

Bieber Fever XII!

2017 Bull Sale

March 2nd, 1:00 pm at the Ranch,
Leola, South Dakota

This bull offering gives cow-calf producers the opportunity to produce high quality feeder cattle that will be "sought" after in the marketplace.

The longest running Red Angus Production Sale in the Northern Plains

WELCOME TO THE SALE!

Cattlemen and Cattlewomen,

The goal of our program has always been to provide our customers with the most progressive Red Angus genetics possible. Genetics that excel in the economically important traits of efficient beef production. To us that means growth, fertility, calving ease, maternal and carcass traits along with the convenience traits. These traits should come in a functional, sound, easy fleshing package. We have always relied on EPD's, visual appraisal and individual performance to guide us in the selection process. As I write this we have just finished evaluating the bulls. Without a doubt this set of bulls is a deep as we have ever produced. Our commitment to reaching our genetic goals include ongoing investment in elite genetics through semen from outstanding sires, selection of high potential young sires, and a structure testing that give our customers a distinct advantage.

If this is the first time you have received our catalog, you probably want to know a little about us. We are a family-owned business with roots in registered Red Angus cattle going back over 50 years. We currently calve over 900 registered Red Angus annually, and in addition wean over 250 ET calves. Our cow herd runs under range conditions typically requiring 10+ acres per cow/calf pair. Our ranch staff is dedicated to helping use to produce profitable cattle, in a commercially orientated system. We consider them essential to the operation of the ranch, and value the input they share, and the time they put in, to make sure we excel at our goals.

The goals of our program depend highly on customer satisfaction. Repeat customers, long standing relationships, and real genetic value, are what we strive to produce.

Our priority has always been our personal alliance with you, our customer, has always been and will continue to be at the top of our list.

Feel free to give us a call and discuss your needs any time.

Thanks for taking the time to review our program.

Craig & Peggy Bieber

Allied Genetic Resources is entering its seventh year of service to our member owners and their commercial customers. Genetic consulting, feeder

cattle and replacement female marketing, professional genetic procurement, sales management and a growing semen business are just a few of the customer focused services offered daily by the growing Allied staff. Genetic improvement and value adding service are what separates great seedstock producers from the rest. As the US beef business becomes more competitive and information based, the strength and reputation of your genetic provider will provide the competitive edge you need to stay to the front of the profit race.

Allied Genetics members now number more than 80 in total and in 2017 will market nearly 9000 profit bred bulls. Chosen for commitment to both their commercial customers and the beef business, these independent producers are absolutely industry leaders when it comes to providing value and focusing on the long term. Do the math, the genetics you purchase in 2017 will have substantial profit impacts on your herd well into the early 2030's. Make sure your genetics provider has that kind of impact in mind when they are building seedstock for you. If they reject technology, talk more about philosophy than sub-stance and or don't stand behind their product the way you wish they would, talk to us or any Allied herd about better genetics purchasing for your future. To be confident in consistency and value just look for the Allied logo when you choose a genetics source. Allied by reputation focused on service. Allied Staff :

MARTY ROPP – Get the most profit possible from your genetics by contacting Marty and making a solid and practical plan for the future. 406-581-7835

CLINT BERRY – Get more for your calves this and every year. Contact Clint and his team of Superior Livestock Representatives for details and professional assistance. 417-844-1009

GARRETT THOMAS – Experienced, professional seedstock marketing service pays dividends. Call Garrett for opportunities and proven options. 936-714-4591

ANDREW CONLEY – Andrew brings years of commercial and genetics experience in the South-east to our growing team. Call him for regional consulting and marketing solutions. 706-781-8656

ROCKY FORSETH – Genetics procurement should have the end in mind. Give Rocky a call to find the seedstock you need then stand behind you when it's time to capture the added value of their calves. 406-590-7984

WWW.ALLIEDGENETICRESOURCES.COM

ALLIED BY REPUTATION. FOCUSED ON SERVICE.

THE PEOPLE OF BIEBER RED ANGUS

Ron Bieber: Co-Founder of BRAR, range, pasture & alfalfa specialist, and cattle breeding.

Lois Bieber: Co-Founder of BRAR. Responsible for the sale meals and hospitality. Oversees all ranch activities.

Craig Bieber: CEO of Bieber Red Angus Ranch, handles all ranch activities.

Peggy Bieber: Craig's partner and now full time office staff, handles all bookkeeping, cattle records, and

clerks the sale.

Craig Howard: Cowboss, Handles day to day operations at BRAR. AI technician, welder and equipment repairman.

Lindley Harrington Howard: Social media manager at BRAR. Past summer intern and day help hand. Helps clerk the sale. Craig Howard's wife.

Cayson Howard: Son of Craig and Lindley Howard. One of our newest ranch hands. Born 1 week after Kylie Jo Payne.

Tom Churchwell: General ranch duties, light mechanics, handles all cattle feeding.

Frankie Coker: Engaged to Tom Churchwell. Keeps the guys happy with her caramel rolls. Helps at sale.

Dillon Spurr: Herdsman, calving, feeding, general ranch duties.

Rod Klarenbeek: General ranch duties, light mechanics, helps with the feeding.

Sue Klarenbeek: Rod's wife, helps sale day.

Alex and Lance: Rod and Sue's grandsons. Rock picking crew. Can be seen doing odd jobs around the ranch on Saturdays.

Jared Schaefer: Night calver and day help.

Eric Payne: Day help hand. Eric and Megan are now living in Aberdeen and sells insurance. Check the ad in the catalog for more information!

Megan Payne: Day help hand. Helps clerk the sale. Eric's wife.

Presley Lynn Payne: Loves to check cows with Grandpa and Grandma and daughter of Eric and Megan Payne.

Kylie Jo Payne: One of the newest addition to the Ranch staff. Born in June. We are sure she will love cows as well! Daughter of Eric and Megan Payne.

Kristin Harms: Office/all-around assistant. Has a full time job at Raven Industries in Sioux Falls, SD. Helps clerk the sale.

Bieber Red Angus Interns: We have always believed that experience is the best teacher and in our internship program we look for individuals that help us through some of the more intensive times like calving and breeding. We look for a "can do" attitude and a commitment to the beef business. We are always looking for opportunities to share

our operation with young people interested in the seedstock business. You may have seen some of these interns in the past year. Our intern in 2016 was Jason Lipps, Ohio.

Rachel Pickell: Head Rockpicker and water tank cleaner. Helps us out on weekends and whenever there isn't school.

Lake View Motel 605-284-2400 (Eureka)

DELIVERY POLICY:

Free delivery to surrounding states on all purchases over \$3500, to central points. Volume purchases by one buyer of 5 head over \$3500 delivered free to central point in the US. All bulls under \$3500 will be delivered at cost. Central point for delivery will include auction barns, vet clinics and ranches that offer to serve as a delivery point. We simply ask for your cooperation in arranging the delivery of your cattle. This will keep the cattle from being on the truck longer than necessary and help to get the cattle to you with the least possible stress and in the best possible condition.

HEALTH:

Ashley Vet Clinic, 701-288-3234, will be available on sale day. All cattle are on a complete vaccination program supervised by Ashley Vet Clinic.

In the past bulls have been tested for persistent BVD carriers and all tests were negative for a number of years. We have chosen not to test the bulls this year since no positives have been found in over 10 years. We do test our replacement heifers for BVD in since 2014 as a part of our surveillance program and have found no positives BVD carriers to date. Bieber Red Angus participates in the Beef Quality Assurance (BQA) program. Heifer calves have been Bangs vaccinated. We participated in a Johnes testing program for 10 years with no confirmed positive. We no longer test for Johnes disease but continue to diligently watch for any suspicious cases and test as necessary.

GENETIC DEFECTS:

All cattle have met the RAAA requirements for registration as pertaining to genetic defects. In particular, animals containing a known genetic defect carrier in their two generation pedigree (parent or grandparent) without an intervening tested free animal have been tested for said genetic defect. The parentage of all animals sold by Bieber's is guaranteed to the extent that the animal is by the sire and out of the dam that is indicated on its registration papers.

RETAINED INTEREST:

We are retaining 1/2 interest in all bulls in the sale. We are selling the remaining 1/2 interest, full possession, and full salvage value on these bulls. This option gives Bieber Red Angus Ranch the option to collect, use and market semen from the bull and does not restrict the purchaser from doing the same. This collection, unless agreed otherwise, would be done at the expense of Bieber Red Angus Ranch, at the buyer's convenience. Also at the time of purchase, the highest bidder on a retained interest bull may elect to purchase exclusive semen rights for 100% of the purchase price in addition to the purchased price on retained bulls. If a buyer elects to purchase exclusive semen rights, Bieber Red Angus Ranch interest then becomes in herd use only, but Bieber Red Angus Ranch retains all rights to use the bull within their herd.

