

Fawcett's Elm Creek Ranch
ANNUAL PRODUCTION SALE

Monday, February 8th, 2016 • 1 p.m. cst • at the ranch, Ree Heights, South Dakota

Fawcett's Elm Creek Ranch
HEREFORD & ANGUS GENETICS

HEREFORD & ANGUS GENETICS

Selling 387 Head

56 two-year-old Hereford (horned and polled) & Angus bulls

82 yearling Hereford (horned and polled) & Angus bulls

26 registered bred and yearling Hereford females

223 commercial bred and yearling females

Welcome

Welcome to Fawcett's Elm Creek Ranch!

Welcome to the annual production sale here at the ranch and thanks to all of our customers past, present and future. It is very important to us to be able to help you with any questions or concerns that you may have regarding our cattle. We stand behind our cattle and those ranchers that utilize our genetics. Let us know when you are planning to sell your calves out of our bulls and we will help make the connection between seller and buyer to make sure you get the most from your calf crop.

We utilize artificial insemination and embryo transplant extensively here at the ranch to make sure that we try to offer the best genetics in the business. Many things help to determine our mating decisions but most importantly we understand that these decisions not only directly impact our own operation but your operation as well. We do not make single trait decisions, we look at the total package.

Due to climate and the demand of our customers, our calving season is quite long starting towards the end of January and going through May with the bulls that are offered as yearlings calving from January through mid March and the bulls being offered as two-year-olds are from the cow herd starting to calve mid March through May, with some exceptions.

The females that are selling are a nice set of functional cattle. Replacement females, future donors and commercial breeds that are ready to generate a steady income.

It has been a busy year here at the ranch. This summer Kristin married Weston Kusser who both now live on the ranch and Weston has joined the FEER team. Kris is working as a nurse with intentions to further her education.

Ranching isn't just our business, it's our life.

We strive to have cattle with great phenotype, easy fleshing, sound structured, backed by great uddered productive females all while keeping EPD's in check.

Please call with any questions or stop by. Visitors are always welcome!

Thanks for your consideration,

Daniel Fawcett & Family

HERD HEALTH

All sale cattle are in excellent health and have been poured with Ivomec. The coming two-year-old bulls are virgins, have been semen tested and scrotal measured. The bred heifers have had all pre-breeding shots as well as two scour (guardian) shots. They were ultrasounded and have been reexamined to be safe in calf. DeRouchey Vet Clinic, Miller will handle all health requirements on the cattle.

BREEDING GURANTEE

All bulls will be guaranteed through first 60 day breeding season. In the event, an animal fails to breed, a suitable replacement will be made or credit will be given in the next sale. The bred heifers are safe in calf and thus will be considered a breeder at time of sale, no further guarantee will apply.

TERMS & CONDITIONS

This will be a video auction. All animals will be penned outside. All animals will sell to the highest bidder with the auctioneer settling any disputes as to bids. Announced changes in catalog information will take precedence over any printed material in catalog. The animals become the property of the highest bidder as soon as sold and will be cared for, for a reasonable time, at buyer's risk. Any person attending this sale does so at their own risk.

PEDIGREE

All registered animals in the sale are clean of any genetic defect to the best of our knowledge. All potential genetic defect carriers have been DNA'd and will have a profile on file with the AHA. The registered bred heifers have been DNA'd and will be pro- filed for ET permits.

RETAINED OWNERSHIPS

We will retain a percentage of several of the bulls and the registered heifers. Terms will be announced sale day.

ABSENTEE BIDS

Any person unable to attend can place a bid through Keith or Daniel or any of the listed sale representatives. Please have credit references available.

DELIVERY

Free delivery on purchases of \$5,000 or more to any one location within a 300 mile radius if delivered by Fawcett's Elm Creek Ranch. We will cooperate on deliveries outside that area. Day of Sale receive \$50 credit on any bull hauled that day.

