Yearling – YW EPD with 50K has the same accuracy as 15 progeny yearling weights on your bull.
- Milk – M EPD with 50K has the same accuracy as having 15 daughters in production out of your bull.
- Carcass – CW EPD with 50K has the same accuracy as 11 progeny carcasses weighed from your bull.

- Rib Eye – RE EPD with 50K has the same accuracy as 9 progeny carcasses measured for Rib Eye.
- Marbling – MB EPD with 50K has the same accuracy as having 10 progeny carcasses graded.
- Ultrasound – Carcass EPDs with 50K have the same accuracy as up to 30 progeny scanned.

The Pfizer 50K DNA test analyzes over 50,000 different markers spread across the entire bovine genome for the most comprehensive analysis, unlike cheaper DNA tests that only look at 400 gene markers, and are obviously less accurate.

Today we can reliably put bulls together for uniformity as well or better with Genomic-Enhanced (GE) EPDs than we can with half-brothers or even full brothers with non GE EPDs.

For more information on Pfizer HD 50K DNA and Genomic-Enhanced EPDs visit Pfizeranimalgenetics.com or call Larry Gran, Cattle Genetics Specialist, Pfizer Animal Health, 605-641-3254 or email larry.gran@pfizer.com.

RON BIEBER

Founder of BRAR, range, pasture & alfalfa specialist, and cattle breeding.

LOIS BIEBER

Co-founder of BRAR. Responsible for the sale meals and hospitality. Oversees all ranch activities.

CRAIG BIEBER

CEO of Bieber Red Angus Ranch, handles all ranch activities.

PEGGY BIEBER

Craig's partner and now full-time office staff, handles all bookkeeping, and clerks the sale.

CRAIG HOWARD

Cowboss, AI technician, welder and equipment repairman.

LINDLEY HARRINGTON HOWARD

Social media manager at BRAR. Past summer intern and day help hand. Helps clerk the sale. Craig Howard's wife.

KENNY MEIDINGER

Equipment manager, responsible for feeding and forage at the ranch.

MICHAEL CHAPMAN

Herdsmen, general ranch duties, light mechanics.

STEVE KEYSER

Intern from South Africa. Steve joined us in June and will be with us for a year.

SCOTT MARWICK

Trainee from South Africa. Scott joined us in June and will be with us for a year.

ERIC PAYNE

Day help hand. Eric and Megan are now living in Aberdeen and selling insurance. Check out page 62!

MEGAN PAYNE

Day help hand. Helps clerk the sale. Eric's wife.

KRISTIN PAYNE

Office/all-around assistant. Attending Augustana College in Sioux Falls, SD. Helps clerk the sale. Looking for long term employment.

Every year we talk about the standout that has done it throughout the summer and on test. Lot 1 has done that but with the power of a great cowline and a sire that we think is going to really leave a mark here. His cowline is the Galle cowline, and the most recent matriarch, Bieber Galee 9513, sold this past fall as one of the high selling donors. She has an impact on our herd and our customers with sons selling to the Maders, WY; Hughes Cattle Co, KY; Ammann, SD; Kent Hughes, SD; Lorin Roseland, SD; S & S Cattle, SD; Dan Beyerlin, KS; Travis Johnson, SD; David Miller, NE and most recently last year's Lot 7, Bieber Steakhouse Y165 to Semex, the world's largest semen cooperative. Lot 1's dam is going to be a force here and often the first calf is one of the best. We aren't going to put much in the footnotes about the data this year because it's all right there. You will be hard pressed to find a bull anywhere in the breed this year that will stack up to Lot 1.

The strength of our program is the stacking of great genetics. The Sue cowline produced Prince Charles 10086 who was the high selling bull in 2006 to Vulture Acres, ND. The Cyclone bull was a standout at Ludvigson and after unsuccessfully trying to buy him we used him AI. Lot 2 stacks profitable traits in both his data and pedigree, giving his new owner a great advantage with the industry's strong position.

Ole 903 has done it again this year. This is the first son of many and he is very intriguing. Lot 3 has seven traits in the top 25% of the breed. Again we have a two-year-old dam that has come to the top. Jim Shirm always said that more first foals were Kentucky Derby winners than any other foal position, and we feel that if the program is working the young females will be among the very best.

Stacking the genetics knee deep in these pedigrees gets the same cowlines coming back year after year. Lot 5's cowline produced last year's high seller, Bieber Rollin Deep Y118. Lot 5 and Rollin Deep's dams are maternal sisters. Lots 5 and 6 are not heifer bulls, but use them on mature cows and these bulls will produce as much growth as any genetics of any breed will produce.

We know that Red Angus genetics will produce as much growth as any breed and both Lots 5 and 6 are the kind that will produce more pounds if that's what you're looking for. Lot 6 is the first bull from the Durham cows and he is 1/4 Simmental, so you will get a bit of heterosis with Lot 6 in your bull battery.

Although these calves are AI calves sired by Cyclone, we liked what we saw last spring and took the opportunity from Jon Marshall to use him naturally the next couple of years. We really think that these sons will have a place in our program and that our customers will benefit from the addition of these genetics.

Oly may be just average at WW time but his gain from WW to YW tells us that if you are backgrounding your calves he is the kind that will work really well. His BW is so low that it takes him a little time to catch up, but as you can see from this set of sons it is happening very quickly. This son has left nothing to chance, taking right off and getting to the finish fast with a 108 ratio on gain.