BIRTH WEIGHTS/CALVING EASE:

We scored for calving ease with our three star (*) scoring system. Three stars (***) indicates that a particular bull can be used on heifers under standard conditions with little or no calving difficulty. Two stars (**) indicates that a particular bull should be used on growthy heifers or cows under standard conditions with little or no difficulty. One star (*) indicates that a particular bull be used on cows. These bulls will produce little difficulty when used on cows. This recommendation is a system we use to help our customer with calving ease selections.

Birth weights are highly affected by environmental factors. Research indicated that the inclusion of corn in cow diets will increase BW. Also contributing to higher BW were cold temperatures in the winter of 2002/2003. The University of Nebraska conducted a three-year-study to research and evaluate effects of high and low temperatures during winter months on calves out of 384 two-year-old heifers. Average BW increased by 11 lbs. when temperatures were colder. The results agree with other studies that show calves born in the southern U.S. compared with calves born in the northern U.S. Weather plays an important role in BW and calving difficulty. We have adjusted the calving ease scores accordingly, taking into consideration what the calf ratioed on BW, pedigree and CE EPD, BW EPD and Genomic data.

FEEDING:

Feeding arrangements are available on all yearling lots will be fed at a charge of \$3.50 per day. We will feed your purchases from sale day until you are ready to pick them up, or we will deliver them.

BREEDING SOUNDNESS EVALUATION:

Breeding Soundness screenings will be performed in February before the sale. We fully guarantee that these bulls will pass the Breeding Soundness Evaluation before the breeding season in 2017 if the bulls are managed properly. We recommend that all bulls tested in this sale be tested 4 to 6 weeks prior to your breeding season. We ask for your understanding if a bull does not pass. Sometimes bulls that have passed do not pass later for various reason. We will do our best to make sure you are satisfied. If you have any questions regarding Breeding Soundness Evaluation, feel free to call Craig or Dr. Dean Christensen at the Ashley Vet Clinic.

WEIGHTS:

Birth weights, weaning weights, yearling weights, and all other measurements are taken at appropriate times to produce sound and accurate comparisons within contemporary groups. We contemporary group our Red Angus calves based on the age of our cows. Calves out of two-year-old dams, three-year-old dams, and the main cowherd are all separate management groups and therefore are separate contemporary groups. Embryos transplant calves are contemporaried in the groups they are weaned with.

WEANING WEIGHTS:

All naturally born calves born at Bieber Red Angus Ranch are raised without creep. We feel that this helps us select and breed for dams that have milking ability and sound udders. ET calves are on creep feed to express their full genetic potential.

INSURANCE:

Livestock insurance will be available on sale day.

SALE INFORMATION

AIR TRANSPORTATION: Aberdeen is serviced by Delta Airlines and all flights come thru Minneapolis. Pierre and Watertown are serviced by Great Lakes Airlines which is affiliated with United and Frontier airlines and is a direct flight to/from Denver.

INTERNET & ABSENTEE BIDDING: We would prefer for each of you to be in attendance on sale day. Realistically, we know that there will be some scheduling conflicts and distance limitations. In these cases we have arranged for you to be able to participate in the sale on an absentee basis with a conference call dedicated to bidding. We will have available one phone line which can accommodate 20 to 30 bidders. Please call prior to the sale and register as a prospective buyer. We have limited capabilities to bid by phone during the sale. Your best option is to be in attendance at the sale, but if you cannot attend or feel more comfortable bidding yourself, we need to warn you of complications in the past with phone service, such as the volume and the rapid pace at which our sale moves. If we handle the bids for you, they will be done in the strictest of confidence. However, if you want to attempt bidding by phone, please make arrangements prior to sale day by calling Craig or Peggy. For internet bidding information, see DVAuction below.

If you are unable to attend and you feel comfortable doing so, you can leave those bids with the Bieber family, auctioneer, or publication representatives. We handle many sight unseen bids and have very satisfied customers who feel confident in using that service. We prefer to have plenty of time to discuss your needs over the phone prior to sale day so that we may select the cattle that best fit your specs. We buy those animals just like you were sitting ringside with us. We also guarantee the cattle so that if they don't meet your ideals, you just return them to us. If possible, come by and evaluate the offering prior to sale day. We will post video of each lot on our website prior to the sale but may run into time limitations.

COLOR: All animals are red unless otherwise indicated in the footnotes.

FOLLOWING SALE: Everyone is invited to Dinner at Ron & Lois's after the sale. Our friend Stu Campbell will be cooking strip Steaks.

UPDATED INFORMATION, YEARLING WEIGHTS, AND ULTRASOUND DATA:

All yearling bulls will be ultrasounded, and updated carcass EPD information will be available the week before the sale or as soon as we receive it from the Red Angus Association of America. Yearling adjusted scrotal size on January 21, 2017 is printed in the catalog and an updated actual scrotal measurements taken the week prior to the sale will be available. The scrotal measurement in the catalog on all yearling bulls is adjusted by the Red Angus Association of America. We generally find actual scrotal measurements at sale time are typically 1 centimeter larger than the adjusted measurements. All other data not provided will be available upon request.

GAIN TESTING: All bulls are gain tested for approximately 110-120 days. The spring born bulls were weaned in September/October and weighed off test January 21.

INFORMATION: Supplement sheets will be available 2-27-2017 on the website or upon request. Supplement sheet will include actual scrotal measurements, actual weights and updated carcass EPD's.

SALE ORDER: The sale order will be catalog order.

COOPERATORS: In order to provide a better selection of cattle we have enlisted the following people who have herds that are aligned through genetics and management. We have listed the phone numbers of the cooperators as they represent the program and can help with your selection.

Gene Rouse (ROU)	515-231-9129	Huxley, IA	Red Angus
Dan Bormann (ROU)	515-520-7707	Huxley, IA	Red Angus
Caleb Acciaccia (ACC)	906-395-7377	Baraga, MI	Red Angus
Skylar Schumacher (SCC)	605-216-0552	Aberdeen, SD	Red Angus

This sale will be broadcast live on the internet.

DVAuction

Broadcasting Real-Time Auctions

We are pleased to offer the Bieber Red Angus Sale broadcast "live" over the internet through DVAuction Services. To bid from your computer at home during the sale, complete this simple two step process.

- Visit the DVAuction web site at www.dvauction.com or call 402-474-5557. Register by entering a User Name and Password. Then enter your personal information on the next screen.
- Click on "Apply for Bidding." Select the Bieber Red Angus Sale from the list of sales and click "Apply." Complete the process by filling out the Banking and Lending information requested.

DVAuction will contact you to let you know that you have been approved to bid and buy at the sale "live" from your computer at home. We will also provide you with a buyer number for the sale. After the sale Bieber Red Angus will contact you to make arrangements for payment and delivery of your on-line purchases.

Please Note: You must have high speed internet access (DSL, T-1, or Broadband) to be able to bid during the sale. Any questions, please contact DVAuction at 402-474-5557 or e-mail support@dvauction.com. We recommend that you register by March 6, 2013 for on-line bidding. Every attempt will be made to complete your application even if it is on sale day.

CHOOSE WISELY

Tom Field, PhD

For the commercial cow-calf producer the two most important professional relationships are with the seedstock supplier and the herd veterinarian. Genetics provides a foundation upon which the future of the enterprise will stand. The most influential genetic decisions made by a cow-calf producer who produces their own replacement heifers are the three most recent generations of herd sires. These bulls account for approximately 75 percent of the calf crop's genetic makeup in terms of their direct influence as sires of calves and as the sires of the cowherd. Given the tremendous influence of the bull battery, the sire acquisition process takes on a special level of significance and thus, the relationship with the genetic supplier becomes highly important.

One of my mentors in the cattle business believed that before a decision was made on which bulls to purchase, cattle producers should visit the potential seedstock suppliers business at least twice – initially to check out the supplier and secondly to evaluate the cattle. The concept was founded on a commitment to only buying seedstock from herds managed under a similar philosophy and with comparable weather, forage and climatic conditions to the purchaser's situation. His belief was that if the people were solid, then you could more confidently do business safe in the knowledge that they were creating good cattle and that they would stand behind them.

However, even before contact is made with a seedstock producer, the cow-calf manager must assess their own conditions, level of herd performance in critically important areas, and solidify their goals and objectives for the beef enterprise. Bull buyers who are making choices from an information rich perspective are more prepared to build a solid working relationship with a seedstock supplier. Determining the mating system is another key decision that should be determined by the cow-calf producer using knowledge about their own enterprise as well as leveraging the experience of other producers as well as the genetics supplier. The mating system as well as the sires selected to work within the mating system requires that commercial producers carefully assess four critical areas:

1. Feed resources and environmental limits
2. Labor resources
3. Marketing goals and objectives
4. Gaps between present and desired levels of performance in traits critical to profitability

Once these issues have been addressed in detail then a meaningful discussion can be undertaken with potential seedstock suppliers. A long term and valued relationship with a seedstock supplier(s) begins with business integrity, a commitment to providing solutions to customers, conversations founded on meaningful information, and service after the sale. As these discussions are undertaken, two concepts should always be

kept in mind – first, the novice bull buyer deserves an attentive supplier who is willing to provide education, answer questions, and most of importantly follow up after the sale (Figure 2). Secondly, there is a dramatic difference between the supplier whose sole goal is to sell a bull and the supplier focused on solving problems for a customer.

