LUNCH 11:30 • SALE AT 12:30

AT THE RANCH IN VALIER, MONTANA

View Holden Hereford's Sale Live on Satellite TV with Superior

HERE'S HOW IT WORKS

HOW TO PARTICIPATE AS AN ABSENTEE BUYER - We prefer for each of you to be in attendance on sale day. Realistically, we know there will be some scheduling conflicts and distance limitations. In these cases, we have arranged for you to be able to participate in the sale on an absentee basis. If possible, you can come by and evaluate the animals prior to sale day. If distance is a problem, we can also provide you with a DVD of all the cattle for home viewing. All of the lots in the sale will be available for viewing online prior to sale day at www.superiorlivestock.com as well. Customers tell us the video does a good job of showing conformation, structural correctness and how the cattle travel, etc. Our sale book, with complete data on each animal, is very helpful. Please feel free to call us with questions. In addition, there will be qualified persons on hand sale day to evaluate the bulls and answer any questions you might have.

Turn in Bids Over the Phone. This is our traditional method of buying livestock and is the suggested process for anyone who does not have excellent, high-speed internet. To get started simply go online to www.superiorlivestock.com and click on the tab titled "Register for a Buyer Number". Select the registration form for Superior Productions and print the registration form, fill it out and fax it in to Superior Productions at (817) 378-3380 with a signature on it. You can also mail it in to the address provided on the form. Upon receipt of this information Superior will call you with a buyer's number and the bid line phone number that you will use on sale day to place bids over the phone.

Click-To-Bid. This is Superior's newest way to buy cattle! Please note that high speed internet is required – this is not for dial-up or satellite internet. Registration is free, but you must become a member of www.superiorclicktobid.com to sign up. Becoming a member is easy – just go to the homepage of www.superiorclicktobid.com and follow the out-lined steps to get started. Input your information and select a username and password. You will receive an e-mail confirming you are a member.

From that point forward you just have to sign in and select the sale you would like to register for and once approved by the ranch you will receive an e-mail confirming which sale you are now registered for.

Viewing the Auction. The sale will be broadcast via satellite on Dish Network channel 232. Please note that there is a short delay if you are watching the auction on television so be sure to call in a couple lots ahead of the lot you are interested in bidding on. The sale will also be broadcast live on the internet at www.superiorclicktobid.com – just go to the home page and select the auction. Remember you can call in to bid whether you watch on the TV or on the internet, but you must be a member of www.superiorclicktobid.com to "click-to-bid". Your computer must have Flash Media Player installed to view the auction. If you do not currently have DISH Network, but would like assistance in signing up, Superior has setup a hotline to assist our customers in making the switch at (888) 999-6656.

Bidders who are successful in making purchases via satellite or internet will be contacted by the ranch after the sale to settle payment and make shipping arrangements.

View and Bid Live on the Internet

Real-time bidding is available via the internet for this sale. Live audio and live video will allow buyers to bid on animals just as if they were present at the sale. Buyers must create an account prior to the sale.

Please visit www.LiveAuctions.tv to create an account and request a buyer number. Instructions are available at www.LiveAuctions.tv to walk you through the account setup process.

Buyers who would like to bid via the internet must register with LiveAuctions.tv two days prior to the sale.

At the Holden Hereford Ranch in Valier, Montana. See map page 3.

TERMS AND CONDITIONS

- ♦ All sale cattle have been parentage verified and DNA tested to be IE Free, HY Free and Dilutor Free by GeneSeek Labs.
- ♦ Each animal will be sold to the highest bidder without reservation.
- ♦ The auctioneer will settle any disputes as to bidding and his decision will be final.
- ♦ Terms of all sales will be cash unless arrangements are made between purchaser and seller prior to sale.
- ♦ Individual health papers will be furnished with each animal permitting shipment to any state.
- ♦ In case an adjustment is required, it will be made with a replacement animal of equal value to the animal in question or credit on the purchase of another animal.
- ♦ No adjustments will be made after nine (9) months of sale day on any animals.
- ♦ The animal becomes the property of the purchaser as soon as sold but it shall be the responsibility of the seller to see that animals are properly cared for until delivered to the purchaser.
- ♦ Any death or injury after the animal is sold is at the buyer's risk.
- ♦ Anyone attending this sale attends at their own risk and without liability on the part of the owners or their employees.
- ♦ Corrections or additions of any information contained in the sale catalog will be announced from the auction stand and will take precedence over any printed material.