Annual Production Sale

CONFERENCE CALL BIDDING

We are offering conference call bidding on sale day. Pre-register to bid: Please call Art Handel at 605-391-8233 prior to sale day to register for a buyer number. (You may call several days in advance to pre-register). To register on sale day call 605-244-9066 between the hours of 10 and 12 (Central Time). All conference call bidders must be approved by 11:00 in order to bid. The conference call number on sale day for bidding is 605-244-9066, password code when prompted: 21368.

DIRECTIONS TO THE RANCH

Do not use GPS to navigate to the ranch, it will not get you here. See the map and use your odometer.

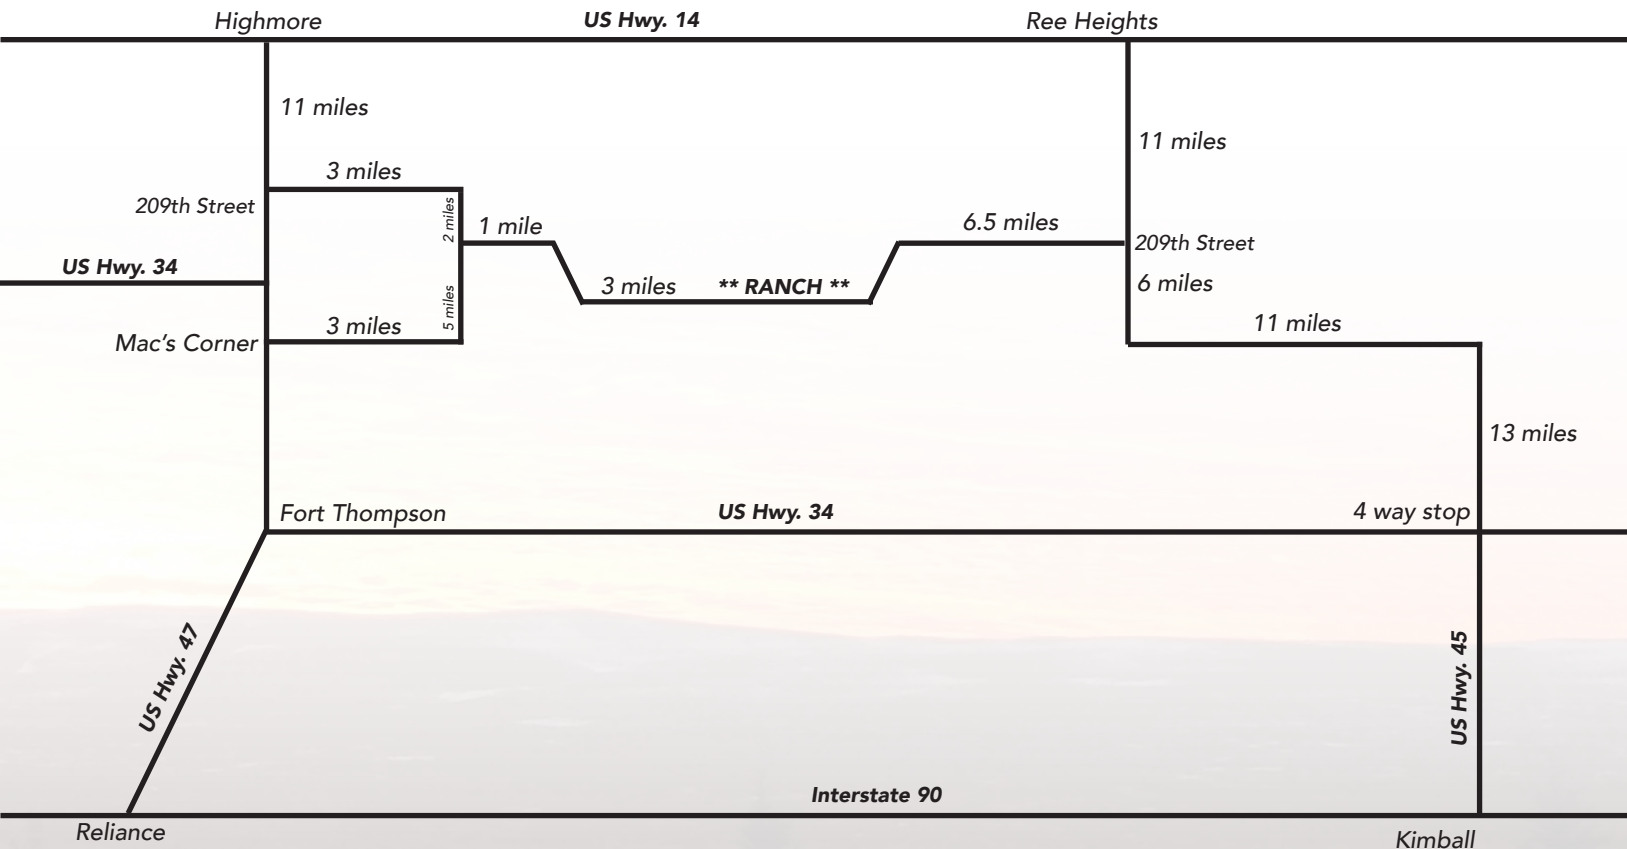

CONFERENCE CALL INSTRUCTIONS

Absentee bidders who wish to use the Conference Call Line may do so by calling 605-244-9066. When prompted dial in the Conference ID: 21368. Pre-register to bid: Please call Art Handel at 605-391-8233 prior to sale day to register for a buyer number. (You may call several days in advance to pre-register). To register on sale day call 605-244-9066 between the hours of 10 and 12 (Central Time). All Conference Call Bidders must be approved by 12:00 in order to bid. The conference call number on sale day for bidding is 605-244-9066, password code when prompted: 21368.

This sale will be broadcast live on the internet.

Visit www.dvauctions.com to sign up and bid online sale day! Please register a day in advance.

Videos of all sale cattle will be posted by February 1st, 2016
Please visit our website, www.fawcettselmcreekranch.com

Sale catalog and ad designs for Fawcett's Elm Creek Ranch Annual Production Sale were proudly done by Focus Marketing Group, Inc., www.focusmarketinggroup.net

The Hereford Advantage: IT ALL ADDS UP