Sire selection should be founded on making the most objective decision possible that is aligned with the overall strategy and vision for the cow-calf enterprise. Thus, it is essential to acquire bulls only from those herds with an active engagement in a performance program backed by a dynamic national data base and supported with state of the art genetic prediction tools. It is not important that a cow-calf producer understand the intricacies of how genetic estimates are calculated but developing a solid functional understanding of how to use the estimates and information is critical. The role of the seedstock supplier is to provide educational and consulting support to assure the comfort level of the customer.

The sire selection process is one driven by winnowing down the available bulls for sale into a group of individuals that possess the appropriate combination of performance metrics that align with the limitations of the resources available on the ranch and assure conformance to the demands of the target market for progeny. This narrowing down process can be driven by several key focal points:

1. Avoid sires that create dystocia. Calving difficulty is a leading cause of both calf and breeding female death loss, contributes to increased morbidity of calves born in difficult births, and diminishing subsequent reproductive rates of females experiencing dystocia.
2. Will replacement females be kept from the progeny – if yes, then what is the appropriate level of mature size and milk production for the particular farm or ranch? Attaining profitable levels of reproductive performance depends on the keeping the nutritional needs of the herd aligned with cost effective feed sources which are often in the form of grazable forages.
3. What is the optimal combination of growth, muscularity, marbling and carcass yield for the target market? Producing feeder calves that can be merchandised to generate high levels of revenue is fundamental to profitability.
4. Finally, what are the gaps in performance for the herd that need to be closed to improve productivity, profitability and quality of life? For example, if cattle are flighty and nervous in handling situation then more focus on docility is warranted. If udders are badly structured leading to calves unable to suckle and thus requiring more labor, then udder quality will need to be addressed.

In each of these discussions, the reputable seedstock breeder will provide information, insight and advice. Using their experience and knowledge is critical to building a genetic base designed for long term satisfaction from the cow-calf enterprise.

A WORD ABOUT GENOMICS

Information versus Data: making sense of what genomics provide us

"I am not buying my kid an encyclopedia. He can walk to school like I did." Lawrence "Yogi" Berra

It is a natural impulse for us to throw up our hand in frustration when challenged to make sense of waves of new information. There is no one equal to Yogi in the ability to express a kernel of wisdom in his malapropisms. I our particular world what he said would sound something like, "I'm going to pick the bulls that look the part to me and the hell with all the number!" Besides, it seems to be easy for a lot of people in our business to believe the numbers are a crock, a contrivance of an in-group to manipulate the process to their advantage. Our view is that the "numbers", the EPDs have been invaluable, will continue to be so, and that is not all that complicated.

The HD50K produces data that verifies parentage and predicts the breeding value of an individual bull for 19 different traits. Angus Genetic, Inc. (AGI) then processes that genomic data and puts it into a usable information format by updating and reporting genomically-enhanced EPDs (GE-EPDs) weekly.

The value of the genomic information is in improving the accuracy of the EPDs. The improve accuracy, according to the statisticians, of GE-EPDs can be expressed in the number of progeny records that would be required to produce equally valid phenotypically derived EPD values. Zoetis says the value of CED, for example, can change by as much as plus or minus 3 in a GE-EPD and that genomic data contributes

an equivalent amount of information about unassisted deliveries as would be derived from 21 offspring of a given bull.

To sum up, let us revisit the data versus information idea. Investigation of the genome and accumulation of data to predict outcome will continue across the entire spectrum of biology. No one can stop it. There is nothing fundamentally wrong or threatening with the process. At the same time, we believe that the interpretation of such data in our business is less than ideal, its impact sometimes exaggerated. In other works, the translation of data to usable information, actionable intelligence, in a work in progress. We believe that process will evolve and improve, particularly as more data accumulates.

Nothing in this world is perfect, including the tools we have to predict outcomes in the vast, magnificent world of biology. But EPDs are still, and will remain, the selection tools to use in choosing bulls to buy. They account for all sources of information on the individual, including pedigree, with collateral relatives' performance, individual performance, and genomic testing. They are the best tools we have and most definitely have worked for us.

Dan Borgen and Brian McCulloh

At Bieber Red Angus, we've been convinced that Genomic data makes our EPD more reliable, so the majority of the bulls selling have been I50K.

Our goal has always been to produce more bulls from less sires. It is not easy to do as one always can find many great sires in the Red Angus breed. We really feel that adds to our consistency and we know industry wide it promotes consistency. Many breeders feel that Red Angus have enough marbling but if we want to increase beef consumption then we need to keep producing a high-quality product. We have been vigilant in our goal of selecting on end-product merit. Lot 7 put that together very well and will provide profitable traits necessary to the commercial cattleman.

Bieber Toryanna 211Y
 Dam of Lot 10

We only had the opportunity to use Lot 10's maternal sire, Goldbar 8123 1 year, but we think he could have been a breed changer from the impact his progeny have had on our program and breed. The number one son Hard Drive has been outstanding, and in addition the daughters, like the dam of Lot 10, are outstanding. She has been a donor and we will have many additional progeny in the next few years. We missed flushing his granddam but have flushed the previous two maternal generations. Full brothers sell as lots 60 and 104.

Lot 17

The Sheba cowline has been really putting bulls in the top of the order this year. This Endurance son lost his dam and got grafted onto one of our ET recipient cows. Lot 17 has done very well but since he was run with our ET herd he had been creep fed. Our policy is that none of the natural calves get creep in order to get good progeny data on dams. We have a lot invested in ET program, and with no real records on the recipient dams, the ET calves need to have resources to express their full genetic potential.

We have pictured lot 19's dam here. If you go way back on his maternal pedigree this cowline is the same Laura cowline as Hard Drive's dam. Add that with 50 Schilling, a maternal powerhouse, you can't help but like the maternal traits this bull stacks. A full brother sells as lot 118.

This bull puts high growth in a very moderate framed package. Lot 21's maternal brother is working at Ludvigson stock Farms. The Kanna cowline had been one that had been around since the beginning, producing Honest Abe 1705 in the 1980's, and Titan 6894 in the 1990's, both sires that had a positive impact on our program.

Lot 23

Lot 23 is bound to have many friends on sale day. When we evaluated the bulls, he caught our attention right away. He has really great phenotype with data and a pedigree to match. If lot 23's dam keeps producing like she did last year, with a son selling to Wagonhound livestock, she will be a cow we need to put into the ET program.

This Right On son has data that will get everyone to take a look. The cowline he is out of had been striking hot lately, with one of the top bulls last fall out of his granddam. The Roseland's, SD have purchased a maternal brother, and we are pretty certain they will be very happy with that decision. Right on has been featured this year in Accelerated Genetics' lineup, and we think he offer some genetics unique to our program.

Hard Drive Y120 has seen very heavy use the past two years in our program. The replacement heifers we bred this past spring had a large representation of daughters sired by Hard Drive. Visitors to our ranch that look at the heifers this spring and summer have all noticed Hard Drive daughters. Comments have been outstanding and we are looking forward to calving the first very large group. The daughters we have calved to this point are spot on with great udders, adequate milk, and calve easily or come of grass in great shape. Hard Drive's dam sold in 2016 to Twedt Red Angus, ND. Hard Drive is no longer producing freezable semen so we have been sampling sons to take his place and move our program forward. We would be amiss if we didn't mention that the disposition on these Hard Drive progeny is excellent. Hard Drive data is hard to match. Semen is rare at this point. If you locate any you need to put it in your tank.

Spartacus was a crowd favorite in our 2014 spring production sale selling to Accelerated Genetics and Jefferies Land and Cattle. He is a great disposition bull stacked for profit, powerfully made, and very stout boned. Spartacus was heavily used in our program in 2015 and we have weaned over 180 calves. We just had a handful of progeny last spring and his son Bieber Gladiator B386 sold to VF Red Angus, OR for \$65K. We predicted that Spartacus was going to get on everyone's radar this spring as his data is outstanding. Spartacus is a very complete bull that leaves a breeding program in a very good position going forward. Semen is available thru Accelerated Genetics.

Rollin Deep Y118 is a powerful sire that does the cowman things right. His pedigree is well known for producing power cattle with exceptional feet, udders, and fleshing ability. Rollin Deep's dam, Bieber Tilly 399W has become a centerpiece in our ET program. His sire, Bieber Roosevelt has become a cornerstone to our commercial customers producing thick cattle with great dispositions. Rollin Deep Y118 is the kind of bull that can leave a positive impact on the breed for years to come. We weaned a little over 120 progeny this past fall, and have over 50 daughters in the herd. Rollin Deep is a sire that produces great phenotype, power and makes balanced cattle with the ability to flesh, breed back, stay sound and productive for the long haul. We have always believed that through focused selection you can breed cattle that have it all. Every year we feel we are getting a bit closer. Rollin Deep has been widely used with many Breeders reporting outstanding progeny with great success.