Lot 18's dam has been known for producing genuine beef bulls with loads of performance. Lot 18 has the abundant thickness and great muscle shape that Ole is noted for.

Wallace 016 has caught the attention of some leading cattlemen and has proven he has what it takes with this calf crop. If you are looking to add muscle, this is a line to have a look at. Lot 18 will add pounds to the scale while keeping cowherd efficiency at an optimum level.

Video clips of the cattle will be available by February 25th. Visit www.bieberredangus.com for details. **THANK YOU** for your support!

This Cowline need no introduction. Adelle has already got Makin Hay, Rough Rider and Out Rider to her credit and now this Ole son has not disappointed. He was the test high gainer this year, being just under a whopping 5 lbs. per day. These cattle have really excelled in a range environment and have had a very positive impact on the Red Angus breed. Barking Iron is what the Indians called a gun in the early days and the bull has some bark to his bite, just like a gun did in those days.

This will be a mating we will see a lot of in the future. Samurai had really opened up new options for our customers. We really feel sons like this bull will give ranchers scale-crushing weights and a lasting contribution to the cowherd.

Z125's dam was a calf we couldn't figure out a sire for but being out of the Tilly cowline we kept her anyway, and she hasn't disappointed us. Complete pedigree or not, this bull is worth a good look.

PREPARATION KEY FOR SUCCESSFUL PURCHASES

By Bob Weaber, Ph.D., Cow-calf Extension Specialist, Kansas State University

As the winter and spring bull-buying season approach, seedstock purchasers should do their home work to help ensure the bull(s) they purchase this year meet their needs. Preparedness is the key to making an informed purchase. Before you crack open the sale catalogs of seedstock suppliers, there are a few resources and skills you should possess.

First, make sure you understand the use of Expected Progeny Differences (EPD) and selection indexes. While EPDs are not the only selection information you should consider, EPDs are the most effective tools available to describe the genetic differences between animals within and across herds. EPDs are much more effective genetic predictors than actual or adjusted performance records. If an EPD is available for a trait it should be used instead of an animal's own performance record for that trait. The EPD removes age and environmental effects that can bias a decision based on actual or adjusted performance records. Use Calving Ease (CE or CED) EPD, rather than birth weight (BW) EPD, if it's available to select bulls that minimize calving difficulty. CE EPD calculations include BW data and other sources of information that affect dystocia.

Not all EPDs are the same, so make sure you know the appropriate information for the breed of cattle you are purchasing. For a useful reference on EPDs and other genetic topics see the Beef Sire Selection Manual (<http://www.nbcec.org/producers/sire.html>) Obtain the breed average EPDs and a percentile rank table available from the most current genetic evaluation for the breed of interest. Percentile rank tables can be found on most breed association websites. These tools will enable you to compare the relative genetic merit of individual animals to other animals in the breed.

Second, make sure you know what traits you would like to improve in your herd? What breed(s) fit in your mating system? If you are using a crossbreeding system make sure the breed you selected fits your objectives. Other factors to consider are: keeping replacement heifers, endpoints for progeny marketing (weaning, back-grounded or in the beef). Assessment of these factors will help point you to the best breed for your needs and the

combinations of maternal/growth/carcass traits that best fit your operation and environment. Be sure to apply selection to traits that have direct economic importance in your production system.

Third, set a realistic budget for bull purchases. Like most things in life, price is driven by quality. Evaluation of a seedstock supplier's prior year sale averages will give you an idea of what to expect in terms of purchase costs. That said, prices over the last 12 months indicate that seedstock purchases are substantially more expensive, some as much as \$500 more, than in previous years. The increased bull cost is largely driven by increased development costs incurred by seedstock producers. The added purchase cost makes it even more important to make a well thought out decision.

Fourth, get to know your seedstock supplier and make sure he/she knows you and your operational goals. Seek out recommendations from your supplier well in advance of the sale. Once you receive the sale catalog make a short list of bulls (6-12 head) that fit your specifications. Arrive at the sale site early to inspect the bulls on your short list. Shorten this list of candidates based on conformation and updated data to identify your purchase candidates. Keep the sale order in mind. Stay focused on the bulls you selected earlier. Sticking to your plan will avoid impulse purchases. Remember: Failure to plan is planning to fail. Please contact your extension livestock specialist or me if you need help finding resources to aid in your sire selection activities.

What a heifer to start out with! First let's talk about longevity. You've heard us talk about High Noon for years. Not many bulls have gotten to stick around here as long as he has; he's really in pretty exclusive company. Her dam is a really good Dateline daughter who we have no plans to let go of anytime soon, and her granddam is still producing good ones at 11 years old. Lot 250 is the low birth weight, high maternal kind that everyone wants in their pen at calving time, and it sure makes things easier when they have High Noon's great disposition. Take a close look at this one—she's not hard to find.

This heifer has a lot of white; be sure to look at her on sale day or on her video before you bid.

COMMERCIAL HEIFERS

Lot 342, 343, 344, 345 and 346.

25 head of open commercial Red Angus Heifers selling in groups of 5 head.

