EPD INFORMATION

In this catalog we have included data on the core performance traits. With the ever-expanding database predictions on more traits than ever before, we have had to narrow our EPD selection to these core items. If you would like additional information on any traits not listed, please let us know. The EPDs provided are as of the date listed. Because BOLT EPDs are updated weekly, we will provide current EPDs on sale day

SCHEDULE OF EVENTS

WEDNESDAY, MARCH 6

9:00 am Sale cattle available for viewing

THURSDAY, MARCH 7

8:00 am Sale cattle available for viewing

9:00 am Coffee and rolls available

11:00 am Lunch will be served

1:00 pm Sale time

SALE LOCATION

Bieber Red Angus Ranch, 11450 353rd Ave, Leola, SD 57456

The ranch is located nine miles west of Leola on Highway 10. When you see the Bieber Red Angus Ranch sign, turn north and go 1/2 mile.

SALE ORDER

Sale order will be catalog order.

FOLLOWING THE SALE

Dinner will be served at Ron and Lois's home after the sale. We will be serving steaks and sides.

DELIVERY POLICY

We offer free delivery on all purchases of individual lots over \$3500 per head to central points in surrounding states. Volume purchases by one buyer of five head or more, that average over \$3500 per head, will be delivered free to central points in the US. All purchases under \$3500 per head will be delivered at cost. Central points for delivery include auction barns, vet clinics and ranches that offer to serve as a delivery point. We simply ask for your cooperation in arranging the delivery of your cattle. This will keep the cattle from being on the truck longer than necessary and help to get the cattle to you with the least possible stress and in the best possible condition. All commercial heifer lots will be delivered at cost. We will help you with arrangements on commercial lots.

COOPERATORS

To provide a better selection of cattle, we have partnered with the following people with herds that align with our own through genetics and management. We have included their contact information as they represent the program and can help with your selection

Gene Rouse (ROU).....(515) 231-9129
Dan Bormann (ROU).....(515) 520-7707
Caleb Acciaccia (ACC).....(906) 395-7377
Dean Christianson (AVC).....(701) 426-7640

INSURANCE

Mortality and Accident, Sickness and Disease Infertility Insurance will be available sale day by Katie Williams of Martin-Trudeau Insurance. Contact Katie at (605) 770-9986 with questions.

CATALOG LETTER

CATTLEMEN AND CATTLEWOMEN,

Welcome to our 2019 Spring Production Sale and thank you for studying our catalog. Throughout the offering you will find proven, reliable sires that have been used in the past, as well as several new sire lines that offer good performance and end-product merit. Both options will produce progeny with the ability to function problem free under practical conditions.

I grew up with a passion for making cattle better. To do that, we have learned a lot about the basics of the cattle business. We have worked intensely to breed cattle that make our customers money. In turn, our passion for helping our customers be profitable has been a sustainable way to build our business and has become one of our major goals at Bieber Red Angus.

Another major goal of our program is to provide our customers with the most progressive genetics possible; genetics that excel in the economically important traits of efficient beef production. To us that means focusing on growth, fertility, calving-ease, maternal and carcass traits. These traits should come in a functional, sound, easy-fleshing package with a good disposition. We rely on EPDs, visual appraisal and individual performance to guide us in the selection process. We also utilize AI and embryo transfer to expand the impact of elite bulls and females on our program. Finally, we continue to invest in semen from prominent sires within the breed to contribute to the diversity and strength of our genetics.

In addition to the goals of our breeding program, we know our future and success depends on customer satisfaction. Repeat customers, long-standing relationships and real genetic value are what we aim to produce. We continue to promise that if you have a problem, we will take care of it.

In the catalog we have included data on the core performance traits. With the ever-expanding database predictions on more traits than ever before, we have had to narrow our EPD selection to these core items. If you would like additional information on any traits not listed, please let us know and we will be happy to provide that information. The EPDs provided in the catalog are as of the date listed. Because BOLT EPDs are updated weekly, we will provide current EPDs on sale day.

Please feel free to stop by ahead of the sale at your convenience to look at the bulls. We would be happy to visit with you at any time about the cattle in the offering and your needs as an operation.

CRAIG J BIEBER

THE PEOPLE OF BIEBER RED ANGUS

RON AND LOIS BIEBER

Ron and Lois are the co-founders of Bieber Red Angus Ranch. Ron is the Ranch Historian and Lois oversees sale meals and hospitality for all of our Bieber Fever visitors!

CRAIG AND PEGGY BIEBER

Craig is the CEO of Bieber Red Angus Ranch. He handles sales and all ranch activities. Peggy is Craig's partner and full time office manager. She handles all bookkeeping and cattle records, and manages the clerking of the sale.

CRAIG, LINDLEY, CAYSON, AND SUTTON HOWARD

Craig is our cowboss. He manages the day to day operations, and is an AI technician and welder. Lindley helps at the sale and is McPherson County Auditor. Cayson and Sutton are future cattlemen in the making!

ERIC, MEGAN, PRESLEY, AND KYLIE PAYNE

Eric is a day help hand and an agent at Insurance Plus in Aberdeen. Megan is a day help hand and sale clerk. Presley and Kylie are Grandpa's cow checking help and Grandma's baking partners. They keep everyone on their toes!

JAKE, KRISTIN, AND HARTLEY HARMS

Jake is a herdsman and AI technician. He handles feeding, calving, and general ranch duties. Kristin is full time office staff and handles our marketing. Hartley is also office staff and brings plenty of smiles every day!

DILLON AND MEGAN SPURR

Dillon is a herdsman and AI technician. He handles calving, breeding, and general ranch duties. Megan is Dillon's wife and helps at brandings and the sale.

DAWSON CEROLL

Dawson is a ranch hand and mechanical specialist. He handles machine maintenance, feeding, and general ranch duties.

Bieber Red Angus Interns: We have always believed that experience is the best teacher and in our internship program we look for individuals that help us through some of the more intensive times like calving and breeding. We look for a "can do" attitude and a commitment to the beef business. We are always looking for opportunities to share our operation with young people interested in the seedstock business. Contact us if you are interested in pursuing an internship opportunity

SALE TERMS

HEALTH

Ashley Vet Clinic will be available on sale day. All cattle are on a complete vaccination program supervised by Ashley Vet Clinic.

In the past bulls have been tested for persistent BVD carriers and all tests were negative for a number of years. We have chosen not to test the bulls

this year since no positives have been found in over 10 years. We have tested our replacement heifers for BVD since 2014 as part of our surveillance program and found no positive BVD carriers. Bieber Red Angus participates in the Beef Quality Assurance (BQA) program. Heifer calves have been Bangs vaccinated. We participated in a Johnes testing program for 10 years with no confirmed positives. We no longer test for Johnes disease but continue to diligently watch for any suspicious cases and test as necessary.

GENETIC DEFECTS

Every animal in the Bieber Red Angus production sale is guaranteed negative for the recessive gene associated with Osteopetrosis(OS), Arthrogyrosis Multiplex(AM) (Curly Calf Syndrome), Neuropathic Hydrocephalus (NH) and any other known genetic defects. With this guarantee, we provide our customers the opportunity to purchase their choice of cattle with very little risk. DNA samples have been collected on every animal in the sale with any known carrier in the first three generations and tested negative unless otherwise noted.