Federation sold to Bachman Red Angus in the spring of 2015 and was a standout. His dam, Basin Primrose 0T43 is one of the leading Primrose daughters, and sold to Jordan Rhodes. Jordan had reported that 0T43 is been doing a great job, and had several sons in his upcoming sale. We have found his paternal sister to have lot of type, excellent milk and great udders. Semen available thru Bieber Red Angus and Allied Genetics.

We spotted Loosli Right On 423 in the spring of 2015 at the Darr Bull development yard. We compared notes with Don Trimmer, from Accelerated Genetics, and agreed he needed to be in our program, and the Accelerated line up. We have been using him naturally, and sampled him AI heavily on heifers last spring, and expect to have a pretty good progeny test next year. Semen is available thru Accelerated Genetics

The Rancher's Guide to 50K

Bull selection is one of the most significant decisions ranchers make in terms of influencing the overall profitability of their operations; therefore, Red Angus strives to deliver reliable genetic predictions to stakeholders to ensure producers are making the most informed decisions possible in pursuit of production goals.

For years, ranchers utilizing Red Angus EPDs (Expected Progeny Differences) in their selection decisions have enjoyed the built-in reliability and risk reduction provided through the breed's early adoption of Total Herd Reporting (THR) data. To further advance EPD accuracy and reliability, Red Angus can now incorporate 50K genomic data.

For generations, animal breeders have relied on phenotypic measurements to determine what the animal possesses at the gene level. Now, with the inclusion of 50K genomic data, we can actually measure the impact of identified gene effects before the weight or measurement is ever recorded.

Red Angus' new 50K test proves to be a game changer.

- **Ensure your yearling heifer bulls are "calving-ease specialists."**
- **Confirm your cowherd-building bulls have optimal genes for maternal traits.**
- **Make certain your carcass bulls are superior grid producers.**

Information gained from 50K genomic data and Total Herd Reporting data provides Red Angus stakeholders' EPDs with unsurpassed reliability.

Lot 1 has been a standout since he was born. His dam is one of Gene Bouse's, very best cows, posting average progeny ratios of WW 110 and IMR 137. Lot 1 is in the top 1% for both of the new indexes and posts some data that is really hard to match. His sire has been making us take notice and we like what we see in his calves. Overload is going to turn some heads on sale day.

1. Lot Number -- This is the lot number of the animal. Cattle will have a white tag that will correspond to that number. Generally cattle will sell in Lot number order.

2. Name -- This is the registered name of the animal. Generally we name bulls after the sire and females after the dam name.

3. Born -- This is the birth date of the animal.

4. Reg -- This is the Registration number of the animal. All Red Angus animals can be looked up on the Red Angus website at www.redangus.org and going to the animal search page and using this registration number.

5. Breed -- This area has the breed composition and category as determined by the Red Angus Association of America. Breed Codes are AR=Red Angus SM=Simmental XX=Unknown. The Unknown cattle are largely cattle that we couldn't prove percentages of parents on the Durham herd. That unknown breed is either Simmental or Red Angus in the Durham foundation cattle.

- AR = RED ANGUS
- SM = SIMMENTAL
- UKN = UNKNOWN

6. Category

- 1A=100% Red Angus with no disqualifying features
- 1B=87% to 99.9% Red Angus with no disqualifying features
- II=Equal to or greater than 87% up to and including 100% Angus blood content having one or more disqualifying characteristics. Disqualifying Features include scurs or horns, ineligible white, black pigmentation, progeny of multiple sire groups, and missing birth date, or weaning weight and date
- III=Less than 87% Angus blood content

7. Sire -- Sire of the animal

8. Paternal Grand Sire -- Sire of the Sire

9. Paternal Grand Dam -- Dam of the Sire

10. Dam -- Dam of the animal

11. Maternal Grand Sire -- Sire of the Dam

12. Maternal Grand Dam -- Dam of the Dam

13. MPPA - Most Probable Producing Ability -- An estimate of a cow's future productivity for a trait (such as progeny weaning weight ratio) based on her past productivity. For example, a cow's MPPA for weaning ratio is calculated from the cow's average progeny weaning ratio, the number of her progeny with weaning record, and the repeatability of weaning weight.

14. AoD - Age of Dam at the time of weaning the progeny identified.

15. ADG - Average Daily Gain -- Measurement of daily body weight change over a specified period of time of an animal on a feed test.

16. ADG Ratio - Average Daily Gain Ratio -- The ratio of the animal within its contemporary group. ET and Twins will be marked with a TW and ET. These animals have no contemporary group.

17. WDA - Weight Per Day of Age -- Weight of an individual divided by days of age

18. WDA Ratio - Weight Per Day of Age Ratio -- Weight of an individual divided by days of age. ET and Twins will be marked with a TW and ET. These animals have no contemporary group.

19. AScr. - Adjusted Scrotal Circumference -- A measure of testes size obtained by measuring the distance around the testicles in the scrotum with a circular tape. Related to semen-producing capacity and is adjusted to Yearling age. Actual Scrotal Measurement are provided on a supplement sheet 1 week prior to the sale and at the sale.

20. CE - Calving Ease Score -- This is our recommendation for CE based upon the data and the pedigree. *** = Use on heifers. Expect less calving difficulty ** = Use on grower heifers and cows. Expect moderate calving difficulty on heifers and very little difficulty on cows. * = Use on cows. Expect difficulty on heifers and some to very little calving difficulty on cows.

21. Grw. Sc. - Growth Score -- This is our recommendation for growth based upon the data and the pedigree. G6 = maximum growth rating, G5 = high growth rating, G4 = moderately high growth rating, G3 = average growth rating, G2 = below average growth rating, G1 = low growth rating.

22. DNA test ran on this animal.

23. EPD - Expected Progeny Difference -- The difference in expected performance of future progeny of an individual, compared with expected performance of future progeny of an individual of average genetic merit in the base time frame for the genetic evaluation. EPDs are estimated from phenotypic merit of an individual and all of its relatives and are estimates of one-half the breeding values. EPDs are generally reported in units of measurement for the trait (e.g., lb., in., etc.).

24. acc - Accuracy -- A measure of the reliability of an EPD. Accuracy values are reported as decimal numbers between zero and one. Values closer to one indicate larger amounts of available information and greater certainty that a bull's EPD will not change significantly as more progeny information becomes available. Bieber Red Angus reports the accuracy values for sires since they have high accuracies. EPD are a more reliable estimate of performance than weight ratios or other measurements. Understanding ACCURACY. Red Angus EPDs are often presented with a corresponding accuracy value, which measures the strength of the relationship between the genetic prediction (EPD) and true genetic value. Accuracies are reported as a decimal number from zero to one. As accuracy value approaches 1.0, the EPD is "accurately" or closely estimating the true genetic merit of an animal for a given trait. Although low-accuracy EPDs are less reliable when compared to those of proven sires, independent research demonstrates EPDs to be the most meaningful indicator of animals' true genetic merit. While "perfect" accuracies of 1.0, are never achieved, many heavily used Red Angus sires have accuracies greater than 0.9 (some as high as .99).

25. %Rank -- This is the percentage rank of the EPD within the type of animal. Rank groups are Proven and

Opportunity Sires, Active Dams and Non Parent under Two Years of Age.

26. Wis - Weight -- The weight for that trait in that column adjusted to a constant days of age by Red Angus Association and Beef Improvement standards.

27. Ratio - Ratio -- The ratio for that trait in that column within its contemporary group. ET and Twins will be marked with a TW and ET a have no contemporary group.

28. CED - Calving Ease Direct -- predicts the probability of calves being born unassisted out of 2-year-old heifers. Producers want live calves - born unassisted. Selecting on actual birth weight is flawed; it is influenced by non-genetic factors such as nutrition and weather (ambient temperature). While BW EPD removes these non-genetic factors, Red Angus' CED EPD is the best predictor of calving ease. The CED EPD includes variation in BW plus other influential genetic factors such as gestation length, calf shape, etc.

29. Birth Weight EPD -- predicts the difference, in pounds, for birth weight, and is also used in the calculation of Red Angus' Calving Ease Direct (CED) EPD.

BW - Birth Weight (BW) -- The actual weight in pounds at birth.

30. Weaning Weight EPD -- predicts the difference, in pounds, for weaning weight (adjusted to age of dam and a standard 205 days of age). This is an indicator of growth from birth to weaning.

WW - Weaning Weight -- The 205 adjusted weight. This is an indicator of growth up to weaning.