Welcome to Holden Herefords

This is our invitation for you to attend our 51st Annual Production Sale. On behalf of our operation, we welcome you to come and see what we feel is our strongest sale offering ever. It is also one of the largest sale offerings we have ever offered for sale, and we feel the depth of quality is absolutely outstanding. It's hard to believe that it has been over 50 years since the first Cooper-Holden Production sale that was held in 1967 in Great Falls, MT. We feel very blessed to still be involved in the Hereford business, and are very grateful for all the wonderful friends and customers we have had experiences with over these last 51 sales. The Hereford business has been great to us over the years, and it is exciting to see the interest focused back on quality Hereford cattle out in the beef industry today. The data is in and Herefords continue to excel in all research programs for both heterosis and extra profit for your operation. We have enjoyed our part in working to produce Hereford cattle that will perform well in all segments of the beef industry, and we look forward to many more years of raising the best Herefords possible. As always we plan on laying out the welcome mat with great hospitality and top quality Hereford cattle on display, and we truly hope you can join us at sale time.

Once again, we are pleased to offer an outstanding set of bulls that are uniform and predictable in quality, type, and breeding. This group represents the top 120 out of almost 165 bull calves born in our 2016 calf crop and almost 60% of them are the results of our extensive ET program. In addition, we are selling a tremendous set of powerful 18 month old bulls from our fall calving program. They are the top 60% of the fall 2015 calf crop. They are a balanced trait set of bulls that combine thickness, performance, pigment, maternal strength, fleshing ability, carcass, disposition, eye appeal, and moderate birth weight. 100% of the sale offering, with the exception of the fall heifer calves, have GE EPDs on them to improve the accuracy of their EPDs. They will also sell with complete ultrasound and performance data and all bulls have been semen tested. We have a couple special "pick of the Flush" heifer lots in the sale again this year and this is a chance to get a great young foundation female. Both of these "pick" lots are full sisters to some of the top yearling bulls selling in the sale. We have a select group of our natural fall heifer calf pairs in the sale and will be selling the choice of cow or calf and we will keep the other. We have a top quality set of 19 open yearling heifers in the sale also. This year we have also decided to add a very nice group of young bred cows due the end of March and early April. All sale cattle except fall heifer calves have been DNA parentage verified and tested free for all known genetic defects. As always, all sale cattle sell fully guaranteed.

Our cow herd is Line One in breeding. We purchased our first Line One cattle over 60 years ago. Since then we have purchased and used many top sires from the Miles City Research Station. We have also exchanged and purchased top herd sires from Cooper Herefords. We have also selected top herd sire prospects from our own herd every year.

We were one of the first members of the Montana Beef Performance Association when it was organized in 1956 and were very active in it until it was dissolved. We have been involved with the TPR program of the American Hereford Association and are active participants in the Whole Herd Reporting Program. These records have been very important in selecting and maintaining the performance and quality of our cattle. We have a severe culling program for our mother cows. We cull on performance, fertility, soundness, udder quality, and milk. Our cattle are the product of many years of selection for these traits. Our cowherd is our pride and many of the top cows in the breed have come from our ranch.

We have stayed with a strong performance, multitrait line breeding program to enhance the predictability of our cattle for our customers. Our focus has always been on stacking generation after generation of the traits that add value to our customer's bottom line. A line breeding program can only succeed if you continually add cattle with superior genetics to it. The advantage of our program is the uniformity and predictability it provides along with the heterosis that can be generated by an outcross within the breed or between breeds. These bulls have generations of bred in performance and will pass these traits on to their progeny consistently.

The sale bulls and heifers and the cowherd will be on display March 11th, 12th, and 13th for your inspection. Lunch and snacks will be provided on both March 12th and sale day. There will be a social hour and dinner at the Lighthouse Restaurant on March 12th from 6:30 to 8:00 p.m. Please come and be our guests.

We are excited to once again be broadcasting our sale live on Superior Productions on RuralTV, which is Dish Network channel 232. Unfortunately, DirecTV is not a carrier for RuralTV yet, but hopefully will be later this year. We will start selling cattle promptly at 12:30 p.m. to try and get all the lots through in our allotted time. DVDs of the sale cattle will be available through us or Superior. Please contact either one of us and we will be happy to send one out to you. We also offer live sale viewing and bidding on the internet with LiveAuctions.tv. Details on how to participate with either Superior Productions or Live Auctions can be found on the inside front cover of our catalog.

