WELCOME TO THE SALE!

Cattlemen and Cattlewomen,

The goal of our program has always been to provide our customers with the most progressive Red Angus genetics possible. Genetics that excel in the economically important traits of efficient beef production. To us that means growth, Fertility, calving ease, maternal and carcass traits along with convenience traits. These traits should come in a functional, sound, easy fleshing package. We have always relied on EPD's, visual appraisal and individual performance to guide us in the selection process.

Our AI program along with our extensive ET program expand the impact of the elite bulls and females on our program. Our commitment to reaching our genetic goals included ongoing investment in elite genetics through semen from outstanding sires and selection of high potential young sires.

The goals of our program depend highly on customer satisfaction. Repeat customers, long standing relationships and real genetic value are what we strive to produce.

Our priority has always been our personal alliance with you, our customer, and that has always been at the top of our list. Feel free to give us a call and discuss you needs any time.

Thanks for taking the time to review our program.

Craig & Peggy Bieber

A Word About Genomics

"I read a lot of catalog every year and I saw this in the WoodHill Farms Catalog written by my friend Brian McCulloch and his partner Dan Borgen. I felt like it is one of the best things I had seen written about genomics. I am passing it on here. The products he talks about are Angus but essentially they are the as the ones we use but specifically for Red Angus cattle. I hope you enjoy this tidbit of information as much as I did.

Information versus Data: making sense of what genomics provide us

"I am not buying my kid an encyclopedia. He can walk to school like I did." Lawrence "Yogi" Berra

It is a natural impulse for us to throw up our hand in frustration when challenged to make sense of waves of new information. There is no one equal to Yogi in the ability to express a kernel of wisdom in his malapropisms. I our particular world what he said would sound something like, "I'm going to pick the bulls that look the part to me and the hell with all the number!" Besides, it seems to be easy for a lot of people in our business to believe the numbers are a crock, a contrivance of an in-group to manipulate the process to their advantage. Our view is that the "numbers", the EPDs have been invaluable, will continue to be so, and that is not all that complicated.

The HD50K produces data that verifies parentage and predicts the breeding value of an individual bull for 19 different traits. Angus Genetic, Inc. (AGI) then processes that genomic data and puts it into a usable information format by updating and reporting genomically-enhanced EPDs (GE-EPDs) weekly.

The value of the genomic information is in improving the accuracy of the EPDs. The improve accuracy, according to the statisticians, of GE-EPDs can be expressed in the number of progeny records that would be required to produce equally valid phenotypically derived EPD values. Zoetis says the value of CED, for example, can change by as much as plus or minus 3 in a GE-EPD and that genomic data contributes an equivalent amount of information about unassisted deliveries as would be derived from 21 offspring of a given bull.

To sum up, let us revisit the data versus information idea. Investigation of the genome and accumulation of data to predict outcome will continue across the entire spectrum of biology. No one can stop it. There is nothing fundamentally wrong or threatening with the process. At the same time, we believe that the interpretation of such data in our business is less than ideal, its impact sometimes exaggerated. In other words, the translation of data to usable information, actionable intelligence, in a work in progress. We believe that process will evolve and improve, particularly as more data accumulates.

Nothing in this world is perfect, including the tools we have to predict outcomes in the vast, magnificent world of biology. But EPDs are still, and will remain, the selection tools to use in choosing bulls to buy. They account for all sources of information on the individual, including pedigree, with collateral relatives' performance, individual performance, and genomic testing. They are the best tools we have and most definitely have worked for us.

Dan Borgen and Brian McCulloch

DELIVERY POLICY:

Free delivery to surrounding state on all purchases over \$3500, to central points. Volume purchases by one buyer of 5 head over \$3500 delivered free to central point in the US. All bulls under \$3500 will be delivered at cost. Central point for delivery will include auction barns, vet clinics and ranches that offer to serve as a delivery point. We simply ask for your cooperation in arranging the delivery of your cattle. This will keep the cattle from being on the truck longer than necessary and help to get the cattle to you with the least possible stress and in the best possible condition.

HEALTH:

Ashley Vet Clinic, 701-288-3234, will be available on sale day. All cattle are on a complete vaccination program supervised by Ashley Vet Clinic.

In the past bulls have been tested for persistent BVD carriers and all tests were negative for a number of years. We have chosen not to test the bulls this year since no positives have been found in over 10 years. We do test our replacement heifers for BVD in since 2014 as a part of our surveillance program and found no positives BVD carriers. Bieber Red Angus participates in the Beef Quality Assurance (BQA) program. Heifer calves have been Bangs vaccinated. We participated in a Johnes testing program for 10 years with no confirmed positive. We no longer test for Johnes disease but continue to diligently watch for any suspicious cases and test as necessary.

GENETIC DEFECTS:

Every animal in the Bieber Red Angus production sale is guaranteed negative for the recessive gene associated with Osteopetrosis(OS), Arthrogryposis Multiplex(AM) (Curly Calf Syndrome), and Neuropathic Hydrocephalus (NH). With this guarantee, we provide our customers the opportunity to purchase their choice of cattle with very little risk. DNA samples have been collected on every animal in the sale with any known carrier in the first three generations and tested negative unless otherwise noted.

RETAINED INTEREST:

We are retaining 1/2 interest in all bulls in the sale. We are selling the remaining 1/2 interest, full possession, and full salvage value on these bulls. This option gives Bieber Red Angus Ranch the option to collect, use and market semen from the bull and does not restrict the purchaser from doing the same. This collection, unless agreed otherwise, would be done at the expense of Bieber Red Angus Ranch, at the buyers convenience. Also at the time of purchase, the highest bidder on a retained interest bull may elect to purchase exclusive semen rights for 100% of the purchase price in addition to the purchased price on retained bulls. If a buyer elects to purchase exclusive semen rights, Bieber Red Angus Ranch interest then becomes in herd use only, but Bieber Red Angus Ranch retains all rights to use the bull within their herd.

BIRTH WEIGHTS/CALVING EASE:

We scored for calving ease with our three star (*) scoring system. Three stars (***) indicates that a particular bull can be used on heifers under standard conditions with little or no calving difficulty. Two stars (**) indicates that a particular bull should be used on growthy heifers or cows under standard conditions with little or no difficulty. One star (*) indicates that a particular bull be used on cows. These bulls will produce little difficulty when used on cows. This recommendation is a system we use to help our customer with calving ease selections.

Birth weights are highly affected by environmental factors. Research indicated that the inclusion of corn in cow diets will increase BW. Also contributing to higher BW were cold temperatures in the winter of 2002/2003. The University of Nebraska conducted a three-year-study to research and evaluate effects of high and low temperatures during winter months on calves out of 384 two-year-old heifers. Average BW increased by 11 lbs. when temperatures were colder. The results agree with other studies that show calves born in the southern U.S. compared with calves born in the northern U.S. Weather plays an important role in BW and calving difficulty. We have adjusted the calving ease scores accordingly, taking into consideration what the calf ratioed on BW, pedigree and CE EPD, BW EPD and Genomic data.

FEEDING:

Feeding arrangements are available on all yearling lots will be fed at a charge of \$3.50 per day. We will feed your purchases from sale day until you are ready to pick them up, or we will deliver them.

BREEDING SOUNDNESS EVALUATION:

Breeding Soundness screenings will be performed in February before the sale. We fully guarantee that these bulls will pass the Breeding Soundness Evaluation before the breeding season in 2015 if the bulls are managed properly. We recommend that all bulls tested in this sale be tested 4 to 6 weeks prior to your breeding season. We ask for your understanding if a bull does not pass. Sometimes bulls that have passed do not pass later for various reason. We will do our best to make sure you are satisfied. If you have any questions regarding Breeding Soundness Evaluation, feel free to call Craig or Dr. Dean Christensen at the Ashley Vet Clinic.