31. Yearling Weight EPD -- predicts the expected difference, in pounds, for yearling weight (adjusted to a standard 365 days of age). This is an indicator of growth from birth to yearling.

YW - Yearling Weight -- The 365 adjusted weight. This is a measure of growth from birth to yearling.

32. Milk EPD - (MILK) predicts the difference in maternal production of an individual animal's daughters as expressed by the weaning weight of their calves.

33. TM - Total Maternal EPD -- predicts the rancher's actual observation of weaning weights of calves raised by an animal's daughters. TM includes the daughter's milk EPD plus half of her genetic contribution to her calf's weaning weight EPD. The formula for TM EPD is: $TM EPD = Milk EPD + 1/2 (WW EPD)$

34. ME - Maintenance Energy -- predicts differences in daughters' maintenance energy requirements and is expressed in Mcal/Month. Recognizing that 70% of cow herd feed costs are burned up in maintaining weight and condition, Red Angus' ME EPD allows for the selection of bulls whose daughters will require less feed; thus, reducing cowherd expenses. Include selection pressure for ME EPD to ensure feed costs don't get out of line when selection is made for greater performance and production. At Bieber Red Angus we collect cow weight at weaning time to insure greater accuracy of this EPD.

35. HPG - Heifer Pregnancy -- predicts the probability

of heifers conceiving to calve at two years of age. Many breeds offer genetic predictions of yearling bull scrotal circumference as an indicator of age of puberty. While puberty is a prerequisite, many factors influence pregnancy rate. Red Angus' HPG EPD offers a tool which selects for what is economically relevant to ranchers - pregnant heifers. At Bieber Red Angus we submit all heifer breeding data to insure the accuracy of this EPD.

36. CEM - Calving Ease Maternal (CEM) -- predicts the probability of a given animal's daughters calving unassisted at two years of age. Replacement heifers should be able to calve on their own. Red Angus' CEM EPD offers the industry's most reliable prediction to address that concern. It includes not only the predisposition for a female to calve unassisted, but also her contribution to her calf's traits (birth weight, calf shape, etc.) that make it more likely to be born unassisted.

37. STAY - Stayability (STAY) -- predicts the probability of a bull's daughters remaining productive until at least six years of age. Why six? That's how long it takes a female to breakeven given all the expenses of development.

38. MARB - Marbling Score -- predicts differences for carcass marbling score as expressed in marbling score units. Higher marbling scores are positively correlated with higher carcass quality grades.

39. REA - Rib Eye Area -- predicts differences of carcass Rib Eye Area between the 12th and 13th rib. Increased Rib Eye Area has a beneficial effect on Yield Grade which also includes Carcass Weight and Fat Thickness.

40. FAT - 12th Rib Fat Thickness -- predicts differences for carcass fat depth over the 12th rib, as expressed in inches. Increases in fat thickness has a detrimental effect on Yield Grade. Fat thickness measured in young seedstock, maybe an indicator of fleshing ability.

41. HerdBuilder Index -- As the name indicates, implementation of the HerdBuilder Index will assist producers in building profitable herds. The HerdBuilder Index is built using the following production scenario:

- Red Angus bulls mated to cows and heifers (resulting progeny ¼ Red Angus, ¾ Simmental)
- Replacement heifers retained from within the herd
- All remaining progeny sold on a quality-based carcass grid.

40. GridMaster Index -- While Red Angus has traditionally been known as a superior maternal breed, those who have retained ownership in Red Angus calves know of their potential to excel in the feedyard and ultimately hang a premium carcass. The GridMaster Index is built using the following production scenario:

- Red Angus bulls mated to cows (resulting progeny ¼ Red Angus, ¾ Simmental)
- All progeny sold on a quality-based carcass grid.

42. Footnote -- This is information we would like to point out about the lot. It may contain breeding information on bred cattle.

TERMS AND CONDITIONS

If you can't attend the sale & would like to buy cattle, call Craig (605-439-3628 / 605-216-8169 / 605-439-3545) before the sale. Tell us what you are looking for and we will assist in arrangement to help you participate in the offering.

We will call you after the sale and inform you of your purchases.
We guarantee your purchase will be satisfactory.

TELEPHONE BIDDING

We will have available telephone bidding by conference call. If you wish to bid over the phone, please register before sale day.

INTERNET BIDDING

See page 3 for information.

The Red Angus Assn. Terms and Conditions will apply if the terms and conditions printed here are not applicable.

BIDDING DISPUTES: The auctioneer in charge will settle any disputes as to bids, and his decision on such matters shall be final.

TERMS: The terms of the sale are cash; the right of property shall not pass until after settlement is made. All settlements will be made with the clerks of the sale immediately following the conclusion of the sale and before any cattle will be released from the ranch.

RETAINED INTEREST: We are retaining 1/2 interest in all bulls in the sale. We are selling the remaining 1/2 interest, full possession, and full salvage value on these bulls. This option gives Bieber Red Angus Ranch the option to collect, use and market semen from the bull and does not restrict the purchaser from doing the same. This collection, unless agreed otherwise, would be done at the expense of Bieber Red Angus Ranch, at the buyer's convenience. Also at the time of purchase, the highest bidder on a retained interest bull may elect to purchase exclusive semen rights for 100% of the purchase price in addition to the purchased price on retained bulls. If a buyer elects to purchase exclusive semen rights, Bieber Red Angus Ranch interest then becomes in herd use only, but Bieber Red Angus Ranch retains all rights to use the bull within their herd.

SEMEN RIGHTS: Buyers receive semen rights proportional to the interest purchased. If you purchase a 1/2 interest, then you are entitled to 1/2 of the semen collections at cost provided that you indicate you want semen prior to collection. We intend to collect some of the bulls in the sale and sample them in our herd. We will cooperate with the buyer in collection of the bull. We prefer to collect most bulls after the first season of use and we will contact the buyer when we intend to collect the bull at a time convenient for the buyer.

PURCHASER'S RISK: Each animal becomes the risk of the purchaser as soon as sold. Animals will be fed, watered and cared for at the purchaser's risk for a reasonable time.

CERTIFICATE OF REGISTRY: A certificate of registry and transfer will be furnished for each animal sold as a registered animal, after settlement has been made.

HEALTH: All cattle will have official health certificates and will sell guaranteed exported to Canada. Canadian health certificates will be charged at cost on animals selling under \$10,000.

ANNOUNCEMENTS: Changes of information contained in this catalog relating to the animals offered for the sale will be announced from the auction box and such announcements shall take precedence. Errors discovered in the catalog will be corrected by announcements at sale time, and such corrections will take precedence over the printed matter in this catalog.

BREEDER'S GUARANTEE: 1. All animals are guaranteed breeders, with the exception of: a) calves under twelve months of age; b) animals shown by Purchaser after sale (in cases of animals shown after purchase, the breeding guarantee, if any, shall be such as agreed upon between Seller and Buyer) c) Any open heifer that has been flushed for embryo transfer; or d) gross negligence or willful misconduct on the part of the Purchaser. 2. Bulls are guaranteed breeders if not allowed to run with the herd until at least 14 months of age. Any bull which either: a) settles 1/3 or more of the healthy cows he serves; b) is the sire of 20 or more animals; or c) settles cows by natural service and passes a fertility test made by a competent veterinarian during any 6 month period of trial (provided for in paragraph 2 of the section of these sale terms and conditions entitled "Options and Privileges of Return or Adjustment") shall be considered a breeder.

Any guarantee with respect to the ability to freeze semen shall be by separate agreement between Buyer and Seller.

Open females have not been served and are so guaranteed.

IDENTIFICATION: Each animal carries a readable tattoo. Tag numbers on the cattle correspond with lot and tattoo numbers in this catalog. Purchaser agrees to use full name of animal in advertising and on stall cards at shows.

OPTIONS AND PRIVILEGES OF RETURN OR ADJUSTMENT:

1. All claims for adjustment or refund must be made in writing either within six months of the sale date or no later than six months after the animal reaches 18 months of age, with the exception of claims involving defects or parentage.
2. In the event an animal is claimed to be a non-breeder, the animal may be returned to the farm of the Seller if in good condition and complying with the health requirements of the Seller's state. The Seller shall be entitled to six months' trial following the return of the animal in which to prove the animal is a breeder, the Seller shall, at the option of the Buyer, replace the animal with another of equal value or grant the Buyer a credit for use on any products marketed by the Seller. Such credit of the full purchase price shall in any case be deemed full satisfaction and settlement. Any expense incurred for transporting an animal claimed to be a non-breeder shall be the responsibility of the Purchaser, except that the Seller shall be responsible for the transportation costs in excess of the distance between the Purchaser's farm and the location where the sale took place. If the Seller proves the animal is a breeder, it shall be the obligation of the Purchaser to take delivery of the animal and pay all expense incurred for transportation.
3. If a female sold as "safe in calf" proves not to be in calf, the Purchaser may receive service from the bull previously used, if available, or if the bull is not available, the Seller shall be obligated to make a satisfactory adjustment on the purchase price upon return of the animal to the farm of the Seller. Any adjustment provided for herein shall absolve the Seller from further liability, except in case such female proves to be a non-breeder. If a female represented as "safe in calf" at time of sale to a certain bull proves to have been bred to a different bull, the Seller shall be obligated to take a satisfactory adjustment on the purchase price upon return of the animal to the farm of the Seller (adjustments shall not be considered to a breeding fee or an allocation of the purchase price to any unborn calf). Any expenses incurred for transportation shall be the responsibility of the Purchaser, except that the Seller shall be responsible for the transportation costs in excess to the distance between the Purchaser's farm and the location where the sale took place.
4. If a female sold as "served" proves not to be in calf, or if a female sold as "pasture-bred" proves not to be in calf, the Seller only guarantees such female to the breeder.
5. If a female sold as "open" proves to be with calf, the Purchaser may return the animal to the farm of the Seller prior to calving for a credit of the full purchase price or for another animal of equal value, whichever is acceptable to the Purchaser. It shall be the obligation of the Seller to bear any expense incurred for transportation.

