Annual Production Sale

MARCH 12, 2017

2 p.m. At the Ranch
Mandan, ND

250 Head 150 Yearling Angus Bulls
25 Two-Year-Old Bulls
45 Open Heifers
31 Bred Heifers and Cows

Welcome!

Hello and welcome to the 6th Annual Hatzenbuhler's Diamond J Angus Production Sale! This will be the second sale at the ranch in our sale facility. This year we will be running the cattle through our sale ring. The mothers and sister mates are here for your inspection and the day ins and outs of how we raise and care for our herd are all here for your observation.

We are thankful for your support the last several years and with our partnership with Alta Genetics, we are striving to improve our genetics with added performance, function and quality. Progeny from top selling bulls raised by some of the most successful ranches in the country will be offered for sale on March 12th. These sires include Hoover No Doubt, the \$67,500 top-selling bull from the Hoover Angus Farm's 2015 sale; KCF Bennett The Rock A473, the \$39,000 top-selling bull from the Knoll Crest Farm's 2014 sale; SAV Real Performance 4876, the \$100,000 and sixth top selling bull from the 2015 Schaff Angus Valley sale; Ellingson Enterprise 3190 and Ellingson Reputation 3023 the co third top-selling bulls from the 2014 Ellingson Angus Sale; and SAV Influence 4043, the \$37,500 sale highlight from the 2015 Schaff Angus Valley Sale. Other top selling sires with progeny for sale on March 12th are Ellingson Golden Era 2279 from the 2013 Ellingson Angus sale, Connealy Skipper from the 2015 Connealy Angus Sale, Hoover Explorer from the 2015 Hoover Angus Sale, Pyramid Law Dog 3424 from the 2014 Pyramid Angus sale and SAV Rangemaster 2874 from the 2013 Schaff Angus Valley sale.

With the exception of two coming two-year-old bulls, all bulls, heifers, bred heifers and a majority of the bred cows were raised at the Diamond J. Our family-run operation strives to produce athletic bulls at a rate of 4.00 lbs gain per day. We use a ration of hay, silage, corn and distillers. The females receive the same ration at half rate for a goal of 1.75 lbs gain per day.

We are also offering May/June calving mixed-aged cows and a set of fall calving cows, calving August and September. This sale offers something for everyone be it large framed or more moderate, yearlings, or older sires, open sister mates to the bulls and bred females. We look forward to visiting with you on sale day!

Join us at the Ranch for our Annual Production Sale!

From Mandan, N.D., head West on I-94. Turn North at Exit 140 and then West at 36th Street.

Sale Day Phone:

Stephanie Hatzenbuhler (701) 391-1626
John Hatzenbuhler (701) 391-5616

Herdsmen:

John Ross Hatzenbuhler (701) 425-7813

Auctioneer:

Seth Weishaar (605) 210-1124

Sale Representatives:

Rod Geppert, American Angus Association (605) 295-3673
Kirby Goettsch, Farm & Ranch Guide (605) 380-3939
Kris Peterson, Cattle Business Weekly (701) 377-2345
Rowdy Benson, Tri-State Livestock News (605) 569-1493
Marc Hotchkiss, Livestock Link (605) 490-1513
Justin Dikoff, DVAuction (605) 290-0635
Buyers unable to attend the sale may send their bids to the ranch, filed representatives or auctioneer. The sale will also be available on www.DVAuction.com. Go to www.DVAuction.com for more information.

Cattle viewing: Videos of the sale cattle can be viewed online at www.thelivestocklink.com and www.DVAuction.com. Cattle are available for inspection at any time at Diamond J Angus Ranch. The cattle offered in the sale will be penned the evening of March 10.

Sale Location: Diamond J Angus Ranch, Mandan, N.D., is located off of Interstate 94, exit 140, north two miles to 36th Street, one mile west. Sale facility is located in the main yard, south of the two houses.

Terms & Conditions: Cattle sell under the suggested terms and conditions of the American Angus Association (http://www.angus.org/Pub/suggested_sale_terms.pdf). Cattle will not be released until payment is received. A Supplement sheet will be available sale day with complete and up-to-date information. Announcements from the auction block take precedence over sale book information.