WEIGHTS:

Birth weights, weaning weights, yearling weights, and all other measurements are taken at appropriate times to produce sound and accurate comparisons within contemporary groups. We contemporary group our Red Angus calves based on the age of our cows. Calves out of two-year-old dams, three-year-old dams, and the main cowherd are all separate management groups and therefore are separate contemporary groups. Embryos transplant calves are contemporaried in the groups they are weaned with.

WEANING WEIGHTS:

All naturally born calves born at Bieber Red Angus Ranch are raised without creep. We feel that this helps us select and breed for dams that have milking ability and sound udders. ET calves are on creep feed to express their full genetic potential.

INSURANCE:

Livestock insurance will be available on sale day. Please see information in catalog.

SALE INFORMATION

AIR TRANSPORTATION: Aberdeen is serviced by Delta Airlines. Pierre is serviced by Delta & Great Lakes Airlines which is affiliated with United and Frontier airlines.

INTERNET & ABSENTEE BIDDING: We would prefer for each of you to be in attendance on sale day. Realistically, we know that there will be some scheduling conflicts and distance limitations. In these cases we have arranged for you to be able to participate in the sale on an absentee basis with a conference call dedicated to bidding. We will have available one phone line which can accommodate 20 to 30 bidders. Please call prior to the sale and register as a prospective buyer. We have limited capabilities to bid by phone during the sale. Your best option is to be in attendance at the sale, but if you cannot attend or feel more comfortable bidding yourself, we need to warn you of complications in the past with phone service, such as the volume and the rapid pace at which our sale moves. If we handle the bids for you, they will be done in the strictest of confidence. However, if you want to attempt bidding by phone, please make arrangements prior to sale day by calling Craig or Peggy. For internet bidding information, see DVAuction below.

If you are unable to attend and you feel comfortable doing so, you can leave those bids with the Bieber family, auctioneer, or publication representatives. We handle many sight unseen bids and have very satisfied customers who feel confident in using that service. We prefer to have plenty of time to discuss your needs over the phone prior to sale day so that we may select the cattle that best fit your specs. We buy those animals just like you were sitting ringside with us. We also guarantee the cattle so that if they don't meet your ideals, you just return them to us. If possible, come by and evaluate the offering prior to sale day. We will post video of each lot on our website prior to the sale but may run into time limitations.

COLOR: All animals are red unless otherwise indicated in the footnotes.

FOLLOWING SALE: Everyone is invited to Dinner at Ron & Lois's after the sale. We will be serving strip loin.

UPDATED INFORMATION, YEARLING WEIGHTS, AND ULTRASOUND DATA:

All yearling bulls will be ultrasounded, and updated carcass EPD information will be available the week before the sale or as soon as we receive it from the Red Angus Association of America. Yearling adjusted scrotal size on January 20, 2015 is printed in the catalog and an updated scrotal taken the week prior to the sale will be available. The scrotal in the catalog on all yearling bulls is adjusted by the Red Angus Association of America. We generally find actual scrotal measurements at sale time are typically 1 centimeter larger than the adjusted measurements. All other data not provided will be available upon request.

GAIN TESTING: All bulls are gain tested for approximately 110-120 days. The spring born bulls were weaned in September/October and weighed off test January 19.

INFORMATION: Supplement sheets will be available 2/29/2016 on the website or upon request.

SALE ORDER: The sale order will be catalog order.

COOPERATORS: In order to provide a better selection of cattle we have enlisted the following people who have herds that are aligned through genetics and management. We have listed the phone numbers of the cooperators as they represent the program and can help with your selection.

DVAuction

Broadcasting Real-Time Auctions

We are pleased to offer the Bieber Red Angus Sale broadcast "live" over the internet through DVAuction Services. To bid from your computer at home during the sale, complete this simple two step process.

- Visit the DVAuction web site at www.dvauction.com or call 402/474-5557. Register by entering a User Name and Password. Then enter your personal information on the next screen.
- Click on "Apply for Bidding." Select the Bieber Red Angus Sale from the list of sales and click "Apply." Complete the process by filling out the Banking and Lending information requested.

DVAuction will contact you to let you know that you have been approved to bid and buy at the sale "live" from your computer at home. We will also provide you with a buyer number for the sale. After the sale Bieber Red Angus will contact you to make arrangements for payment and delivery of your on-line purchases.

Please Note: You must have high speed internet access (DSL, T-1, or Broadband) to be able to bid during the sale. Any questions, please contact DVAuction at (402)-474-5557 or e-mail support@dvauction.com. We recommend that you register by March 2, 2016 for on-line bidding. Every attempt will be made to complete your application even if it is on sale day

MEET THE PEOPLE OF

Bieber Red Angus

Ron Bieber: Founder of BRAR, range, pasture & alfalfa specialist, and cattle breeding.

Craig Bieber: CEO of Bieber Red Angus Ranch, handles all ranch activities

Craig Howard: Cowboss, Handles day to day operations at BRAR. AI technician, welder and equipment repairman.

Lindley Harrington Howard: Social media manager at BRAR. Past summer intern and day help hand. Helps clerk the sale. Craig Howard's wife.

Tom Churchwell: General ranch duties, light mechanics, handles all cattle feeding.

Dillon Spurr: Herdsman, calving, feeding, general ranch duties.

Jared Schaefer: Night calver and day help.

Eric Payne: Day help hand. Eric and Megan are now living at Mina Lake and sells insurance. Check the ad in the catalog for more information!

Megan Payne: Day help hand. Helps clerk the sale. Eric's wife.

Presley Lynn Payne: Loves to check cows with Grandpa and Grandma and daughter of Eric and Megan Payne.

Kristin Harms: Office/all-around assistant. Has a full time job at Raven Industries in Sioux Falls, SD. Helps clerk the sale.

Jake Harms: Husband of Kristin Payne. Day help when they come home for weekend and sales.

Arden Sieh: Part time day help as needed.

Keith Lunders: Part time day help as needed.

Bieber Red Angus Interns: We have always believed that experience is the best teacher and in our internship program we look for individuals that help us through some of the more intensive times like calving and breeding. We look for a "can do" attitude and a commitment to the beef business. We are always looking for opportunities to share our operation with young people interested in the seedstock business. You may have seen some of these interns in the past year.

We lead of the sale with a Hard Drive son that really pushes the envelope for more traits than any bull that will we offer this year. The High Noon daughters are some of our best proven cows and his dam is no exception. We expect this sire to be one of the leading Hard Drive Y120 sons and with his sire not producing freezable semen Lot 1 will be a prime candidate to replace him.

Lot 2 is out of a cow that we feel may be one of our top cows, Laura 112W. Last year her son was lot 36 and sold to a very discriminating commercial customer Wagonhound Livestock, who was one of the RAA Commercial Producers of the Year. This year Laura 112W brought in another and he doesn't give anything up to last year's maternal brother. Laura 112W goes back to the same cowline as Laura 158W who recently sold for \$30,000 to Twedt Red Angus on the Western Heritage Sale in Denver.

Fusion has done a great job and this son comes topping the list. His dam is owned by Craig & Lindley Howard. We are very proud of the crew at BRAR and they have the opportunity to run some cows. Craig has a pretty good eye helping us with mating and selection throughout the program. They purchased this cow as a heifer calf which has proven to be an outstanding choice as she has earned a spot in the donor pen.

