

You are not just buying a bull, you are buying a program

38TH ANNUAL PRODUCTION SALE

SUNDAY • 1 PM (MST)

January 26, 2020

AT THE RANCH

Fellow Cattle Men and Women,

Welcome to our 38th year of selling registered cattle! We want to thank you for showing interest in our program. Let's just say goodbye to the year of 2019 and hope 2020 is the beginning of prosperity and fewer challenges with our farming and ranching operations. With the moisture from this past fall, the grass promises to be bountiful this coming spring and summer.

The summer and fall weather challenged us with a major hailstorm in July and an abundance of moisture in the fall, leaving our pens deep in mud and concerning us with thoughts of how to wean our calves. A new pen was in order and built in the home pasture on top of a hill where we weaned. It proved a good solution and finally, now that the ground has frozen, we're using our normal pens. With this all said, the calves may still be a little green come sale day. They were weaned late and didn't get started on their rations until mid-November.

Even though, we feel the offering runs deep from the top to bottom with more top herd bull prospects than ever. As you page through the sale book, you will notice we have been fortunate to attend some dispersion sales and were able to tap into some new genetics as proven by their calves. I think we did a good job and think you may really like what you see.

The heifer calves are some of the best by our herd sire, Mohnen Impressive 755. They will go out and work in any program and make an impact.

We want to remind you that customer service is one of our top priorities. If you ever have a problem, don't hesitate to call, so we can make it right.

Please join us for Cowboy Church at 11:00 A.M. on sale day followed by lunch and the sale starting at 1 P.M.

Available through DV Auction.
Advance registration required.

SUNDAY, JANUARY 26, 2020
at 1 P.M. sale

6449 100th Ave SW
Regent, ND 58650

Join us at 11 A.M. for
Cowboy Church & Noon for lunch

Videos will be available with our
sale book on www.angus.org

Livestock Representatives:

Rod Geppart, American Angus Association..... 605-295-3673
Tony Heins, Cattle Business Weekly 701-400-4435
Scott Dirk, Tri-State Livestock News 605-380-6024
Will Bollum, Western Ag Reporter 507-244-0833

Auctioneer: Dustin Carter 712-898-9972

Terms and Conditions: Cash. All cattle are to be settled for sale day unless prior arrangements have been made.

Retained Interest: Classic Angus Ranch is retaining a 1/3 semen interest in all bulls sold. The purchaser of the bull will have possession of the bull and all salvage value rights. In the event of any semen sales from the bull, then Classic Angus Ranch is retaining 1/3 interest in the gross revenue from all semen sales. Classic Angus Ranch retains the semen interest if the bull is sold to subsequent purchasers. Classic Angus also reserves the right to collect semen from the bull at the buyer's convenience and our expense. This retained semen interest extends to any clone of the bull.

Supplemental Information: A supplemental sheet will be available sale day with scrotal measurements and adjusted 365-day weights. Announcements from the auction block take precedence over sale book information.

Cowboy Church & Lunch: Church service with Timothy Steun and complimentary lunch will be served by Classic Angus Ranch in the heated sale barn before the sale.

Liability: All persons attending this sale do so at their own risk, legal or otherwise for their safety or the behavior of the animals. The owners, auction service or sale staff assume no liability for property loss or any accidents that may occur.

Feed and Wintering: Wintering cost for bulls purchased for less than \$5,000 is \$300 per bull in addition to the bid price. **Bulls purchased for \$5,000 or more fed free.** This provides our buyers with the feeding of their bulls a good growing ration until delivery in the first week of May to keep them sound and ready to breed. Also included in the wintering cost is a fertility check and a monthly email update if email address is provided.

Delivery: Classic Angus offers free delivery with all bulls purchased in North Dakota and neighboring states within 300 miles. Deliveries over 300 miles will be taken to a central point at cost. The central point for deliveries will include auction barns, vet clinics and ranches. Prior to delivery, we will be in contact with you to establish a central delivery point.

Repeat Buyer & Referral Discount: Classic Angus values its customers and appreciates their continued business year after year. To show our appreciation to our repeat buyer customers, we offer a \$50 discount per bull to our repeat customers on their bull purchases during our production sale.

First Year Breeding Guarantee: Breeding season is defined as the 60-day period following the first turnout of the bulls. All bulls selling for \$3,000 or more will be given 50% of the value of the injured bull, minus \$1,000 for salvage value, in a future sale or toward a replacement bull if one is available. All injured bulls must be diagnosed by a veterinarian. Please notify us as soon as possible should injury occur and prior to the injured bull being sold for salvage. All claims must be made by September 1, 2020.