Injury or death prior to delivery: Injury resulting in death or death of the bull prior to delivery will not be the responsibility of Diamond J Angus Ranch. This is an insurable risk that the purchaser can obtain.

First Breed-Season Guarantee: Bulls selling are guaranteed for 90 days from turnout against breeding injury. If a replacement is available, he will be provided or if the buyer prefers, credit towards another bull will be given in next year's sales. Credit for the amount of purchase minus \$2,500 will be applied towards the purchase of another bull. The buyer keeps all salvage value. Please notify us as soon as possible should an injury occur and prior to the injured bull being sold for salvage. This is not a mortality insurance policy, nor does it cover mismanagement or neglect. We do not cover injuries sustained prior to breeding season.

Herd Health: Dr. Kirk Johnson will be on hand to write interstate health certificates for those cattle requiring them. All cattle are on a complete vaccination and mineral program. All females are officially calf-hood bang's vaccinated.

Genetic testing on recessives: All lots with genomic-enhanced EPDs are accompanied by the i50K logo. All lots are genetic defect free, unless otherwise noted.

Insurance: To properly insure your investment, Jared Mohen will be available to assist you with mortality insurance.

Dakota AG Insurance
721 West Havens, Mitchell, SD 57301

Office: 605-990-5355
Cell: 605-682-1368

Semen Interest: Diamond J Angus will be retaining 1/3 semen revenue sharing interest in all bulls. Full possession and salvage value belongs to the buyer unless otherwise stated.

Delivery: Free delivery within a 300-mile radius on bulls. Beyond that point at cost. Bulls will have passed a breeding soundness exam prior to delivery. We will begin bull deliveries in late March. Delivery on females is the responsibility of the buyer and must be completed within a week of sale day.

Liability: All persons who attend this sale do so at their own risk and Diamond J Angus Ranch assumes no liability, legal or otherwise, for any accidents which may occur.

- Performance sire
- Above breed average EPDs
- Individual ratio 100
- Dams WR 106, Pathfinder!
- Youngest No Doubt son in the sale. He is very good and comes from a dam with huge credentials, including Pathfinder
- status.
- Dam is a New Dimension back to a Traveler 004 from the Queen Roth cow family. She has three daughters in production along side her.

*EA Main Attraction
0309 (left) and
Diamond J Buzz
2059 (below) are
maternal brothers
to Lot 14.*

- Resource has gained the admiration of cattlemen worldwide as a sire of body mass, efficient conversion and phenotypic power like few sires the breed has ever seen. As impressive as his sons are, Resource's greatest attribute is likely his daughters.
- A foot improver and a sire of tremendous udders and excellent dispositions; Resource offers a perfect mating option for breeders looking to build functional quality and maternal equity into their cow herds.
- Look no further than the great Resource for pounds in the right package and cows that get the job done year in and year out!

SAV Rangemaster 2874

- This massive Diamond J high-performance herd sire was selected as a favorite from a powerful embryo flush highlighted in the 2013 SAV sale, by the \$147,500 Accelerated Genetics sire, SAV 707 Rito 9969.

SAV 707 Rito 9969 • Sire of SAV Rangemaster 2874

- The productive pathfinder dam of this bull is one of the top income-producing cows in the SAV program with a progeny birth ratio of 97 balanced with a progeny weaning ratio of 106 on six natural calves along with a progeny ribeye ratio of 103 on 98 head evaluated by ultrasound and her many other successful progeny are highlighted by the Genex/CRI sire SAV Angus Valley 1867, the ABS Global Sire SAV Brave 8320 and the legendary SAV Blackcap May 4137 who has produced a multitude of top-sellers and herd sires as the all-time top income-producing cow in the SAV program to date.

DIAMOND J SIRE DIRECTORY

SAV Influence 4043

- Influence is by far the most complete, clean and mild mannered International son we have seen. He has impeccable feet and he is early gestation, so Influence has turned more to the calving ease side on birth weight EPD. Influence will be tested on Diamond J heifers in the next breeding season. Influence is easy to breed to. He doesn't take away from any trait, but instead adds performance and style to his progeny with correct structure and feet, big scrotals on the bulls and nice, feminine featured daughters. Influence really stands up to his name. He injects a positive influence to all traits on every bloodline we've bred him to. Owned with Alta Genetics, Canada.