These heifers were born at Bieber Red Angus out of commercial Red Angus cows from the Rapid Creek Ranch. The heifers have been Bangs vaccinated and have had 3 doses of Bovi-Shield Gold FP 5L HB. These Red Angus heifers are high percentage Red Angus. There are 4 heifers red white faced heifers that will be lot numbered at the end of the group. The balance is solid red.

SHOULD YOU SPEND MORE OR LESS FOR A BULL?

BULL PURCHASE PRICE

Purchasing bulls is a critical management decision. The following table was developed assuming: annual bull maintenance costs of \$350 (operating costs plus a 10 percent risk of death loss), a 90 percent calf crop, and a salvage value of \$1,100. Several conclusions can be reached from this data:

Losing a bull in the first or second year is extremely costly on a per-calf basis and the loss overwhelms most of the genetic potential that might be derived from that sire's limited influence in the herd.

When possible, bulls should be servicing 25 or more females per season to allow the enterprise the flexibility to spend more on each bull purchased.

Determining the price to be spent on a bull depends on the marketing target and the bull's ability to generate an advantage in excess of the additional cost per calf as purchase price increases. For example, a bull purchased for \$3,000 and used in a 1:25 scenario for four years must contribute more than \$5.56 per calf across all four calf crops to warrant the additional price as compared to a \$2,500 bull.

The national sire evaluation system allows producers to make reasonable comparisons between bulls and groups of bulls by estimating expected progeny differences for traits such as weaning weight, yearling weight and carcass weight. These estimates can then be assigned economic value by applying market prices. Some breed associations are now providing additional index values that are reasonable estimates of composition traits such as carcass value, maternal merit and feedlot performance.

Reprinted with permission from Cattle-Fax

ANNUAL BULL COST PER WEANED CALF

Years Bull Used:

Purchase \$	1	2	3	4
\$2,000	102	43	24	14
\$2,500	124	54	31	19
\$3,000	147	66	39	25
\$3,500	169	77	46	31
\$4,000	\$191	\$88	\$53	\$36

* 25 cows per bull

We often get asked how much should we spend on a bull and the above article and commentary provide some insight to that question.

Many people tell us they can't afford to spend much on their bulls. This couldn't be further from the truth. The cost of running a good bull is the same cost as running a bad bull. A good bull will easily add 30-50 pounds to your average weaning weight. Even if the bull is only mated to 25 cows and you get a 95% calf crop and a modest \$1.50 per pound value, then the good bull will net \$1125 to \$1875 per year above an average bull. With an average useful life of 4 years and an equal residual sales price, you can pay \$4500 to \$7500 more for the good bull over an average bull without a loss of profitability. This is before you consider that current prices on weaned calves are above the prices listed, good bulls last longer on average, have better resale and are often mated to more than 25 cows. Most operations would improve their bottom line by breeding to higher quality bulls.

COMMENTS FROM BIEBER RED ANGUS RANCH:

This older data from Cattle-Fax points out that \$500 more on a bull means that the bull needs to contribute \$5.56 per calf across 4 calf crops to warrant the additional price. If you do the math on a 600lb calf at \$1.50, it only takes a little over 5 pounds per calf to break-even on the high priced bull. We have consistently found the real value of high priced bulls comes in added value to the heifers calves. Often this past fall and winter the difference between replacement quality heifers and average heifers was \$10 to \$15 dollars per hundred weight at the same auction on the same day. We have a customer that decided to support a breeder with a very short history and purchased two bulls. His bull battery contained three bulls from Bieber Red Angus Ranch and two from the young breeder. The herd runs with one bull per breeding pasture. This customer found out that the Bieber Red Angus Ranch bulls gave him an average 60lbs more per calf than the other breeder's bulls. This producer told us "I am tired of helping everyone else. From now on, I will be back to buy Bieber bulls to help myself. Your bulls are just bred better."

Just one more fact to support the case for better bulls. Land Grant Universities have often shown that being a "low cost" producer is a key to survival in the cow/calf business. Ironically, the same research has shown that buying good bulls is the only area where low cost producers spend more money than high cost producers.

The original reason we like the Cattle-Fax article was that we want our customers to understand what taking care of a young bull the first year, and every year after, is worth it. It can be very costly if one loses a bull in the first year. Bulls really should be separated from the cows to reduce competition for resources. They require some added care throughout the year to function like a fine-tuned athlete for your breeding season. We can't stress enough that the cost per calf weaned will significantly decrease if bulls have proper care during the off season, particularly in the first year.

DELIVERY POLICY:

Free delivery on all bull purchases over \$3000, to central points within 300 miles. Volume purchases of 5 or more bulls selling to one ranch delivered up to 500 miles. All bulls under \$3000 and females will be delivered to central points at cost. Central point for delivery will include auction barns, vet clinics and ranches that offer to serve as a delivery point. We simply ask for your cooperation in arranging the delivery of your bulls. This will keep the bulls from being on the truck longer than necessary and help to get the bulls to you with the least possible stress and in the best possible condition.

We are able to load out bulls during the sale, but request your patience while we sort and get your bulls to the loading area. Please let the clerks know if you plan to load out. They will notify the crew and direct you to the loading area. It would also be helpful if you would contact us in advance if you plan to haul your own so that we can research health testing requirements for your state.

Profit \$implified...

