Welcome to the Ponca Valley

Now in our 76th year of producing registered Hereford cattle, we are more focused than ever on making them more profitable for our customer.

The two-year-old bulls represent the younger half of our 2017 spring bulls. These bulls were wintered last year on limited feed and grown last summer on grass only. They sell as naturally big, rugged and sound bulls ready to take care of themselves and go to work.

In last year's sale the fall bulls were the fall bulls were a highlight. This year we have 8 of these bulls and they are very good. This group includes the first sons of 531, the 145 son we sold a 1/2 interest in to Douthit Herefords.

The yearlings are big and are the older half of our 2018 bull calves. They include our 2019 Denver Carload which was the Champion Spring Calf Carload in Denver.

The heifers are outstanding and should make great cows and there are several that could show well.

We continue to produce our cattle in a no creep, no nonsense program where, "What you see, is what you get." Buyers from recent years report that our cattle add pounds, improve disposition and last for years.

This catalog will contain a limited amount of footnotes. The longer I am in the business the more I realize that you good cattle producers know what you want and the numbers or footnotes will not change that fact. I am honored to have some of the very best cattle producers using our bulls.

Hope to see you on sale day or before.

We are proud of this set of coming two-year-old bulls. They have been raised in pastures that give them room to develop and are not carrying any extra fat. Most will not have footnotes, but they are very comparable to those that do.

Testimonial

Ponca Mortgage Lifter 106

We bought our first Hereford bull from Lowell Fisher in 2012 to run on our black cows. Ponca Mortgage Lifter 106 bred 28 cows in a rough 160 acre pasture as a yearling and has been with 30+ cows every year since; including 2018. We have bought two more bulls from Lowell and our experience has been similar with all 3.

The disposition on the bulls is incredible and it carries into their calves. We have added bone, length, and pounds to our calves using Lowell Fisher Herefords. The heifers we kept for replacements are excellent mothers with good dispositions.

We have never before sold a female with as much cow power potential as the choice of these two flushmates.

We have been doing embryo transfers since the early 1980's and if you would follow the dam side of this pedigree it would be donor cows all the way back to our first flush.

These two heifers are very much alike and are both special.

A flush mate bull sells as Lot 50, 820. He is also a great prospect.

531 is our best 0145 son to date. We sold the spring calving 1/2 interest in 531 to Doathit Herefords in Kansas and we have used him naturally for fall calves and AI for spring calves. Seven sons sell. 531 is the most consistent sire of pigment and solid markings that we have used.

- 314 sires beautiful, low birth weight, short marked, pigmented calves that are born extremely easy and then just get up and grow.
- His calves were a feature in Berry's 2015 sale and will dominate the top end of their 2016 sale. A commercial producer that used 100 straws on heifers in 2014 recently purchased 150 straws. The true test!
- Owned with The Berrys, Wyo., Cooper Hereford Ranch, Mont. and K7 Herefords, Iowa