- Big surprises have been produced by Real Performance. His calves came smaller than we expected out of this powerful Resource son. Once they hit the ground, they started growing and haven't quit. Total success for a sire group on both sexes of calves. Performance ratioed 101 for weaning and his oldest calves were from our second AI group with the rest all clean-up. Performance is by far one of the most impressive, complete sires that the Diamond J has acquired. He is so docile, we have considered riding him in the Fourth of July parade!
- He holds the record for heaviest 205 day weight bull at Schaff Angus Valley and was a \$100,000 sale highlight of the 2015 SAV sale. Owned with Alta Genetics, Canada.

SAV Real Performance 4876

DIAMOND J SIRE DIRECTORY

SAV Real Complete 4728

- This promising herd sire prospect was selected along with his \$100,000 flush brother by Diamond J Angus and the Alta Genetics AI Stud from the record-setting 2015 SAV Sale where they were headliners of an impressive embryo flush by the popular and proven Genex/CRI sire, SAV Resource 1441, from a productive donor dam by the Genex/CRI Pathfinder sire, SAV Net Worth 4200.
- This bull combines a modest individual birth ratio of 82 with individual weaning and yearling ratios of 101 and 100, respectively, and an individual IMF ratio of 124, to offer unique EPD balance backed by a solid genetic heritage that combines the best of the herd sire producing Emblynette and Blackcap May families.

SAV Geographic 5318

- SAV Geographic 5318 is a performance powerhouse with tremendous length, thickness, volume and muscle – built right from the ground up with worlds of substance and bone. He earned a 205-day weight of 1027 lbs. for a weaning ratio of 111, ranking him among the five top-indexing bulls of his calfcrop. He records EPDs for weaning and yearling weight in the breed's top 1%. A full sister is working in the SAV embryo program.
- His productive Final Answer dam records a weaning ratio of 109 on 3 calves and should qualify as a Pathfinder.

DIAMOND J SIRE DIRECTORY

SAV Resource 1441, sire of SAV Distinction 5407

- A super complete son of Resource. Distinction has it all; phenotype, performance, breed-leading EPDs and cow family strength. He came off of pasture looking more outstanding than when he went in. Owned with Alta Genetics, Canada.

- One of the deepest and thickest TenX sons to be found. Tenacity is very mild mannered with an EPD profile at the top of the breed. He excels at all traits that drive profit. Owned with Alta Genetics, Canada.

A A R Tenx X 7008 S A, sire of SAV Tenacity 5211.

DIAMOND J SIRE DIRECTORY

Ellingson Golden Era 2279

• I like to call this bull "golden boy." He is the ultimate performance sire with ratios of 101 for weaning and 105 for yearling. Frame, performance and feed conversion are what make Golden Era the "golden boy." He is tall, long and deep with very correct structure and feet. His birth weights have been moderate. Big, growthy calves pay and the ones made right that can convert feed pay even more. His first daughters' calves are making it into the replacement pen, so the performance is passing on. Owned with Alta Genetics, Canada, and Ellingson Angus, North Dakota.

Ellingson Enterprise 3190

*Connealy Earnan 076E
Sire of Ellingson Enterprise 3190*

• Enterprise is one of our most heavily used and successful performance sires. His calves have modest birth weights, very good temperaments, frame and style. Enterprise works on several bloodlines amongst heavy competition from several breed-leading sires. Pounds pay and Enterprise can deliver that formula. His calves are feed converters so when they hit the feedlots, they have lots of growth and from our own ultrasound results, carcass traits are also passed on. Payweight, quality and feed conversion are traits Enterprise excels at. Owned with Alta Genetics, Canada, and Ellingson Angus, North Dakota.

DIAMOND J SIRE DIRECTORY

Ellingson Reputation 3023

Ellingson Identity 9104, Sire of Ellingson Reputation 3023

- Reputation has done an amazing job for the Diamond J. He is capable of breeding cows or heifers. He adds thickness, capacity, improves feet and dispositions. He does moderate a bit, but the result is an easier keeper in an overall more desirable animal. One thing Reputation calves do across the board is gain on feed. They make more use of what's available and convert at a faster rate. His daughters are broody girls and will be some of our most efficient, easy-keeping cows. His sons tend to be moderate, thick, good-footed and easy keeping boys. The definition of Reputation is efficiency! Owned with Alta Genetics, Canada, and Ellingson Angus, North Dakota.