Herefords are practical, profitable and reliable cattle. Known as the efficiency experts, Herefords have been an industry icon for more than 100 years. Today the beef industry faces more challenges than ever, and the Hereford breed is helping producers meet those challenges head-on.

Herefords reduce input costs. Along with excellent feed conversion, Herefords offer hardiness, fertility, longevity and a gentle disposition.

Herefords boost crossbreeding programs. Whiteface crosses pack extra hybrid kick. Three large-scale, real-world research projects at Lacey Livestock/Harris Ranch, Circle A Ranch and Simplot Livestock Co. have documented the Hereford-sired advantage.

PROFITABULL: The True Profit Driver

A registered Hereford bull pays in so many ways. Today you can count on registered Hereford bulls to deliver more genetic technology and predictability than any other breed.

It is difficult to improve those things you cannot measure; therefore, in 2001 AHA implemented a Whole Herd Total Performance Records (TPR[™]) Program to measure production traits as well as other economic traits such as fertility, longevity and reproductive efficiency.

Hereford breeders continue to go above the status quo and submit ultrasound data, body condition scores, cow weights and disposition scores, which all add to the integrity and accuracy of the AHA database. Because of Hereford breeders' commitment, the AHA has developed the single largest database for cow fertility and productivity in the world. This database has positioned the breed as a champion of cow productivity and has led to the development of new expected progeny differences (EPDs) such as udder suspension, teat size, sustained cow fertility and heifer calving rate.

