PRIVATE TREATY SALE

Bulls

Balanced Traits, Outcross Genetics and Functional Bulls that have been Bred for Grass Efficiency Thriving despite our harsh Montana arid range conditions

Fellow Cattlemen;

This years offering represents the top 25% of the spring 2016 bull calf crop.

This is a very nice group of bulls; we hope you find some that suit you.

Look to the Schatzee sired bulls to add thickness, muscle and shape while also adding to the maternal aspect. The Braxton sired bulls will excel in calving ease. We have used this bloodline on our heifers, both registered and commercial for years with great results. The 332A bulls are well balanced and have received a lot of attention. Our breeding philosophy is to focus on the female. Our cows are expected to perform: calve and mother without assistance, breed back in a timely manner and wean a good calf. The registered cattle are managed the same as the commercial cows. We don't single trait select, nor do we select for extremes. We select for traits that will compliment one another, while continuously working at keeping our genetics problem free. When offering bulls for sale, our goal is to provide bulls that are sound, functional, balanced, working class bulls; able to perform in most environments. Be sure to check out the individual videos; available on our website by February 1; they can be a very helpful selection tool. Our family is truly blessed to be involved in agriculture and with this great breed of cattle. If we can help, do not hesitate to call.

Mark and Della

Bulls are available for viewing in Townsend anytime with prior arrangements. Videos will be available on our website; www.ehlkeherefords.com by the 1st of February. Bull choices can be made anytime; bulls are held with 20% deposit until semen testing and ultrasound. Balance is then due on delivery. In the unlikely event that your pick does not pass bull soundness exam, your deposit is refunded or can be applied to another bull(s) if you prefer.

FIRST SEASON BREEDING GUARANTEE

All bulls are guaranteed to be able to breed for the first breeding season. Breeding season is defined as the 90 day period following the first time the bull(s) are turned out. If a replacement bull is available, he will be provided, or if a buyer prefers, credit toward a bull will be given in the following year's sale, less salvage value of the injured bull.

Free Delivery within 250 miles. We will work with you on cost effective delivery options for outside of 250 miles.

HEALTH

All bulls will be fertility tested mid March. All bulls receive pre-breeding vaccines of IBR, BVDI & II, PI3, BRSV, Lepto/Vibrio, Multimin, Footrot and Deworm/Delice. Our herd has ftested negatively for BVD PI. The testing is done annually to insure we retain our negative status.

Ehlke Herefords is dedicated to producing the Top Hereford Sires in the industry that balances **Muscle**, **Volume** and **Eye Appeal** with **Performance**, **Carcass Quality** and **EPD** profiles to lead the industry.

To achieve this goal...

We use all available data including, carcass ultrasounds, performance data, EPD's, along with visual appraisals when searching for our next herd sires. It is also very important to us and our program to try and see our potential herd sires dam and maternal grand dam whenever possible as to ensure udder quality that goes generations deep allowing us to know what genetics we are either taking home or breeding and the kind of quality we will be producing for our customers.

Our Hereford Sires progeny have to go out to perform for our commercial and registered customers alike so we strive to to our homework and hard work to provide the best herd sires we can for our customers.

MARB 0.00 | BMI \$10 | CEZ \$11 | BII \$9 | CHB \$16

Current EPDs as of catalog print date

D31 is definitely a herd bull candidate. This Schatzee son is a great combination of muscle expression, thickness and depth of rib; big square hip, structurally very sound. D31 is very sound on his feet. Short marked, heavy pigment. D31s dam and her ½ sisters are all standouts in our herd. Retaining a semen interest on the bull.

2

E Z712 SCHATZEE D18