Multi-breed EPD base simplifies selection

Since 2010, the Red Angus Association of America (RAAA) and the American Simmental Association (ASA) have combined their growth and carcass datasets to provide commercial producers with the most reliable EPDs in the beef industry. In the summer of 2012, RAAA and ASA adopted a common base for Growth (BW, WW, YW, Milk) and Carcass (MARB, YG, CW, REA, FAT) EPDs so that all animals registered in either RAAA or ASA can be directly compared – regardless of breed makeup.

What is BASE?

For decades, each breed association has presented EPDs in their own language (the base). Base is no more than a reference point for any trait against which subsequent generations of animals are compared. The establishment of a base ensures that the population future generations are compared to remains stable, which allows the breed's genetic trend to be accurately identified.

Raw Genetic Value + Base Adjustment = Published EPD

Study Percentile Ranks...

Percentile ranks are an easy reference and therefore a powerful tool to assist you in becoming accustomed to the new multi-breed base. Red Angus EPD percentile ranks are presented along with all active animals' EPDs, and reference how animals compare within their respective Red Angus subpopulations, i.e. Sire Summary Sires, Active Dams, Non-Parent Bulls, etc. It's important to realize that although the multi-breed base allows for the direct comparison of Red Angus and Simmental EPDs, the percent ranks for Red Angus animals will continue to simply compare the genetics of Red Angus animals against other Red Angus. Thus, an animal that was in the top 10% for growth under the old Red Angus base will still be in the top 10% for growth in the new Red Angus multi-breed base.

Example:

In the past, you preferred to purchase bulls that had a -2.0 or lower BW EPD.

Since a -2.0 on the old RAAA base represented the top 20% for BW, you now need to use -2.7 as your critical selection threshold as that represents the top 20% for BW on the new multi-breed base.

Other Examples:

Previous Selection Threshold Old RAAA Base		New Selection Threshold New Multi-Breed Base	
EPD	% Rank	EPD	% Rank
36 WW EPD	40%	58 or higher WW EPD	40%
0.08 MARB EPD	50%	0.38 or higher MARB EPD	50%
0.24 REA EPD	20%	0.30 or higher REA EPD	20%

Bull Selection Simplified.

Building a cow herd?

- Combine low-expense traits (ME EPD) with acceptable revenue traits to breed efficiency into the cow herd.
- Improve fertility with selection pressure on HPG EPDs.
- Sleep through the night by selecting high-CEM EPDs.
- Improve longevity and lower replacement rates by selecting higher-than-average STAY EPDs.

Breeding virgin heifers?

- Select for CED EPD as the most meaningful predictor of calving ease. Red Angus' CED combines birthweight and other factors affecting calving-ease scores.

Selling calves or yearlings?

- Heavier payweights may be achieved by selecting higher WW EPDs, but...make sure heavier is what you want. Heavier weaning weights mean heavier payweights for calf feds. However, for those who background their calves, too much weaning weight could translate into yearlings that are too heavy when they enter the feed yard, and finish too heavy. **Overshooting performance goals can be just as detrimental as falling short.**
- Enhance your reputation - improve traits that impact feeder profits, such as carcass traits and post-weaning gain (YW).

Retaining Ownership?

- Docile and fast starting, Red Angus are easy to start on feed and keep on feed.
- Balance YW EPD of potential bulls with the existing cow herd to pinpoint needed improvement for post-weaning gains.
- Increase payweight with selection for improved CW EPD.

Selling on a Grid?

- Fine-tune marbling (MARB), rib eye area (REA), and back fat (FAT) EPDs to target value-based grids.
- Target YG 1 & 2 premiums and avoid YG 4 discounts by applying selection pressure on YG EPD.
- Optimize carcass weights to increase payweights while avoiding discounts for heavy weight carcasses.
- Balance Carcass EPDs against existing cow herd genetics:
 - Cowherds of higher continental influence may require additional selection pressure on marbling EPD to improve quality grade.
 - High-percentage British cowherds typically benefit from selection pressure to reduce YG and increase CW.

Ranch Tested. Rancher Trusted.

Red Angus

Oly is quickly proving to be a leader in several areas. Oly's BW EPD makes him an exceptional heifer bull. His growth really turns the curve upward. His maternal traits, along with his first daughters, indicate that he has a pretty good shot at being an excellent female producer. His Marbling and REA put him in a very desirable area. We find it hard to say enough about this bull. He is easy fleshing and has a great disposition. Sons and daughters sell. Semen is available at Bieber Red Angus Ranch.

Samurai X22 was produced by our cooperator and friend Gene Rouse and sold to Select Sires. For years we looked for a Cheyenne son we could tie into, and finally he showed up in our own offering, thanks to Gene. Samurai's first calves have all the blow and go that his data shows. They are stout and have great carcasses. Samurai has that Red Angus color that George Chiga indicated was the mark of leading herd sires in his time. Sons and daughters sell. Samurai semen is available through Select Sires.

Roosevelt really shook things up with a great group of sons in 2012. He sired the high selling and third-high selling bull in the March 2012 sale. Roosevelt exhibits great depth of flank with lots of style and a great disposition. We really like the way his daughters look and are looking forward to calving them this coming spring. His HPG in the top 15% and ME in the top 10% of the breed give him a great shot at becoming a great maternal sire. Roosevelt will offer your program some style and marbling genetics. Sons and daughters sell. Semen is available at Bieber Red Angus Ranch.