LIABILITY: Neither owners, sale managers, clerks nor anyone connected with the sale assumes responsibility, legal or otherwise, for damages of any kind.

CONTRACT: The above terms and conditions shall constitute a contract between the buyer and seller of each animal sold.

IMPLIED WARRANTY: Except for those stated in the terms and conditions, there are no warranties, either expressed or implied, as to merchantability or fitness for a particular purpose with respect to the cattle being sold in this auction. The warranties set forth in terms and conditions are in lieu of all other warranties, either expressed or implied, and the remedies provided therein shall be the sole and exclusive remedy of the buyer, or any part claiming through buyer, for any breach of warranty or guarantee therein provided and all other obligations or liabilities.

We guarantee your purchase will be satisfactory.

BIEBER RED ANGUS BULL DEVELOPMENT

At Bieber Red Angus, we have learned a lot in 47 years of producing the type of bulls customers come back for year after year. Stacking the right genetics to produce efficient and profitable cattle has always been the Bieber way, but the truth is that there is a lot more to it than mating the right cows to the right bulls. Developing bulls is 1/3 skill, 1/3 science and 1/3 art. Feed too much and cattle get fat and will not hold up for our customers. Feed wrong and you lose out on a bull expressing his full genetic potential. Every year we have customers tell us how our bulls stand up better compared to bulls from other breeders. We are very proud of the longevity these bulls have under reasonable conditions. Our development program is designed to accomplish three goals: 1) feed at a moderate rate of growth to the point of full genetic expression, 2) develop bulls in a management program we believe is similar to how our customers will manage their calves and 3) use feed-stuffs raised on our ranch that are similar to what we feel our customers will have access to. The program starts them on a high roughage diet (44 Mcal) for the first 45 days to allow calves a low-stress introduction to bunk feeding and diet change and to establishing a pecking order. The performance targets for this receiving phase are expected to be 1.5 to 2 lbs. of average daily gain (ADG). We feel that the receiving phase is the most important part of our development program because it prepares the rumen flora to handle diets with increasing amounts of energy. After the initial

receiving phase, the goal of the program is to slowly increase diet energy to properly develop muscle density and marbling deposition while maintaining sound structural and physiological development. At this point, bulls are stepped up to a 48-Mcal diet for three weeks and then a 52-Mcal diet for three weeks with a performance target of 2.25 to 2.7 lbs ADG.

The final stage of the program is to bring bulls to full genetic expression and reach a working level of body condition on a 55-Mcal diet with performance target of 3.2 to 3.5 lbs. ADG—to bring the customer that high performance, stylish bull that the Bieber brand is known for. After the collection of carcass scan data, the bulls are moved back down to the 48-Mcal diet and kept in a “holding pattern” through the sale until delivery. When you look through the catalog you will see many bulls gaining between 3 and 4 pounds per day. These bulls are not underfed; yet when you walk through the pens on sale day these bulls are not fat either. With 47 years of experience, we have found that elusive balance that so many others seek to find. We can talk about genetics all day, but if the bulls are overfed they just won’t stand up in the long run. The truth is it just makes sense to buy 47 years of experience. If you have questions concerning our bull development program, contact Craig or our consulting nutritionist Eric Mousel of High Plains Ranch Management Services 605/690-4974

50 YEAR HISTORY OF BIEBER RED ANGUS

Ron Bieber

In July of 1961, my brother Leroy Bieber and I were looking for a place to produce good beef cattle. We purchased Julius Binder's and Frank Sieh's properties amounting to 2300 acres. In September of that year, I was called into the Army because of the Cuban missile crisis. While serving for ten months, Leroy and I purchased some available land from Jacob Jakober. This expanded our operation to 3600 acres. In the spring of 1962, we began tagging all cows and calves and started keeping weaning weight records. At that time, we were calving mostly Hereford cows bred to Hereford bulls. We also had a group of baldy calves that produced 60 pounds more than the Herefords. In 1964, Leroy and I split up our operations, and Leroy purchased a farmstead three miles west of our operation. In the late winter Lois and I purchased our first Shorthorn bull from Fred Kiesz.

March of 1966 brought a tremendous blizzard our way. By the time we got out to find the cattle, some were four feet below the snow and still alive. We pulled them out, rolled them on to a toboggan and pulled them home. We lost 30 Hereford cows, but were able to buy 35 Shorthorn cows later that spring that were bred to a polled Hereford bull. This led to progress in converting our entire cow herd to crossbred cattle. Soon we realized that systematic crossbreeding would result in superior weights, and our weaning weights went from 380 to 560 pounds in a period of ten years. Crossbred cows eliminated pinkeye, cancer eye and prolapse, and we consistently had better breed back.

In September of 1967, I decided that we would take a working vacation and go to Montana to search for the next cross on our cow herd. Our first stop was at Miles City to have a look at the USDA cattle research station, where an acquaintance had had success using Line 1 Herefords. Next, we took in the Montana Hereford tour, looking at numerous herds and meeting with lots of Hereford breeders. When I said we were considering using Red Angus, one of the Hereford breeders from western North Dakota said, "Red Angus are like women's hats—here today, gone tomorrow." Twenty years later he started using Red Angus, and he no longer produces Herefords.

In October of 1968, I saw an ad in the Western Livestock Reporter for the sale of 50 registered Red Angus cows in May, Idaho. When I arrived, Gene Cook took me around for a tour of his Red Angus herd. I selected 14 cows, which Gene had transported by a pot that was filled with feeder cattle headed to our area. The cows arrived in early December, and we were officially a Red Angus seedstock herd.

April of 1969 brought an opportunity to take another trip to Montana. Ora Erdmann from Erdmann Angus had sent ten bulls to the Stanford Bull Test Station in north-west Montana. The test had 300 or more Angus, Hereford, Shorthorn and Red Angus bulls, as I remember. Early one morning I fed the cattle and tagged new calves. I finished seeding the field east of the house. Ora Erdmann showed up just before noon, and with him was Dr. Harlan Ritchie, Animal Science professor from Michigan State University.

I loaded my bag in the single cab two-ton truck, and off we went to Montana: three men, luggage and lots of BS. The major conversation topics were cattle and genetics. It didn't take many miles down the road before we were engaged in an intense conversation concerning cattle breeding. After he found out we were using a good Shorthorn bull, Harlan said that there was a breeder in Michigan he knew who was interested in a large framed Shorthorn bull like we had. It turned out Harlan was

not coming back with Ora and myself, so an opportunity to sell a high dollar herd sire was missed. Harlan is a very astute observer of animal breeding and has been known for years as a leading authority on cattle breeding. Ora Erdmann was in his 60s, a keen observer of cattle and a self-taught cattle breeder. His famous one-liner was "I don't want Shetland pony Angus."

In the late 1960s the beef cattle industry was changing rapidly. Suddenly performance records became important, and many cattlemen were looking for larger framed cattle. The pursuit of more frame and the introduction of continental breeds was recognized by keen observers of cattle breeding, like Harlan Ritchie, who realized frame could be detrimental to profitable beef production. That trip to Montana enlightened me and gave us contact with many leading cattle breeders in the beef industry.

In September of 1969, R.C. Buckner of Tyler, Texas, was having a Red Angus dispersion sale. Albert Erdmann and I made the trip in a two-ton truck to watch Buckner sell off 750 head of cattle. When we left, we ended up filling the truck with 20 head. After that, every chance we had we acquired more Red Angus cows and heifers. Soon our herd numbered 250 breeding females. In the fall of 1975, we sold our crossbred herd to Henderson Ranch of Lodgepole, South Dakota.

In 1975, we also had difficulty selling bulls, so we made the decision to have a production sale. That May we moved enough soil to form a level spot to put up an insulated Morton building. In those early years we provided information on birth weight, weaning weight, yearling weight and gain from weaning to yearling at each sale. Now we provide 12 EPDs and nine weights and measurements.

