**Welcome to the Third Annual Sale....**

# **REDstock®**

*The Power of RED*

We welcome you to our third annual **REDstock®** Partners sale at the Litton Agri-Science Center in Chillicothe, Missouri. On behalf of Bachman Cattle Farms, Bieber Red Angus Ranch, Emerald Earth Cattle Company, Mud Creek Reds and Spreutels Red Angus Farms, we trust you will find some exceptional cattle to purchase for your operations.

We want to thank Bill Schreurs of Mud Creek Red Angus for joining us this year as one of the new partners in **REDstock®**. We appreciate your trust in our program and look forward too many years of helping us to become the Midwest's premium supplier of Red Angus genetics.

We always wish to emphasize this is not a consignment sale, but a program to place pressure on breeding direction and to deliver a set of bulls and females who will work in your environment and deliver profits to your bottom line. We are focusing our breeding, developing and culling practices to deliver bulls and females who are eye-appealing yet commercially viable for your operation. We believe in the tools that the Red Angus Association provides us to evaluate the Economically Relevant Traits (ERTs) to help deliver profitable cattle for you. That means we measure everything during these cattle's lives while they are with us. We measure for actual performance and evaluate their genetics through EPD benchmarking as well as using DNA technology to improve their worthiness to you.

We have applied extensive review of these animals throughout their lives with us. We are aggressive at culling for lack of performance, poor feet, poor udders and poor dispositions. We are tackling the No. 1 issue in the phenotypical construction of good feet and legs in the Red Angus Industry. These animals have been highly selected and have met their performance and physical review benchmarks before being placed in this catalog.

Lastly, we wish to provide excellent customer service to you, our valued customers. To become a partner in **REDstock®**, each member must agree to provide a 100% Satisfaction guaranteed policy to replacing any defective animal in its first breeding or calving season. You choose what the definition of "satisfaction" is and we simply deliver that. If that's replacing your money, then we do that. If you want a replacement bull of equal value and merit, then we do that. We want you to keep coming back!

Thank you again in your interest in our program and these great Red Angus cattle.

Sincerely,

**REDstock® Partners**

# Sale Day Information

## DELIVERY POLICY

Free delivery on all purchases over \$3,500 per lot to central points up to 300 miles. Volume purchases of 5 or more lots selling to one ranch delivered up to 500 miles. All bulls under \$3,500 and females will be delivered at cost. Central point for delivery will include auction barns, vet clinics and ranches that offer to serve as a delivery point. We simply ask for your cooperation in arranging the delivery of your cattle. This will keep the cattle from being on the truck longer than necessary and help to get the cattle to you with the least possible stress and in the best possible condition.

## HEALTH

Chillicothe Animal Hospital, 660-646-3670, will be available on sale day to issue health certificates as part of the clerking / check-out process. The **REDstock**® Partners wish to communicate they adhere to a very comprehensive herd health set of protocols. Each ranch operation has slight variations in the herd-health management of their cattle. We encourage you to discuss with each **REDstock**® Partner separately their herd health protocol.

## BULL/FEMALE DEVELOPMENT

Please see page 4 for more information on how the cattle were developed.

## DNA TESTING

All bulls in this sale were DNA typed and sampled for the Red Angus Association GGP-LD test. All bulls were also BVD-PI tested and found negative. In some cases, we ordered further tests for other genetic defects and parentage verification. No bull was found negative to any condition tested, but in some cases parentage was not verified. We invite you to look up the individual bulls' registration number and validate their test results.

## RETAINED INTEREST

Each **REDstock**® Partner who is supplying bulls will retain 1/2 interest in all bulls in the sale. Each Partner is selling the remaining 1/2 interest, full possession and full salvage value on these bulls. This option gives each **REDstock**® Partner the option to collect, use and market semen from the bull and does not restrict the purchaser from doing the same. This collection, unless agreed otherwise, would be done at the expense of the **REDstock**® Partner who owned the bull, at the buyer's convenience. Also, at the time of purchase, the highest bidder on a retained interest bull may elect to purchase exclusive semen rights for 100% of the purchase price in addition to the purchased price on retained bulls. If a buyer elects to purchase exclusive semen rights, the bull owned by the **REDstock**® Partner who owned him prior to the sale, interest then becomes in herd use only, but each **REDstock**® Partner retains all rights to use the bull within their herd.