ANGUS MEDIA Visit the Angus Journal® Web site, www.angus.org, and view this sale book online. QLC Aviator purchased as the top-selling bull in the Quirk 2017 sale in Nebraska. Wanting to add the Musgrave Aviator pedigree into our herd, we feel that he was the bull that would best fit our program. He is an extra-long bodied calving-ease bull with a deep hip and big butt. His sons are very attractive with long bodies and extra thickness. We are anxiously waiting for his daughters to come into production. They have the look of future brood cows.

TEX Playbook calves have risen to the top of calf crops across the country. They are quiet-tempered, deep-bodied, structurally correct cattle with exceptional eye-appeal and performance. Playbook is stout, smooth and big-middled with lots of base width and muscle expression. Easy to view and easy to use. A breed leader for \$Weaning, Docility and Milk. A proven low birth weight, calving-ease sire who does not sacrifice body dimension or growth.

Frosty Elba 3745, dam of Lots 1 and 2, was the top selling elite bred heifer in the 2017 Schiefelbein Angus Sale in Minnesota selling to Dave Askdal and Bob Carlson Classic Angus. She now walks the pastures in Regent, North Dakota. As visitors come to look at our herd, they are in awe seeing her. Her full brother sold to Genex for \$100,000 (Schiefelbein iBull 3415). Her sons have sold for \$125,000, the great Schiefelbein Showman 338. She is also the dam of the 2018 Schiefelbein Sale lead off bulls that averaged \$16,000 with a top of \$23,000. She is the dam of top selling bulls at Carlson Classic Angus in the 2019 sale. Her maternal dam, Frosty Upward 1100, is one of the most productive donors at Schiefelbein's having produced over \$300,000 in progeny. Frosty Elba's first daughters will calve this spring with great anticipation. She records a weaning ratio of 108 on her natural calves.

\$125,000 Schiefelbein Showman 338 -
A son of Frosty Elba 3745.

\$25,000 Schiefelbein Super Bull 37 -

Every year we look to mate a great cow to create the best son to date. With that mating could be the best bull to ever sell by Bob Carlson. Named after Dave Askdal of Minnesota, we feel he is quite worthy of the unique name. He is extremely long bodied with a very long hip. He has a thick straight top and lots of rib with extra muscle and very clean front. He is a very sound, good footed bull and has the disposition of a kitten. He sells along with his full brother, Lot 2 in this sale.

As we compare these two full brothers, some say 918 may be better than Admiral Dave although he is three months younger. Combining the long body and thickness along with the extra rib and thick straight top. Standing on sound feet, he is also a can't-miss herd bull prospect.

+6	+1.5	+52	+92	+27	N/A	N/A	N/A	+55	N/A

A really good Aviator out of a Windbreak heifer which are some of the best mothers we've ever had. They are very gentle, good milking cows. Being a twin to a heifer, both were raised by their mother. She weaned off almost 1,400 lbs. of calves. That is efficiency! Top 30% of the breed for Milk and top 35% BW.

This calf is a stud. We can't take every bull's photo, but he is one of the best. He has extra length, a hind quarter that goes way down, a big strong hip and a wide top with clean front. He is wide based and sound on his feet. His cow family is anchored by the great Cincha 15613, one of the best cows we have ever owned. 904 ranks in the top 10% of the breed for WW, top 15% CED and YW and top 20% BW. His balanced EPDs ranking in the top 20% or better make him a "can't miss" bull.

The natural son of Lady 9100. We bred her to calve in the fall after flushing her planning to get back in sync to flush early the following year. 875 has a super low BW of 67 lbs. making him a true heifer bull. Because of his age, he fell out of the weaning weight age group so there is no 205-day weight. His dam is one of the most productive donor cows we have ever had. She is massive and deep bodied with a remarkable rear quarter and loads of eye appeal. 875 ranks in the top 4% CED, top 10% BW and top 35% WW.

Possibly the most influential bull to grace our herd. Purchased in 2018 from Born's Angus dispersion in eastern South Dakota, his daughters were the most highly desired females in that sale averaging over \$5,000 along with two sons selling for over \$11,000.

755 is the calving ease, high growth bull we expected. He adds the muscle expression, extra rib and a gentle disposition to his calves. We are offering six of his best daughters and a very powerful group of his sons. Contact us for semen on 755. He ranks in the top 15% for CED and \$W, top 20% WW, \$M, Marb, top 25% DMI, Doc, \$G and \$B and top 30% BW, YW, RADG, HP and \$F.

Looking to put some extra bone and red meat into your calves? Take a long hard look at this bull. He stems from one of our matriarch old Forever Lady cows that has stood the test of time. She will be 13 years old. His EPDs won't knock your socks off, but he is a bull that will hold up and have longevity.

Here are old genetics from an embryo we put in that was made back in 2007. Sired by the very popular B/R New Frontier, the bull that everyone wanted for his genetics. Full brothers were top selling bulls in our 2008-2010 sales, selling into registered and commercial herds. His dam, Forever Lady 9209, makes him a can't-miss bull. She was my best donor cow ever produced and what an impact she had on our herd.