THANK YOU

Messmer Packer S008

Packer puts together a nice combination of marbling and muscle. His sons are full of muscle and easy to look at. We purchased the natural service rights on him a couple of years ago and are impressed with the muscle he passes on to his progeny. Packer remains very moderate and easy fleshing. Bieber Mighty Packer X178 and Bieber Packer X375—both Packer sons—topped our March and December 2011 sales, respectively. The Packer sons in this sale are all ET calves. We are also using a full brother to his sire, Messmer Jericho W041. We work hard to make these cattle work for your operation. Packer makes that job easier by producing cattle that fit what our industry is looking for. Packer is a Genex Sire.

LCOC High Noon A093R

Visitors constantly ask which herd sire has the best disposition. Without a doubt, the answer is always High Noon. High Noon is an impressive bull and gets a lot of attention. He consistently passes his quiet and gentle demeanor on to his offspring. This disposition is combined with both stoutness and carcass quality that put him in the top 5% for marbling and top 8% for REA, which makes High Noon one of the breed's leading sires. High Noon has become a mainstay sire and we can't find any reason to quit using him. You won't find a sire line any more consistent! High Noon has sons and daughters that sell. Semen is available through CRV USA or at Bieber Red Angus Ranch.

BIEBER RED ANGUS BULL DEVELOPMENT

At Bieber Red Angus, we have learned a lot in 47 years of producing the type of bulls customers come back for year after year. Stacking the right genetics to produce efficient and profitable cattle has always been the Bieber way, but the truth is that there is a lot more to it than mating the right cows to the right bulls.

Developing bulls is 1/3 skill, 1/3 science and 1/3 art. Feed too much and cattle get fat and will not hold up for our customers. Feed wrong and you lose out on a bull expressing his full genetic potential. Every year we have customers tell us how our bulls stand up better compared to bulls from other breeders. We are very proud of the longevity these bulls have under reasonable conditions.

Our development program is designed to accomplish three goals: 1) feed at a moderate rate of growth to the point of full genetic expression, 2) develop bulls in a management program we believe is similar to how our customers will manage their calves and 3) use feed-stuffs raised on our ranch that are similar to what we feel our customers will have access to.

The program starts them on a high roughage diet (44 Mcal) for the first 45 days to allow calves a low-stress introduction to bunk feeding and diet change and to establishing a pecking order. The performance targets for this receiving phase are expected to be 1.5 to 2 lbs. of average daily gain (ADG). We feel that the receiving phase is the most important part of our development program because it prepares the rumen flora to handle diets with increasing amounts of energy.

After the initial receiving phase, the goal of the program is to slowly increase diet energy to properly develop muscle density and marbling deposition while maintaining sound structural and physiological development. At this point, bulls are stepped up to a 48-Mcal diet for three weeks and then a 52-Mcal diet for three weeks with a performance target of 2.25 to 2.7 lbs ADG.

The final stage of the program is to bring bulls to full genetic expression and reach a working level of body condition on a

57-Mcal diet with performance target of 3.2 to 3.5 lbs. ADG—to bring the customer that high-performance, stylish bull that the Bieber brand is known for.

After the collection of carcass scan data, the bulls are moved back down to the 48-Mcal diet and kept in a "holding pattern" through the sale until delivery. When you look through the catalog you will see many bulls gaining between 3 and 4 pounds per day. These bulls are not underfed; yet when you walk through the pens on sale day these bulls are not fat either. With 47 years of experience, we have found that elusive balance that so many others seek to find. We can talk about genetics all day, but if the bulls are overfed they just won't stand up in the long run.

The truth is it just makes sense to buy 47 years of experience. If you have questions concerning our bull development program, contact Craig or our consulting nutritionist Eric Mousel of High Plains Ranch Management Services 605/690-4974.

BULL MORTALITY AND LOSS OF USE INSURANCE COVERAGE

TERMS & CONDITIONS

Values Up to \$25,000
One Year Policy Term
Premium Fully Earned
\$150 Minimum Premium
Per Animal

Required Testing:

All bulls must be tested, certified and listed in the official catalog of a herd sale.

Please see the reverse side for further coverage information.

COVERAGE INCLUDES

Full Mortality:

100% of the value of the bull in the event of death or life-threatening injury.

Loss of Use:

80% of the value of the bull, less salvage value, of in the event of Loss of Use from an accident, illness, or disease that can clearly be diagnosed or identified to have occurred on a specified date.

25% of the value of the bull in the event of Loss of Use from an accident, illness, or disease if there is a diagnosis consistent with an accident, illness, or disease but no real evidence that provides clear diagnosis or identification.

Oly is quickly proving to be a leader in several areas. Oly's BW EPD makes him an exceptional heifer bull. His growth really turns

1. Lot Number - This is the lot number of the animal. Cattle will have a white tag that will correspond to that number. Generally cattle will sell in Lot number order.

2. Name - This is the registered name of the animal. Generally we name bulls after the sire and females after the dam name.

3. Born - This is the birth date of the animal.

4. Reg - This is the Registration number of the animal. All Red Angus animals can be looked up on the Red Angus website at www.redangus.org and going to the animal search page and using this registration number.