Lot 5 has an amazing set of 8 full brothers 5, 15, 33, 41, 82, 86, and 88 that all are going to get a lot of attention. B&K Cattle Co, Blake & Kirsten Angell, KS bought this dam and we told Blake that he was going to be impressed with the offering 246U produced for our spring offering. We have an outstanding group of full sisters making the impact of this mating go on a long time. 246U is a Romero daughters and they are really noted for their extremely easy fleshing ability which keeps them in the herd a long time. Rose 246U, her dam, and granddam all spent time in our donor pen. Make sure you check out all the full brothers. Let us know which one you like better.

Lot 6 definitely has possibilities as an outcross for a lot of herds. This bull's dam, Basin Rose OT54 has already had an impact with a maternal grandson working in the Bachman herd. Rhodes Red Angus bought her this past fall's sale. The Rose/Primrose cowline has left its mark with a whole group of great progeny. We could take more about Rollin Deep but the truth is we just like a lot of what he does.

Every year we do our best to design some of the best matings in the breed and Lot 9 makes that very clear. Lot 9 is the first son of Bieber Spartacus A193 (Accelerated) and is also a maternal brother to Hard Drive Y120 (Select Sires) and Deep End B597 (Genex). We used Spartacus heavily in 2015 and expect that this will be one of the sires we test in 2016.

Lot 10, is the first of an amazing set of 8 full brothers 10, 15, 33, 41, 82, 86, and 88 that all are going to get a lot of attention. B&K Cattle Co, Blake & Kirsten Angell, KS bought this dam and we told Blake that he was going to be impressed with the offering 246U produced for our spring offering. We have an outstanding group of full sisters making the impact of this mating go on a long time. 246U is a Romero daughter and they are really noted for their extremely easy fleshing ability which keeps them in the herd a long time. Rose 246U, her dam, and granddam all spent time in our donor pen. Make sure you check out all the full brothers.

The Primrose cow has produced more herdsires than just about any cow in the Red Angus breed. Lot 13 is no exception and may be the best one to date. Primrose 2043 has over 70 progeny to date and countless daughters who have been flushed. Last year's high selling bull sold to Crump Red Angus and lot 13 is a full brother. Lot 13's full brothers sell as lot 59, 149, 247, 249, and 310. Maternal brothers sell as lot 225, 294, 296 AND 319.

Lot 17 stacks a pedigree that ought to interest cattlemen across the country. Lot 17 granddam was the high selling cow in our fall 2013 sale selling to Joe Andrews, NC. We expect that this bull's dam will be in the flush program at some point in her career and with the first one out of the gate she has put herself in a good position.

This is the first of two full brothers the other selling as lot 36. Their dam Rose 57U8 took a while to get noticed around here, because she didn't have a top bull early. 57U8 first 2 calves were heifers and all retained in the herd. Her pedigree makes her an outcross to a lot of the Red Angus breed making these son outcrosses as well. 57U8 has a MPPA of 106 and has been in our donor pen in 2014-2015. 57U8 sold as lot 2 to Dykes Cattle Co., WA and is going to be a donor for their program in the NW. These two sons are very interesting and warrant a look.

VIDEO WILL BE AVAILABLE ON ALL THE LOTS ONE WEEK PRIOR TO THE SALE

Lot 31 is the first Stormer son to sell. His dam Laura 101Y is in our ET program and comes from the famed cowline that produced Hard Drive. We have focused on trying to make sure we find some these young cows early and put them in the flush program. This lot really hits the sweet spot in the data with a CED of 10 and growth in the top 20% of the breed.

Lot 33 is one of amazing set of 8 full brothers 5, 10, 15, 41, 82, 86, and 88 that all are going to get a lot of attention. B&K Cattle Co, Blake & Kirsten Angell, KS bought this dam and we told Blake that he was going to be impressed with the offering 246U produced for our spring offering. We have an outstanding group of full sisters making the impact of this mating go on a long time. 246U is a Romero daughters and they are really noted for is their extremely easy fleshing ability which keeps them in the herd a long time. Rose 246U, her dam, and granddam all spent time in our donor pen. Make sure you check out all the full brothers.

Reports of Hard Drives progeny have been coming back to us and we don't think we have had a sire that has had more happy users than him ever. This lot gives a great opportunity to capitalize on those genetics. His granddam has done a great job producing outstanding genetic packages including one son that sold to a very discriminating bull buyer, Shawn Claymore, Claymore Red Angus.

Lot 54 has 3 maternal brother that sell as lot 66, 109, 270. Primrose 7079 has been one of the most prolific donor we have ever owned. Lot 54 has brothers working in a list of herds that would make you wonder who doesn't have one. It starts with Wangness, SD, Waggoner Red Angus, OK, Leland Red Angus, MT, Koester Red Angus, ND, Minium Cattle (twice), KS, Peterson, SD, Price Ranch (twice), CO, Pearl Creek Cattle (twice), SD, Spurr Farms, SD, Grozes, ND, Pharis (twice) SD, Circle E, NE, Sheldknight Cattle, TX, Claymore Ranch (twice), SD, Gibbs, MT, 3K Cattle, TX, Retzlaff, ND. That a pretty impressive list!

BIEBER RED ANGUS BULL DEVELOPMENT

At Bieber Red Angus, we have learned a lot in 47 years of producing the type of bulls customers come back for year after year. Stacking the right genetics to produce efficient and profitable cattle has always been the Bieber way, but the truth is that there is a lot more to it than mating the right cows to the right bulls. Developing bulls is 1/3 skill, 1/3 science and 1/3 art. Feed too much and cattle get fat and will not hold up for our customers. Feed wrong and you lose out on a bull expressing his full genetic potential. Every year we have customers tell us how our bulls stand up better compared to bulls from other breeders. We are very proud of the longevity these bulls have under reasonable conditions. Our development program is designed to accomplish three goals: 1) feed at a moderate rate of growth to the point of full genetic expression, 2) develop bulls in a management program we believe is similar to how our customers will manage their calves and 3) use feed-stuffs raised on our ranch that are similar to what we feel our customers will have access to. The program starts them on a high roughage diet (44 Mcal) for the first 45 days to allow calves a low-stress introduction to bunk feeding and diet change and to establishing a pecking order. The performance targets for this receiving phase are expected to be 1.5 to 2 lbs. of average daily gain (ADG). We feel that the receiving phase is the most important part of our development program because it prepares the rumen flora to handle diets with increasing amounts of energy. After the initial

receiving phase, the goal of the program is to slowly increase diet energy to properly develop muscle density and marbling deposition while maintaining sound structural and physiological development. At this point, bulls are stepped up to a 48-Mcal diet for three weeks and then a 52-Mcal diet for three weeks with a performance target of 2.25 to 2.7 lbs ADG.

The final stage of the program is to bring bulls to full genetic expression and reach a working level of body condition on a 55-Mcal diet with performance target of 3.2 to 3.5 lbs. ADG—to bring the customer that high performance, stylish bull that the Bieber brand is known for. After the collection of carcass scan data, the bulls are moved back down to the 48-Mcal diet and kept in a “holding pattern” through the sale until delivery. When you look through the catalog you will see many bulls gaining between 3 and 4 pounds per day. These bulls are not underfed; yet when you walk through the pens on sale day these bulls are not fat either. With 47 years of experience, we have found that elusive balance that so many others seek to find. We can talk about genetics all day, but if the bulls are overfed they just won't stand up in the long run. The truth is it just makes sense to buy 47 years of experience. If you have questions concerning our bull development program, contact Craig or our consulting nutritionist Eric Mousel of High Plains Ranch Management Services 605/690-4974

Red Angus Guide to EPDs

HB HerdBuilder Index – Need bulls for developing a profitable cowherd and maximizing the value of marketed progeny? Select a bull with a high HB value.

GM GridMaster Index – If you market all of your calf crop and want to increase the value of that calf crop, select a bull with a high GM value to maximize your profit.

