Cattlemen & Women,

Welcome to our 18th annual bull sale. At this time, I would like to thank all the past customers – we really appreciate your business and your confidence in our bulls.

A special thanks to all who attended the South Dakota Angus Tour and especially Jack for cooking the beef and Sonja, Carol, Lori and LyRanda for serving.

The bulls have been raised with the rancher in mind. We don't CREEP FEED. We let the cow raise her calf on her own. We want to know which cow can raise a calf, not a creep feeder.

These bulls are feed a high roughage 45 mg cal ration developed by our nutritionist Jack Seiben of J&R Feeds. The TMR ration consists of corn silage, ground hay, corn, and J&R Bull Concentrate. The bulls will be in ideal breeding condition and carcass information will be available sale day.

We will winter the bulls until May. The bulls sell with an unconditional first breeding season guarantee. The fall and 2 year old bulls have already passed their fertility testing and the yearlings will be tested before delivery.

Stop in anytime to view the bulls at the ranch. You can also view the bulls online prior to the sale at www.fuossangusranch.com

Jack is cooking again so plan to stay after the sale for ribs and drinks.

Thanks,

Dave & Kathy Fuoss & family

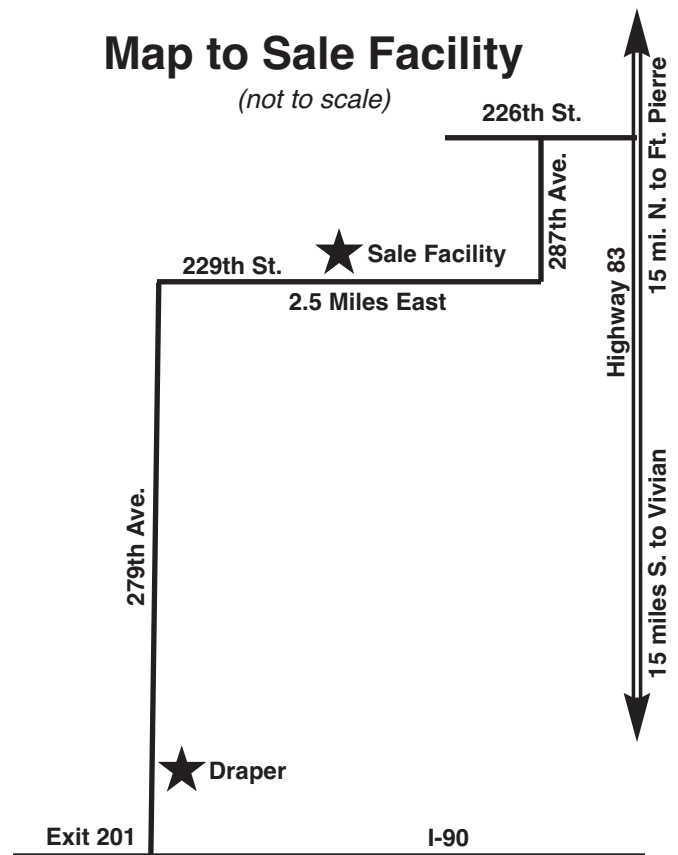

Yearling weights, ultrasound data, and scrotal measurements will be available the day of the sale on the yearlings.

This information can be sent to you prior to the sale via email or fax upon request.

Dam's BR 4@99 WR 4@100 YR 3@100

Angus bulls have long been known for their paramount calving ease. If you are breeding heifers, Angus is the go-to breed of choice. But what about the so-called "big" birth weight Angus bulls – where do they fit in? The vast majority of mature cows calve unassisted – it is pretty rare for a mature cow to need assistance, except for abnormal deliveries (backwards, breech, twins, etc.) Data reported to the AAA shows that 99% of Angus cows, second calf or beyond, calve unassisted and only 1% need some type of assistance (abnormal deliveries excluded from this data). Back to the question at hand: where do the "big" birth weight Angus bulls fit in? Example: If you have a bull with a Birth EPD of +5, he would be 3.2 pounds heavier than the average (breed average BW EPD 1.8) (5 – 1.8 = 3.2 pounds difference.) However, his superior growth EPDs mean he will wean bigger calves and put way more money in your pocket than the average Angus bull! The moral of the story: If you are breeding mature cows to an Angus bull, don't make birth weight be your focus.

Luke VanderMay Horse Consignment #1

Ima Splash Bar Bay Gelding

Sire: Lucky to be Gold

Dam: Lucky Bar Splash

Lucky is a 6 year old gelding that is broke, gentle and sound. He has been ranch rode. He will watch a cow, drag calves to the fire and rope and doctor in the pasture. He is stout and strong from the horn and will take a full days riding. Lucky is soft in the face and sides and rides good.

For more information, call Luke VanderMay at 605-415-7493

Luke VanderMay Horse Consignment #2

Cash Sorrel Gelding

Cash is an 11 year old sorrel gelding that is ranch broke, sound and gentle with no buck. He has been used in all phases of ranch work and is good to ride. Cash is good with a rope, pulls good and is a good traveler. He is soft in the face and handles nice. He would work good for about anyone with some riding experience.

For more information, call Luke VanderMay at 605-415-7493
