Welcome to the 2015 edition of Mohican West & Guests.

We are again delighted to have Fred and Doreen McMurry and Mark and Della Ehlke and their families join us in presenting this outstanding offering of cattle.

This is young, productive offering of Hereford cattle that are just reaching their prime years. The animals offered this year have many productive years ahead of them. The EPDs are as good as you will find anywhere and the cattle in the offering match the EPDs.

Our featured herd sires that are being offered are Mohican Top Shelf Z1 and TDP Crossover Z400. A one-half interest and full possession will be offered in one of these proven young herd bulls. The calves by Top Shelf are very impressive. Be sure to look up Lot 24A, a Top Shelf heifer calf that is a super show heifer prospect and also Lot 11 and Lot 26A, powerful herd sire prospects. Lot 35A is a typical Crossover daughter. They are so complete, correct and eye appealing. They will make great cows.

A special feature this year will be the top end of our bred heifers. We have never done this before and look forward to having you evaluate these special heifers. None were held back. We offer you our best.

We feel the offering is a power-packed one and one that will have something for everyone. We appreciate the support and confidence you have given our program the last several years. We have had many favorable comments from buyers of our cattle. Please give us a call with any questions you might have. We look forward to having you with us sale day

One of the very best sons of Trust and the proof is in his set of calves. His donor dam sold in our 2014 sale to Mead Cattle in Georgia. She has been one of our very consistent producers and will be a major part of the genetics of our herd for years to come. Top Shelf is stylish, deep, soggy and fully pigmented. He is athletic standing on a big foot with a sound set of feet and legs. His EPD profile is incredible and he will leave a beautiful set of females.

Crossover was Reserve Division Champion at the National show in Denver. He exhibits the ultimate attractive look as he is dark red to the ground with perfect markings and pigment. His offspring have that same attractive look, are easy calved, and perform well. Reports from those who used Crossover A.I. are extremely satisfied. His dam and grandam are from one of our most predictable cow families. He will leave top replacement females and sons that will be easily marketed. Keeping with our tradition of offering one of our top young herd bulls in our sale we offer you choice on two of our best to date.

• This is a big bodied broody cow prospect backed by our donor 107L cow family. She is the donor we own with Eric Walker in Tennessee.

She is a flush sister to lot 4 and both can start a breeding program or add quality to an existing one.

Pasture exposed to Mohican Brick M13B from April 20 to August 1, 2015. Observed bred April 24th. Safe in calf.

His dam was our lot one in our 2014 sale selling for \$62,500 to Upstream Ranch, Bill Grubbs and Hidden Oaks Ranch. She is a full sister to famed herd sire, TH 223 71I Victor 755T.

This combination of Top Shelf and 404X has created a massive calf that has that masculine herd bull look. He is stout, big volume, deep and wide.

His EPD spread will be accepted industry wide and his daughters will head cowherds wherever you find them.

Birth weight 85 lbs.

A maternal brother to Lot 1, "Top Shelf".

His dam is now a donor for Mead Cattle in Georgia. She is one of our best ever with an MPPA of 110. She is as productive as she looks.

This calf is all bull...really masculine, muscled, full of guts and designed to be a real breeding bull. His pedigree on the sire side is different for us but very popular industry wide. This guy will sire salable bulls and build a cow herd.

Birth weight 86 lbs.

*Mohican Carmel 6X
Dam of Lot 13*

*Grandview CMR 1L Mattie Y490 ET
Full sister to the dam of Program A431*

• We acquired an interest in this young sire because we love his look, quality, pedigree and EPD profile. His sire is a proven powerhouse female producer and one who leaves bulls accepted by the commercial industry. His cow family is perhaps the strongest at Ward Ranch with Ladysport Dew 78P being the maternal grandmother. His dam, 66X was the top selling heifer calf in Ward's 2010 production sale at \$62,500. Both here and at Mead Cattle we expect exciting things from "Lux".

• Co-owned with: NJW Polled Herefords, Mead Cattle and Pablo Herrera.

• This is a big, stout, large footed son of Nasdaq that we selected to replace his sire as our walking bull. He is deep red, fully pigmented and loaded with muscle. His dam is the "key" as she is a moderate frame, big volume female with a perfect udder. She is very fertile and her genetics are known for their ability to turn grass into meat with little expense. What could be more important in today's world. He has more than lived up to our expectations.

• Co-owned with: Cottage Hill Farm and NJB Limited.

Birk

DR MW Trask Grassmaster W02

Lots 37-54

Once again this year, Dale selected these heifers. They came out of a group of 65 head. This group of sale heifers are a real snapshot of our program and again, we will let these heifers "tell their own stories".

Lot 55--MC 751 100W Daydream 1322

MC
McMURRY CATTLE
 Billings, Montana

Lots 55-60

The McMurry Cattle program utilizes available dryland pasture and haycrop forages. Chelated minerals and salt are available at all times. The cattle have to maintain good condition on what is available. Our program is polled except for sampling of particularly desirable horned bloodlines. We cull heavily each year.