CED Calving Ease Direct – Breeding Heifers? Select bulls with a high CED to increase the probability that the heifers will calve unassisted.

BW..... Birth Weight – Predicts differences in birth weight. BW is included in the CED EPD, so simplify your decisions by selecting bulls based on CED instead of BW.

WW Weaning Weight and **YW** Yearling Weight – Predicts differences in weight at weaning and yearling. While selection based on these growth measures can increase your payweight, be cautious what the bull's other EPDs are.

Milk Milk – Predicts differences in weaning weight of daughter's progeny due to milk production.

ME Maintenance Energy – Selecting bulls with a lower ME EPD will decrease the amount of feed his daughters will require to maintain body weight.

HPG..... Heifer Pregnancy – Retaining heifers? Select bulls with a high HPG to increase the percentage of exposures that result in a calving observation.

CEM Calving Ease Maternal – Another number to pay attention to if you are retaining heifers. Selecting bulls with a high CEM will increase the probability of those daughters calving unassisted.

STAY.... Stayability – The most important trait if your goal is developing cows that stay productive, thus increasing your profitability. Bulls that have a high Stay EPD are expected to sire daughters that remain productive in the herd until at least 6 years of age.

MARB .. Marbling Score – Select bulls with high MARB EPD to increase the number of progeny that grade Choice or Prime.

YG Yield Grade – Marketing calves on a grid? Placing selection pressure on YG EPD will decrease the number of YG discounts on grid-marketed progeny.

CW..... Carcass Weight – Selecting bulls with a high CW EPD will increase the weight of the hanging carcass, which directly impacts revenue.

REA Rib Eye Area – Need to add muscle? Select bulls with a high REA EPD to increase rib eye area, which favorably increases Yield Grade.

FAT Backfat – Need to reduce waste in carcasses? Select bulls with a low FAT EPD to reduce backfat, which favorably increases Yield Grade.

RETURN ON INVESTMENT

Red Angus genetics will improve your return on investment!

"For 10 to 15 years all the buyers ever talked about was black calves, and the black calves always brought more than everything else. Now I can honestly say that good Red Angus calves outsell the black calves and I know the Red Angus bred heifers will outsell black Angus bred heifers of equal quality every day."

– Jim Davis, Superior Livestock Auction

Effect of Breed Description on the Sale Price of Beef Calves*

* King, et al., 2015. The effect of breed description on the sale price of beef calves sold through 116 Superior Livestock Auction's video sales from 2010 – 2014. J. Animal Science, Volume 93, Supplement S-3, pp 640-641.
^{abcd} Means with unlike superscripts differ (P<0.05).

Independent research shows Red Angus-sired calves sold for a higher price than all other breed groups. Red Angus bulls make a positive difference in your breeding program's bottom line.

50 YEAR HISTORY OF BIEBER RED ANGUS

Ron Bieber

In July of 1961, my brother Leroy Bieber and I were looking for a place to produce good beef cattle. We purchased Julius Binder's and Frank Sieh's properties amounting to 2300 acres. In September of that year, I was called into the Army because of the Cuban missile crisis. While serving for ten months, Leroy and I purchased some available land from Jacob Jakober. This expanded our operation to 3600 acres. In the spring of 1962, we began tagging all cows and calves and started keeping weaning weight records. At that time, we were calving mostly Hereford cows bred to Hereford bulls. We also had a group of baldy calves that produced 60 pounds more than the Herefords. In 1964, Leroy and I split up our operations, and Leroy purchased a farmstead three miles west of our operation. In the late winter Lois and I purchased our first Shorthorn bull from Fred Kiesz.

March of 1966 brought a tremendous blizzard our way. By the time we got out to find the cattle, some were four feet below the snow and still alive. We pulled them out, rolled them on to a toboggan and pulled them home. We lost 30 Hereford cows, but were able to buy 35 Shorthorn cows later that spring that were bred to a polled Hereford bull. This led to progress in converting our entire cow herd to crossbred cattle. Soon we realized that systematic crossbreeding would result in superior weights, and our weaning weights went from 380 to 560 pounds in a period of ten years. Crossbred cows eliminated pinkeye, cancer eye and prolapse, and we consistently had better breed back.

In September of 1967, I decided that we would take a working vacation and go to Montana to search for the next cross on our cow herd. Our first stop was at Miles City to have a look at the USDA cattle research station, where an acquaintance had had success using Line 1 Herefords. Next, we took in the Montana Hereford tour, looking at numerous herds and meeting with lots of Hereford breeders. When I said we were considering using Red Angus, one of the Hereford breeders from western North Dakota said, "Red Angus are like women's hats—here today, gone tomorrow." Twenty years later he started using Red Angus, and he no longer produces Herefords.

In October of 1968, I saw an ad in the Western Livestock Reporter for the sale of 50 registered Red Angus cows in May, Idaho. When I arrived, Gene Cook took me around for a tour of his Red Angus herd. I selected 14 cows, which Gene had transported by a pot that was filled with feeder cattle headed to our area. The cows arrived in early December, and we were officially a Red Angus seedstock herd.

April of 1969 brought an opportunity to take another trip to Montana. Ora Erdmann from Erdmann Angus had sent ten bulls to the Stanford Bull Test Station in north-west Montana. The test had 300 or more Angus, Hereford, Shorthorn and Red Angus bulls, as I remember. Early one morning I fed the cattle and tagged new calves. I finished seeding the field east of the house. Ora Erdmann showed up just before noon, and with him was Dr. Harlan Ritchie, Animal Science professor from Michigan State University.

I loaded my bag in the single cab two-ton truck, and off we went to Montana: three men, luggage and lots of BS. The major conversation topics were cattle and genetics. It didn't take many miles down the road before we were engaged in an intense conversation concerning cattle breeding. After he found out we were using a good Shorthorn bull, Harlan said that there was a breeder in Michigan he knew who was interested in a large framed Shorthorn bull like we had. It turned out Harlan was not coming back with Ora and myself, so an opportunity to sell a high dollar herd sire was missed. Harlan is a very astute observer of animal breeding and has been known for years as a leading authority on cattle breeding. Ora Erdmann was in his 60s, a keen observer of cattle and a self-taught cattle breeder. His famous one-liner was "I don't want Shetland pony Angus."

In the late 1960s the beef cattle industry was changing rapidly. Suddenly performance records became important, and many cattlemen were looking for larger framed cattle. The pursuit of more frame and the introduction of continental breeds was recognized by keen observers of cattle breeding, like Harlan Ritchie, who realized frame could be detrimental to profitable beef production. That trip to Montana enlightened me and gave us contact with many leading cattle breeders in the beef industry.

In September of 1969, R.C. Buckner of Tyler, Texas, was having a Red Angus dispersion sale. Albert Erdmann and I made the trip in a two-ton truck to watch Buckner sell off 750 head of cattle. When we left, we ended up filling the truck with 20 head. After that, every chance we had we acquired more Red Angus cows and heifers. Soon our herd numbered 250 breeding females. In the fall of 1975, we sold our crossbred herd to Henderson Ranch of Lodgepole, South Dakota.

In 1975, we also had difficulty selling bulls, so we made the decision to have a production sale. That May we moved enough soil to form a level spot to put up an insulated Morton building. In those early years we provided information on birth weight, weaning weight, yearling weight and gain from weaning to yearling at each sale. Now we provide 12 EPDs and nine weights and measurements.

In the spring of 1983, we purchased the West Ranch from Harold Geffre. In the spring of 1988, we were able to purchase 800 acres from the Morrison Brothers, land that had run along the west side of our property. Then in the winter of 1989, we were offered the Jonathan Brenise place, which was 480 acres. We presently have enough land to run 800 cows.