Thank you for your interest in our program. Please feel free to stop by and inspect the cattle at any time, and if we can help you out in any way, please give us a call.

Jack & Tresha Holden & family, Jay D. & Kelli Evans & family

www.holdenherefords.com

DELIVERY

We are offering free delivery to central points within 1,000 mile radius of our ranch on all purchases totaling \$5000 or more. Cattle will be delivered to anywhere in the continental U.S. but will be at buyer's cost after the first 1000 miles.

ABSENTEE BIDDING

Anybody wishing to bid that cannot attend the sale or participate on the phone with Superior Livestock may place a phone bid by contacting any listed sale representative, Jack Holden, or Jay D. Evans. DVD's of the sale cattle will be available. Please contact us for more information.

TRAVEL AND ACCOMMODATIONS

Holden Hereford Bull Sale Special

**When you register, tell the clerk that you are with the
Holden Hereford group and you will receive a 10% discount.**

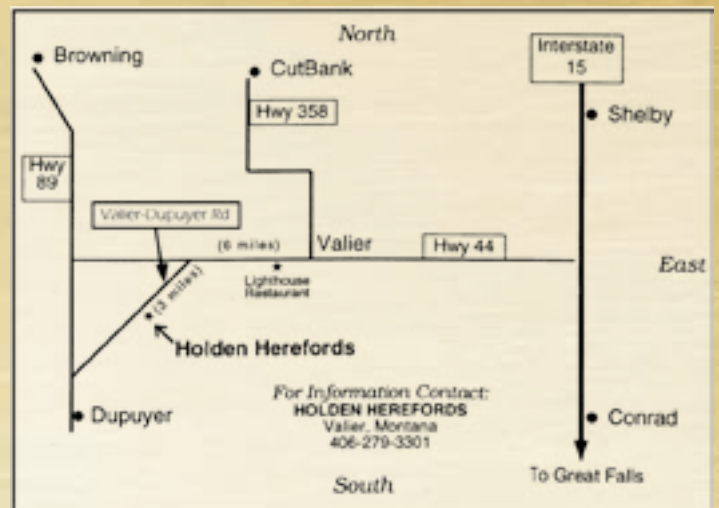

Advance reservations required.
Not valid in conjunction with other discounts.

THERE'S NEVER BEEN A BETTER TIME TO CAPITALIZE ON THE VALUE OF USING HEREFORD BULLS ON YOUR ANGUS BASED COWHERD

Using Hereford bulls on Angus-based cows will give producers advantages in profitability, cash flow, herd size, and retained female fertility and longevity according to a recently completed study at Circle A Angus Ranch. In fact, when the data was further analyzed for economic emphasis, the results showed an advantage of \$514 net per cow over a period of 10 years. That's a \$51 difference per cow per year.

Economic models also predicted that if replacement females are retained over a period of 10 years, Hereford-sired females will generate a 20% advantage in herd size for the same relative cost versus the straight Angus commercial cows because of increased fertility and longevity.

**There will be a social hour and
Prime Rib dinner at the
Lighthouse Restaurant,
1 1/2 miles west of Valier
on March 12th from 6:30 to 8:00 p.m.
Please Come And Be Our Guests!!!**

**Holden Herefords is 9 miles west of Valier
on the cutoff road to Dupuyer.
Take Highway 44 for 6 miles and
then the left-hand fork off the highway.
You can't miss it!**

♦ 1013Y has proven to be a tremendous all around breeding bull that covers all the bases. He is a moderate BW, high calving ease bull with excellent growth, maternal and carcass strength. His progeny are deep ribbed, easy fleshing, well marked and his daughters are great uddered. He ranks in the top 25% of the breed or higher on 8 different EPDs including being in the top 5% on MARB EPD and \$CHB. His dam topped our 2015 Female Sale at \$70,000 and is a daughter of the \$175,000 5139R cow. 1013Y is also the sire of the \$240,000 4075B bull. 15 powerful sons sell!