RETAINED INTEREST

We are retaining 1/2 interest in all bulls in the sale. We are selling the remaining 1/2 interest, full possession, and full salvage value on these bulls. This option gives Bieber Red Angus Ranch the option to collect, use and market semen from the bull and does not restrict the purchaser from doing the same. This collection, unless agreed otherwise, would be done at the expense of Bieber Red Angus Ranch, at the buyer's convenience. Also at the time of purchase, the highest bidder on a retained interest bull may elect to purchase exclusive semen rights for 50% of the purchase price in addition to the purchased price on retained bulls. If a buyer elects to purchase exclusive semen rights, Bieber Red Angus Ranch's interest then becomes in herd use only, but Bieber Red Angus Ranch retains all rights to use the bull within their herd.

BIRTH WEIGHTS/CALVING EASE

We score for calving ease with our three star (*) scoring system. Three stars (***) indicates that a particular bull can be used on heifers under standard conditions with little or no calving difficulty. Two stars (**) indicates that a particular bull should be used on growthy heifers or cows under standard conditions with little or no difficulty. One star (*) indicates that a particular bull should be used on cows under standard conditions with little or no difficulty. This recommendation is a system we use to help our customers with calving ease selections.

Birth weights are highly affected by environmental factors. Research has indicated that the inclusion of corn in cow diets will increase BW. Also contributing to higher BW were cold temperatures. The University of Nebraska conducted a three-year study to research and evaluate effects of high and low temperatures during winter months on calves out of 384 two-year-old heifers. Average BW increased by 11 lbs. when temperatures were colder. The results agree with other studies comparing calves born in the southern US to calves born in the northern US. Weather plays an important role in BW and calving difficulty. We have adjusted the calving ease scores accordingly, taking into consideration what the calf ratioed on BW, pedigree, CE EPD, BW EPD and Genomic data.

FEEDING

Feeding arrangements are available on all lots and will be fed at a charge of \$3.50 per day. We will feed your purchases from sale day until you are ready to pick them up, or we will deliver them.

COLOR

All animals are red unless otherwise indicated in the footnotes.

GAIN TESTING

The spring born bulls were weaned in October of 2018 and yearling weights were taken in January of 2019.

BREEDING SOUNDNESS EVALUATION

Breeding soundness screenings will be performed in February before the sale. We fully guarantee that these bulls will pass the breeding soundness evaluation before the breeding season in 2019 if the bulls are managed properly. Part of being maintained properly means being on a plan of nutrition where bulls maintain or gain weight. The bulls will be weighed the week prior to the sale when the breeding soundness evaluation is done. We recommend that all bulls tested in this sale be tested 4 to 6 weeks prior to your breeding season. Our guarantee will require that the bull weigh the same or more than when we did the breeding soundness evaluation in February 2019. We ask for your understanding if a bull does not pass. Sometimes bulls that have passed do not pass later for various reasons. We will do our best to make sure you are satisfied. Keep in mind that the development of any bull is inhibited by inadequate nutrition. If you have any questions regarding breeding soundness evaluation, feel free to call Craig or Dr. Dean Christensen at the Ashley Vet Clinic.

WEIGHTS

Birth weights, weaning weights, yearling weights, and all other measurements are taken at appropriate times to produce sound and accurate comparisons within contemporary groups. We group our Red Angus calves based on the age of our cows. Calves out of two-year-old dams, three-year-old dams, and the main cowherd are all separate management groups and therefore are separate contemporary groups. Embryo transplant calves are contemporaried in the groups they are weaned with.

WEANING WEIGHTS

All naturally born calves at Bieber Red Angus Ranch are raised without creep. We feel that this helps us select and breed for dams that have milking ability and sound udders. ET calves are on creep feed to express their full genetic potential.

INTERNET AND ABSENTEE BIDDING

We would prefer for each of you to be in attendance on sale day. Realistically, we know that there will be scheduling conflicts and distance limitations. In these instances, we have arranged a conference call dedicated to bidding for you to participate in the sale on an absentee basis. We will have one phone line available and can accommodate 20 to 30 bidders. Please call the office prior to the sale and register as a prospective buyer. We have limited capabilities to bid by phone during the sale. We need to warn you of complications we have experienced with the conference call including the volume of the phone and the rapid pace at which our sale moves. For internet bidding information, see the DVAuction section.

If you are unable to attend and you feel comfortable doing so, you also have the option to leave your bids with the Bieber family, Auctioneer, or publication representatives. We handle many sight unseen bids and have very satisfied customers who feel confident in using this service. We prefer to have plenty of time to discuss your needs over the phone prior to sale day so that we may select the cattle that best fit your specifications. We buy those animals just like you were sitting ringside with us. We also guarantee the cattle so that if they don't meet your expectations, you can return them to us. If possible, please come and evaluate the offering prior to sale day. We will also post video of each lot on our website prior to the sale.

UPDATED SUPPLEMENT INFORMATION

Supplement sheets will be available on sale day and will include actual scrotal measurements, actual weights, and updated carcass EPDs. All yearling bulls will be ultrasounded and updated carcass EPD information will be available. Yearling adjusted scrotal size is printed in the catalog. These are adjusted by the Red Angus Association of America. We find actual scrotal measurements at sale time are typically one centimeter larger than the adjusted measurements.

DVAuction Broadcasting Real-Time Auctions

We are pleased to offer Bieber Fever broadcast "live" over the internet through DVAuction Services. To bid from your computer at home during the sale, complete this simple two step process.

- Visit the DVAuction website at www.dvauction.com or call (402) 474-5557. Register by entering a User Name and Password. Then enter your personal information on the next screen.
- Click on "Apply for Bidding." Select the Bieber Red Angus Sale from the list of sales and click "Apply." Complete the process by filling out the Banking and Lending information requested.

DVAuction will contact you to let you know that you have been approved to bid and buy at the sale "live" from your computer at home. We will also provide you with a buyer number for the sale. After the sale, Bieber Red Angus will contact you to make arrangements for payment and delivery of your online purchases.

Please Note: You must have high speed internet access (DSL, T-1, or Broadband) to be able to bid during the sale. Any questions, please contact DVAuction at (402) 474-5557 or e-mail support@dvauction.com. We recommend that you register at least one day before the sale for online bidding. Every attempt will be made to complete your application even if it is on sale day.

Red Angus Returns

Calf enrollments in FCCP have increased 39% from 2015-2017 for the right reasons:

- Significant premiums
- Source verification for export markets
- Access to Angus product lines

Enrollees must verify:

- Traceability to at least 50 percent Red Angus breed influence
- Ranch of origin
- Group age

To enroll your calves and start earning industry-leading premiums, contact Chessie Mitchell, 940-387-3502, Ext. 2.

Visit RedAngus.org for more information.

Ranch Tested. Rancher Trusted.

Red Angus

EVALUATING YOUR PHILOSOPHY OF GENETIC SELECTION

Eric Mousel, University of Minnesota Beef Team

The type of bulls selected to contribute to a genetic program is one of the most important decisions cow-calf operators will make. These decisions will set the direction of the cowherd and the calf crop for many years to come. However, it may not be a real surprise to learn that the majority of bulls purchased in the U.S. cattle industry are selected primarily based on visual attributes rather than for traits that contribute to long-term profitability at the cow-herd level. Even with more relevant (and sometimes irrelevant) data available on any potential sire from a reputable seed stock program than ever before; the propensity for many producers to select bulls almost entirely based on visual appraisal hasn't really changed much over the years.