The Power of 50K

Performance observations collected at the ranch are impacted by the animal's genetics, which can include hundreds or thousands of genes. Recent advancements in DNA technology have now allowed for the identification of a portion of genes that have a significant favorable or unfavorable impact on a particular trait.

50K is the tool that observes 50,000 locations on the animal's genome and identifies which genes that animal possesses and their impact on various traits. The result: additional informative data available for EPD calculations.

Genetic predictions will always be based on data; however, the means in which we collect data has – and will likely continue to – evolve. Previously, the Red Angus Association of America relied solely on phenotypic observations such as weaning weights and ultrasound data to calculate EPDs. The delivery of 50K technology provides additional data points that can be applied to an animal's EPD calculations. Data obtained from a 50K test can be as informative as a bull's first calf crop or a cow's lifetime production record, thus, providing stakeholders with a tool to vastly increase accuracy of an animal's EPDs.

Accuracy

EPDs predict an animal's true genetic merit, which can be passed on to offspring. As the amount of data included in an animal's EPD calculation increases, ranchers can have more confidence that the EPD correctly identifies the animal's true genetic merit. This is communicated to stakeholders in the form of "Accuracy," which is printed in conjunction with each EPD and ranges from 0 to 99.

Increased Data = Increased Accuracy = Increased Reliability

The power of 50K is the ability to collect additional genetic prediction data before an animal is selected to enter or exit the herd. Thus, allowing producers to achieve their genetic goals at a faster rate, as the genetic predictions used in selection decisions are of higher accuracy.

Pedigree + Performance Record

Pedigree + Performance Record + 50K Genomic Data

Pedigree + Performance Record + 10 Progeny

The Rancher's Guide to 50K

Bull selection is one of the most significant decisions ranchers make in terms of influencing the overall profitability of their operations; therefore, Red Angus strives to deliver reliable genetic predictions to stakeholders to ensure producers are making the most informed decisions possible in pursuit of production goals.

For years, ranchers utilizing Red Angus EPDs (Expected Progeny Differences) in their selection decisions have enjoyed the built-in reliability and risk reduction provided through the breed's early adoption of Total Herd Reporting (THR) data. To further advance EPD accuracy and reliability, Red Angus can now incorporate 50K genomic data.

For generations, animal breeders have relied on phenotypic measurements to determine what the animal possesses at the gene level. Now, with the inclusion of 50K genomic data, we can actually measure the impact of identified gene effects before the weight or measurement is ever recorded.

Red Angus' new 50K test proves to be a game changer.

- **Ensure your yearling heifer bulls are “calving-ease specialists.”**
- **Confirm your cowherd-building bulls have optimal genes for maternal traits.**
- **Make certain your carcass bulls are superior grid producers.**

Information gained from 50K genomic data and Total Herd Reporting data provides Red Angus stakeholders' EPDs with unsurpassed reliability.

Bull Selection – Simplified.

Red Angus stakeholders have enjoyed the capability of selecting bulls based on economically relevant traits (ERTs), such as Heifer Pregnancy or Stayability, that truly impact their operations profitability. While these ERTs allow for efficient selection decisions, the growing number of ERTs and EPDs has resulted in confusion as producers attempt to estimate a sire's overall impact. In response, RAAA has developed the HerdBuilder and GridMaster indices, which answer the question:

“What impact will each potential sire have on my operation's profitability?”

HERDBUILDER

Producers selecting bulls to develop profitable replacement females and maximize the value of non-replacement marketed progeny should incorporate the HerdBuilder Index into their selection decisions.

The HerdBuilder Index is built using the following scenario:

- Red Angus bulls mated to cows and heifers
- Replacement heifers retained from within the herd
- All remaining progeny sold on a quality-based carcass grid

Given that replacement heifers are retained, significant influence is placed on the obvious maternal ERTs of Stayability, Heifer Pregnancy and Calving Ease. Additionally, with all remaining progeny sold on a quality-based carcass grid, Marbling, Yield Grade and growth EPDs also impact the HerdBuilder Index.

GRIDMASTER

Use the GridMaster Index if your operation's primary goal is maximizing profitability of feeders in the feedyard and on the rail.

The GridMaster Index is built using the following scenario:

- Red Angus bulls mated to cows
- All progeny sold on a quality-based carcass grid

Marbling, Yield Grade and growth EPDs are the traits of primary importance in the GridMaster Index.

While the process of calculating an index is very complex, the resulting selection tool is very simple to implement.

HerdBuilder and GridMaster are expressed as differences in profitability per exposure.

HerdBuilder Example:

30 cows x 5 years breeding = 150 exposures

Bull A has a HerdBuilder Index of 175: $175 \times 150 = \$26,250$

Bull B has a HerdBuilder Index of 100: $100 \times 150 = \$15,000$

\$11,250 Difference in Profitability

BULL MORTALITY *and* LOSS OF USE INSURANCE

Insurance Coverage Underwritten By:

Aegis Security Insurance Company
PO Box 3153, Harrisburg, PA 17105-3153
A.M. Best Rating: A VI

Option 1: Bull Mortality and Loss of Use Coverage

- Values:** Bulls valued up to \$25,000, not to exceed purchase price.
- Term:** One Year Policy Term
- Premium:** 12% of the Purchase Price
Premium Fully Earned
\$150 Minimum Premium Per Animal
- Testing:** All bulls must be tested, certified and listed in the official catalog of a herd sale.

Please see the reverse side for further coverage information.

Option 2: Bull Mortality Coverage

- Values:** Bulls valued up to \$25,000, not to exceed purchase price.
- Term:** Renewable One-Year Policy Term for Bulls 6 Month - 7 Years of age.
- Premium:** 5.5% of the Purchase Price
Premium Fully Earned
\$150 Minimum Premium Per Animal
- Testing:** Veterinarian examination and signed statement of health required for all bulls for which coverage is requested.

Full Mortality:

100% of the value of the bull in the event of death or life-threatening injury.

Loss of Use:

80% of the value of the bull, less salvage value, of in the event of Loss of Use from an accident, illness, or disease that can clearly be diagnosed or identified to have occurred on a specified date.

25% of the value of the bull in the event of Loss of Use from an accident, illness, or disease if there is a diagnosis consistent with an accident, illness, or disease but no real evidence that provides clear diagnosis or identification.

Full Mortality:

100% of the value of the bull in the event of death or life-threatening injury.

Aberdeen, SD 57402

Red Angus Marketing Programs

The FCCP is the first step in differentiating your cattle from others to buyers, feedlots and packers.

What is the Feeder Calf Certification Program?

Producers utilize the Feeder Calf Certification Program (FCCP) to enroll calves in the industry's first genetic, source and age USDA process-verified program (PVP).

With many age and source verification programs to choose from, it's important to realize that Red Angus has the only PVP to hold the marketing claim of traceability to at least 50 percent registered Red Angus bloodlines. The genetic claim of the FCCP allows calves to access many Angus product lines. USDA provides certification of meat carcasses for a number of marketing programs that make claims concerning breed and carcass characteristics. Packer product lines making an "Angus" genetic claim require documentation from USDA verifying their Angus genetics, like the FCCP Certificate of Compliance.

How to enroll your calf crop in the Feeder Calf Certification Program

1. Contact Red Angus at (940) 387-3502 to go through a short supplier enrollment questionnaire over the phone. Red Angus will ask general management, animal identification and breeding questions. If needed, additional documentation on breeding may be needed such as semen documentation, lease agreements or information on purchased bred females.
2. After all documentation is recorded, Red Angus will have the tags shipped directly to the producer. Tags need to be applied prior to the calves leaving the ranch of origin.
3. The producer will receive a customer enrollment agreement to fill out and return with a copy of your calving records.
4. Upon return of your customer enrollment agreement and calving record, Red Angus will issue your USDA-approved certificate of compliance.