## FEEDING

Feeding and boarding arrangements are available at a charge of \$5.00 per head per day. We will feed your purchases from the sale day until you are ready to pick them up, or when we deliver them.

## BREEDING SOUNDNESS EVALUATION

All bulls have passed a BSE as close to thirty days prior to sale. The age advantage bulls will have been tested twice, once at their yearling performance review, and again around thirty days prior. To fully insure your breeding season the **REDstock**® Partners would recommend bulls be re-tested 4 to 6 weeks prior to your breeding season. All Bulls sold are guaranteed breeders for the 2017 season if managed properly. If a problem occurs, **REDstock**® Partners will do our very best to make sure you are satisfied.

## BREEDING DATA/CALVING DATA ON BRED FEMALES

Breeding data on bred females is verified by ultrasound. The calving date of the pregnancy verified by ultrasound and is an estimate. Many years of ultrasound had proven it is 99% accurate. These are called to the best of veterinarian's ability depending on the embryo age. The Bieber fall calving cows were ultrasounded on 1/24/2017 and will be armed to verify pregnancy before the sale. The Bieber May/June calving cows have been ultrasounded 10/12/2016 and will be armed to verify pregnancy before the sale. Likewise, Bachman Cattle Farms fall calving heifers were ultrasounded on 1/18/2017 and will be armed again just prior to the sale to meet Missouri Show-Me-Select® pregnancy verification requirements for bred heifers. Spreutels females were ultrasounded on 1/18/2017 and will be armed to verify pregnancy before the sale. All updated pregnancy status will be available on sale day.

I've had the honor and privilege to work with the **REDstock**® Partners from the beginning and witness the maturity they are bringing to provide high quality Red Angus bulls to you, the commercial cattlemen and cattlemen. They have teamed together to bring you something different in this type of production sale. Their program-managed approach to seedstock development is yielding substantial benefits to your operation.

I have observed how this team is working on a common breeding platform to force more uniformity in the bull selection. Their use of the best benchmarking tools and forcing the bulls to be developed in large contemporary groups will make a better product for you. This team understands we need bulls that are eye appealing to you, but are phenotypically and genetically in the top of their class. They are making tremendous strides to allow the best EPDs and test performances match up with physical balance and power while standing on top of great feet and legs.

I have worked with this team to apply some of the most stringent testing and culling practices so they can present to you a great set of bulls. I'm looking forward to watching this group provide fescue adapted bulls for you and backed up with one of the best customer service commitments out there in the seedstock world.

See you Sale Day,  
*Clint Berry*  
Allied Genetic Resources

# About the Cattle Selling...

**BULL DEVELOPMENT** We continue to refine a methodical, well balanced bull development program that is so important to the **REDstock®** partnership. We leverage the combined 50 years of bull development experience used by the Bieber Red Angus operation and the unparalleled experience of Clint Berry who is intimately involved with buying thousands of bulls for a large customer base.

Bull development starts with a thorough evaluation of the mamma cow factory that's producing these bulls. We are benchmarking these cows to track their performance to ensure you are getting bulls from great mamma cows. Next, we apply our sire selections from a rigorous review of our approved sire program. These sires have been reviewed, benchmarked for their performance, and selected as sires to produce the bulls you see in this catalog. We are still refining this process and feel we are on track to reduce the overall number of sires used to build our offering to maximize the consistency in our bull product.

This year you will see the transition from individually testing bulls for feed efficiency to testing without gathering individual Dry Matter Conversion (DMC) and Residual Feed Intake (RFI) data. The older set of bulls will be presented with this data and the younger set of yearling will not be presented with this data. Why is that? We have been supplying DMC and RFI data to the Red Angus Association for several test cycles to develop a feed efficiency EPD. We support the work to develop this EPD and the rest of the Red Angus producers will benefit from this without having to pay the extra DMC and RFI data expense.