Why is this the case you might ask? It is probably a multi-faceted answer to that question, but the central theme likely revolves around some variation of the supposition that most cow-calf producers do not really have a guiding philosophy when it comes to their genetic program. They may select specifically for calving ease or something similar; but other than that, they generally are very vague on what exactly they are breeding for. Similarly, cow-calf producers that maybe do have a specific thing they are breeding for may not have a very good grasp on how to achieve the specific target they are trying to hit, or simply do not have the discipline to repeatedly select for those specific criteria, to the exclusion of all of the 'noise'.

As a related tangent, there are an alarming number of cow-calf operators that do have a guiding philosophy to their breeding program, but the philosophy itself may not, in reality, be achieving the results they believe that it does. As an example, every year I have a significant number of producers call about mid-summer looking for 'anything with a set of nuts' or 'something that will make a live calf'. The underlying philosophy here is a suggestion that genetics do not matter to the bottom line and long-term success of a cowherd and thus there is a resistance to invest any capital in replacement breeding stock. Every time I encounter this philosophy, I can't help but to seriously challenge this thought process, based simply on the fact that in today's calf market, at the average cost of running a cow, every calf that weans off at less than 500 lbs. is a money loser.

That is a sobering statistic as the average weaning weight of calves in Cow Country USA is only slightly over 500 lbs. So, without a sales pitch for fancy bulls or this, or that, or the other; simple mathematics dictates that commercial cow operators with this philosophy do in fact, need more than a set of testicles and will require more than simply a live calf. It is important to remember that the genetics of those calves will need to offset not only the percentage of calves that don't make it to a breakeven weight, but also to cover the cost of the cows that never produced a calf due to failure to breed or death loss at calving or before weaning.

I think it is a good idea for any cow-calf operator to evaluate their breeding philosophy from time to time and a good place to start this process is to think about what the end point is for that particular program. Most cow-calf operators in Cow Country USA sell their calves at weaning. However, it is still surprising to me to hear the number of producers that sell their calves at weaning, and these are the good operators, that place a very high value on selecting for marbling. The genetic potential to marble is a singular trait that the cow-calf producer that sells at weaning DOES NOT get paid for...ever. So why then are there so many cow-calf operators that select for marbling you might ask? I suspect that the biggest reason is because their seedstock supplier told them it was critical that they select for marbling and lo and behold THEIR seedstock supplier has the best bulls for marbling in the land! Of course I am not suggesting the marbling potential is a trait that never should be selected for by cow calf operators, but as a primary selection point it is a little out of place for an outfit that routinely sells calves at weaning. There just isn't a conduit in the market place at this time that will force buyers to reward producers for this type of potential. That may change in the near future, but it is not in place yet.

The point is, that when evaluating the end point of a breeding program, the operator needs to look at whether they sell at weaning, background calves, retain replacement heifers, retain calves in the feedyard or finish themselves, or retain through slaughter, etc. The economically relevant traits that should be selected for will largely be determined by this end point.

The next point of evaluation for most cow-calf operators is thinking about 'what do I need a cow to do to keep this program where it needs to be'? There are many, many things that will contribute to this question however, at a minimum I think we can all agree that these four things will be the base requirements for any cow herd to accomplish in order to main long-term profitability:

- | | |
|----------------------------------|----------------|
| 1. Have a life calf | (Fertility) |
| 2. Rebreed | (Fertility) |
| 3. Wean a calf over 500 lb. | (Productivity) |
| 4. Repeat this at least 12 times | (Longevity) |

So the question then becomes, what criteria should be selected for to achieve these four targets? There are probably a multitude of things that will contribute to achieving these targets, however, I think Tom Lasater of the Beefmaster breed of cattle fame probably put it most succinctly in the Lasater Philosophy of Breeding Cattle that a cow outfit need only to select for the six essentials to achieve a focus on long-term profitability in the cow business:

1. Disposition
2. Weight
3. Hardiness
4. Fertility
5. Conformation
6. Milk

EVALUATING YOUR PHILOSOPHY OF GENETIC SELECTION

Additionally, other icons of cattle breeding such as Jan Bonsma of South Africa have placed tremendous emphasis on other selection considerations such as fleshing ability, muscling, masculinity, hair coat quality, and parasite resistance as key contributors to profitability. Any number of additional criteria could be named and selected for, but the breeder must keep in mind that the more selection points made for a program, the more disciplined the breeder has to be in finding and evaluating replacement breeding stock.

Another key component of breeding philosophy that I think should at least be considered by any outfit is whether crossbreeding can help achieve the goals set for the program. After the wave of exotic breeds that entered the U.S. beef industry in the 1960's and '70's, it probably is no real surprise that the national cow herd is now mostly straight-bred Angus. However, it also should be no surprise then that cow productivity (weaning weights) has gone up very little since the time that we largely quit crossbreeding beef cattle. The heterosis afforded by crossing two different breeds and thus recovering the accumulated inbreeding depression found in all straight breeds, is the only real boost in production the average cow-calf operator is going to get. The real decision should probably be based on whether the goals of the program are to capture the individual heterosis as a result of that first cross of parents of different breeds or can the full maternal heterosis; where crossbred cows are mated to a third breed, be netted.

Individual heterosis has been shown to provide about an 8% boost in performance. Maternal heterosis on the other hand will provide an additional 15% boost in production. Heterosis is accumulative, so when both individual and maternal heterosis are captured in a breeding program, a whopping 23% boost in production can result from a solid crossbreeding strategy. I am not sure I could find a cow-calf operator in the country that wouldn't take a 23% boost in production with little to no additional investment.

Now, I know you are thinking to yourself, 'well, I only have 50 cows, how on earth can I crossbreed very effectively'? In fact there are several ways in which a smaller herd can quickly capture the tremendous benefits from crossbreeding. There are several rotating breed systems that can be employed as well as the use of composite breeds. Once upon a time, it was fun to talk about using composite breeds in a crossbreeding program, but the reality was that a solid composite seed stock program was a pretty rare thing. But now, almost everyone reading this can probably name at least two or three composite seedstock producers in their region. Two, three, and four breed composites are no longer very hard to find. Of course a tremendous amount of discipline must be exercised when crossbreeding with composites, but they are out there and there is a tremendous amount of data available from reputable programs on these types of sires.

How much is too much?

The final thing that invariably comes up is 'How much should I spend for bulls'? This is a very open-ended question, and I don't necessarily have a very definitive answer for it. However, there are a couple of benchmarks I think a commercial outfit can use to evaluate what they should be spending for bulls. My dad always used to say, 'The cost of running a good bull is about the same as the cost of running bad bulls. You can pay for it on the front end or the back end, but you'll pay for it either way.' I suppose in a way, he was probably right. I like to look at it from a little different angle. Many outfits I have talked to cannot get their minds around how a commercial cow outfit can routinely spend \$6,000 - \$7,000 on bulls. I put the following table together to illustrate the cost of seed stock bulls on a cost per cow basis to help buyers get a little better idea of the true economics of bulls.