♦ 4150B was another 215Z son we purchased at Cooper's 2015 sale for his combination of phenotype, calving ease, carcass strength, and cow family. He has bred exactly as we expected and we have calved heifers to him the last 2 years. His exceptional EPD profile ranks him in the top 15% of the breed on BW EPD, the top 10% on WW, Teat and Udder EPDs and the top 4% on Scrotal, Milk, M&G, and MARB EPDs and the top 10% on \$CHB. 9 balanced trait sons sell!

◆ 4075B was the \$240,000 high selling bull from our 2015 Sale to Hoffman Herefords and Cottonwood Cattle. He is already proving to be a great breeding bull, and we can't wait to showcase more of his genetics next year. He has tremendous spring of rib, volume, muscle shape, eye appeal and is backed by one of the top carcass cows in the breed that is extra powerful and great uddered. She boasts average progeny ratios of 11 @ 99.5 on REA ratio and 11 head @ 134.5 on IMF ratio. 4075B played a large part in Hoffman Herefords having Grand Champion carload at the NWSS this year with 50% of the carload being 4075B sons. We are very excited with how 4075B is breeding and to offer his first set of sons for sale. 5 outstanding sons sell!

EXPLANATION OF BREED EPDS

CALVING EASE- DIRECT (CED)

EPDs are based on calving ease scores and birth weights. More positive EPDs are favorable and indicate easier calving. The EPD for direct calving ease indicates the influence of the sire on calving ease in purebred females calving at two years of age.

BIRTH WEIGHT (BW)

The BW EPD is an indicator of birth weight and calving ease. Progeny sired by a bull with a BW EPD of 2.2 can be expected to weigh 3.2 lb. more at birth, on average, than progeny sired by a bull with an EPD of -1.0 lb. (2.2 minus -1.0 = 3.2 lb.) Birth weight is another indicator of calving ease. Larger BW EPDs usually, but not always, indicate more calving difficulty.

WEANING WEIGHT (WW)

The WW EPD reflects pre-weaning growth potential. Measured from adjusted 205-day weight. It is an indicator of direct genes for growth independent of milk production of the dam. Calves sired by a bull with a WW EPD of 30 should have a 20 lb. advantage in 205-day adjusted weaning weight compared to calves sired by a bull with an EPD of +10 lb. (30 minus 10.0 = 20 lb.).

YEARLING WEIGHT (YW)

YW EPD for a sire with an EPD of 87 indicates that on average, his progeny should be 30 lb. above the average of progeny of a bull with an EPD of 57 lb. YW EPD reflects differences in the 365-day adjusted yearling weight for progeny. It is the best estimate of total growth.

MATERNAL MILK & GROWTH (M+G)

The M+G EPD is a combination EPD. It is the MM EPD plus 1/2 the WW EPD. It has no accuracy value since it is simply a combination of two other EPDs. A sire's MG EPD reflects what he is expected to transmit to his daughters for a combination of both growth genetics (WW EPD) and maternal production (MM EPD). This EPD is sometimes referred to as "total maternal" or "combined maternal."

MATERNAL MILK EPD (MILK)

The MILK EPD is a prediction of weaning weight differences due to milk and maternal ability of the dam. For a sire, the MILK EPD predicts the maternal ability of his daughters expressed in pounds of calf weaned. MILK EPDs do not specifically predict pounds of milk produced, but pounds of calf weaned due to maternal production of the dam. It predicts the difference in average weaning weight of sires' daughter's progeny due to milking ability. Daughters of a sire with a MILK EPD of 14 should produce progeny with 205-day weights averaging 24 lb. more (as a result of greater milk production) than daughters of a bull with a MILK EPD of -10 lb. (14 minus -10.0=24 lb.). This difference in weaning weight is due to total milk production over the entire lactation period.

SCROTAL CIRCUMFERENCE (SC)

Measured in centimeters and adjusted to 365 days of age, SC EPD is the best estimate of fertility. It is related to the bull's own semen quantity and quality, and is also associated with age at puberty of sons and daughters. Larger SC EPD suggest younger age at puberty. Yearling sons of a sire with an EPD of 0.7 should have yearling scrotal circumference measurements that average 0.7 cm. larger than progeny by a bull with an EPD of 0.0. In this genetic analysis, a multiple-trait model was used for scrotal circumference. Weaning weight was used as a predictor variable to increase the prediction accuracy of SC EPDs. Therefore, an animal with a weaning weight EPD should also have an SC EPD.