In recent years Hereford breeders have also made a commitment to collecting and submitting DNA samples. In 2012 genomic-enhanced EPDs were released, which add even more predictive power to Hereford genetics.

Calves sired by Hereford bulls have a \$30 per head documented advantage in feedlot profitability and a 7% advantage in fertility when compared to Angus-sired calves. These advantages were documented during a three-year, real-world commercial heterosis project at Lacey Livestock/Harris Ranch comparing progeny by Hereford and Angus bulls when crossed on Angus-based cows.

Another project with Simplot Livestock Co. proved low-birth-weight Hereford bulls stacked up to Angus heifer bulls in calving ease when bred to Angus first-calf heifers.

Lorna Marshall, Genex U.S. beef marketing manager, says, "For the last 10 years, the Hereford breed has been on a mission to become really commercially relevant."

She explains that Hereford is experiencing some amazing times. Hereford bull sales are at record prices, and it's a fun time to be a Hereford breeder and to own Hereford cows.

"Today it's really fun for me to go sell Hereford semen, because I have a plethora of bulls in my lineup that are calving ease bulls that are high accuracy that represent a lot of different pedigrees and can do a lot of powerful things for commercial producers."

The Hereford Momma: The Cadillac of Females

There's nothing better than a Hereford-sired momma. Whether she is purebred or crossbred, the Hereford-influenced momma is the best in the pasture.

This is not your grandpa's Hereford. After years of selection pressure, today's Hereford female is one you can trust. She's got the maternal advantage producers can count on to add longevity and productivity to their herds.

Hereford-sired mommas offer some of the best features in the industry:

- Fertility
- Longevity
- Adaptability
- Improved herd health
- Better performance (pounds of calf weaned)

The cheapest and most profitable technology available to cattle producers is maternal heterosis. The Circle A Ranch and Lacey Livestock/Harris Ranch research projects both documented a maternal advantage of 7% higher pregnancy rate when comparing the Hereford-sired females to Angus-sired females. Data from Circle A also prove a net income of \$51 more per cow per year and a significantly higher selling price for bred heifers.

"As range cows go, I think the Hereford female is a superior range cow and makes a great mother," says Mark Lacey, Lacey Livestock, Independence, Calif.

Heterosis advantage

Dr. Randall Raymond, veterinarian and Simplot Livestock Co. director of research and veterinary services, says the Hereford advantage is in maternal heterosis.

"In a cow-calf operation there is a 4.3% increase in pregnancy rate due to maternal heterosis," Raymond says. "That's a big deal. The single biggest expense to a commercial cow-calf operation is retention of heifers. Because it costs a lot to make her, and every heifer you keep is a calf you can't feed or sell at weaning."

Heterosis also contributes to 4.2 lb. of birth weight, 18 lb. of pre-weaning gain and 35 lb. of carcass weight, Raymond explains. Heterosis also contributes 4% less pre-weaning mortality. It also means about 20 lb. more weaning weight just because of heterosis.

Raymond also praises Herefords for their feed efficiency, moderation in milk, female longevity, phenotypic markers (whiteface), docility, maternal versatility and fleshing ability.

Unquestionable disposition

There's no place for high-headed cattle that tear up equipment or cause injuries. Herefords are known for their gentleness. They're safer and easier on fences, equipment and people.

He wants it all.

Visit Hereford.org to hear Jess Herbers discuss the value of Hereford genetics in the Goose Creek Valley Farms commercial cow herd. The Montvale, Virginia, operation was nominated for BIF's 2015 Commercial Producer of the Year.

American Hereford Association
P.O. Box 014059 • Kansas City, MO 64101
816-842-3757 • Hereford.org
©2015 American Hereford Association

There's a reason a tried and true black baldie is the most favored cow in America's cow herd. She's accountable, predictable, profitable and sustainable. Her calf and her steer mates are in demand, regardless of end point.