Not all data will be finished by the time the catalog inputs are closed. We will supply the remaining data for the bulls as supplement sheets. Those supplement sheets will be available on-line before the sale as well as available on sale day.

All bulls are guaranteed breeders through their first breeding season. All bulls must pass their Breeding Soundness Exams within 30 days of the sale and we recommend another test before turning these bulls in with cows if they are going to be inactive for any extended period.

**REDstock®** is interested in developing a relationship with our bull customers to help facilitate the commercial Red Angus Feeder Calf program through the FCCP Yellow Tag certification program. We are also interested in helping you with participating in the Top Dollar Angus® program. 73% of the bulls in this sale will qualify as Top Dollar Angus® bulls and you may be interested in accessing those premium grids through participating feed yards.

Bulls with the Missouri Show-Me-Select® logo qualify as bulls who meet the requirements as calving ease bulls to use on replacement heifers.

**FEMALE DEVELOPMENT** Unlike the centralized approach to bull testing, the female offering in this sale reflects the individual partner's development program at their home ranches. Having said this, however, we started the analysis of the female cow base of each operation, benchmarking and setting the plan for improving each generation of replacement heifers to come over the next few years. There are some common aspects to these females:

- 100% of the females are "home raised", not repurposed or resold from sale barns.
- All yearling heifers offered are subjected to their pre-breeding health protocols in compliance to the Missouri Show-Me Select® Heifer Replacement Program. Go to <http://agebb.missouri.edu/select/prgmreq.htm> to see the requirements.

All bred heifers are compliant with the Missouri Show-Me Select® Heifer Replacement Program whether they have been ear tagged with the Missouri Show-Me Select® tag or not. They are not "approved" as Missouri Show-Me Select® bred heifers, but we've followed the same protocol.

## Meet the Partners...

### BIEBER RED ANGUS RANCH

focuses on Red Angus genetics and has been breeding Red Angus Cattle since 1968. One of the nation's largest Red Angus Seedstock producers, Bieber Red Angus Ranch has been consistent in their approach to cattle breeding using the latest

proven technology in selection to improve performance and carcass traits. EPD (Expected Progeny Difference), carcass ultrasound, and the latest in DNA technology are all used by the operation to improve the performance and eating quality of the genetics they produce. Bieber Red Angus genetics are utilized worldwide and one of the top suppliers to the major bull stud companies.

The involvement of the operation in projects like the NCBA Carcass Tenderness project, RAA carcass progeny testing, and the most recently RAA 50K research project have given them a unique insight to how genetics affect profitability and a satisfying eating experience. We have been fortunate to be listed for the past years as one of the Seedstock Top 100 producers in the U.S.

Bieber Red Angus Ranch runs two production sales per year, one in March and one in November while joining the **REDstock**® Partners team to help develop that team and market in the Midwest. We are one of the primary suppliers of genetics for the **REDstock**® team and provide support to their marketing plans.

**EMERALD EARTH CATTLE** is a Red Angus seed stock producer located in the rolling green hills of southwest Wisconsin. Over the past 10 years we have strived very hard to develop a cow herd that has good feet, good teats and udders, good dispositions, and always raises a good calf. We are at a point where every single cow in our herd has reached that level. It gives us great confidence

in selling bulls knowing that their dams are good momma cows, that anyone would be happy to own. We have feed efficiency tested many bulls and females over the years. It has been eye opening to see the huge difference that cattle convert grain into gain. Through this time, we have continually selected cows and sires that excel in feed efficiency. Our bulls in this sale carry many generations of feed efficient genetics.

All of us at **REDstock**® have been striving to meet every bar in producing good dispositioned, good performing, good type, and good EPD bulls. We are confident that you will be able to find the perfect bull to meet your needs at the 2017 **REDstock**® sale.