5. Breed - This area has the breed composition and category as determined by the Red Angus Association of America. Breed Codes are AR=Red Angus SM=Simmental XX=Unknown. The Unknown cattle are largely cattle that we couldn't prove percentages of parents on the Durham herd. That unknown breed is either Simmental or Red Angus in the Durham foundation cattle.

6. Category

- IA=100% Red Angus with no disqualifying features
 - IB=87% to 99.9% Red Angus with no disqualifying features
 - II Equal to or greater than 87% up to and including 100% Angus blood content having one or more disqualifying characteristics
 - III=Less than 87% Angus blood content
- Disqualifying Features include scurs or horns, ineligible white, black pigment, progeny of multiple sire groups, and missing birth date, or weaning weight and date.

7. Sire - Sire of the animal

8. Paternal Grand Sire - Sire of the Sire

9. Paternal Grand Dam - Dam of the Sire

10. Dam - Dam of the animal

11. Maternal Grand Sire - Sire of the Dam

12. Maternal Grand Dam - Dam of the Dam

13. MPPA - Most Probable Producing Ability - An estimate of a cow's future productivity for a trait (such as progeny weaning weight ratio) based on her past productivity. For example, a cow's MPPA for weaning ratio is calculated from the cow's average progeny weaning ratio, the number of her progeny with weaning record, and the repeatability of weaning weight.

14. AoD - Age of Dam at the time of weaning the progeny identified.

15. ADG - Average Daily Gain - Measurement of daily body weight change over a specified period of time of an animal on a feed test.

16. ADG Ratio - Average Daily Gain Ratio - The ratio of the animal within its contemporary group. ET and Twins will be marked with a TW and ET. These animals have no contemporary group.

17. WDA - Weight Per Day of Age - Weight of an individual divided by days of age

18. WDA Ratio - Weight Per Day of Age Ratio - Weight of an individual divided by days of age. ET and Twins will be marked with a TW and ET. These animals have no contemporary group.

19. AScr. - Adjusted Scrotal Circumference - A measure of testes size obtained by measuring the distance around the testicles in the scrotum with a circular tape. Related to semen-producing capacity and is adjusted to Yearling age. Actual Scrotal Measurement are provided on a supplement sheet 1 week prior to the sale and at the sale.

20. Frame - Frame Score - A score based on hip height measurement adjusted to a yearling age. This score is related to slaughter weights and mature sizes.

21. CE - Calving Ease Score - This is our recommendation for CE based upon the data and the pedigree. *** = Use on heifers. Expect less calving difficulty ** = Use on young heifers and cows. Expect moderate calving difficulty on heifers and very little difficulty on cows. * = Use on cows. Expect difficulty on heifers and some to very little calving difficulty on cows.

22. Grw. Sc. - Growth Score - This is our recommendation for growth based upon the data and the pedigree. G6 = maximum growth rating, G5 = high growth rating, G4 = moderately high growth rating, G3 = average growth rating, G2 = below average growth rating, G1 = low growth rating.

23. EPD - Expected Progeny Difference - The difference in expected performance of future progeny of an individual, compared with expected performance of future progeny of an individual of average genetic merit in the base time frame for the genetic evaluation.

EPDs are estimated from phenotypic merit of an individual and all of its relatives and are estimates of one-half the breeding values. EPDs are generally reported in units of measurement for the trait (e.g., lb., in., etc.).

24. acc - Accuracy - A measure of the reliability of an EPD. Accuracy values are reported as decimal numbers between zero and one. Values closer to one indicate larger amounts of available information and greater certainty that a bull's EPD will not change significantly as more progeny information becomes available. Bieber Red Angus reports the accuracy values for sires since they have high accuracies. EPD are a more reliable estimate of performance than weight, ratios or other measurements. Understanding ACCURACY. Red Angus EPDs are often presented with a corresponding accuracy value, which measures the strength of the relationship between the genetic prediction (EPD) and true genetic value. Accuracies are reported

as a decimal number from zero to one. As accuracy value approaches 1.0, the EPD is "accurately" or closely estimating the true genetic merit of an animal for a given trait. Although low-accuracy EPDs are less reliable when compared to those of proven sires, independent research demonstrates EPDs to be the most meaningful indicator of animals' true genetic merit. While "perfect" accuracies of 1.0 are never achieved, many heavily used Red Angus sires have accuracies greater than 0.9 (some as high as .99).

25. %Rank - This is the percentage rank of the EPD within the type of animal. Rank groups are Proven and Opportunity Sires, Active Dams and Non Parent under Two Years of Age.

26. Wis - Weight - The weight for that trait in that column adjusted to a constant days of age by Red Angus Association and Beef Improvement standards.

27. Ratio - Ratio - The ratio for that trait in that column within its contemporary group. ET and Twins will be marked with a TW and ET a have no contemporary group.

28. CED - Calving Ease Direct - predicts the probability of calves being born unassisted out of 2-year-old heifers. Producers want live calves - born unassisted. Selecting on actual birth weight is flawed; it is influenced by non-genetic factors such as nutrition and weather (ambient temperature). While BW EPD removes these non-genetic factors, Red Angus CED EPD is the best predictor of calving ease. The CED EPD includes variation in BW plus other influential genetic factors such as gestation length, calf shape, etc.