The stakes have never been higher to create **value** and **efficiency** throughout the production system. In the past decade, Hereford has documented dramatic improvements in calving ease, weaning and yearling performance and end product merit.*

Reduce your risk. Improve your opportunity for profitability.

You want it all in your beef operation?
Then take it.

HEREFORDS. Accountable. Predictable. Profitable. Sustainable.

* The Spring 2015 Hereford Pan-American Cattle Evaluation (PACE) documents consistent improvements in all traits of economic importance. From 2004 to 2014, AHA Genetic Trends indicate a 14% reduction in birth weights, 20% improvement in weaning and yearling performance and a 30% improvement in end product merit. Hereford.org/userfiles/S15_Trend.pdf

- Two recent, large-scale research projects have documented the value of Hereford genetics in the commercial industry. Calves sired by Hereford bulls have a \$30 per head documented advantage in feedlot profitability and 7% advantage in fertility when compared to Angus-sired calves. This advantage was documented during a three-year, real-world commercial heterosis project comparing progeny by Hereford and Angus bulls when crossed on Angus-based cows. The study also documented a maternal advantage of 7% higher pregnancy rate when comparing the Hereford-sired females to Angus-sired females.
- Another project with Simplot Livestock Co. proved low birth weight Hereford bulls stacked up to Angus-heifer bulls in calving ease when bred to Angus first-calf heifers. This project will continue to follow the calves through weaning, finishing and harvest and track results of the Hereford-sired calves versus the Angus-sired calves.
- Using Hereford bulls on Angus-based cows will give producers advantages in profitability, cash flow, herd size, and retained female fertility and longevity according to a recently completed study at Circle A Angus Ranch. In fact, when the data was further analyzed for economic emphasis, the results showed an advantage of \$514 net per cow over a period of 10 years. That's a \$51 difference per cow per year.
- Economic models also predicted that if replacement females are retained over a period of 10 years, Hereford-sired females will generate a 20% advantage in herd size for the same relative cost versus the straight Angus commercial cows because of increased fertility and longevity, period of 10 years. That's a \$51 difference per cow per year.

Fawcett's Elm Creek Ranch :: Yearling Hereford Bulls

The yearling bulls come predominately from the group of cows calving late January through mid March with the exception of the Denver pen bulls and a few others. These bulls have been on a high roughage ration at a low MCAL to ensure longevity. We want our bulls to be able to work hard and last years without any problems. You will find many 1/2 and 3/4 brothers in this offering to help you to have a consistent calf crop. Most all of the bulls in this group are the result of Artificial Insemination. Carcass data, scrotal and a projected yearling weight will be available on sale day. If there are any questions on pedigrees or any other information you are interested in please ask.

Dam to Lots 1-3 • ECR L18 Gen Lady 6131

Lots 1,2 and 3 are the members of our Denver pen of three. These bulls all offer a tremendous amount of power, length and eye appeal. They are wide constructed, heavy muscled, deep and easy fleshing. Their donor dam is a direct daughter of L18 out of the 131 donor. The 6131 donor and 131 donor have left their mark significantly on our herd with herd bulls and numerous daughters retained in the herd. These bulls are no accident, they are backed by a great cow families. They are sound, functional type bulls that will work in many scenarios to improve your cow herd and at the end of the day the weight and marketability to your calf crop.

Look at the numbers! 70 birth weight and 794 yearling weight on this dark red polled bull. He is big stout and powerful and has as much body and rib shape as possible. Out of a first calf heifer that really worked hard. Combination of a great Redeem daughter with really nice udder and teat size. Reads really good on paper too, having a spread from 1.8 to 108 YW with good carcass numbers giving him a \$32 CHB. Great phenotype, performance and numbers.

This 2109 son is out of a first calf heifer and has been a standout all summer. He's dark in color yet traditional in the way he is marked. This summer he was the big stout one that was always easy to find. His MGS 9022 is a herd bull that has been a favorite of mine who will be turning 7 years old this spring and will be going back out on cows. For a bull to still be going strong here is saying something. Lucky Lot 7 offers moderate birth with not only performance and growth but eye appeal and added longevity from his pedigree.