RIBEYE AREA (REA)

REA EPDs reflect differences in an adjusted 365-day ribeye area measure based on ultrasound measurements of live yearling cattle. Sires with relatively higher REA EPDs are expected to produce better muscled and higher percentage yielding slaughter progeny than will sires with lower REA EPDs

MARBLING (MARB)

MARB EPDs reflect differences in an adjusted 365-day intramuscular fat (marbling) score based on ultrasound measurements of live yearling cattle. Breeding cattle with higher MARB EPDs should produce slaughter progeny with a higher degree of intramuscular fat and therefore higher quality grades.

Certified Hereford Beef Index (\$CHB)

This is a terminal sire index that is built on a production system where Hereford bulls sire calves for the CHB market. There is some pressure put on CE and then positive weight on both WW and YW. Remember that all offspring in this index are harvested, so they need to be born alive and then grow fast at all stages of life. Of course, we have much more emphasis on fat in this index, as we want the cattle to stay lean. There is also a significant weight on both REA and IMF with more emphasis again on IMF. This index would be used by producers who have a target of producing bulls for a terminal breeding program. It could be used heavily in the Midwest where bulls are used in rotational breeding programs to produce cattle in a retained ownership program or are simply sold to backgrounders. This is the only index that has no emphasis on fertility. Remember that nothing is retained in the herd.

GENOMIC ENHANCED EPDS

Over the past few years, the American Hereford Association (AHA) has worked with Hereford breeders and the scientific community to develop and incorporate Genomic information into National Cattle Evaluation (NCE) to enhance the predictive power of EPD. Genomic Enhanced EPD (GE-EPD) allows commercial and seedstock producers the opportunity to make selections and mating decisions based on the most current and accurate information of Hereford Genetics. The AHA utilizes a 77K, High Density (HD) panel that was built off of high accuracy Hereford sires. Each Animal that is tested has an updated set of EPD and corresponding accuracy. For some traits, the added accuracy will increase by 100%, and moving from .15 to over .30 means you would be adding from 5-10 progeny to a pedigree before an animal has any progeny analyzed. The use of this information reduces your risk when buying, and helps to plan mating based off of all information available.

What are the advantages of GE-EPDs?

- Much higher accuracy EPDs for unproven cattle
- Provide reliable EPDs for traits that are difficult to measure
- Faster generation turnover with fewer mistakes
- Simple, easy to interpret results with "all-in-one" value

What is the value of EPD accuracy?

- Faster rate of genetic progress
- Feed and labor cost savings in seedstock development
- Opportunity cost of making the wrong decision
- Value of time in relation to earlier selection and more information for marketing and customer relations.

YEARLING BULLS

This group of yearling bulls represents the top 75% of the bull calves born in our 2016 calf crop. This is one of the largest sets of yearling bulls we have ever offered for sale, and we feel they are the best set we have offered in our 51 years of sales. The quality and uniformity in this group from top to bottom is outstanding. They are stout made, well marked, and have top notch performance and ultrasound data to back it up. They have all been semen checked and are ready to go to work for you. 100% of these bulls have AHA GE EPDs to increase the accuracy of their EPDs, and they are all parentage verified and tested negative for all genetic defects. We invite you to look them over, and we feel that you will be very impressed with the consistency in type and kind in this powerful set of bulls. There are many full and 3/4 brothers in this group also, and almost 60% are ET calves from our extensive ET program.

The average EPDs on this group of bulls is CED +2.0 BW +2.6 WW +55 YW +88 Milk +31 M&G +58 REA +.25 MARB +.16
 Compare this to the breed averages of CED +1.2 BW +3.2 WW +49 YW +79 Milk +21 M&G +45 REA +.34 MARB +.09

You will see how strong this group is on all traits across the board. Combine this with 60 years of common sense, balanced trait selection, linebreeding, and selecting for strong maternal lines that are fertile and easy fleshing, well pigmented and great uddered, and it adds up to bulls that will add tremendous value to your herd in all phases of beef production. These bulls were again fed out on the CHS Feeds ration called Holden Bull Challenger. It is a high fiber, low fat pellet that we have fed for the last 20 years. The bulls gained over 3.4 lbs. a day on a 130 day gain test and have an average 205 day weight of 755 lbs., an average 365 day weight of 1295 lbs. and an average scrotal of almost 38 cm. They also scanned an average REA of 12.7, an average IMF score of 2.6%, and an average REA per 100/wt. of 1.02 with an average Backfat of .29 inch.