Red Angus FCCP
GENETICS + SOURCE + AGE

- Traceability to at least 50% Red Angus Bloodlines
- Source Verified to Ranch of Origin
- Group Age Verified

Allied Access
SOURCE + AGE

- Source Verified to Ranch of Origin
- Group Age Verified

Still the Best Value at 99¢ & No Enrollment Fees!

Thistle Ridge and Silver Spur purchase Rollin Deep Y118 in 2012. We decided this spring with the impact he was making on our program that we should walk the bull so we bought natural service from Thistle Ridge. Rollin Deep Y118 new picture shows he is a powerful sire that does the cowman things right. His pedigree is well known for producing power cattle with exceptional feet, udders, and fleshing ability. Rollin Deep Y118 has become a centerpiece in our ET program and his sire, Bieber Roosevelt has become of cornerstone to our commercial customers producing thick cattle with great dispositions. Rollin Deep Y118 is the kind of bull that can leave positive impact on the breed for years to come. If you are looking for a bull that sires great phenotype, power and makes balanced cattle with the ability to flesh, breed back, stays sound and productive for the long haul. Look no further. A limited number of daughters brought in some outstanding progeny. We have always believed that through focused selection you can breed cattle that have it all. Every year we feel we get a bit closer. Semen Available thru Bieber Red Angus

Hard Drive Y120 sold to Select Sires in our 2013 production sale. When you study Hard Drive's data you are pretty hard pressed to find a sire that will post as many traits in as high of percent rank as he does. Hard Drive has gone lower on BW, and higher on growth so expect his progeny to be in high demand. We weaned over 180 Hard Drive calves in the fall of 2015. Visitors last fall and this winter have been very impressed with Hard Drive's daughters in the replacement heifer pen. We have evaluated the bull pen and the progeny from Hard Drive will impress everyone. Hard Drive's dam sold in January to Twedt Red Angus and will definitely give Sam some of the same outstanding genetics. Hard Drive is no long producing freezable semen so the next couple of groups of sons will be where we find our next great sires.

No other sire in the history of Bieber Red Angus has had the impact that Roosevelt has had. Roosevelt has been an exceptional sire and has produced some of our finest progeny in recent years. Cattlemen appreciate the power and type in Roosevelt's progeny. He has truly impacted our herd as much as any sire in recent history. Both his sons and daughters are extremely good fleshing with added depth and exceptional disposition. Roosevelt has produced many sons that have gone on and left an impact in both registered and commercial herds. He is a very well balanced bull and is always among the favorite sires when people come to the ranch to view the cattle. Semen Available thru Bieber Red Angus.

We sampled Fusion heavily in 2013, and 2014. He produced several great sons who sold in our 2015 production sale. We sampled both Federation who sold to Bachman Red Angus and Federalist who sold to Twedt Red Angus and Genex. We liked Fusion for his outcross pedigree, his data and his phenotype. Fusion's calving ease is sure shot. We are calving the first Fusion daughters and they are meeting all expectation. Our offering is solid again this year with over 50 sons in the offering. Semen available thru ABS.

Spartacus was a crowd favorite in our 2014 spring production sale selling to Accelerated Genetics and Jefferies Land and Cattle. He is a great disposition bull stacked for profit. Powerfully made and very stout boned, Spartacus was heavily used in our program in the 2015 breeding season. Spartacus is a very complete bull that leaves a breeding program in a very good position going forward. Semen is available thru Accelerated Genetics.

Bull Selection Simplified.

Building a cow herd?

- Combine low-expense traits (ME EPD) with acceptable revenue traits to breed efficiency into the cow herd.
- Improve fertility with selection pressure on HPG EPDs.
- Sleep through the night by selecting high-CEM EPDs.
- Improve longevity and lower replacement rates by selecting higher-than-average STAY EPDs.

Breeding virgin heifers?

- Select for CED EPD as the most meaningful predictor of calving ease. Red Angus' CED combines birthweight and other factors affecting calving-ease scores.

Selling calves or yearlings?

- Heavier payweights may be achieved by selecting higher WW EPDs, but...make sure heavier is what you want. Heavier weaning weights mean heavier payweights for calf feds. However, for those who background their calves, too much weaning weight could translate into yearlings that are too heavy when they enter the feed yard, and finish too heavy. **Overshooting performance goals can be just as detrimental as falling short.**
- Enhance your reputation - improve traits that impact feeder profits, such as carcass traits and post-weaning gain (YW).

Retaining Ownership?

- Docile and fast starting, Red Angus are easy to start on feed and keep on feed.
- Balance YW EPD of potential bulls with the existing cow herd to pinpoint needed improvement for post-weaning gains.
- Increase payweight with selection for improved CW EPD.

Selling on a Grid?

- Fine-tune marbling (MARB), rib eye area (REA), and back fat (FAT) EPDs to target value-based grids.
- Target YG 1 & 2 premiums and avoid YG 4 discounts by applying selection pressure on YG EPD.
- Optimize carcass weights to increase payweights while avoiding discounts for heavy weight carcasses.
- Balance Carcass EPDs against existing cow herd genetics:
 - Cowherds of higher continental influence may require additional selection pressure on marbling EPD to improve quality grade.
 - High-percentage British cowherds typically benefit from selection pressure to reduce YG and increase CW.

Ranch Tested. Rancher Trusted.

Red Angus

(940) 387-3502 • RedAngus.org

Contact the Red Angus Association of America if you have further questions about how you can reach your breeding goals with Red Angus EPDs.

Grw.Sc. G6

Lot 1 has been a standout since he was born. His dam is one of Gene Rouse's, very best cows, posting average progeny ratios of WW 110 and IMF 137. Lot 1 is in the top 1% for both of the new indexes and posts some data that is really hard to match. His sire has been making us take notice and we like what we see in his calves. Overload is going to turn some heads on sale day.

1. Lot Number -- This is the lot number of the animal. Cattle will have a white tag that will correspond to that number. Generally cattle will sell in Lot number order.

2. Name -- This is the registered name of the animal. Generally we name bulls after the sire and females after the dam name.

3. Born -- This is the birth date of the animal.

4. Reg -- This is the Registration number of the animal. All Red Angus animals can be looked up on the Red Angus website at www.redangus.org and going to the animal search page and using this registration number.

5. Breed -- This area has the breed composition and category as determined by the Red Angus Association of America. Breed Codes are AR=Red Angus SM=Simmental XX=Unknown. The Unknown cattle are largely cattle that we couldn't prove percentages of parents on the Durham herd. That unknown breed is either Simmental or Red Angus in the Durham foundation cattle.

- AR = RED ANGUS
- SM = SIMMENTAL
- UKN = UNKNOWN

6. Category

- 1A=100% Red Angus with no disqualifying features
- 1B=87% to 99.9% Red Angus with no disqualifying features
- II=Equal to or greater than 87% up to and including 100% Angus blood content having one or more disqualifying characteristics. Disqualifying features include scurs or horns, ineligible white, black pigment, progeny of multiple sire groups, and missing birth date, or weaning weight and date
- III=Less than 87% Angus blood content

7. Sire -- Sire of the animal

8. Paternal Grand Sire -- Sire of the Sire

9. Paternal Grand Dam -- Dam of the Sire

10. Dam -- Dam of the animal

11. Maternal Grand Sire -- Sire of the Dam

12. Maternal Grand Dam -- Dam of the Dam

13. MPPA -- Most Probable Producing Ability -- An estimate of a cow's future productivity for a trait (such as progeny weaning weight ratio) based on her past productivity. For example, a cow's MPPA for weaning ratio is calculated from the cow's average progeny weaning ratio, the number of her progeny with weaning record, and the repeatability of weaning weight.