Ellingson Stagecoach 4015

- Stagecoach is turning into a consistent, real world heifer bull. His pedigree and style will compliment across the breed bloodlines and produce live calves out of heifers with a lot of grow. The Diamond J has noticed that the Stagecoach calves have a very distinct, eye catching look to them, being some "beefy, growthy doing ones" that catch the eye no matter what their age is. We want a whole pen full of calves like this out of our heifers. Owned with Alta Genetics, Canada, Carstens Farms, Ltd, Iowa, and Ellingson Angus, North Dakota.

DIAMOND J SIRE DIRECTORY

Ellingson Icon 5062

- This bull is an Icon. His CED combined with his impressive body mass take him to a level other heifer bulls can't come close to matching. Icon is so correct and square with a perfect, small Angus head and as close to perfect feet as you're going to get. We at the Diamond J want our heifers bred to the most complete, powerful, calving ease bull we can find. Icon is our answer. Owned with Alta Genetics, Canada, and Ellingson Angus, North Dakota.

- A different kind of Resource. Regency displays more frame and a greater amount of real power and capacity than most Resource sons. Superior temperament and correct structure make Regency a bull that will last for years. Combine his phenotype with breed leading EPDs and Regency is definitely a Diamond J favorite. Owned with Alta Genetics, Canada and Ellingson Angus, North Dakota.

Ellingson Regency 5030

DIAMOND J SIRE DIRECTORY

- Top Gun is by far the most gentle, easy-going son of Earnan we have met. He is massive in person and is a trait leader for performance. His potential to sire calves with an abundance of payweight is what could be the difference between a non-profitable and profitable season. This reason alone is why the Diamond J pursued Top Gun as a herd sire. Pounds pay and Top Gun will deliver. Owned with Alta Genetics, Canada and Ellingson Angus, North Dakota.

- A calving ease specialist unique from most higher CED bulls being Cyclone has more frame and growth potential than his competition. Cyclone grew so much his first breeding season that he got the Diamond J Angus award for most improved sire over the summer! Cyclone is very correct made nad super clean with amazing feet. Not only is he powerful, but he's just crazy pretty and we admire him for his style. Owned with Alta Genetic, Canada and Hoover Angus, Iowa.

Hoover No Doubt

- No Doubt has really come out shining as a performance leader for the Diamond J. He ratioed 102 at weaning being compared to at least 20 other high performing sires. The competition is huge. No Doubt throws power with clean lines and an Angus style unmatched in the breed. He works on every bloodline we tried and his calves are consistent. There are no misses with this bull, only huge improvements. Owned with Alta Genetics, Canada, Peak Dot Ranch, Canada, and Hoover Angus s, Iowa.

Hoover Leadman

- A real leader in the pasture, Leadman is a power inflicting specialist. His mass is what we all want and need to obtain a successful scale-crushing weaning day. Add that onto his top of the breed EPD profile and your payweights should be amazing. Leadman not only leads on looks and on paper, he is an aggressive breeder, getting the job done with no hesitation and came off of pasture with more mass than when he went in. Leadman will be a go-to power bull for the Diamond J for a long time. Owned with Alta Genetics, Canada, and Hoover Angus, Iowa.

Hoover Explorer

- A sure fire heifer bull that doesn't sacrifice frame or power in his progeny. They are born small and wean off looking more like a calf out of a cow than a heifer. If you need an Angus sire to use on Simmental or Charolais heifers, so not to sacrifice frame but to achieve a live calf with plenty of Payweight. Explorer is about is perfect as there is. Explorer is also a disposition improver and enjoys his daily scratch down. owned with Alta Genetics, Canada and Hoover Angus, Iowa.

Baldrige Forecaster B160

- Forecaster is a bull that does it all to the highest level. He is a calving ease, performance, maternal, carcass and profit trait breed leader. He is the real deal and is a big, soggy bull with a clean profile and small Angus head. He went out to pasture as one of the biggest two year old bulls the Diamond J has laid eyes on and came off looking even better. An easy disposition and a very good set of feet combined with Forecaster's trait-leading abilities make him the perfect sire on paper and in the breeding pen. He is that good. Owned with Alta Genetics, Canada and Baldrige Brothers, Nebraska.