The far left column of the table is the purchase price at the point of sale which ranges from \$3,000 - \$9,000. The 2nd column is the salvage value of that bull. I arbitrarily took 1,850 lbs. x \$0.73/lb. There is nothing magical about this figure, it is just an approximation and will vary widely from outfit to outfit. The third column is the net cost of using the bull (Price paid - salvage). The fourth column is an estimation of the number of cows a bull will breed in its lifetime. I figured this by taking an average rotation of 4 years on a breeding bull; 25 cows as a yearling and 35 cows as an adult. This comes out to roughly 130 total females bred in his lifetime. Column 5 is simply the net cost per cow per year of using that bull (Net cost/Cows bred per lifetime).

Estimated Net Cost Per Cow Per Year of Bulls at Different Purchase Prices

PRICE PAID	SALVAGE	NET COST	COWS BRED PER LIFETIME	NET COST/COW/YEAR
\$3000	\$1350	\$1650	130	\$12.69
\$4000	\$1350	\$2650	130	\$20.38
\$5000	\$1350	\$3650	130	\$28.07
\$6000	\$1350	\$4650	130	\$35.76
\$7000	\$1350	\$5650	130	\$43.46
\$8000	\$1350	\$6650	130	\$51.15
\$9000	\$1350	\$7650	130	\$58.84

From the table, you can see that the net cost per cow per year of a bull that brought \$7,000 on a sale is just a shade over \$40/cow/year. It seems to me that most commercial outfits kind of have that \$30-\$40/cow in mind when they think about genetic value. Where does that come from? I'm not entirely sure, but many of us have heard the old mark of 'the value of 4 feeder steers' as a proxy for what bulls should be bringing. Well, if you do the math on 4 feeder steers right now, that's about \$4,500; which in those terms should be the average cost of bull. On a net cost per cow per year basis, \$7,000 is not much of a stretch for an outfit that wants slightly above average bulls. I'm not suggesting commercial outfits should go out and spend \$7,000 on bulls, I'm just pointing out the likely philosophical thinking behind this phenomena. When you break purchase price down to a net cost per cow per year, expensive bulls all of the sudden look much more reasonable.

LOT 1

We kick things off with a Marble Bar son, all of whom are exciting outcrosses. Lot 1 stacks LSF Exclusive and VGW Oly 903 into his pedigree as well, making for a very maternal genetic package. His data puts him near the top for carcass, which is no surprise considering his dam knocked it out of the park with a 139 marbling ratio putting her in the top 1% of the breed. This bull will turn heads and if he tracks with his dam, he will be one of the most sought after bulls in the breed.

LOT 2

Every year we sell a section of bred heifers in our Bieber Fever Fall Production Sale and last year our vet, Dean Christianson of the Ashley Vet Clinic, bought this lot's dam. This bull really knocks it out of the park; he posts HerdBuilder and growth numbers in the top of his group and in the top of the breed. Lot 2 has a great look to him and will attract a lot of buyers on sale day.

LOT 3

Marble Bar is an Australian bull and one of the biggest things that caught our eye about him was that he was purchased by the same herd that brought us Iron Ore. The Iron Ore daughters have been outstanding. Lot 3's dam has done a great job and is from the same cowline as the dam of lot 1. He has great kind, a good hip, and solid growth making him an outstanding outcross prospect.

LOT 4

Lot 4 is an outstanding Deep End son with a great dam from the Rouse herd that always calves early in the season. Gene and his family have been sending us bulls for around 25 years and every year they send bulls that rank near the top of the offering. This bull is very powerful and in the upper echelon of the Red Angus breed for both growth and GridMaster.

Lot 6 is a Marble Bar son that has outstanding growth and we believe that, in time, the index will find favorability in these genetics from Australia. This mating has a great, young Rollin Deep daughter, who will likely follow her dam and granddam into our ET program. He is every bit as good as the earlier Marble Bar sons, we just happened to miss him on picture day. Make sure you check out his video, he may be your favorite. Maternal brothers sell as lots 133 and 296.

Spartacus sons topped the sale last year and lot 8 is a great example of why. This lot has posted some very impressive CED and growth data which could easily put him at the top of the sale. He has a bit of white ahead of his navel, but he smokes a lot of the bulls on test and did it with a very moderate BW.

This Franchise son's dam produced several bulls that sold to very selective commercial customers Roger Wilson of NE and McDowell Ranch of TX. His Oly sired dam has a stellar reputation. The Dateline cowline has a history of making them good with a cherry red color that a lot of people like. This bull has his sire's great kind and posts some very intriguing data.

Lot 22 matches the Enchantress cowline with Let's Roll making for a combination of two great Bieber pedigrees. With focused selection, this lot represents valuable maternal genetics that are sure to make any cowherd more valuable. Lot 22's granddam was flushed for multiple years and his dam is likely going to follow the same path.

REFERENCE SIRES

BIEBER SPARTACUS A193

Spartacus is a complete bull that will leave any breeding program in a very good position going forward. He does so many things right! His data is hard to match for both seedstock and commercial cattlemen and his progeny have that extra look that everyone wants in their calf crop. Many of our customers have tied into his sons, and those feeder cattle will be in high demand in the coming years. His daughters, most of which are bred heifers, look to be some of the best females we have in our herd. Semen almost sold out this summer, but more will be available this year through Select Sires or Accelerated Genetics. Everyone is very pleased with the disposition on progeny sired by Spartacus as they offer a great temperament. With over 1,000 registered calves to his credit, the new BOLT EPDs have proven that he is one of the more balanced sires in the Red Angus breed. With 39 sons in the offering, everyone has the opportunity to own one.

REFERENCE SIRES

BIEBER GLADIATOR C386

Gladiator is the leading son of Spartacus and is also out of the famed Bieber Laura 158W, the dam of Hard Drive Y120. We have used three sons out of Laura 158W and we are convinced they will continue to move our and our customers' genetics towards profitability. Gladiator has breed leading, Top Dollar carcass and growth. The 55 sons we have to offer this year are hitting it out of the park. Semen is available through Bieber Red Angus.

BIEBER ROLLIN DEEP Y118

Rollin Deep has been one of those rare sires that truly elevates the breed. He was an impressive individual from the start, posting outstanding data with one of the deepest phenotypes we had ever seen. His progeny proved impressive and our customers found that his sons complimented their programs and added muscle, great data, and superior style. Our attention then turned towards his daughters who continue to do an outstanding job. Rollin Deep has become the epitome of our program with 120 daughters in the herd and over 1300 progeny registered with the RAA. His influence has been felt across the breed and we have several great sons that are now making their own mark on the industry. We have a limited amount of semen available and will continue to produce progeny - but we are convinced his sons are going to be even better sires in our herd.

CHOOSE WISELY

Tom Field, PhD

For the commercial cow-calf producer the two most important professional relationships are with the seedstock supplier and the herd veterinarian. Genetics provides a foundation upon which the future of the enterprise will stand. The most influential genetic decisions made by a cow-calf producer who produces their own replacement heifers are the three most recent generations of herd sires. These bulls account for approximately 75 percent of the calf crop's genetic makeup in terms of their direct influence as sires of calves and as the sires of the cowherd. Given the tremendous influence of the bull battery, the sire acquisition process takes on a special level of significance and thus, the relationship with the genetic supplier becomes highly important.

One of my mentors in the cattle business believed that before a decision was made on which bulls to purchase, cattle producers should visit the potential seedstock suppliers business at least twice – initially to check out the supplier and secondly to evaluate the cattle. The concept was founded on a commitment to only buying seedstock from herds managed under a similar philosophy and with comparable weather, forage and climatic conditions to the purchaser's situation. His belief was that if the people were solid, then you could more confidently do business safe in the knowledge that they were creating good cattle and that they would stand behind them.