14. Aod -- Age of Dam at the time of weaning the progeny identified.

15. ADG -- Average Daily Gain -- Measurement of daily body weight change over a specified period of time of an animal on a feed test.

16. ADG Ratio -- Average Daily Gain Ratio -- The ratio of the animal within its contemporary group. ET and Twins will be marked with a TW and ET. These animals have no contemporary group.

17. WDA - Weight Per Day of Age -- Weight of an individual divided by days of age

18. WDA Ratio - Weight Per Day of Age Ratio -- Weight of an individual divided by days of age. ET and Twins will be marked with a TW and ET. These animals have no contemporary group.

19. AScr - Adjusted Scrotal Circumference -- A measure of testes size obtained by measuring the distance around the testicles in the scrotum with a circular tape. Related to semen-producing capacity and is adjusted to Yearling age. Actual Scrotal Measurement are provided on a supplement sheet 1 week prior to the sale and at the sale.

20. CE - Calving Ease Score -- This is our recommendation for CE based upon the data and the pedigree. *** = Use on heifers. Expect less calving difficulty ** = Use on grower heifers and cows. Expect moderate calving difficulty on heifers and very little difficulty on cows. * = Use on cows. Expect difficulty on heifers and some to very little calving difficulty on cows.

21. Grw. Sc. - Growth Score -- This is our recommendation for growth based upon the data and the pedigree. G6 = maximum growth rating, G5 = high growth rating, G4 = moderately high growth rating, G3 = average growth rating, G2 = below average growth rating, G1 = low growth rating.

22. DNA test ran on this animal.

23. EPD - Expected Progeny Difference -- The difference in expected performance of future progeny of an individual, compared with expected performance of future progeny of an individual of average genetic merit in the base time frame for the genetic evaluation. EPDs are estimated from phenotypic merit of an individual and all of its relatives and are estimates of one-half the breeding values. EPDs are generally reported in units of measurement for the trait (e.g., lb., in., etc.).

24. acc - Accuracy -- A measure of the reliability of an EPD. Accuracy values are reported as decimal numbers between zero and one. Values closer to one indicate larger amounts of available information and greater certainty that a bull's EPD will not change significantly as more progeny information becomes available. Bieber Red Angus reports the accuracy values for sires since they have high accuracies. EPD are a more reliable estimate of performance than weight ratios or other measurements. Understanding ACCURACY: Red Angus EPDs are often presented with a corresponding accuracy value, which measures the strength of the relationship between the genetic prediction (EPD) and true genetic value. Accuracies are reported as a decimal number from zero to one. As accuracy value approaches 1.0, the EPD is "accurately" or closely estimating the true genetic merit of an animal for a given trait. Although low-accuracy EPDs are less reliable when compared to those of proven sires, independent research demonstrates EPDs to be the most meaningful indicator of animals' true genetic merit. While "perfect" accuracies of 1.0, are never achieved, many heavily used Red Angus sires have accuracies greater than 0.9 (some as high as .99).

25. %Rank -- This is the percentage rank of the EPD within the type of animal. Rank groups are Proven and

Opportunity Sires, Active Dams and Non Parent under Two Years of Age.

26. Wts - Weight -- The weight for that trait in that column adjusted to a constant days of age by Red Angus Association and Beef Improvement standards.

27. Ratio - Ratio -- The ratio for that trait in that column within its contemporary group. ET and Twins will be marked with a TW and ET a have no contemporary group.

28. CED - Calving Ease Direct -- predicts the probability of calves being born unassisted out of 2-year-old heifers. Producers want live calves - born unassisted. Selecting on actual birth weight is flawed; it is influenced by non-genetic factors such as nutrition and weather (ambient temperature). While BW EPD removes these non-genetic factors, Red Angus' CED EPD is the best predictor of calving ease. The CED EPD includes variation in BW plus other influential genetic factors such as gestation length, calf shape, etc.

29. Birth Weight EPD -- predicts the difference, in pounds, for birth weight, and is also used in the calculation of Red Angus' Calving Ease Direct (CED) EPD.

BW - Birth Weight (BW) -- The actual weight in pounds at birth.

30. Weaning Weight EPD -- predicts the difference, in pounds, for weaning weight (adjusted to age of dam and a standard 205 days of age). This is an indicator of growth from birth to weaning.

WW - Weaning Weight -- The 205 adjusted weight. This is an indicator of growth up to weaning.

31. Yearling Weight EPD -- predicts the expected difference, in pounds, for yearling weight (adjusted to a standard 365 days of age). This is an indicator of growth from birth to yearling.

YW - Yearling Weight -- The 365 adjusted weight. This is a measure of growth from birth to yearling.

32. Milk EPD -- (MILK) predicts the difference in maternal production of an individual animal's daughters as expressed by the weaning weight of their calves.

33. TM - Total Maternal EPD -- predicts the rancher's actual observation of weaning weights of calves raised by an animal's daughters. TM includes the daughter's milk EPD plus half of her genetic contribution to her calf's weaning weight EPD. The formula for TM EPD is: TM EPD = Milk EPD + 1/2(WW EPD)

34. ME - Maintenance Energy -- predicts differences in daughters' maintenance energy requirements and is expressed in Mcal/Month. Recognizing that 70% of cow herd feed costs are burned up in maintaining weight and condition, Red Angus' ME EPD allows for the selection of bulls whose daughters will require less feed; thus, reducing cowherd expenses. Include selection pressure for ME EPD to ensure feed costs don't get out of line when selection is made for greater performance and production. At Bieber Red Angus we collect cow weight at weaning time to insure greater accuracy of this EPD.

35. HPG - Heifer Pregnancy -- predicts the probability

of heifers conceiving to calve at two years of age. Many breeds offer genetic predictions of yearling bull scrotal circumference as an indicator of age of puberty. While puberty is a prerequisite, many factors influence pregnancy rate. Red Angus' HPG EPD offers a tool which selects for what is economically relevant to ranchers - pregnant heifers. At Bieber Red Angus we submit all heifer breeding data to insure the accuracy of this EPD.

36. CEM - Calving Ease Maternal (CEM) -- predicts the probability of a given animal's daughters calving unassisted at two years of age. Replacement heifers should be able to calve on their own. Red Angus' CEM EPD offers the industry's most reliable prediction to address that concern. It includes not only the predisposition for a female to calve unassisted, but also her contribution to her calf's traits (birth weight, calf shape, etc.) that make it more likely to be born unassisted.

37. STAY - Stayability (STAY) -- predicts the probability of a bull's daughters remaining productive until at least six years of age. Why six? That's how long it takes a female to breakeven given all the expenses of development.

38. MARB - Marbling Score -- predicts differences for carcass marbling score as expressed in marbling score units. Higher marbling scores are positively correlated with higher carcass quality grades.

39. REA - Rib Eye Area -- predicts differences of carcass Rib Eye Area between the 12th and 13th rib. Increased Rib Eye Area has a beneficial effect on Yield Grade which also includes Carcass Weight and Fat Thickness.

40. FAT - 12th Rib Fat Thickness -- predicts differences for carcass fat depth over the 12th rib, as expressed in inches. Increases in fat thickness has a detrimental effect on Yield Grade. Fat thickness measured in young seedstock, maybe an indicator of fleshing ability.

41. HerdBuilder Index -- As the name indicates, implementation of the HerdBuilder Index will assist producers in building profitable herds. The HerdBuilder Index is built using the following production scenario:

- Red Angus bulls mated to cows and heifers (resulting progeny ¼ Red Angus, ¼ Simmental)
- Replacement heifers retained from within the herd
- All remaining progeny sold on a quality-based carcass grid.