Connealy Skipper

- Skipper is an outcross bull to all of our bloodlines so we bred him to several bloodlines and he is consistent across the board. He threw several lower birth weight calves his first year, so he did perform clean up duties his next year on several heifers. I like to refer to Skipper as solid. I can put solid in front of every trait and apply Skipper's name to it. Other terms that really describe him are "well rounded" and "all around." Skipper does everything with balance all the while not sacrificing a single thing down to his feet and temperament. We need more bulls with such a level of balance as skipper has. Owned with Alta Genetics, Canada, and Connealy Angus, Nebraska.

KR Kash Only

- This bull has stud qualities from front to back. He has style and mass all put together in a way that you can't find anything to "nit pick" on this young bull. Feet quality and temperament are also excellent. When you first meet Kash only you stand in awe and admire such a classy, massive bull. He is an active breeder and doesn't hesitate to get the job done. Now add in his paper resume with EPDs for performance and profit in the top 1% of the breed, and Kash only is a real deal money maker. Owned with Alta Genetics, Canada and Krebs Ranch, Nebraska.

Raven Sweepstake 5135

- A moderate, thick to the core heifer bull. This bull holds condition extremely well and boasts a CED EPD in the top 1% of the breed. Use Sweepstake on a large variety of heifers to improve muscle and performance traits. Owned with Alta Genetics, Canada, and Raven Angus, South Dakota.

Pyramid Law Dog 3424

- Law Dog is a moderate, thick, excellent footed, easy keeping bull. He does throw a bit more frame than what he himself displays. We have used him to add thickness, foot structure and to tone down some cows that are packing a bit too much frame or a nice looking girl that just needs a bit more thickness. If you're looking for a "Resource" styled bull, but need a different bloodline, Law Dog will fill the order. Owned with Alta Genetics, Canada and Yellow Top Angus, North Dakota.

- Payback is a moderate, easy fleshing, feed efficiency master. He displays good feet and temperament. Payback will inject an easy keeper style into his progeny. The gain-ability on this sire is impressive. Owned with Edgar Brothers, South Dakota.

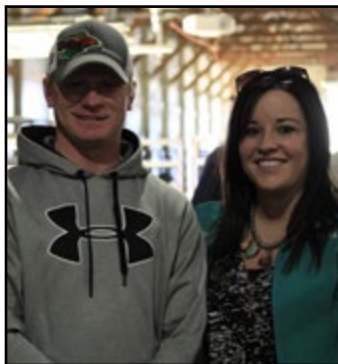

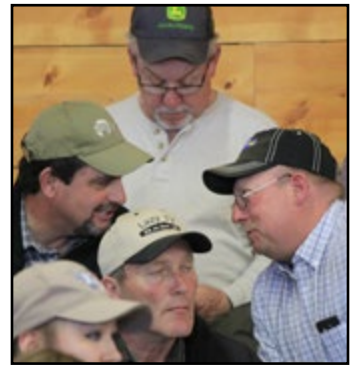

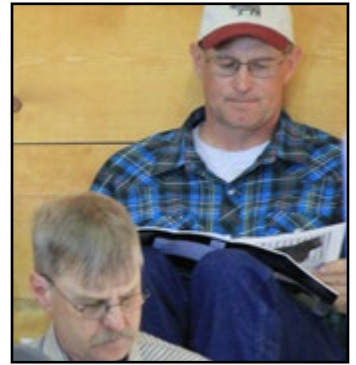

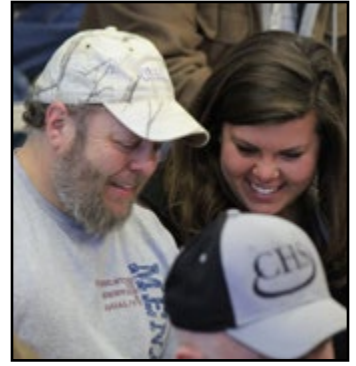

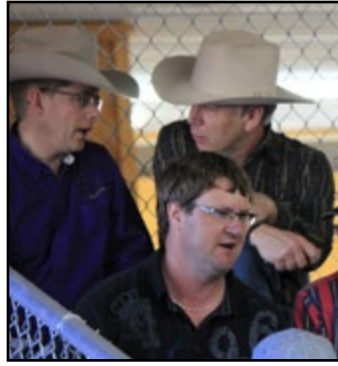

EB Payback L930

Proud to be a multi-generation operation

THE DIAMOND J THEN (1945 AND NOW (2016).