Scrotal Measurements were taken on 1-8-2017

ELITE HERD BULL PROSPECT

- ♦ Retaining 1/2 interest and 1/2 possession with buyer having first choice on possession time

6007D is a herd bull prospect that combines all that today's beef industry demands. He is deep ribbed, big butted, smooth made, and extra fancy and has great EPDs and a powerhouse donor dam to back it up. He will add carcass strength, eye appeal, performance, and fleshing ability to his progeny and he has a great pedigree. His dam is a huge topped, good uddered, easy fleshing 3196 daughter that still looks great at 11 years of age. We kept a half brother to 6007D out of our fall program to use also and plan on adding lots of his dam's influence to our breeding program going forward.

- ♦ #1 bull in sale on MARB EPD at .58 and ranks in the very top 1% of breed
- ♦ Ratioed 111 on REA and 159 on IMF
- ♦ Big time individual performance with 800 lb. 205 day weight and 1398 lb. 365 day wt.
- ♦ Top 2% of breed on \$CHB
- ♦ Dam has an average IMF ratio on 17 head of 124.6
- ♦ Full and maternal brothers sell as Lots 5337C, 6003D, 6207D, 6225D, 6248D, and 6262D

POWERHOUSE HERD BULL PROSPECT

6020D is a great example of what we expected from the 4075B progeny. He is a soft made, high volume, square butted bull with plenty of style. He is also great haired and well marked. Dam is a full sister to our 2316Z herd sire and a daughter of the great 7008G donor cow. Great combination of maternal and carcass strength in a super functional package.

- ◆ Ratioed 106 on REA
- ◆ Top 25% on MARB EPD
- ◆ 40 cm scrotal and top 20% on Scrotal EPD
- ◆ Full brother sells as Lot 6124D

TOP HERD BULL PROSPECT

6092D has extra pigment, spring of rib, muscle shape, and eye appeal. He is a great patterned bull that is loaded with muscle and fleshing ability. His dam was a powerhouse donor that was our selection from the Baker Hereford Dispersion. She was a powerhouse cow that was extremely deep sided, big topped, and great uddered and has left us with some great daughters. Cooper's also have a daughter that they are flushing. Great pedigree and loads of genetic potential in this bull!

CURVE BENDER DELUXE

6186D has so many great traits about him that it's tough to know where to start. He is goggle eyed, red necked, and red to the hoof, has extra spring of rib and capacity, and is long bodied, deep flanked, and square hiped. He has great testicle development and is smooth shouldered and nice fronted. He has exceptional individual performance, and you couldn't write a much nicer set of EPDs across the board. To top it off, he is out of the great 5139R donor cow that has produced over \$1 million in progeny sales. This is an all around genetic package that is hard to beat!

6203D has a great pattern to him and is a real eye catcher. He was sick for a while at the start of test, and it set him back some but he is coming on strong now. He is short marked, has excellent muscle expression, and really balanced from front to back. His dam is a powerful donor that Brad showed at JNHE where she was a Reserve Division Champion. Excellent bred in performance and maternal strength.

TOP SHELF HERD BULL PROSPECT

If we hadn't already used 3 sons out of the 7003T donor cow, I'm pretty sure we would be keeping this bull to use ourselves. 6212D is upheaded, clean made, smooth through his shoulder, deep sided and thick quartered. He has loads of eye appeal and he checks all the boxes on performance and scan data. To top it off he is out of one of the premier cow families in the Hereford breed. Here is a curve bender deluxe that did it all.

- ◆ Ratioed 106 on REA and 160 on IMF Top 1% of breed on Milk and M&G EPDs
- ◆ Top 3% on Scrotal EPD
- ◆ Top 20% on CED and BW EPDs and \$CHB
- ◆ Top 15% on WW EPD
- ◆ Maternal granddam is the \$175,000 5139R cow

CURVE BENDER DELUXE

Calving ease, performance, maternal, carcass all wrapped together in a nice package. 6233D is very well marked, clean patterned, deep sided, and look at his individual performance and scan data. He did it all even with starting out at 75 lbs. He is out of a goggle eyed, great uddered 8050U daughter. This bull has a lot to offer.