29. Birth Weight EPD - predicts the difference, in pounds, for birth weight, and is also used in the calculation of Red Angus Calving Ease Direct (CED) EPD.

BW - Birth Weight (BW) - The actual weight in pounds at birth.

30. Weaning Weight EPD - predicts the difference, in pounds, for weaning weight (adjusted to age of dam and a standard 205 days of age). This is an indicator of growth from birth to weaning.

WW - Weaning Weight - The 205 adjusted weight. This is an indicator of growth up to weaning.

31. Yearling Weight EPD - predicts the expected difference, in pounds, for yearling weight (adjusted to a standard 365 days of age). This is an indicator of growth from birth to yearling.

YW - Yearling Weight - The 365 adjusted weight. This is a measure of growth from birth to yearling.

32. Milk EPD - (MILK) predicts the difference in maternal production of an individual animal's daughters as expressed by the weaning weight of their calves.

33. TM - Total Maternal EPD - predicts the rancher's actual

observation of weaning weights of calves raised by an animal's daughters. TM includes the daughter's milk EPD plus half of her genetic contribution to her calf's weaning weight EPD. The formula for TM EPD is: TM EPD = Milk EPD + 1/2 (WW EPD)

34. ME - Maintenance Energy - predicts differences in daughters' maintenance energy requirements and is expressed in Mcal/Month. Recognizing that 70% of cow herd feed costs are burned up in maintaining weight and condition, Red Angus ME EPD allows for the selection of bulls whose daughters will require less feed; thus, reducing cowherd expenses. Include selection pressure for ME EPD to ensure feed costs don't get out of line when selection is made for greater performance and production. At Bieber Red Angus we collect cow weight at weaning time to insure greater accuracy of this EPD.

35. HPG - Heifer Pregnancy - predicts the probability of heifers conceiving to calve at two years of age. Many breeds offer genetic predictions of yearling bull scrotal circumference as an indicator of age of puberty. While puberty is a prerequisite, many factors influence pregnancy rate. Red Angus HPG EPD offers a tool which selects for what is economically relevant to ranchers - pregnant heifers. At Bieber Red Angus we submit all heifer breeding data to insure the accuracy of this EPD.

36. CEM - Calving Ease Maternal (CEM) - predicts the probability of a given animal's daughters calving unassisted at two years of age. Replacement heifers should be able to calve on their own. Red Angus CEM EPD offers the industry's most reliable prediction to address that concern. It includes not only the predisposition for a female to calve unassisted, but also her contribution to her calf's traits (birth weight, calf shape, etc.) that make it more likely to be born unassisted.

37. STAY - Stayability (STAY) - predicts the probability of a bull's daughters remaining productive until at least six years of age. Why six? That's how long it takes a female to breakeven given all the expenses of development.

38. MARB - Marbling Score - predicts differences for carcass marbling score as expressed in marbling score units. Higher marbling scores are positively correlated with higher carcass quality grades.

39. REA - Rib Eye Area - predicts differences of carcass Rib Eye Area between the 12th and 13th rib. Increased Rib Eye Area has a beneficial effect on Yield Grade which also includes Carcass Weight and Fat Thickness.

40. FAT - 12th Rib Fat Thickness - predicts differences for carcass fat depth over the 12th rib, as expressed in inches. Increases in fat thickness has a detrimental effect on Yield Grade. Fat thickness measured in young seedstock, maybe an indicator of fleshing ability.

41. Footnote - This is information we would like to point out about the lot. It may contain breeding information on bred cattle.

TERMS AND CONDITIONS

The Red Angus Assn. Terms and Conditions will apply if the terms and conditions printed here are not applicable.

BIDDING DISPUTES: The auctioneer in charge will settle any disputes as to bids, and his decision on such matters shall be final.

TERMS: The terms of the sale are cash; the right of property shall not pass until after settlement is made. All settlements will be made with the clerks of the sale immediately following the conclusion of the sale and before any cattle will be released from the ranch.

RETAINED INTEREST: We are retaining 1/2 interest in all bulls in the sale. We are selling the remaining 1/2 interest, full possession, and full salvage value on these bulls. This option gives Bieber Red Angus Ranch the option to collect, use and market semen from the bull and does not restrict the purchaser from doing the same. This collection, unless agreed otherwise, would be done at the expense of Bieber Red Angus Ranch, at the buyer's convenience. Also at the time of purchase, the highest bidder on a retained interest bull may elect to purchase exclusive semen rights for 100% of the purchase price in addition to the purchased price on retained bulls. If a buyer elects to purchase exclusive semen rights, Bieber Red Angus Ranch interest then becomes in herd use only, but Bieber Red Angus Ranch retains all rights to use the bull within their herd.

SEMEN RIGHTS: Buyers receive semen rights proportional to the interest purchased. If you purchase a 1/2 interest, then you are entitled to 1/2 of the semen collections at cost provided that you indicate you want semen prior to collection. We intend to collect some of the bulls in the sale and sample them in our herd. We will cooperate with the buyer in collection of the bull. We prefer to collect most bulls after the first season of use and we will contact the buyer when we intend to collect the bull at a time convenient for the buyer.

PURCHASER'S RISK: Each animal becomes the risk of the purchaser as soon as sold. Animals will be fed, watered and cared for at the purchaser's risk for a reasonable time.