Extensive AI and ET are used in the breeding program. An occasional bull calf is retained after weaning for use as a herd bull. Home raised bulls are from the top of our production and are docile individuals. Purchased herd bulls are outstanding individuals that carry traits important to program development.

Replacement females are bred to calve at two years of age. Ultrasound carcass data is collected on all yearling bulls and females. We have selected for marbling and tenderness for many years. We do not retain cow families with history of calving difficulty.

The mature cows offered for sale in 2015 have been tested negative for BVD, Bovine Leukosis, Johnne's Disease, and Neospora. We blood tested for pregnancy at 30 days following AI service and all sale females were ultrasound evaluated July 06, 2015, by Dr Beck.

Calves of both genders are evaluated carefully for potential seedstock use. Only those individuals of promise are retained. The cattle selling are females that would work in our program were it not for the sale.

• The LB 38L cow family is loaded with DOD females. Daughter WSF MC NICKY 751 remains in the nucleus of our herd. Her calves tend to have below average birth weights. She brings in a good calf every year. We have used a son of 751. Trust 100W daughters are earning a lot of respect. The 1322 two year old Trust 100W daughter is well bred top and bottom. She is a front pasture type of female and is doing a good job with her calf. Her udder is the kind that will hold up for a long time. Safe in calf to MC NORTHERN LIGHT 70X 1489 ET, 43522564, verified by ultrasound by Dr Beck with a projected March 12, 2016, calving date.

• Unassisted, BW 96, she is sired by MC 9119 G152 VICTOR 1315, a bull that we used on heifers last year. His sire, Destin Exclusive 77U G151, is a full sibling to the great P70 cow, made famous by CES and Walker. His dam is a Nasdaq P316 daughter of MMPH JEWEL B8. Destin Exclusive 77U G151 tends to moderate cow size. Calves are conservatively marked. The daughters in production here have attractive udders and are doing a good job raising their calves. This is a uniquely bred heifer with great promise. Longevity and soundness run deep in this family.

• This predictable young female is from the heart of our herd. She exhibits an attractive, level udder. She has settled three times to first AI services. There is a long list of breed leading females in her pedigree. She is easy to look at and carries the service of Anchor 11X, 43079478. The anticipated due date is Jan 29, 2016, per ultrasound by Dr Beck. AI service date 4/23/15. Dr Beck has provided ultrasound services for us when available over many years. His work is exceptional.

We acquired an interest in Anchor 11X after evaluating his progeny and daughters in production. This bull is producing highly marketable offspring. His bull calves are in great demand. Calving ease has been exceptional. He is powerful and maintains easily.

• BW 96, unassisted, she is an outstanding brood cow prospect by Square-D Mr Beef 465A, Res Calf Champion, Canadian Agribition. We purchased the US semen rights on 465A because of his impressive phenotype, docility, the many top females by his sire, Ranchman, and his impressive dam, now a proven herd bull producer. This is an outcross bloodline for the US. It promises to enhance the qualities we are seeking in our breeding program. This heifer is beautifully marked and structurally correct. She will be easy to look at in production.

• This Durango 4037 two year old is a low birth weight, calving ease resource. Quality udders and strong fertility are features of multiple generations of quality females in her maternal pedigree. She calved unassisted and is safe to herd sire NJW 144Y 22Z BIG MAX 56B, 43483082, a balanced maternal and performance Max 22Z son out of a top P20 BEEF 38W daughter. Anticipated calving date is Feb 20, 2016, per ultrasound by Dr Beck.

• BW 76, unassisted, she is sired by the sought after young outcross sire Whitehawk Precedence 342Z. This brood cow prospect offers enhanced calving ease with individual birth ratio of 88%, along with strong milk, above average fertility, exceptional marbling and above average dollar index EPD's. This female is a herd building, balanced trait resource.

• This female carries genetics for balanced production and carcass traits along with excellent calving ease, and added maternal value. She is doing a good job with her heifer calf. Her sire produced calves that came without a single problem. He worked well on heifers. Daughters in production are moderate, productive females that do a good job. With the combined influence of Ribstone 157K, of E Braxton 719 and Legend 242, good things should happen. This is a home made pedigree simply using proven genetics that are out there. The cow is young and predictable. MC 1264 is safe to AI service to KCF Bennett M326 S342, 42763176, now one of the highly proven balanced trait bulls, excelling in fertility and udder quality. The pregnancy is confirmed via ultrasound by Dr Beck. Due Feb 01, 2016. AI date 4/22/15.

• BW 82, unassisted, she adds some highly proven, herd bull producing females from the top end of the THM program, notably 3043, 1026 and 9036. Her sire, MC 3043 6056 SOLUTION 1390, has produced beautifully marked, easy calving offspring. We are anxious to see his daughters in production.