PREMIER HERD BULL PROSPECT

The picture of this bull pretty much tells the tale phenotypically. He is great fronted, clean shouldered, deep ribbed, and stout all the way through his butt and lower quarter. He has great structure and extra bone and is one of those bulls you can't help but love for how rugged he is and yet smooth patterned at the same time. 6237D has that herd bull look just like his sire did, and he is the kind we all like to produce. We are loving the type and kind in these 4075B progeny, and this bull has set himself off to the front end of them. To top it off his dam is the 1177Y Cooper donor cow that is a direct daughter of their great 440P cow. What a great combination of phenotype, EPDs, and cow family in this powerhouse.

TOP HERD BULL PROSPECT

6248D is a bull that just grows on you the more you look at him. He is a soft made, deep ribbed, well marked bull with a tremendous hip on him. He is moderate framed and easy doing and built really nice up through his front end. He is a maternal brother to the Lot 6007D bull, and you have to appreciate how great the 6033S cow has worked with different sires. Loads of potential here and he is the right kind!

6250D is the heaviest bull on adj. 365 day weight that we have ever produced. He has been exceptional from day one and has never looked back. He has tremendous length, volume, and overall capacity and he always surprises you when he steps on the scale. He has huge goggle eyes on both sides, is red to the ground, and has great testicular development. He is out of the 1126Y donor cow that produced over \$140,000 in progeny sales in our 2016 Sale and has had 2 flushes sell for over \$20,000 each. If you want to add pigment, explosive growth, and cow power to your herd, this is the bull to buy.

- ◆ #2 bull in the sale on YW EPD
- ◆ Top 3% on YW EPD
- ◆ Top 5% on M&G EPD
- ◆ Top 10% on WW EPD
- ◆ Top 25% on REA EPD
- ◆ There is a pending deal for the Australian semen rights that will be at buyer's discretion if they want to go forward with it. All revenue will go to the buyers. Call for details.

POWERHOUSE INDUSTRY PERFORMANCE BULL

6256D may have checked more boxes on individual performance and carcass than any bull in the sale. If you want to add explosive growth, feed efficiency, carcass quality, and maternal strength then this big footed, rugged made, soft sided, great haired, eye appealing scamp will do it. He is the #1 bull on NR and YR, WW and YW EPDs and the #2 bull on adj. REA and REA EPD in the sale. He has great neck extension, exceptional volume, and is deep flanked and powerful through his rear quarter. This bull reminds me a lot of the 6375 Cooper bull but with even more eye appeal. We all know what a great sire of breed changing sons that 6375 was, and I think that 6256D has that same potential.

- ◆ Ratioed 116 on REA and 160 on IMF
- ◆ Top 1% of breed on WW, YW, Milk, and M&G EPDs
- ◆ Top 2% on \$CHB
- ◆ Top 10% on REA EPD
- ◆ Top 25% on MARB
- ◆ Dam has an avg. NR of 108.2 and avg. YR of 109.2

HERD BULL PROSPECT

This is a great mating with a son of the 440 Cooper cow mated with a daughter of the 5139R cow. Nothing like having 2 of the most noted cows from both our programs right up close in the pedigree. 6258D is deep sided, well marked, and extra long with good muscle expression. He is moderate BW with excellent EPDs across the board. His dam is another top daughter out of 7034T and 5139R and had a perfect udder and red on her teats.

- ♦ Top 1% on Milk and M&G EPDs
- ♦ Top 15% on CED, WW, and Scrotal EPDs
- ♦ A maternal brother sold to L-W Herefords in our 2015 Sale and was also used at Churchill Herefords

18 MONTH OLD FALL BULLS

This is the top 30 out of 43 bulls born in the fall of 2015 and the quality is really deep in this offering with plenty of herd bull power in them. The average EPDs on this group is BW +2.0 WW +55 YW +88 Milk +31 M&G +58 REA +.20 MARB +.14. All of these bulls have AHA GE EPDs to increase their accuracy. Almost half of these bulls are ET calves out of some of our top donors. They will all add pigment, performance, carcass, and maternal strength to their progeny. They are big and stout and will cover a lot of country and breed a lot of cows.