Something a little special here. A 43Y out of a 3027 first calf heifer. Calving ease without sacrificing growth, performance or muscle. He's plenty stout enough and weaned off heavy all in a calving ease package. Started off at just 74 lbs. A heifer bull option that offers the right characteristics and power to be used on mature cows.

Big stout polled Catapult son with big time performance and power. Heavy muscled, long bodied and wide constructed. His mother has done it repeatedly producing a herd bull selling to Bar JZ, a top replacement and now this powerhouse. Comes from a cow who produces quality consistently and is a dam of distinction.

Lot 43 is a long bodied Bob son the has a lot of muscle shape and plenty of depth. On his cow side he combines 175E and 2110. Expect his offspring to open up with a larger than average ribeye.

Lot 55 is a powerful son of 2029 who came off the cow with a big 733 lb. weaning weight ranking him amongst the top of his contemporary group. He's stout, long bodied and the type that will sire those calves that will grow fast and come in heavy.

A nice complete 2109 son in a fault free package. Traditional in his markings and offers soundness, longevity and muscle shape.

This is a top end bull, so many things going in the right direction. A Bob son with full pigment out of a 3027 daughter that goes back to the old reliable 5042. He is great phenotypically with loads of muscle shape, width and depth. Herd bull kind. Most likely safe for use on heifers but the kind of quality and power to use on cows! He has calving ease and performance throughout his pedigree. Great cow families that have proven themselves not only here at the ranch but ranches all across the country.

A lower birth weight Angus bull with numbers to burn. Out of a first calf heifer yet still has plenty of growth and performance.

Annual Production Sale :: Ree Heights, South Dakota

Faucett's Elm Creek Ranch :: 2-year-old Hereford Bulls

We are really excited about this years group of two-year-old bulls. This group of bulls predominately come from the second group of cows calving from mid March through May. In this group of cows you will find calves sired by AI sires and the bulls resulting from embryo transplant. The quality has never been this good as you will find great bulls scattered throughout the offering out of proven cows and donors. This group of bulls leave the yards as soon as the grass has greened in the spring and are on their own until fall without supplement, and then are fed a high roughage ration out on pasture where they have room to travel. They are sound, hard in their condition and ready to work and last.

Sire to Lot 83 • ECR L18 Extra Deep 9279 (aka Bob)

This Bob son is out of 9058, a young donor that you will hear more about in the future. This bull is absolutely fault free from so many different angles. Great carcass data scanning with 126 IMF ratio and a big REA. He is heavily pigmented and dark in color. Study him from the side and he gives you a profile like no other, he holds his head high, straight in his lines, level from hooks to pins and has the perfect amount of muscle shape and expression. An easy fleshing bull that has plenty of softness and depth to his rib cage. BUT more importantly he is a maternal powerhouse being a Bob son having the 0028 cow on the top side and the 7195 bull on the bottom side. Expect phenomenal udder quality, teat size and longevity from his offspring. Terms to be announced. Call for more details.

Sire to Lot 99 • HH Advance 2029Z ET

Carcass bull and so much more! Lot 99 is a big, stout and rugged bull. Lots of muscle shape and depth of body. 108 REA and 125 IMG ratio make him a standout as far as carcass with the look and pedigree to make him valuable in many different scenarios. Expect great uddered females out of this bull and his sons to be powerful. He reads with excellent carcass and growth giving him a \$34 CHB.

Sire to Lots 102 and 103 • DKF RO Cash Flow 0245 ET

A super powerful Cash Flow son out of the 131 donor. Massive, easy fleshing and powerful with full pigment. He is modern and functional. A bull that will add longevity to your cow herd. Lot 102 is a really sound structured bull that can really get out and move with a long stride. He has that herd bull look. If you decide to use him on papered cows or commercials he will not dissapoint.