40. GridMaster Index -- While Red Angus has traditionally been known as a superior maternal breed, those who have retained ownership in Red Angus calves know of their potential to excel in the feedyard and ultimately hang a premium carcass. The GridMaster Index is built using the following production scenario:

- Red Angus bulls mated to cows (resulting progeny ¼ Red Angus, ¼ Simmental)
- All progeny sold on a quality-based carcass grid.

42. Footnote -- This is information we would like to point out about the lot. It may contain breeding information on bred cattle.

TERMS AND CONDITIONS

The Red Angus Assn. Terms and Conditions will apply if the terms and conditions printed here are not applicable.

BIDDING DISPUTES: The auctioneer in charge will settle any disputes as to bids, and his decision on such matters shall be final.

TERMS: The terms of the sale are cash; the right of property shall not pass until after settlement is made. All settlements will be made with the clerks of the sale immediately following the conclusion of the sale and before any cattle will be released from the ranch.

RETAINED INTEREST: We are retaining 1/2 interest in all bulls in the sale. We are selling the remaining 1/2 interest, full possession, and full salvage value on these bulls. This option gives Bieber Red Angus Ranch the option to collect, use and market semen from the bull and does not restrict the purchaser from doing the same. This collection, unless agreed otherwise, would be done at the expense of Bieber Red Angus Ranch, at the buyer's convenience. Also at the time of purchase, the highest bidder on a retained interest bull may elect to purchase exclusive semen rights for 100% of the purchase price in addition to the purchased price on retained bulls. If a buyer elects to purchase exclusive semen rights, Bieber Red Angus Ranch interest then becomes in herd use only, but Bieber Red Angus Ranch retains all rights to use the bull within their herd.

SEMEN RIGHTS: Buyers receive semen rights proportional to the interest purchased. If you purchase a 1/2 interest, then you are entitled to 1/2 of the semen collections at cost provided that you indicate you want semen prior to collection. We intend to collect some of the bulls in the sale and sample them in our herd. We will cooperate with the buyer in collection of the bull. We prefer to collect most bulls after the first season of use and we will contact the buyer when we intend to collect the bull at a time convenient for the buyer.

PURCHASER'S RISK: Each animal becomes the risk of the purchaser as soon as sold. Animals will be fed, watered and cared for at the purchaser's risk for a reasonable time.

CERTIFICATE OF REGISTRY: A certificate of registry and transfer will be furnished for each animal sold as a registered animal, after settlement has been made.

HEALTH: All cattle will have official health certificates and will sell guaranteed exported to Canada. Canadian health certificates will be charged at cost on animals selling under \$10,000.

ANNOUNCEMENTS: Changes of information contained in this catalog relating to the animals offered for the sale will be announced from the auction box and such announcements shall take precedence. Errors discovered in the catalog will be corrected by announcements at sale time, and such corrections will take precedence over the printed matter in this catalog.

BREEDER'S GUARANTEE: 1. All animals are guaranteed breeders, with the exception of: a) calves under twelve months of age; b) animals shown by Purchaser after sale (in cases of animals shown after purchase, the breeding guarantee, if any, shall be such as agreed upon between Seller and Buyer) c) Any open heifer that has been flushed for embryo transfer; or d) gross negligence or willful misconduct on the part of the Purchaser. 2. Bulls are guaranteed breeders if not allowed to run with the herd until at least 14 months of age. Any bull which either: a) settles 1/3 or more of the healthy cows he serves; b) is the sire of 20 or more animals; or c) settles cows by natural service and passes a fertility test made by a competent veterinarian during any 6 month period of trial (provided for in paragraph 2 of the section of these sale terms and conditions entitled "Options and Privileges of Return or Adjustment") shall be considered a breeder.

Any guarantee with respect to the ability to freeze semen shall be by separate agreement between Buyer and Seller.

Open females have not been served and are so guaranteed.

If you can't attend the sale & would like to buy cattle, call Craig (605-439-3628 / 605-216-8169 / 605-439-3545) before the sale. Tell us what you are looking for and we will assist in arrangement to help you participate in the offering.

We will call you after the sale and inform you of your purchases.

We guarantee your purchase will be satisfactory.

TELEPHONE BIDDING

We will have available telephone bidding by conference call. If you wish to bid over the phone, please register before sale day.

INTERNET BIDDING

See page 3 for information.

IDENTIFICATION: Each animal carries a readable tattoo. Tag numbers on the cattle correspond with lot and tattoo numbers in this catalog. Purchaser agrees to use full name of animal in advertising and on stall cards at shows.

OPTIONS AND PRIVILEGES OF RETURN OR ADJUSTMENT:

1. All claims for adjustment or refund must be made in writing either within six months of the sale date or no later than six months after the animal reaches 18 months of age, with the exception of claims involving defects or parentage.

2. In the event an animal is claimed to be a non-breeder, the animal may be returned to the farm of the Seller if in good condition and complying with the health requirements of the Seller's state. The Seller shall be entitled to six months' trial following the return of the animal in which to prove the animal is a breeder, the Seller shall, at the option of the Buyer, replace the animal with another of equal value or grant the Buyer a credit for use on any products marketed by the Seller. Such credit of the full purchase price shall in any case be deemed full satisfaction and settlement. Any expense incurred for transporting an animal claimed to be a non-breeder shall be the responsibility of the Purchaser, except that the Seller shall be responsible for the transportation costs in excess of the distance between the Purchaser's farm and the location where the sale took place. If the Seller proves the animal is a breeder, it shall be the obligation of the Purchaser to take delivery of the animal and pay all expense incurred for transportation.

3. If a female sold as "safe in calf" proves not to be in calf, the Purchaser may receive service from the bull previously used, if available, or if the bull is not available, the Seller shall be obligated to make a satisfactory adjustment on the purchase price upon return of the animal to the farm of the Seller. Any adjustment provided for herein shall absolve the Seller from further liability, except in case such female proves to be a non-breeder. If a female represented as "safe in calf" at time of sale to a certain bull proves to have been bred to a different bull, the Seller shall be obligated to take a satisfactory adjustment on the purchase price upon return of the animal to the farm of the Seller (adjustments shall not be considered a breeding fee or an allocation of the purchase price to any unborn calf). Any expenses incurred for transportation shall be the responsibility of the Purchaser, except that the Seller shall be responsible for the transportation costs in excess to the distance between the Purchaser's farm and the location where the sale took place.

4. If a female sold as "served" proves not to be in calf, or if a female sold as "pasture-bred" proves not to be in calf, the Seller only guarantees such female to the breeder.

5. If a female sold as "open" proves to be with calf, the Purchaser may return the animal to the farm of the Seller prior to calving for a credit of the full purchase price or for another animal of equal value, whichever is acceptable to the Purchaser. It shall be the obligation of the Seller to bear any expense incurred for transportation.

LIABILITY: Neither owners, sale managers, clerks nor anyone connected with the sale assumes responsibility, legal or otherwise, for damages of any kind.

CONTRACT: The above terms and conditions shall constitute a contract between the buyer and seller of each animal sold.

IMPLIED WARRANTY: Except for those stated in the terms and conditions, there are no warranties, either expressed or implied, as to merchantability or fitness for a particular purpose with respect to the cattle being sold in this auction. The warranties set forth in terms and conditions are in lieu of all other warranties, either expressed or implied, and the remedies proved therein shall be the sole and exclusive remedy of the buyer, or any part claiming through buyer, for any breach of warranty or guarantee therein provided and all other obligations or liabilities.

We guarantee your purchase will be satisfactory.

Money can't buy Happiness but it can buy Cows ... which is pretty much the same thing!