### BACHMAN CATTLE FARMS

*"Anyone who listens to my teaching and follows it is wise, like a person who builds a house on a solid rock."* (Matthew 7:24) Sue and I share our

beliefs that God and our relationship to our Savior, Jesus Christ is our solid rock which provides our decision points to be in the Red Angus seedstock business. We are called to be stewards of God's Kingdom on Earth and care for His Red Angus animals in our operation.

Red Angus is our cattle foundation, it's our "solid rock". We have made substantial investments in believing that we can place Red Angus seedstock cattle into the market who performs well for the commercial cattlemen and cattlemen who are feeding the nation and being influential in feeding the world a very healthy, necessary protein-base food.

We strive to have eye-appealing cattle meeting our 75/75/35 goals (75% of our seedstock females producing progeny with 75% of their collective EPDs in the Top 35% ranking) who generates profits for our customers, whether they sell pound calves or sell into premium grids. This means developing a breeding program to emphasize balanced EPDs across Economically Relevant Traits (ERTs) of calving ease, growth, maternal superiority and dynamic carcass qualities. We want to achieve these goals while providing superior service to you, our customers and potential customers. We simply guarantee 100% satisfaction with your purchase or your money back.

### MUD CREEK REDS LLC

is a family-owned and operated cattle farm located in northwest Iowa. The Schreurs family started this Registered Red Angus herd in 2008 with the purchase of the Split Rock Red Angus herd out of Garretson, SD. With the goal of continuously trying to improve our genetics, we have been AI breeding over 75% of the herd each year. Our breeding plan focuses on calving ease, high growth rates, maternal traits, and carcass quality. We are focused on producing structurally sound females with a good disposition, and have a strict culling program. Our cows graze on our pastures in the summer with no pampering and graze cornstalk residue in the winter.

We appreciate you taking the time to look through the catalog and study the animals that we are offering on this sale. If you have any questions about any of the bulls or heifers, please feel free to give Bill a call at (712) 470-2992.

**SPREUTELS FARM** at Koshkonong, MO is located just off Rt. 63 in the Ozarks area. Cattle are all home-raised, registered, and commercial Red Angus since 1991. We are family owned and operated with 400 cows and private treaty bull and female sales, and we have received 10 Grid Master awards. Since joining forces with **REDstock**® Partners, Spreutels has been using many of the bulls provided by Scott Bachman. We see this as an opportunity to further increase the EPD ratings in our herd.

In the #1 slot is a great LSF SRR TYSON 3025A son you'll want to examine closely. Bachman Cattle Farms is proud to be part of the private partnership in the ownership of TYSON 3025A, the \$105,000 stud out of the Ludvigson-Strawberry Ridge program. The TYSON 3025A side of his pedigree is attracting national attention based on an extremely high performing bull-stud with exceptional muscular and stylish looks backed up with an exceptional set of EPDs. In his maternal side of the pedigree you'll find BIEBER REAL MCCOY Y124, a Bachman owned bull stud marketed by Accelerated Genetics. This bull's dam (BACH F39A) brings out a 109.6 MPPA so you can tell the influence of REAL MCCOY has had on this bull's dam. BACH F010C's 77 lb. birthweight to 717 lb. weaning weight spread is fantastic. He went on to record a 1237 lb. Adjusted Yearling Weight, or a 4.50 lb./day of gain. This bull will add a tremendous set of capabilities to your program.

The first bull we purchased from the Bieber program was BIEBER PACKER X375. This young bull met his early death at our farm, but we were able to salvage 170 units of semen on him and we've been using that in our IVF-ET program. Lot 1 from last year's sale was a X375 son and our BACHMAN COMMANDER ET12A is a X375 son. This son, BACH F023C has great balance, is squarely made, thick and very masculine. Matched with his appealing physical and smooth walking capacities are top-end EPD's in which 75% are in the top 35% of the breed. He had a very respectable gain of 3.14 lbs./day in his gain test, while posting a -1.15 RFI.

BIEBER PACKER X375 Sire of Lot 6.