SAF Forever Lady 9209 - Dam of Lot 43.

Really high maternal son of Cowboy Up, with loads of performance behind him. The Cowboy Up bulls were a very hot item in 2019. The dam of this bull is a very long bodied, heavy muscled, heavy milking cow. Ranks top 15% of breed for WW, top 20% YW, top 1% Scrotal. We used this bull last year with old aged cows. Every cow bred early, expecting great results.

Here is a herd bull for commercial or registered herds. This is one massive animal, that is big butted, full of red meat and a tremendous rib to him. Plus, the length of body is something else. His donor dam by Resource is one of the greatest cows to roam our pastures. She is a sight to behold—massive and thick with a long body and deep quarter and yet a disposition that is gentle as a kitten. The fellow we used on all of our later calving cows. I can't wait to see his progeny. He ranks top 3% for WW, top 1% YW, top 25% Docility, 40% Milk.

A very young daughter of Impressive 755, but she is good and has the size to fit with her older counterparts. Her dam is quite possibly the best In Focus cow we have. She records a progeny weaning ratio of 107 on her calves.

Classic Momentum 803

63

Selling 19 bred heifers from Dale Jung, New England, ND. 17 heifers are black, and 2 heifers are baldy. This is a special group of bred heifers, coming from one of the top commercial herds in SW North Dakota. Dale has purchased bulls from us for over 20 years, thus his bloodlines follow closely with the bloodlines of our herd. Some of the sires used most recently that would appear in their pedigrees are Yukon, Cisco Kid and Resource, making them highly maternal and easy fleshing.

They are on a very complete vaccination program. They have received one shot of Cattle Master 5, 7-way with Somus and poured in the spring and again this past fall. They received a shot of Preg Guard 10 last spring. They were pregnancy checked Nov. 18, 2019 by Dr. Rowe and bred to calf starting April 1, 2020 for 55 days to Classic Momentum 803 - the top calving-ease bull in our 2019 sale.

SELECTION TOOLS

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

GROWTH

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight EPD (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Docility (DOC), is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire's calves.

MATERNAL

Maternal Milk EPD (Milk), is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

CARCASS

Marbling EPD (Marb), expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area EPD (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

\$VALUE INDEXES

\$Value indexes, are multi-trait selection indexes to assist beef producers by adding simplicity to genetic selection decisions. \$Values are reported in dollars per head, where a higher value is more favorable. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment.

Weaned Calf Value (\$W), an index value expressed in dollars per head, is the expected average difference in future progeny performance for pre-weaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.

Beef Value (\$B), an index value expressed in dollars per head, is the expected average difference in future progeny performance for post-weaning and carcass value compared to progeny of other sires.

BUY BULLS ON TARGET

Genetic Recommendations:

	Value
Marbling EPD (Marb)	+ 0.54
Dollar Grid Carcass Index (\$G)	+ 46.0

The Targeting the Brand logo is designed to highlight registered Angus bulls with greater genetic potential to produce calves meeting the most challenging specifications of the Certified Angus Beef® brand. Bulls must be at least breed average or better for marbling EPD and \$ Grid of non-parent Angus sires to qualify for use of the Targeting the Brand logo. Even when these numbers do not appear on the catalog listing, the logo gives you confidence that these minimum genetic requirements are met. Actual EPD requirements are outlined below based on the breed averages from the Fall 2019 Angus Sire Summary.

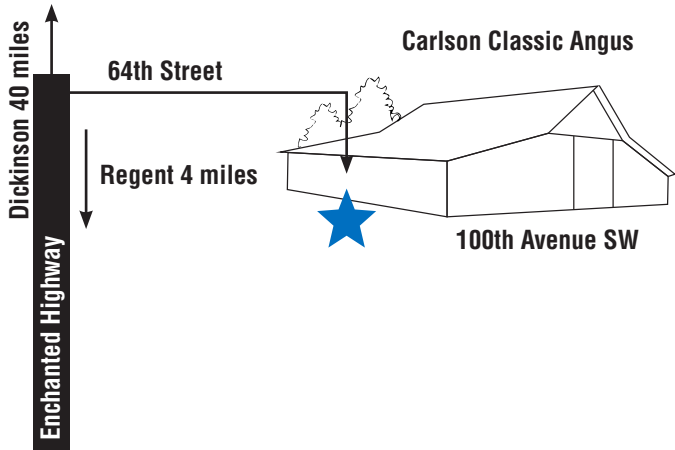

LOOK FOR THE LOGO!

To learn more about how commercial cattlemen can further utilize the Targeting the Brand logo in marketing genetically superior feeder cattle, visit www.AngusLink.com