In the spring of 1983, we purchased the West Ranch from Harold Geffre. In the spring of 1988, we were able to purchase 800 acres from the Morrison Brothers, land that had run along the west side of our property. Then in the winter of 1989, we were offered the Jonathan Brenise place, which was 480 acres. We presently have enough land to run 800 cows.

Red Navigator Identifies Cow-Making Females

Ranchers make daily decisions that impact the profitability of their ag businesses for years down the road. Education, experience and common sense factor into these economic choices, but foreseeing the future of unpredictable markets and weather patterns still pose obstacles.

With the help of the Red Angus Association of America's Red Navigator commercial female DNA test, ranchers can alleviate some of that risk when choosing which replacement heifers will develop into the most productive cows.

The Red Navigator genetic profile identifies those females predisposed to remain in production long term and ultimately provide a positive return on investment. By testing heifers before breeding, ranchers can make keep-cull decisions earlier in the production cycle, retaining only those females that will advance their cowherd. They can then market the bottom-end heifers as feeders, generating cash flow with less feeding, breeding and pasture expenses.

Scientifically Sound

Powered by the ultimate combination of the Red Angus database and a GeneSeek reduced-panel DNA profile, Red Navigator provides vital genomic information on tested Red Angus-influenced commercial females. Red Navigator-

tested females are percentile ranked in comparison to all Red Angus animals in the database.

Red Navigator ranks females based on RAAA's HerdBuilder and GridMaster Indices and all EPD traits, plus verifies the heifer's paternal parentage if the potential sires have been tested with the RA50K test (50K or HD-80K). The culmination of information delivered through the Red Navigator provides commercial producers with an unmatched tool for guiding their selection decisions.

Due to the fact that DNA tests are breed specific – meaning the test works best on the breed it was developed for – Red Navigator should only be used on females that are at least 75 percent Red Angus breed composition. For example, the Red Navigator test will accurately predict the genetic potential of females that are sired by a registered Red Angus bull and have a registered Red Angus maternal grandsire.

Management Choices

Ranchers who elect to use Red Navigator in a move to expedite genetic progress should test females prior to breeding since once the females are bred, the options to market the genetically inferior females are limited.

Weaning is the optimal time to collect DNA samples for Red Navigator testing, affording cattlemen with a wider variety of marketing options for their heifers by identifying which heifers are replacement quality – either for in-herd retention or to market as such – and which heifers are most profitable in the feedlot.

Producers can also run the Red Navigator prior to the final pre-breeding cull, ensuring they are breeding the top maternal genetics in their herd.

Regardless of when heifers are tested through Red Navigator, the added knowledge of females' genetic makeup can greatly assist producers in reaching the goals of their operation.

Flexible Marketing

Not only does Red Navigator assist Red Angus stakeholders in replacement heifer selection, but the genomic test can also add value at marketing time.

Since Red Navigator provides genetic predictions for the GridMaster Index, test results identify which heifers will excel in carcass and growth traits. Therefore, ranchers also receive valuable data on females culled from the replacement group and, if the culled females have favorable carcass traits, the producer may elect to retain ownership of the heifers in the feed yard.

For those who market replacement-quality heifers as a major component of their operation, Red Navigator provides a genetic assessment of the marketed females to potential buyers. Customers are more likely to pay a premium on a group of replacement heifers that have an average Herd-Builder Index ranking in the top 25 percent.

RAAA recognizes the increasing expectations of commercial producers, and stands ready to provide cutting-edge tools to better enable the success of all producers who use Red Angus genetics.

Red Navigator delivers valuable guidance to the most demanding, profit-minded producers who understand the reward of foresight and knowledge to capitalize on their Red Angus genetic investments. ■

To order the Red Navigator test, producers must complete and submit the DNA order form found at redangus.org/genetics/dna-tools or call the National Office at (940) 387-3502. Blood cards will be provided free of charge. Producers ordering Red Navigator tests must own at least one registered Red Angus bull, and the bull(s) must be transferred to the ordering producer. Take advantage of the special introductory price of \$25 per female by ordering your Red Navigator tests today.

Verified Beef

Verified Beef: Provides “on-the-ground” audited verification programs for cow/calf producers and stocker operations for USDA Process Verification Programs (PVP).

Reputation Feeder Cattle:

Make more money on your calves now!

- Score the herd.
- Market the calves.

Reputation Herd Designer:

Build equity and leave a legacy!

Make more money on your calves in the future.

- Virtually test drive potential bulls.
- Choose bulls which significantly increase the RFC score while not detracting from the maternal traits of the herd.
- Develop your 5 year and 10 year plans.
- Result: Make more money now (cash flow), more money in the future, and create a legacy while building equity in the cowherd.

REPUTATION FEEDER CATTLE

Defining the Difference

Verified Beef's Reputation Feeder Cattle® (RFC) program predicts feedlot performance based on industry recognized EPD data and/or DNA derive genetic equivalent trait indicators. RFC's star rankings predict sale group performance and carcass traits based solely on inherent genetic merit and do not account for factors such as weigh conditions, bloom, or other managerial or environmental effects. RFC predicted profitability (Relative Value/cwt) is in comparison to cattle with industry average genetics, and is representative of total dollars of difference from purchase to slaughter. Actual realization of these values is dependent on market conditions, management strategies, and environmental effects, including plane of nutrition, days on feed, weather, etc. Verified Beef and Zoetis do not guarantee or warranty the actual performance of the cattle.

Top Dollar Angus®

WHAT IS TOP DOLLAR ANGUS

Top Dollar Angus is a genetic certification and marketing company focused exclusively on the top 25% of the industry in carcass & growth, Angus or Red Angus influenced feeder cattle. Top Dollar Angus is a program similar to popular branded beef programs, except that Top Dollar Angus does its "branding" in the feeder cattle and calf market.

Qualified herds must have two or more generations of Angus (Black or Red) genetics with growth and carcass traits objectively ranking in the top 25% of the breed based on documented historical sire use. DNA evaluation, conducted by Zoetis or GeneSeek, is another workable method to qualify. Once your cattle have met the necessary requirements, they will be marketed under the Top Dollar Angus brand and logo and will be promoted aggressively to a large

For more information on Top Dollar Angus:

number of feedyards and buyers. In today's market, Top Dollar Angus cattle are seeing premiums ranging from \$30-\$70 per head above the average market.

Why the premium? Cattle feeders know that Top Dollar Angus cattle perform better and have higher grid-based carcass rewards compared to other cattle. This puts more dollars per head into the cattle feeder's pocket, which can be passed back to the producer in the form of premiums paid above market price.

Top Dollar Angus helps take the guess work and surprises out of growing and feeding cattle. Feedyards are tired of unpredictable performance and wide ranging profitability results from group to group on cattle they purchase. Cattle often look the same and have the same colored hides, but

are very different genetically. That's why the genetic certification of high-end Angus/Red Angus feeder cattle is here! The industry must differentiate the best Angus/Red Angus genetics from average cattle, that's what Top Dollar Angus will do for you!

If you have consistently invested in high-performance Angus/Red Angus genetics, Top Dollar Angus will make your cattle stand out from the pack and get you the premiums you deserve. No matter how you market your cattle our goal is to create more demand and higher prices for your calves.

Bull Selection Simplified.

Building a cow herd?

- Combine low-expense traits (ME EPD) with acceptable revenue traits to breed efficiency into the cow herd.
- Improve fertility with selection pressure on HPG EPDs.
- Sleep through the night by selecting high-CEM EPDs.
- Improve longevity and lower replacement rates by selecting higher-than-average STAY EPDs.

Breeding virgin heifers?

- Select for CED EPD as the most meaningful predictor of calving ease. Red Angus' CED combines birthweight and other factors affecting calving-ease scores.

Selling calves or yearlings?

- Heavier payweights may be achieved by selecting higher WW EPDs, but...make sure heavier is what you want. Heavier weaning weights mean heavier payweights for calf feds. However, for those who background their calves, too much weaning weight could translate into yearlings that are too heavy when they enter the feed yard, and finish too heavy. **Overshooting performance goals can be just as detrimental as falling short.**
- Enhance your reputation - improve traits that impact feeder profits, such as carcass traits and post-weaning gain (YW).

Retaining Ownership?

- Docile and fast starting, Red Angus are easy to start on feed and keep on feed.
- Balance YW EPD of potential bulls with the existing cow herd to pinpoint needed improvement for post-weaning gains.
- Increase payweight with selection for improved CW EPD.

Selling on a Grid?

- Fine-tune marbling (MARB), rib eye area (REA), and back fat (FAT) EPDs to target value-based grids.
- Target YG 1 & 2 premiums and avoid YG 4 discounts by applying selection pressure on YG EPD.
- Optimize carcass weights to increase payweights while avoiding discounts for heavy weight carcasses.
- Balance Carcass EPDs against existing cow herd genetics:
 - Cowherds of higher continental influence may require additional selection pressure on marbling EPD to improve quality grade.
 - High-percentage British cowherds typically benefit from selection pressure to reduce YG and increase CW.