Long as a freight train with good rib shape and volume describes this bull accurately. Then we get to tell you about his great performance during his test phase. His Off-Test weight of 1345 lbs. tells part of the story how this bull gained 5.21 lbs./day! He did that while consuming 5.21 lbs. of dry matter for each pound gained - wow, take a double look at that performance! This is consistent with what we are seeing out of BACHMAN COMMANDER ET12A. He qualifies for the Top Dollar Angus® program.

Here's an opportunity to own a product of our ET program: the proven calving ease of LSF PROSPECT 2035Z mated with a fantastic donor cow, BROWN MS P707 Y7697. She is one of four BROWN donor cows we picked up at the BROWN dispersal sale. This is the first bull in the sale that qualifies as a heifer bull in the Missouri Show-Me Select Heifer Replacement program. You'll appreciate the qualities of this bull: calving ease, growth and carcass together in one genetic package. He had a very good gain test with averaging 3.64 lbs./day with a feed conversion ratio of 5.65 lbs. of dry matter intake for each lb. gained while scoring a -1.41 RFI .....don't blink on bidding for this one!

70	712	1189	4.09	11.43	38.1	4.29	5.18	-1.43							

This LSF TYSON 3025A son has good width with a thick soft sided shape. His respectable EPD set is balanced with a very good 70 lb. to 712 lb. growth spread through weaning. He went on to impress us with a 4.61 lb./day of gain through the development test and clocked in with a great 40cm scrotal measurement. Balance all of this with very good efficiency at converting 5.18 lbs. of dry matter for each pound of gain and coming out with a -1.48 Residual Feed Intake (RFI) measurement.

# RETURN ON INVESTMENT

Red Angus genetics will improve your return on investment!

"For 10 to 15 years all the buyers ever talked about was black calves, and the black calves always brought more than everything else. Now I can honestly say that good Red Angus calves outsell the black calves and I know the Red Angus bred heifers will outsell black Angus bred heifers of equal quality every day."

— Jim Davis, Superior Livestock Auction

Independent research shows Red Angus-sired calves sold for a higher price than all other breed groups. Red Angus bulls make a positive difference in your breeding program's bottom line.

## Yearling Bulls

This lead off bull from this outstanding group of yearlings may be the best bull we have raised. D611 is one of the first sons of H2R ProfitBuilder B403 to sell. ProfitBuilder is on track to be one of the most significant Red Angus sires today. ProfitBuilder's calves are deep bodied and structurally correct, they are born easy and grow fast, and they are super easy to work with. D611 carries these same traits. D611 is muscular and thick in a stylish and balanced package. On top of that he carries a strong EPD profile from birth to growth, and carcass to maternal traits. D611's dam has been one of our best donor cows for consistently producing top marbling, excellent uddered, excellent feet, great dispositioned, and feed efficient offspring. We have 7 active daughters and 11 active granddaughters in our herd. As you can tell we love this cow, and are super excited about the great possibilities of this bull. Be one of the first to own a ProfitBuilder son!

H2R PROFITBUILDER B403 Sire of Lot 23, 24.

EEC PROFITBUILDER D619 Sells as Lot 24.

One of three ET brothers, D619, D633, and D614. All stout sons of H2R ProfitBuilder B403. We were first drawn to ProfitBuilder for his outstanding EPD's, but when we saw how structurally correct he was we knew we had to get his genetics into our herd. He has continued to impress us with his performance at Genex through both his disposition and high fertility. The dam of these 3 bulls, SRN Tyra 7155, always makes a stylish calf, and her three ET sons on this sale are guaranteed to catch your eye. They are stout made, with great quarters, and lots of rib and depth. It's hard to know which one to start with, but D619 was Joe's favorite early on. By the way 7155 is the Dam of LCOC Deniro A090X, a proven feed efficient, calving ease, and structurally correct sire. These sons will be easy on your heifers, while adding style, structure, and efficiency to your herd.

This phenotypically correct bull has great length and width. He is muscular and square made. Plus, he is a BIG outcross! In an effort to expand our Red Angus genetics we added Black Angus into our herd. After lots of studying, we chose KCF Bennett Absolute as a sire. We are overwhelmed with the results, and hope you will like them too! D640's dam is out of Leachman Deniro A090X one of the top feed efficient Red Angus sires ever tested. This bull, D640, is loaded with proven feed efficient sires; from Absolute to Heritage W027, and Deniro to High Noon A093R. This "no holes" EPD bull will do great things for your herd on every level!