However, even before contact is made with a seedstock producer, the cow-calf manager must assess their own conditions, level of herd performance in critically important areas, and solidify their goals and objectives for the beef enterprise. Bull buyers who are making choices from an information rich perspective are more prepared to build a solid working relationship with a seedstock supplier. Determining the mating system is another key decision that should be determined by the cow-calf producer using knowledge about their own enterprise as well as leveraging the experience of other producers as well as the genetics supplier. The mating system as well as the sires selected to work within the mating system requires that commercial producers carefully assess four critical areas:

1. Feed resources and environmental limits
2. Labor resources
3. Marketing goals and objectives
4. Gaps between present and desired levels of performance in traits critical to profitability

Once these issues have been addressed in detail then a meaningful discussion can be undertaken with potential seedstock suppliers. A long term and valued relationship with a seedstock supplier(s) begins with business integrity, a commitment to providing solutions to customers, conversations founded on meaningful information, and service after the sale. As these discussions are undertaken, two concepts should always be kept in mind – first, the novice bull buyer deserves an attentive supplier who is willing to provide education, answer questions, and most of importantly follow up after the sale (Figure 2).

Secondly, there is a dramatic difference between the supplier whose sole goal is to sell a bull and the supplier focused on solving problems for a customer.

Sire selection should be founded on making the most objective decision possible that is aligned with the overall strategy and vision for the cow-calf enterprise. Thus, it is essential to acquire bulls only from those herds with an active engagement in a performance program backed by a dynamic national data base and supported with state of the art genetic prediction tools. It is not important that a cow-calf producer understand the intricacies of how genetic estimates are calculated but developing a solid functional understanding of how to use the estimates and information is critical. The role of the seedstock supplier is to provide educational and consulting support to assure the comfort level of the customer.

The sire selection process is one driven by winnowing down the available bulls for sale into a group of individuals that possess the appropriate combination of performance metrics that align with the limitations of the resources available on the ranch and assure conformance to the demands of the target market for progeny. This narrowing down process can be driven by several key focal points:

1. Avoid sires that create dystocia. Calving difficulty is a leading cause of both calf and breeding female death loss, contributes to increased morbidity of calves born in difficult births, and diminishing subsequent reproductive rates of females experiencing dystocia.
2. Will replacement females be kept from the progeny – if yes, then what is the appropriate level of mature size and milk production for the particular farm or ranch? Attaining profitable levels of reproductive performance depends on the keeping the nutritional needs of the herd aligned with cost effective feed sources which are often in the form of grazable forages.
3. What is the optimal combination of growth, muscularity, marbling and carcass yield for the target market? Producing feeder calves that can be merchandised to generate high levels of revenue is fundamental to profitability.
4. Finally, what are the gaps in performance for the herd that need to be closed to improve productivity, profitability and quality of life? For example, if cattle are flighty and nervous in handling situation then more focus on docility is warranted. If udders are badly structured leading to calves unable to suckle and thus requiring more labor, then udder quality will need to be addressed.

In each of these discussions, the reputable seedstock breeder will provide information, insight and advice. Using their experience and knowledge is critical to building a genetic base designed for long term satisfaction from the cow-calf enterprise.

A WORD ABOUT GENOMICS

Information versus Data: making sense of what genomics provide us

"I am not buying my kid an encyclopedia. He can walk to school like I did." Lawrence "Yogi" Berra

It is a natural impulse for us to throw up our hand in frustration when challenged to make sense of waves of new information. There is no one equal to Yogi in the ability to express a kernel of wisdom in his malapropisms. In our particular world what he said would sound something like, "I'm going to pick the bulls that look the part to me and the hell with all the number!" Besides, it seems to be easy for a lot of people in our business to believe the numbers are a crock, a contrivance of an in-group to manipulate the process to their advantage. Our view is that the "numbers", the EPDs have been invaluable, will continue to be so, and that is not all that complicated.

The HD50K produces data that verifies parentage and predicts the breeding value of an individual bull for 19 different traits. Angus Genetic, Inc. (AGI) then processes that genomic data and puts it into a usable information format by updating and reporting genomically-enhanced EPDs (GE-EPDs) weekly.

The value of the genomic information is in improving the accuracy of the EPDs. The improve accuracy, according to the statisticians, of GE-EPDs can be expressed in the number of progeny records that would be required to produce equally valid phenotypically derived EPD values. Zoetis says the value of CED, for example, can change by as much as plus or minus 3 in a GE-EPD and that genomic data contributes

an equivalent amount of information about unassisted deliveries as would be derived from 21 offspring of a given bull.

To sum up, let us revisit the data versus information idea. Investigation of the genome and accumulation of data to predict outcome will continue across the entire spectrum of biology. No one can stop it. There is nothing fundamentally wrong or threatening with the process. At the same time, we believe that the interpretation of such data in our business is less than ideal, its impact sometimes exaggerated. In other works, the translation of data to usable information, actionable intelligence, is a work in progress. We believe that process will evolve and improve, particularly as more data accumulates.

Nothing in this world is perfect, including the tools we have to predict outcomes in the vast, magnificent world of biology. But EPDs are still, and will remain, the selection tools to use in choosing bulls to buy. They account for all sources of information on the individual, including pedigree, with collateral relatives' performance, individual performance, and genomic testing. They are the best tools we have and most definitely have worked for us.

Dan Borgen and Brian McCulloh

At Bieber Red Angus, we are convinced that Genomic data makes our EPDs more reliable. The majority of the bulls in this sale have been 150K tested.

50 YEAR HISTORY OF BIEBER RED ANGUS

Ron Bieber

In July of 1961, my brother Leroy Bieber and I were looking for a place to produce good beef cattle. We purchased Julius Binder's and Frank Sieh's properties amounting to 2300 acres. In September of that year, I was called into the Army because of the Cuban missile crisis. While serving for ten months, Leroy and I purchased some available land from Jacob Jakober. This expanded our operation to 3600 acres. In the spring of 1962, we began tagging all cows and calves and started keeping weaning weight records. At that time, we were calving mostly Hereford cows bred to Hereford bulls. We also had a group of baldy calves that produced 60 pounds more than the Herefords. In 1964, Leroy and I split up our operations, and Leroy purchased a farmstead three miles west of our operation. In the late winter Lois and I purchased our first Shorthorn bull from Fred Kiesz.

March of 1966 brought a tremendous blizzard our way. By the time we got out to find the cattle, some were four feet below the snow and still alive. We pulled them out, rolled them on to a toboggan and pulled them home. We lost 30 Hereford cows, but were able to buy 35 Shorthorn cows later that spring that were bred to a polled Hereford bull. This led to progress in converting our entire cow herd to crossbred cattle. Soon we realized that systematic crossbreeding would result in superior weights, and our weaning weights went from 380 to 560 pounds in a period of ten years. Crossbred cows eliminated pinkeye, cancer eye and prolapse, and we consistently had better breed back.

In September of 1967, I decided that we would take a working vacation and go to Montana to search for the next cross on our cow herd. Our first stop was at Miles City to have a look at the USDA cattle research station, where an acquaintance had had success using Line 1 Herefords. Next, we took in the Montana Hereford tour, looking at numerous herds and meeting with lots of Hereford breeders. When I said we were considering using Red Angus, one of the Hereford breeders from western North Dakota said, "Red Angus are like women's hats—here today, gone tomorrow." Twenty years later he started using Red Angus, and he no longer produces Herefords.