Ranch Tested. Rancher Trusted.

Red Angus

Contact the Red Angus Association of America if you have further questions about how you can reach your breeding goals with Red Angus EPDs.

Red Angus Guide to EPDs

HB HerdBuilder Index – Need bulls for developing a profitable cowherd and maximizing the value of marketed progeny? Select a bull with a high HB value.

GM GridMaster Index – If you market all of your calf crop and want to increase the value of that calf crop, select a bull with a high GM value to maximize your profit.

CED Calving Ease Direct – Breeding Heifers? Select bulls with a high CED to increase the probability that the heifers will calve unassisted.

BW..... Birth Weight – Predicts differences in birth weight. BW is included in the CED EPD, so simplify your decisions by selecting bulls based on CED instead of BW.

WW Weaning Weight and **YW** Yearling Weight – Predicts differences in weight at weaning and yearling. While selection based on these growth measures can increase your payweight, be cautious what the bull's other EPDs are.

Milk Milk – Predicts differences in weaning weight of daughter's progeny due to milk production.

ME Maintenance Energy – Selecting bulls with a lower ME EPD will decrease the amount of feed his daughters will require to maintain body weight.

HPG..... Heifer Pregnancy – Retaining heifers? Select bulls with a high HPG to increase the percentage of exposures that result in a calving observation.

CEM Calving Ease Maternal – Another number to pay attention to if you are retaining heifers. Selecting bulls with a high CEM will increase the probability of those daughters calving unassisted.

STAY.... Stayability – The most important trait if your goal is developing cows that stay productive, thus increasing your profitability. Bulls that have a high Stay EPD are expected to sire daughters that remain productive in the herd until at least 6 years of age.

MARB .. Marbling Score – Select bulls with high MARB EPD to increase the number of progeny that grade Choice or Prime.

YG Yield Grade – Marketing calves on a grid? Placing selection pressure on YG EPD will decrease the number of YG discounts on grid-marketed progeny.

CW..... Carcass Weight – Selecting bulls with a high CW EPD will increase the weight of the hanging carcass, which directly impacts revenue.

REA Rib Eye Area – Need to add muscle? Select bulls with a high REA EPD to increase rib eye area, which favorably increases Yield Grade.

FAT Backfat – Need to reduce waste in carcasses? Select bulls with a low FAT EPD to reduce backfat, which favorably increases Yield Grade.

Research Validates Red Angus as Most-Favored Female

Ranchers across the country have long recognized the value of Red Angus females as the foundation of a profitable cowherd. Now, independent research validates those years of cattle production experience with tangible data proving the Red Angus heifer's worth.

Research Confirmation

Esther McCabe, et al., of Kansas State University, led a study that confirmed Red Angus are the most-favored female in the industry. McCabe and her team compiled five years' worth of pricing data from Superior Livestock Auction, comparing 13,804 lots of heifer calves totaling over 1.2 million head that sold in 116 video auctions.

The research team evaluated the effects of independent variables on the sale price of heifer calves that fell into six different breed composition groups: English, English crosses, English-Continental crosses, Black Angus-sired out of dams with no Brahman influence, Red Angus-sired out of dams with no Brahman influence, and Brahman-influenced.

They deduced that Red Angus-sired heifer calves bring \$5 to \$9 more per hundredweight than all other breed types.

Rancher Trusted

While market research validates the price advantage of Red Angus heifers, ranchers have tested and trusted her worth on the range for years. Red Angus females are desirable as replacement heifers because they mature into productive mother cows that reward producers with extra dollars in their pockets on sale day.

Red Angus cows have gained ranchers' trust as a complete package through fertility, fleshing ability, good disposition, longevity and excellent overall production. They produce feeder calves that earn premiums in the yard and on the rail through docility, feed efficiency, conversion and carcass merit.

Over the years, stockmen have voted with their checkbooks, purchasing heifers they know will bring profitability to their ranching businesses – and Red Angus females are their most-favored choice. ■

Independent research studying five years of Superior Livestock Auction data confirms the value of Red Angus replacement females.

Red Angus Stockyard

List or locate quality Red Angus replacement females at stockyard.redangus.org. Over 20,000 head of cattle are sold each year through the Red Angus Stockyard.

FeMail

An electronic tool to help locate or market ranch-tested replacements. Market your open heifers, bred heifers or cows, or cow-calf pairs. FeMails are designed for offerings of 25 head of more to complement listings on the Red Angus Stockyard.

Breed and Gender Interact to Affect the Sale Price of Beef Heifer Calves*

Red Angus

Red Angus Marketing Programs

The FCCP is the first step in differentiating your cattle from others to buyers, feedlots and packers.

What is the Feeder Calf Certification Program?

Producers utilize the Feeder Calf Certification Program (FCCP) to enroll calves in the industry's first genetic, source and age USDA process-verified program (PVP).

With many age and source verification programs to choose from, it's important to realize that Red Angus has the only PVP to hold the marketing claim of traceability to at least 50 percent registered Red Angus bloodlines. The genetic claim of the FCCP allows calves to access many Angus product lines. USDA provides certification of meat carcasses for a number of marketing programs that make claims concerning breed and carcass characteristics. Packer product lines making an "Angus" genetic claim require documentation from USDA verifying their Angus genetics, like the FCCP Certificate of Compliance.

How to enroll your calf crop in the Feeder Calf Certification Program

1. Contact Red Angus at (940) 387-3502 to go through a short supplier enrollment questionnaire over the phone. Red Angus will ask general management, animal identification and breeding questions. If needed, additional documentation on breeding may be needed such as semen documentation, lease agreements or information on purchased bred females.
2. After all documentation is recorded, Red Angus will have the tags shipped directly to the producer. Tags need to be applied prior to the calves leaving the ranch of origin.
3. The producer will receive a customer enrollment agreement to fill out and return with a copy of your calving records.
4. Upon return of your customer enrollment agreement and calving record, Red Angus will issue your USDA-approved certificate of compliance.

Red Angus FCCP

GENETICS + SOURCE + AGE

- Traceability to at least 50% Red Angus Bloodlines
- Source Verified to Ranch of Origin
- Group Age Verified

BULL MORTALITY *and* LOSS OF USE INSURANCE

Option 1: Bull Mortality and Loss of Use Coverage

- Values:** Bulls valued up to \$30,000, not to exceed purchase price
- Term:** One Year Policy Term for Bulls
One Year of Age or More
- Premium:** 10% of the Purchase Price
Premium Fully Earned
\$150 Minimum Premium Per Animal
- Testing:** All bulls must be tested, certified and listed in the official catalog of a herd sale.

*Further coverage information available on page 2.

Full Mortality:

100% of the value of the bull in the event of death or life-threatening injury.

Loss of Use:

80% of the value of the bull, less salvage value, of in the event of Loss of Use from an accident, illness, or disease that can clearly be diagnosed or identified to have occurred on a specified date.

25% of the value of the bull in the event of Loss of Use from an accident, illness, or disease if there is a diagnosis consistent with an accident, illness, or disease but no real evidence that provides clear diagnosis or identification.

Option 2: Bull Mortality Coverage

- Values:** Bulls valued up to \$30,000, not to exceed purchase price
- Term:** One Year Policy Term for Bulls
6 Months - 7 Years of Age
- Premium:** 5.5% of the Purchase Price
Premium Fully Earned
\$150 Minimum Premium Per Animal
- Testing:** Veterinarian examination and signed statement of health required for all bulls for which coverage is requested unless tested, certified and listed in the official catalog of a herd sale.

Full Mortality:

100% of the value of the bull in the event of death or life-threatening injury.

FCCP SWEEPSTAKES

Don't miss the chance to take home a cool grand – and be a winner in the marketplace – when you enroll in the Red Angus Feeder Calf Certification Program!

From January 1 to June 30, producers will be entered to win a \$1,000 cash prize with each bag of 25 FCCP tags purchased! It's a win-win scenario! This could be your lucky year!

A special drawing for Red Angus genetics providers will feature a .22 Henry Golden Boy trophy rifle. When tag purchasers call to enroll and they identify where they purchase their bulls, that seedstock provider will be entered to win the commemorative FCCP trophy rifle!

Research shows that calves identified as Red Angus genetics in the marketplace sell for a higher price. So, encourage your bull buyers to take part in this marketing program that has a proven track record. You're sure to be a winner with the USDA's longest running and most reliable genetic, age and source verification program!

Don't hesitate! Call to enroll your calf crop and automatically be entered in the sweepstakes today! Winners will be selected by random drawing.

**Contact Chessie Mitchell, tag program coordinator,
at chessie@redangus.org or 940-387-3502, Ext. 2.**

Full sweepstakes details are available online at redangus.org.