Impressive bull out of a first calf Boxed Beef daughter. Expect plenty of growth from his calves, and pounds to sell at the sale barn! In 2015 we had an opportunity to co-own H2R ProfitBuilder B403. With our 2015 sire lineup already in place we were only able to use him moderately. As we all know, not all great looking bulls, with great EPD bulls produce great progeny. That said, with ProfitBuilder's first calf crop on the ground we were impressed and used him heavily in 2016. D632 is just one example of why we will use ProfitBuilder again in 2017.

An outcross bull, grandson of Hoover Dam, one of the most popular sires at ABS known for his style, disposition, and maternal traits. D616 has been one of our most curious, and quietest bull calves. His dam is a Heritage W027 daughter with great udder and teats. A good "no holes" bull that will be easy on your cows and produce great replacement females for your herd.

Coming out of the BIEBER ROOSEVELT W384 sire line, this bull expresses good balance, is stylish and just plain solid. All of our bulls will exhibit good personalities, but the Roosevelt progeny are extremely docile and easy to handle. This bull's sire, BACH MR COMINATOR 79Z is the spitting image of Roosevelt 384 and is very gentle, yet a vigorous breeder. We love the daughters he makes and keep as many as we can afford in our herd as replacements. Track his 4.11 lbs./day of gain along with qualifying for the Top Dollar Angus® program. I'd recommend he'd work best on more mature cows due to his heavier birth weight.

BACHMAN DOMINATOR 79Z Sire of Lot 43.

Here's another BACH MR DOMINATOR 79Z son coming out of that BIEBER ROOSEVELT W384 sire line. This bull brings good balance combined with stoutness and power. He has a really good hip and overall bone structure. He's solid across his EPD base and has a respectable 3.84 lbs./day of gain so far into the test. He qualifies for the Top Dollar Angus® program and comes from one of our top donor cow family lines: JEFFRIES MS CHINOOK Y929. We sold a 1/2 genetic interest in this donor cow recently for \$15,000 to James Ranch in Oklahoma.

Here's one of those "in-betweeners".....not really a fall born or a spring born bull. We decided to put him with the spring group so he's 60+ days older than the average yearling from Bachman Cattle Farms. Regardless that he's older than the other spring bulls, he has great rib shape and volume and exhibits a substantial length of body. This is a power-oriented bull with a larger frame. He weighed 1300 lbs. at his November 1 mid-point test or gaining a healthy 3.39 lbs./day. Qualifies for the Top Dollar Angus® program.

Brown Solid Rock Z7245 brought a multitude of beneficial traits: growth, marbling, great feet, and good disposition. This light birthweight son will carry those traits into your herd!

# Red Angus Guide to EPDs

**HB** ..... HerdBuilder Index – Need bulls for developing a profitable cowherd and maximizing the value of marketed progeny? Select a bull with a high HB value.

**GM** ..... GridMaster Index – If you market all of your calf crop and want to increase the value of that calf crop, select a bull with a high GM value to maximize your profit.

**CED** ..... Calving Ease Direct – Breeding Heifers? Select bulls with a high CED to increase the probability that the heifers will calve unassisted.

**BW** ..... Birth Weight – Predicts differences in birth weight. BW is included in the CED EPD, so simplify your decisions by selecting bulls based on CED instead of BW.

**WW** ..... Weaning Weight and **YW** ..... Yearling Weight – Predicts differences in weight at weaning and yearling. While selection based on these growth measures can increase your payweight, be cautious what the bull's other EPDs are.

**Milk** ..... Milk – Predicts differences in weaning weight of daughter's progeny due to milk production.

**ME** ..... Maintenance Energy – Selecting bulls with a lower ME EPD will decrease the amount of feed his daughters will require to maintain body weight.