In October of 1968, I saw an ad in the Western Livestock Reporter for the sale of 50 registered Red Angus cows in May, Idaho. When I arrived, Gene Cook took me around for a tour of his Red Angus herd. I selected 14 cows, which Gene had transported by a pot that was filled with feeder cattle headed to our area. The cows arrived in early December, and we were officially a Red Angus seedstock herd.

April of 1969 brought an opportunity to take another trip to Montana. Ora Erdmann from Erdmann Angus had sent ten bulls to the Stanford Bull Test Station in northwest Montana. The test had 300 or more Angus, Hereford, Shorthorn and Red Angus bulls, as I remember. Early one morning I fed the cattle and tagged new calves. I finished seeding the field east of the house. Ora Erdmann showed up just before noon, and with him was Dr. Harlan Ritchie, Animal Science professor from Michigan State University.

I loaded my bag in the single cab two-ton truck, and off we went to Montana: three men, luggage and lots of BS. The major conversation topics were cattle and genetics. It didn't take many miles down the road before we were engaged in an intense conversation concerning cattle breeding. After he found out we were using a good Shorthorn bull, Harlan said that there was a breeder in Michigan he knew who was interested in a large framed Shorthorn bull like we had. It turned out Harlan was not coming back with Ora and myself, so an opportunity to sell a high dollar herd sire was missed. Harlan is a very astute observer of animal breeding and has been known for years as a leading authority on cattle breeding. Ora Erdmann was in

his 60s, a keen observer of cattle and a self-taught cattle breeder. His famous one-liner was "I don't want Shetland pony Angus."

In the late 1960s the beef cattle industry was changing rapidly. Suddenly performance records became important, and many cattlemen were looking for larger framed cattle. The pursuit of more frame and the introduction of continental breeds was recognized by keen observers of cattle breeding, like Harlan Ritchie, who realized frame could be detrimental to profitable beef production. That trip to Montana enlightened me and gave us contact with many leading cattle breeders in the beef industry.

In September of 1969, R.C. Buckner of Tyler, Texas, was having a Red Angus dispersion sale. Albert Erdmann and I made the trip in a two-ton truck to watch Buckner sell off 750 head of cattle. When we left, we ended up filling the truck with 20 head. After that, every chance we had we acquired more Red Angus cows and heifers. Soon our herd numbered 250 breeding females. In the fall of 1975, we sold our crossbred herd to Henderson Ranch of Lodgepole, South Dakota.

In 1975, we also had difficulty selling bulls, so we made the decision to have a production sale. That May we moved enough soil to form a level spot to put up an insulated Morton building. In those early years we provided information on birth weight, weaning weight, yearling weight and gain from weaning to yearling at each sale. Now we provide 12 EPDs and nine weights and measurements.

In the spring of 1983, we purchased the West Ranch from Harold Geffre. In the spring of 1988, we were able to purchase 800 acres from the Morrison Brothers, land that had run along the west side of our property. Then in the winter of 1989, we were offered the Jonathan Brenise place, which was 480 acres. We presently have enough land to run 800 cows.

Lot 1 has been a standout since he was born. His dam is one of Gene Rouses, very best cows, posting average progeny ratios of WW 110 and IMF 137.

1. Lot Number - This is the lot number of the animal. Cattle will have a white tag that will correspond to that number. Generally cattle will sell in lot number order.

2. Name - This is the registered name of the animal. Generally we name bulls after the sire and females after the dam.

3. Born - This is the birth date of the animal.

4. Reg - This is the Registration number of the animal. All Red Angus animals can be looked up on the Red Angus website by going to the animal search page and using this registration number.

5. Breed - This area has the breed composition and category as determined by the Red Angus Association of America. Breed Codes are:

- AR = Red Angus
- SM = Simmental
- XX = Unknown

The Unknown cattle are largely cattle we weren't able to prove parentage on in the Durheim herd. The unknown breed is either Simmental or Red Angus in the Durheim foundation cattle.

6. Category -

- 1A = 100% Red Angus with no disqualifying features
- 1B = 87% to 99.9% Red Angus with no disqualifying features
- II = Equal to or greater than 87% up to and including 100% Angus blood content having one or more disqualifying features. Disqualifying features include scurs or horns, ineligible white, black pigment, progeny of multiple sire groups, and missing birth date, or weaning weight and date.
- III = Less than 87% Angus blood content

7. Sire - Sire of the animal

8. Paternal Grand Sire - Sire of the Sire

9. Paternal Grand Dam - Dam of the Sire

10. Dam - Dam of the animal

11. Maternal Grand Sire - Sire of the Dam

12. Maternal Grand Dam - Dam of the Dam

13. MPPA - Most Probable Producing Ability -- An estimate of a cow's future productivity for a trait (such as progeny weaning weight ratio) based on her past productivity. For example, a cow's MPPA for weaning ratio is calculated from the cow's average progeny weaning ratio, the number of her progeny with weaning record, and the repeatability of weaning weight.

14. AoD - Age of Dam at the time of weaning the progeny.

15. ADG - Average Daily Gain -- Measurement of daily body weight change over a specified period of time of an animal on a feed test.

16. ADG Ratio - Average Daily Gain Ratio -- The ratio of the animal within its contemporary group. ET and Twins will be marked with a TW and ET. These animals have no contemporary group.

17. WDA - Weight Per Day of Age -- Weight of an individual divided by days of age.

18. WDA Ratio - Weight Per Day of Age Ratio -- Weight of an individual divided by days of age. ET and Twins will be marked with a TW and ET. These animals have no contemporary group.

19. AScr. - Adjusted Scrotal Circumference -- A measure of testes size obtained by measuring the distance around the testicles in the scrotum with a circular tape. Related to semen-producing capacity and is adjusted to Yearling age. Actual Scrotal Measurement are provided on a supplement sheet one week prior to the sale and at the sale.

20. CE - Calving Ease Score -- This is our recommendation for CE based upon the data and the pedigree.

- *** = Use on heifers; expect less calving difficulty
- ** = Use on grower heifers and cows; expect moderate calving difficulty on heifers and very little difficulty on cows
- * = Use on cows; expect difficulty on heifers and some to very little calving difficulty on cows

21. Grw. Sc. - Growth Score -- This is our recommendation for growth based upon the data and the pedigree.

- G6 = maximum growth rating
- G5 = high growth rating
- G4 = moderately high growth rating
- G3 = average growth rating
- G2 = below average growth rating
- G1 = low growth rating

22. DNA - Test ran on this animal.

23. EPD - Expected Progeny Difference -- The difference in expected performance of future progeny of an individual, compared with expected performance of future progeny of an individual of average genetic merit in the base time frame for the genetic evaluation. EPDs are estimated from phenotypic merit of an individual and all of its relatives and are estimates of one-half the breeding values. EPDs are generally reported in units of measurement for the trait (e.g. lb., in., etc.).

acc - Accuracy -- A measure of the reliability of an EPD. Accuracy values are reported as decimal numbers between zero and one. Values closer to one indicate larger amounts of available information and greater certainty that a bull's EPDs will not change significantly as more progeny information becomes available. Bieber Red Angus reports the accuracy values for sires since they have high accuracies. EPDs are a more reliable estimate of performance than weight, ratios or other measurements. Red Angus EPDs are often presented with a corresponding accuracy value, which measures the strength of the relationship between the genetic prediction (EPD) and true genetic value. As accuracy value approaches 1.0, the EPD is "accurately" or closely estimating the true genetic merit of an animal for a given trait. Although low-accuracy EPDs are less reliable when compared to those of proven sires, independent research demonstrates EPDs to be the most meaningful indicator of animals' true genetic merit. While "perfect" accuracies of 1.0, are never achieved, many heavily used Red Angus sires have accuracies greater than 0.9 (some as high as .99).