Middle framed 2029 son who has an abundance of muscle shape and depth of body. Great fleshing ability and eye appeal. He is packed full of red meat having a great turn to his top and muscle expression in his hind quarter. Stands with some width of chest and thickness throughout. Good carcass numbers and even better phenotype to go with. He is a little different in terms of pedigree offering a bit more power from Hunter on his bottom side stemming back to breaker. High quality bull.

Massive. Stout. Powerful. Ground pounder. Earth Shaker. This bull is ideal in his size, depth, and muscle shape. Lot 134 offers a lot of things in a unique package including soundness, great structure and ample amount of thickness. Lots of pigment and pounds in this meat wagon. Even better that his mother is one the super cows in terms of longevity. She's the kind that stays in good shape and always produces quality cattle. Phenotype, pedigree, and longevity.

Full brother to Lot 137 and quite comparable in the way they are made. Easy doing sound structured bull.

The hardest thing for me to do for this sale is to pick out bred heifers right out of our replacements. This group of bred heifers represents a cross section of our replacements and offers something for everyone. They were sorted out of the group late December and have had no special treatment. These females are future power cows, herd bull mommas and potential donors. We hate to see these leave.
RETAINING 1 SUCCESSFUL FLUSH ON ALL REGISTERED FEMALE LOTS.

In the fall of 2014, Dave Goertz asked what I thought of the Turbo calves and I replied "one of the absolute best cow prospects of 2014 was a Turbo heifer." This is the one I was talking about. I remember following this heifer in to wean that day and couldn't take my eyes off her. At the time she was middle framed, long bodied and had a ton of rib shape and depth of body with pigment and mass and she still has it all. Due to calve 2/4 bred to ECR Genetic Flow 4368 ET.

We knew that we needed to step up on the offering of registered yearling heifers and that is exactly what we did. These heifers are truly impressive with a variety of type of cattle and yet still the consistency for a producer, young, old, established or just getting started to be able to select females out of this group to improve their own herd or be a great starting point. When I started researching pedigrees it really opened my eyes to the reality of some of the great cow families that are being offered in this group.

We are confident in the ability of these females to make a positive impact.
RETAINING THE RIGHT TO 1 SUCCESSFUL FLUSH ON ALL REGISTERED FEMALES.

Show heifer prospect. I always have people asking about what I have for show heifers. This one slipped through the cracks as she should have been in the fall heifer sale. Her mother was a class winner at a past Junior Nationals for Kris. Just a May baby. She's got all the right pieces to be VERY competitive in the ring and being out of 9022 she will go on to be a productive cow.

Lot 164 is super long bodied and cowy in the way she's made. Notice the cow families she has in her pedigree, 131 donor and 0028 donor. When I see these two cows line up on paper, I know you can expect good things to come.

Faucett's Elm Creek Ranch :: Commercial Bred & Open Females

The commercial bred heifers are the result of heifers raised here at the ranch or large groups of customer cattle. They have been sorted extensively for disposition and quality. These dehorned females are a great set of females who offer productivity, soundness and longevity. They have had all calf shots, Preg Guard Gold 10 prior to breeding and Guardian.

Females will sell in groups of 5. High bid has the option to take as many lots as available.
In example high bid on lot 165-A has the option to buy just Lot 165-A, or 165-A and B or all of Al'd females.

In terms of that herd bull look, 2109 is the most impressive herd bull we have had at the ranch. He offers a bit more uniqueness in terms of muscle shape and power compared to his L1 counterparts. Whether he is used on virgin heifers or mature cows the results are the same, low birthweight and high weaning weight. He produces cattle with the maternal traits of the L1 influence that are wide constructed, big middled and heavy muscled. Not only is a powerful individual he is backed by a maternal great 759T who is a donor for the Cooper herd in Montana.

Videos of all sale cattle will be posted by February 1st, 2016