American Angus Association® Selection Tools

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an “I”, and may or may not include the animal’s own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

Accuracy (ACC), is the reliability that can be placed on the EPD. An accuracy of close to 1.0 indicates higher reliability. Accuracy is impacted by the number of progeny and ancestral records included in the analysis.

GROWTH

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire’s calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW), expressed in pounds, is a predictor of a sire’s ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW), expressed in pounds, is a predictor of a sire’s ability to transmit weaning growth to his progeny compared to that of other sires.

Residual Average Daily Gain (RADG), feed efficiency expressed in pounds per day, is a predictor of a sire’s genetic ability for postweaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed.

Yearling Weight EPD (YW), expressed in pounds, is a predictor of a sire’s ability to transmit yearling growth to his progeny compared to that of other sires.

Yearling Height EPD (YH), is a predictor of a sire’s ability to transmit yearling height, expressed in inches, compared to the that of other sires.

Scrotal Circumference EPD (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

Docility (DOC), is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire’s calves.

MATERNAL

Heifer Pregnancy (HP), is a selection tool to increase the probability or chance of a sire’s daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction, and the EPD is reported in percentage units.

Calving Ease Maternal (CEM), is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire’s daughters will calve as first-calf heifers when compared to daughters of other sires.

Maternal Milk EPD (Milk), is a predictor of a sire’s genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf’s weaning weight attributed to milk and mothering ability.

Mature Weight EPD (MW), expressed in pounds, is a predictor of the difference in mature weight of daughters of a sire compared to the daughters of other sires.

Mature Height EPD (MH), expressed in inches, is a predictor of the difference in mature height of a sire’s daughters compared to daughters of other sires.

Cow Energy Value (\$EN), expressed in dollars savings per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals (more dollars saved on feed energy expenses). Components for computing the cow \$EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

CARCASS

The genetic evaluation produces a single set of EPDs for carcass weight, marbling score, Ribeye area and fat thickness. The units of measure are in carcass trait format and analyzed on an age-constant basis.

Carcass Weight EPD (CW), expressed in pounds is a predictor of the differences in hot carcass weight of a sire’s progeny compared to progeny of other sires.

Marbling EPD (Marb), expressed as a fraction of the difference in USDA marbling score of a sire’s progeny compared to progeny of other sires.

Ribeye Area EPD (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire’s progeny compared to progeny of other sires.

Fat Thickness EPD (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire’s progeny compared to progeny of other sires.

\$VALUE INDEXES

\$Value indexes, are multi-trait selection indexes to assist beef producers by adding simplicity to genetic selection decisions. \$Values are reported in dollars per head, where a higher value is more favorable. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment.

Weaned Calf Value (\$W), an index value expressed in dollars per head, is the expected average difference in future progeny performance for pre-weaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.

Feedlot Value (\$F), an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires.

Grid Value (\$G), an index value expressed in dollars per head, is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.

Quality Grade (\$QG) represents the quality grade segment of the economic advantage found in \$G. \$QG is intended for the specialized user wanting to place more emphasis on improving quality grade. The carcass marbling (Marb) EPD, which is influenced by carcass marbling scores and ultrasound percent intramuscular fat (% IMF) measurements, contribute to \$QG.

Yield Grade (\$YG) \$YG represents the yield grade segment of the economic advantage found in \$G. \$YG is intended for the specialized user wanting to place more emphasis on red meat yield. It provides a multi-trait approach to encompass ribeye, fat thickness and weight into an economic value for red meat yield.

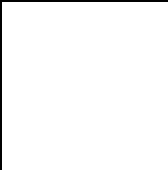

\$G combines both \$QG and \$YG, and may be the best carcass decision tool for focusing on quality and red meat yield simultaneously.

Beef Value (\$B), an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.