24. %Rank - This is the percentage rank of the EPD within the type of animal. Rank groups include Proven and Opportunity Sires, Active Dams, and Non Parent under Two Years of Age.

25. Wts - Weight -- The weight for that trait in that column adjusted to a constant days of age by Red Angus Association and Beef Improvement standards.

26. Ratio - The ratio for that trait in that column within its contemporary group. ET and Twins will be marked with a TW and ET and have no contemporary group.

27. CED - Calving Ease Direct -- Predicts the probability of calves being born unassisted out of two-year-old heifers. Producers want live calves born unassisted. Selecting on actual birth weight is flawed; it is influenced by non-genetic factors such as nutrition and weather (ambient temperature). While BW EPD removes these non-genetic factors, Red Angus CED EPD is the best predictor of calving ease. The CED EPD includes variation in BW plus other influential genetic factors such as gestation length, calf shape, etc.

28. Birth Weight EPD - Predicts the difference, in pounds, for birth weight, and is also used in the calculation of Red Angus' Calving Ease Direct (CED) EPD.

BW - Birth Weight (BW) -- The actual weight in pounds at birth.

29. Weaning Weight EPD - Predicts the difference, in pounds, for weaning weight (adjusted to age of dam and a standard 205 days of age). This is an indicator of growth from birth to weaning.

WW - Weaning Weight -- The 205 adjusted weight. This is an indicator of growth up to weaning.

30. Yearling Weight EPD - Predicts the expected difference, in pounds, for yearling weight (adjusted to a standard 365 days of age). This is an indicator of growth from birth to yearling.

YW - Yearling Weight -- The 365 adjusted weight. This is a measure of growth from birth to yearling.

31. Milk EPD - (MILK) predicts the difference in maternal production of an individual animal's daughters as expressed by the weaning weight of their calves.

32. ME - Maintenance Energy -- Predicts differences in daughters' maintenance energy requirements and is expressed in Mcal/Month. Recognizing that 70% of cowherd feed costs are burned up in maintaining weight and condition, Red Angus' ME EPD allows for the selection of bulls whose daughters will require less feed; thus, reducing cowherd expenses. Includes selection pressure for ME EPD to ensure feed costs don't get out of line when selection is made for greater performance and production. At Bieber Red Angus we collect cow weight at weaning time to ensure greater accuracy of this EPD.

33. HPG - Heifer Pregnancy -- predicts the probability of heifers conceiving to calve at two years of age. Many breeds offer genetic predictions of yearling bull scrotal circumference as an indicator of age of puberty. While puberty is a prerequisite, many factors influence pregnancy rate. Red Angus' HPG EPD offers a tool

which selects for what is economically relevant to ranchers - pregnant heifers. At Bieber Red Angus we submit all heifer breeding data to ensure the accuracy of this EPD.

34. CEM - Calving Ease Maternal (CEM) - predicts the probability of a given animal's daughters calving unassisted at two years of age. Replacement heifers should be able to calve on their own. Red Angus' CEM EPD offers the industry's most reliable prediction to address that concern. It includes not only the predisposition for a female to calve unassisted, but also her contribution to her calf's traits (birth weight, calf shape, etc.) that make it more likely to be born unassisted.

35. STAY - Stayability (STAY) -- Predicts the probability of a bull's daughters remaining productive until at least six years of age. Why six? That's how long it takes a female to breakeven given all the expenses of development.

36. MARB - Marbling Score -- Predicts differences for carcass marbling score as expressed in marbling score units. Higher marbling scores are positively correlated with higher carcass quality grades.

37. REA - Rib Eye Area -- Predicts differences of carcass Rib Eye Area between the 12th and 13th rib. Increased Rib Eye Area has a beneficial effect on Yield Grade which also includes Carcass Weight and Fat Thickness.

38. FAT - 12th Rib Fat Thickness -- Predicts differences for carcass fat depth over the 12th rib, as expressed in inches. Increases in fat thickness have a detrimental effect on Yield Grade. Fat thickness measured in young seedstock may be an indicator of fleshing ability.

39. HerdBuilder Index - As the name indicates, implementation of the HerdBuilder Index will assist producers in building profitable herds. The HerdBuilder Index is built using the following production scenario:

- Red Angus bulls mated to cows and heifers (resulting progeny ¾ Red Angus, ¼ Simmental)
- Replacement heifers retained from within the herd
- All remaining progeny sold on a quality-based carcass grid

40. GridMaster Index While Red Angus has traditionally been known as a superior maternal breed, those who have retained ownership in Red Angus calves know of their potential to excel in the feedyard and ultimately hang a premium carcass. The GridMaster Index is built using the following production scenario:

- Red Angus bulls mated to cows (resulting progeny ¾ Red Angus, ¼ Simmental)
- All progeny sold on a quality-based carcass grid

41. Footnote - This is information we would like to point out about the lot. It may contain breeding information on bred cattle.

TERMS AND CONDITIONS

ABSENTEE BIDDING

If you can't attend the sale and would like to bid absentee, call Craig at (605) 439-3628 or (605) 216-8169 prior to the sale. If you tell us what you are looking for, we will assist in making bidding arrangements. We will call you after the sale and inform you of your purchases. We guarantee your purchase will be satisfactory.

TELEPHONE BIDDING

We will have telephone bidding available by conference call. If you wish to bid over the phone, please register before sale day.

INTERNET BIDDING

See page 3 for information.

The Red Angus Association Terms and Conditions will apply if the terms and conditions printed here are not applicable.

BIDDING DISPUTES: The auctioneer in charge will settle any disputes as to bids. His decision on such matters shall be final.

TERMS: The terms of the sale are cash; the right of property shall not pass until after settlement is made. All settlements will be made with the clerks of the sale immediately following the conclusion of the sale and before any cattle will be released from the ranch.

RETAINED INTEREST: We are retaining 1/2 interest in all bulls in the sale. We are selling the remaining 1/2 interest, full possession, and full salvage value on these bulls. This option gives Bieber Red Angus Ranch the option to collect, use and market semen from the bull, and does not restrict the purchaser from doing the same. This collection, unless agreed otherwise, would be done at the expense of Bieber Red Angus Ranch, at the buyer's convenience. Also at the time of purchase, the highest bidder on a retained interest bull may elect to purchase exclusive semen rights for 100% of the purchase price in addition to the purchased price on retained bulls. If a buyer elects to purchase exclusive semen rights, Bieber Red Angus Ranch's interest then becomes in herd use only. Bieber Red Angus Ranch retains all rights to use the bull within their herd.

SEMEN RIGHTS: Buyers receive semen rights proportional to the interest purchased. If you purchase a 1/2 interest, then you are entitled to 1/2 of the semen collections at cost, provided that you indicate you want semen prior to collection. We intend to collect some of the bulls in the sale and sample them in our herd. We will cooperate with the buyer in collection of the bull. We prefer to collect most bulls after the first season of use, and we will contact the buyer when we intend to collect the bull at a time convenient for the buyer.