CERTIFICATE OF REGISTRY: A certificate of registry and transfer will be furnished for each animal sold as a registered animal, after settlement has been made.

HEALTH: All cattle will have official health certificates and will sell guaranteed exported to Canada. Canadian health certificates will be charged at cost on animals selling under \$10,000.

ANNOUNCEMENTS: Changes of information contained in this catalog relating to the animals offered for the sale will be announced from the auction box and such announcements shall take precedence. Errors discovered in the catalog will be corrected by announcements at sale time, and such corrections will take precedence over the printed matter in this catalog.

BREEDER'S GUARANTEE: 1. All animals are guaranteed breeders, with the exception of: a) calves under twelve months of age; b) animals shown by Purchaser after sale (in cases of animals shown after purchase, the breeding guarantee, if any, shall be such as agreed upon between Seller and Buyer) c) Any open heifer that has been flushed for embryo transfer; or d) gross negligence or willful misconduct on the part of the Purchaser. 2. Bulls are guaranteed breeders if not allowed to run with the herd until at least 14 months of age. Any bull which either: a) settles 1/3 or more of the healthy cows he serves; b) is the sire of 20 or more animals; or c) settles cows by natural service and passes a fertility test made by a competent veterinarian during any 6 month period of trial (provided for in paragraph 2 of the section of these sale terms and conditions entitled "Options and Privileges of Return or Adjustment") shall be considered a breeder.

Any guarantee with respect to the ability to freeze semen shall be by separate agreement between Buyer and Seller.

Open females have not been served and are so guaranteed.

If you can't attend the sale & would like to buy cattle, call Craig (605-439-3628 / 605-216-8169 / 605-439-3545) before the sale. Tell us what you are looking for and we will assist in arrangement to help you participate in the offering.

We will call you after the sale and inform you of your purchases.

We guarantee your purchase will be satisfactory.

TELEPHONE BIDDING

We will have available telephone bidding by conference call. **If you wish to bid over the phone, please register before sale day.**

INTERNET BIDDING

See page 5 for information.

IDENTIFICATION: Each animal carries a readable tattoo. Tag numbers on the cattle correspond with lot and tattoo numbers in this catalog. Purchaser agrees to use full name of animal in advertising and on stall cards at shows.

OPTIONS AND PRIVILEGES OF RETURN OR ADJUSTMENT:

1. All claims for adjustment or refund must be made in writing either within six months of the sale date or no later than six months after the animal reaches 18 months of age, with the exception of claims involving defects or parentage.
2. In the event an animal is claimed to be a non-breeder, the animal may be returned to the farm of the Seller if in good condition and complying with the health requirements of the Seller's state. The Seller shall be entitled to six months' trial following the return of the animal in which to prove the animal is a breeder, the Seller shall, at the option of the Buyer, replace the animal with another of equal value or grant the Buyer a credit for use on any products marketed by the Seller. Such credit of the full purchase price shall in any case be deemed full satisfaction and settlement. Any expense incurred for transporting an animal claimed to be a non-breeder shall be the responsibility of the Purchaser, except that the Seller shall be responsible for the transportation costs in excess of the distance between the Purchaser's farm and the location where the sale took place. If the Seller proves the animal is a breeder, it shall be the obligation of the Purchaser to take delivery of the animal and pay all expense incurred for transportation.
3. If a female sold as "safe in calf" proves not to be in calf, the Purchaser may receive service from the bull previously used, if available, or if the bull is not available, the Seller shall be obligated to make a satisfactory adjustment on the purchase price upon return of the animal to the farm of the Seller. Any adjustment provided for herein shall absolve the Seller from further liability, except in case such female proves to be a non-breeder. If a female represented as "safe in calf" at time of sale to a certain bull proves to have been bred to a different bull, the Seller shall be obligated to take a satisfactory adjustment on the purchase price upon return of the animal to the farm of the Seller (adjustments shall not be considered to a breeding fee or an allocation of the purchase price to any unborn calf). Any expenses incurred for transportation shall be the responsibility of the Purchaser, except that the Seller shall be responsible for the transportation costs in excess to the distance between the Purchaser's farm and the location where the sale took place.
4. If a female sold as "served" proves not to be in calf, or if a female sold as "pasture-bred" proves not to be in calf, the Seller only guarantees such female to the breeder.
5. If a female sold as "open" proves to be with calf, the Purchaser may return the animal to the farm of the Seller prior to calving for a credit of the full purchase price or for another animal of equal value, whichever is acceptable to the Purchaser. It shall be the obligation of the Seller to bear any expense incurred for transportation.

LIABILITY: Neither owners, sale managers, clerks nor anyone connected with the sale assumes responsibility, legal or otherwise, for damages of any kind.

CONTRACT: The above terms and conditions shall constitute a contract between the buyer and seller of each animal sold.

IMPLIED WARRANTY: Except for those stated in the terms and conditions, there are no warranties, either expressed or implied, as to merchantability or fitness for a particular purpose with respect to the cattle being sold in this auction. The warranties set forth in terms and conditions are in lieu of all other warranties, either expressed or implied, and the remedies provided therein shall be the sole and exclusive remedy of the buyer, or any part claiming through buyer, for any breach of warranty or guarantee therein provided and all other obligations or liabilities.

We guarantee your purchase will be satisfactory.