**HPG** ..... Heifer Pregnancy – Retaining heifers? Select bulls with a high HPG to increase the percentage of exposures that result in a calving observation.

**CEM** .... Calving Ease Maternal – Another number to pay attention to if you are retaining heifers. Selecting bulls with a high CEM will increase the probability of those daughters calving unassisted.

**STAY** .... Stayability – The most important trait if your goal is developing cows that stay productive, thus increasing your profitability. Bulls that have a high Stay EPD are expected to sire daughters that remain productive in the herd until at least 6 years of age.

**MARB** .. Marbling Score – Select bulls with high MARB EPD to increase the number of progeny that grade Choice or Prime.

**YG** ..... Yield Grade – Marketing calves on a grid? Placing selection pressure on YG EPD will decrease the number of YG discounts on grid-marketed progeny.

**CW** ..... Carcass Weight – Selecting bulls with a high CW EPD will increase the weight of the hanging carcass, which directly impacts revenue.

**REA** ..... Rib Eye Area – Need to add muscle? Select bulls with a high REA EPD to increase rib eye area, which favorably increases Yield Grade.

**FAT** ..... Backfat – Need to reduce waste in carcasses? Select bulls with a low FAT EPD to reduce backfat, which favorably increases Yield Grade.

**Ranch Tested. Rancher Trusted.**

## Red Angus

This calf is a bit young, but be sure to take a good look at him. He has great rib, volume, and depth. D650 has been able to keep pace with his contemporaries, and will produce calves that can put on pounds. He'll be a great addition to your operation!

A Category 3-75% Red Angus bull with good balance, style and masculinity. He's got a nice square hip with plenty of muscle which is consistent being a BIEBER TAKEOVER Z206 son. Given that he's a 75% pedigreed bull, having 56% of his EPDs in the top 35% of the breeding is a testament to how powerful his sire's EPDs are. Qualifies as a Missouri Show-Me Select® Heifer Replacement bull.

BACH MR TAKEOVER S059D Sells as Lot 58.

We combined the power and moderate frame of BIEBER TAKEOVER Z206 and bred him to a ESTONIA cow coming out of the Green Mountain program. This bull has good rib depth and great length. We expect him to lose his slight lankiness and angularity as he ages toward a two-year old. He carries a very balanced set of EPDs and gained a respectful 3.84 lbs./day during his test. His genetics allow him to qualify for both the Missouri Show-Me Select® and the Top Dollar Angus® programs.

## TOP DOLLAR ANGUS®

Now adding value to both Angus and Red Angus feeder calves

Capture premiums by giving your calves the name recognition they deserve!

### Should you consider Top Dollar Angus certification for your calves? Absolutely – YES!

If you've consistently invested in high-performing Angus or Red Angus genetics, we can make your calf crop stand out from the pack, and give you access to the Top Dollar Angus premium calf-buyer network, regardless of how you market your cattle (local auction, video, or direct trade). Our goal is to bring more demand to your doorstep.

The beef cattle business offers both challenges and opportunities, and lower feeder calf prices underscore the need to capture value-added premiums. Every cow-calf producer with high-end genetics and a solid health program wants to sell their cattle above the average market price, which is exactly why Top Dollar Angus was created.

Top Dollar Angus is a genetic certification and marketing company focused exclusively on the best Angus and Red Angus-influenced feeder calves in the industry. Qualified calves must contain at least two generations of Angus or Red Angus genetics with growth and carcass traits ranking in the top 25% of their respective breed.

**Red Angus sires that have a GridMaster Index in the top 25% of the breed or higher meet Top Dollar Angus specifications. Look for the Top Dollar Angus designation on qualifying lots in Seedstock Partners' sale catalogs!**

This new program is similar to Certified Angus Beef®, except that Top Dollar Angus does its "branding" in the feeder cattle and calf market. It works by certifying calf crops that meet program requirements on the farm or ranch, enabling these cattle to be marketed using the Top Dollar Angus brand name and logo. Top Dollar Angus feeder calves are eligible to receive a \$50 per head premium (sometimes more) over the average market when sold to partner

feedyards. One group of Top Dollar Angus steers sold recently via video auction for \$67 per head above the average market for their weight and location. Another group was forward-sold for a \$52 per head premium. Yet another single load of Montana steer calves beat the market by \$57 per head.