PURCHASER'S RISK: Each animal becomes the risk of the purchaser as soon as sold. Animals will be fed, watered and cared for at the purchaser's risk for a reasonable time.

CERTIFICATE OF REGISTRY: A certificate of registry and transfer will be furnished for each animal sold as a registered animal, after settlement has been made.

HEALTH: All cattle will have official health certificates and will sell guaranteed export to Canada. Canadian health certificates will be charged at cost on animals selling under \$4000.

ANNOUNCEMENTS: Changes of information contained in this catalog relating to the animals offered for the sale will be announced from the auction block and such announcements shall take precedence. Errors discovered in the catalog will be corrected by announcements at sale time, and such corrections will take precedence over the printed matter in this catalog.

BREEDER'S GUARANTEE: 1. All animals are guaranteed breeders, with the exception of: a) calves under twelve months of age; b) animals shown by Purchaser after sale (in cases of animals shown after purchase, the breeding guarantee, if any, shall be such as agreed upon between Seller and Buyer) c) any open heifer that has been flushed for embryo transfer; or d) gross negligence or willful misconduct on the part of the Purchaser. 2. Bulls are guaranteed breeders if not allowed to run with the herd until at least 14 months of age. Any bull which either: a) settles 1/3 or more of the healthy cows he serves; b) is the sire of 20 or more animals; or c) settles cows by natural service and passes a fertility test made by a competent veterinarian during any 6 month period of trial (provided for in paragraph 2 of the section of these sale terms and conditions entitled "Options and Privileges of Return or Adjustment") shall be considered a breeder.

Any guarantee with respect to the ability to freeze semen shall be by separate agreement between Buyer and Seller.

Open females have not been served and are so guaranteed.

IDENTIFICATION: Each animal carries a readable tattoo. Tag numbers on the cattle correspond with lot and tattoo numbers in this catalog. Purchaser agrees to use full name of animal in advertising and on stall cards at shows.

OPTIONS AND PRIVILEGES OF RETURN OR ADJUSTMENT:

1. All claims for adjustment or refund must be made in writing either within six months of the sale date or no later than six months after the animal reaches 18 months of age, with the exception of claims involving defects or parentage.
2. In the event an animal is claimed to be a non-breeder, the animal may be returned to the farm of the Seller if in good condition and complying with the health requirements of the Seller's state. The Seller shall be entitled to six months' trial following the return of the animal in which to prove the animal is a breeder. The Seller shall, at the option of the Buyer, replace the animal with another of equal value or grant the Buyer a credit for use on any products marketed by the Seller. Such credit of the full purchase price shall in any case be deemed full satisfaction and settlement. Any expense incurred for transporting an animal claimed to be a non-breeder shall be the responsibility of the Purchaser, except that the Seller shall be responsible for the transportation costs in excess of the distance between the Purchaser's farm and the location where the sale took place. If the Seller proves the animal is a breeder, it shall be the obligation of the Purchaser to take delivery of the animal and pay all expense incurred for transportation.
3. If a female sold as "safe in calf" proves not to be in calf, the Purchaser may receive service from the bull previously used, if available, or if the bull is not available, the Seller shall be obligated to make a satisfactory adjustment on the purchase price upon return of the animal to the farm of the Seller. Any adjustment provided for herein shall absolve the Seller from further liability, except in case such female proves to be a non-breeder. If a female represented as "safe in calf" at time of sale to a certain bull proves to have been bred to a different bull, the Seller shall be obligated to take a satisfactory adjustment on the purchase price upon return of the animal to the farm of the Seller (adjustments shall not be considered to a breeding fee or an allocation of the purchase price to any unborn calf). Any expenses incurred for transportation shall be the responsibility of the Purchaser, except that the Seller shall be responsible for the transportation costs in excess to the distance between the Purchaser's farm and the location where the sale took place.
4. If a female sold as "served" proves not to be in calf, or if a female sold as "pasture-bred" proves not to be in calf, the Seller only guarantees such female to the breeder.
5. If a female sold as "open" proves to be with calf, the Purchaser may return the animal to the farm of the Seller prior to calving for a credit of the full purchase price or for another animal of equal value, whichever is acceptable to the Purchaser. It shall be the obligation of the Seller to bear any expense incurred for transportation.

LIABILITY: Neither owners, sale managers, clerks nor anyone connected with the sale assumes responsibility, legal or otherwise, for damages of any kind.

CONTRACT: The above terms and conditions shall constitute a contract between the buyer and seller of each animal sold.

IMPLIED WARRANTY: Except for those stated in the terms and conditions, there are no warranties, either expressed or implied, as to merchantability or fitness for a particular purpose with respect to the cattle being sold in this auction. The warranties set forth in terms and conditions are in lieu of all other warranties, either expressed or implied, and the remedies proved therein shall be the sole and exclusive remedy of the buyer, or any part claiming through buyer, for any breach of warranty or guarantee therein provided and all other obligations or liabilities.

WE GUARANTEE YOUR PURCHASE WILL BE SATISFACTORY.

Red Angus Guide to EPDs

HB HerdBuilder Index – Need bulls for developing a profitable cowherd and maximizing the value of marketed progeny? Select a bull with a high HB value.

GM GridMaster Index – If you market all of your calf crop and want to increase the value of that calf crop, select a bull with a high GM value to maximize your profit.

CED Calving Ease Direct – Breeding Heifers? Select bulls with a high CED to increase the probability that the heifers will calve unassisted.

BW..... Birth Weight – Predicts differences in birth weight. BW is included in the CED EPD, so simplify your decisions by selecting bulls based on CED instead of BW.

WW Weaning Weight and **YW** Yearling Weight – Predicts differences in weight at weaning and yearling. While selection based on these growth measures can increase your payweight, be cautious what the bull's other EPDs are.

Milk Milk – Predicts differences in weaning weight of daughter's progeny due to milk production.

ME Maintenance Energy – Selecting bulls with a lower ME EPD will decrease the amount of feed his daughters will require to maintain body weight.

HPG..... Heifer Pregnancy – Retaining heifers? Select bulls with a high HPG to increase the percentage of exposures that result in a calving observation.

CEM Calving Ease Maternal – Another number to pay attention to if you are retaining heifers. Selecting bulls with a high CEM will increase the probability of those daughters calving unassisted.

STAY.... Stayability – The most important trait if your goal is developing cows that stay productive, thus increasing your profitability. Bulls that have a high Stay EPD are expected to sire daughters that remain productive in the herd until at least 6 years of age.

MARB .. Marbling Score – Select bulls with high MARB EPD to increase the number of progeny that grade Choice or Prime.

YG Yield Grade – Marketing calves on a grid? Placing selection pressure on YG EPD will decrease the number of YG discounts on grid-marketed progeny.

CW..... Carcass Weight – Selecting bulls with a high CW EPD will increase the weight of the hanging carcass, which directly impacts revenue.

REA Rib Eye Area – Need to add muscle? Select bulls with a high REA EPD to increase rib eye area, which favorably increases Yield Grade.

FAT Backfat – Need to reduce waste in carcasses? Select bulls with a low FAT EPD to reduce backfat, which favorably increases Yield Grade.

Ranch Tested. Rancher Trusted.