TOP HERD BULL PROSPECT

This is a really interesting mating. We went back and used the 1045L bull that sold to Spencer Herefords in 2002. 1045L has proven to be one of the top carcass bulls in the breed plus he always sired loads of depth and fleshing ability. The dam is a daughter of the great 5139R cow so this pedigree has a lot of cow power in it also. 5322 is light BW with extra rib shape and capacity. He is short marked, thick made, and look at his outstanding carcass EPDs.

- ♦ Ratioed 104 on REA and 132 on IMF
- ♦ Top 2% on MARB EPD and top 20% on REA
- ♦ Top 15% on CED, BW, and Scrotal EPDs and \$CHB
- ♦ Maternal brother sells as Lot 6258D
- ♦ Retaining a 1/4 in herd semen interest

POWERHOUSE HERD BULL PROSPECT

5337C is a powerful performance and carcass bull that is rugged, wide based, deep through his flank, big butted, and eye appealing. We used him this fall on our young cows and he never missed a beat. You have to really appreciate his fleshing ability, overall capacity, and substance phenotypically, and then as a bonus you get the 6033S cow as his dam and a great set of EPDs. He is the top bull in the group on MARB EPD and \$CHB, and also has outstanding growth numbers combined with breed average BW EPD. He is the right kind, and we plan on continuing to add his influence to our program.

- ♦ Top 1% on MARB EPD and ratioed 123 on IMF
- ♦ Top 2% on \$CHB
- ♦ Top 10% on YW, Milk, and M&G EPDs
- ♦ Maternal brother to Lot 6007D bull
- ♦ Selling 1/2 interest and 1/2 possession and 100 units of semen

PICK OF FLUSH #1

Here is an incredible opportunity to buy a foundation female. These heifers are maternal sisters to the great 055X cow at Cooper Herefords, and we all know the track record she has put up over the last few years. There are 2 heifers out of the 4082B bull that has done such a great job of breeding. This pedigree adds in the 4126P Cooper cow also and combines power, eye appeal, and tremendous maternal strength. 1 heifer is sire by 1013Y so you get the bonus of adding the great 5139R and 7003T cows in the pedigree. Either mating should be a slam dunk for a future donor female with the potential to be every bit as powerful as the 055X cow.

Due to some bad weather we were unable to get pictures of these heifers in time for the catalog. Please check out their videos when available. We will also try and get pictures and have them on our website.

YEARLING HEIFERS

Once again, we are proud to offer a group of our yearling heifers. This is a tremendous set of females with quality all through the offering. Many of these heifers have the potential to be future donors and foundation females to build your herd around. They have excellent EPDs with averages

Average EPDs for this group CED +2.8 BW +2.8 WW +53 YW +86 Milk +31 M&G +58 REA +.22 MARB +.06

The average heifer in this group ranks in the top 4% of the breed on Milk EPD and the top 10% on M&G EPD. We feel this is a real testament to the maternal strength of our breeding program, and the value that there is in this group of heifers to help build your cowherd.

4036B

Big time donor potential in this powerful young female. 4036B is a full sister to the 4052B that sold for \$30,000 in our 2015 Sale to Flying S Herefords, and that we have used in our program. She is perfect uddered, well marked, high volume, and has exceptional EPDs. This is a great young female to add to any herd!

4048B

They don't get any more powerful than this 1161Y daughter. 4048B is extremely long bodied, great fronted, and has extra bone and substance. She has a great udder, and is a full sister to the 4082B bull that has worked so well in our program. A full sister sold for \$17,500 in our 2015 Sale and has turned into an incredible young cow for Bill Wilhelm. We really hate to see this young cow go but help yourself to a female that has donor written all over her.

- ◆ Avg. NR of 105

FALL PAIRS

Once again, we are pleased to offer you some of our fall heifer calf pairs. There are some real elite young females in here along with a great set of heifer calves. These calves are all sired by the 2 215Z sons that we purchased from Cooper's or by the 1013Y bull. They should make excellent females. We are selling choice on these pairs. Buyer has the option of taking the cow or the heifer calf. Also if the buyer wants to keep the pair together, they will have the option of doubling the bid and taking both. Females are exposed to CL 1 Domino 420B or to the HH Advance 5337C bull that sells as Lot 5337C. Check out the videos on these pairs. They are a great set.