Why are so many profit-minded cattle feeders interested in purchasing Top Dollar Angus calves and yearlings? It's because these cattle perform very well both in the feedyard and on value-based grids. Top Dollar Angus cattle consistently deliver rapid growth and high quality grades. That puts extra dollars in cattle feeders' pockets, which are passed back to cow-calf producers in the form of premium prices.

We start this section of bred heifers from the Spreutels. Wilbur, Elsie and their two boys have been breeding Red Angus in Southern Missouri for 25+ years with a great reputation for focusing on the overall carcass quality of their animals. They have been awarded the coveted Red Angus Gridmaster award nine times, firmly establishing they know how to raise and feed cattle for the ultimate dinner plate experience. We kick off with a purebred heifer AI bred to a fantastic new bull in our battery, BROWN BLW STATISTICIAN B5240.

Here is the first of four BACH MR DOMINATOR BCF79Z daughters from different dams. This would be a nice package of four 1/2 sisters coming out of a great female maker. DOMINATOR BCF79Z is a son of BIEBER ROOSEVELT W384 shoo is well known for making beautiful replacement females. These heifers have been developed using the Missouri Show-Me Select Replacement Heifer program protocols. They all have been pelvic measured, reproductive tract scored and vaccinated in accordance to the development program.

SELLS OPEN.

Here's one of the first BIEBER FEDEERATION B544 daughter being sold out on the market. We believe you will really like her balance, depth and will be blessed with the same good feet and bones that B544 has. We sold a 1/3 interest in B544 recently for \$25,000, setting a new valuation on him at \$75,000. While the sire side of the pedigree is solid, look at the maternal side of this pedigree. She is carrying the genetics from Jeffries MS Chinook Y929 who we just recently sold a 1/2 genetic interest stake for \$15,000, valuing the door cow now at \$30,000. Don't overlook the power behind these FEDERATION daughters!

Here is the last chance to add a Rollin Deep daughter to your herd! She has a nicely balanced EPD and should go out and make a great cow for someone. The Rollin Deep line is known for making great females and all three of these should fit the bill. We love the way they are put together and the style he stamps his progeny with!!

# BULL MORTALITY *and* LOSS OF USE INSURANCE

## Insurance Coverage Underwritten By:

Aegis Security Insurance Company  
PO Box 3153, Harrisburg, PA 17105-3153  
**A.M. Best Rating: A VI**

### Option 1: Bull Mortality and Loss of Use Coverage

**Values:** Bulls valued up to \$25,000, not to exceed purchase price.

**Term:** One Year Policy Term

**Premium:** 12% of the Purchase Price  
Premium Fully Earned  
\$150 Minimum Premium Per Animal

**Testing:** All bulls must be tested, certified and listed in the official catalog of a herd sale.

*Please see the reverse side for further coverage information.*

#### Full Mortality:

**100%** of the value of the bull in the event of death or life-threatening injury.

#### Loss of Use:

**80%** of the value of the bull, less salvage value, of in the event of Loss of Use from an accident, illness, or disease that can clearly be diagnosed or identified to have occurred on a specified date.

**25%** of the value of the bull in the event of Loss of Use from an accident, illness, or disease if there is a diagnosis consistent with an accident, illness, or disease but no real evidence that provides clear diagnosis or identification.

### Option 2: Bull Mortality Coverage

**Values:** Bulls valued up to \$25,000, not to exceed purchase price.

**Term:** Renewable One-Year Policy Term for Bulls 6 Month - 7 Years of age.

**Premium:** 5.5% of the Purchase Price  
Premium Fully Earned  
\$150 Minimum Premium Per Animal

**Testing:** Veterinarian examination and signed statement of health required for all bulls for which coverage is requested.

#### Full Mortality:

**100%** of the value of the bull in the event of death or life-threatening injury.
