Welcome to our NJW 2015 Bull Sale!

We have developed our Genetics by using bloodlines that fit our environment and that will produce both bulls and cows that equally earn their keep. Our focus is and always has been to raise bulls for Commercial Cowmen and doing so with the belief that the "Balanced Trait" approach is the right one. The genetics you choose today will have a long term impact on your herd and, as purebred breeders, it is our job to provide you with the highest quality, honest, predictable and proven product as possible.

The bulls in this sale are a balanced, efficient, forward moving set of "Genetic Tools." The average EPDs of NJW Yearling Sale Bulls are...

BW	WW	YW	MILK	M&G	SC	REA	MARB	CHB
2.5	52	84	25	51	.96	.52	.12	\$27
35%	35%	35%	20%	25%	30%	15%	30%	20%

These bulls were raised on Wyoming Range and their mother's milk ...ONLY (no creep)! They posted an avg. Actual BW 85 lbs. (scale weighed) and avg. Backfat .19. We develop our bulls to improve longevity and winter them here at the ranch on a limited amount of 16% grower pellet and free choice, long stem grass hay.

As you look at the dam pictures, keep in mind that a good share of the pictures were taken at the end of the summer, a few days prior to weaning. By this time, the two year olds are starting to show that it's time to wean!

This calving season saw our first 8Y and 10Y daughters come into production. Fall will tell the whole story, but right now, we are seeing beautiful, easy doing, big bodied, young brood cows with wonderful udders and plenty of cream in their milk! Come breeding time, 8Y and 10Y are going to be seen over and over on our breeding charts. They just can't be beat for their added depth of body, doing ability, thickness, soundness, disposition and their consistency in breeding that on! Trust 100W continues to give us great, hard working females and highly marketable, high performing bulls. Daughters of Trust and 38W are raising their third calves this year and it is evident they are on their way to being the nucleus of our cowherd.

We are so fortunate to have Cody Chabot working here ...he is such an incredible asset to our program. His wife Shawna applies her talents here doing the sale bull and Denver cattle prep as well as videoing sale cattle.

Bell turned 16 last summer so we don't get to drive her to school anymore. She is doing some great leatherwork and has again made a belt for the buyer's drawing right after the sale. She only has one litter of pigs this year so we are enjoying her extra help calving.

Thank you from the heart for your interest and trust in our program! —Ned, Jan & Bell Ward

EPDs

EPD's are an estimate of an animal's genetic worth for that particular trait. An EPD is expressed in the units of measure for that trait. EPD's are based on a combination of performance information from an animal's pedigree, individual and progeny performance. EPD's can be used to predict one animal's progeny performance compared to another's progeny. EPD's can also be used to compare the genetic worth of one animal to the overall Hereford population average and distribution. Each calculated EPD has an associated accuracy value.

Over the past few years, the American Hereford Association has worked with Hereford breeders and the scientific community to develop and incorporate Genomic information into National Cattle Evaluation (NCE) to enhance the predictive power of EPDs. Genomic Enhanced EPD (GE-EPD) allows commercial and seedstock producers the opportunity to make selections and mating decisions based on the most current and accurate information of Hereford Genetics. The AHA utilizes a 77K, High

Density (HD) panel that was built off of high accuracy Hereford sires. Each animal that is tested has an updated set of EPDs and corresponding accuracy. For some traits, the added accuracy will increase by 100%, and moving from .15 to over .30 means you would be adding from 5-10 progeny to a pedigree before an animal has any progeny analyzed. The use of this information reduces your risk when buying, and helps to plan matings based off of all information available.

What are the advantages of GE-EPDs?

- Much higher accuracy EPDs for unproven cattle
- Provide reliable EPDs for traits that are difficult to measure
- Faster generation turnover with fewer mistakes
- Simple, easy to interpret results with "all-in-one" value

What are the value of EPD accuracy?

- Faster rate of genetic progress
- Feed and labor cost savings in seedstock development
- Opportunity cost of making the wrong decision
- Value of time in relation to earlier selection and more information for marketing and customer relations

All bull have been BVD PI tested through Newport Laboratories. All bulls are on an aggressive vaccination program, including Newport Laboratories' autogenous pink-eye and foot rot vaccine.

GENERAL INFORMATION

Sale Location:

Sale located at Ward Ranch ...2.5 miles North of Sheridan, WY ...off I-90 Exit 20, turn right on Hwy. 338 for 2.5 miles to the ranch on the right.

Airports:

Billings, MT ...125 miles from the ranch; Sheridan, WY for private planes and served by Great Lakes Airlines.

Motels: Sheridan, WY ...ask for NJW Bull Sale Rate

Holiday Inn • 307-672-8931...**call by 3/27 for \$84 rate**
Best Western Sheridan Center • 307/674-7421 **\$64 rate**
Hampton • 307-673-2734

Terms: Cash or check. Each animal to be sold to the highest bidder. The auctioneer shall settle any disputes as to bids. All cattle are to be paid for by the purchaser during or immediately after the sale and will not be released until settlement has been made. Each animal becomes the property of the buyer immediately after the animal is sold. Any death or injury thereafter falls upon the buyer. **Announcements concerning the cattle at the sale ring by the owners or the auctioneer will take precedence over statements in this catalog.** All persons attending the sale do so at their own risk. Neither the owners, nor any person associated with the sale, assumes any liability, legal or otherwise.

Guarantee: All animals in the sale are guaranteed breeders. If any adjustment is required, it will be made with a replacement animal of equal value to the animal in question or credit will be given on the purchase of another animal.

Health: All sale bulls have passed a Breeding Soundness Exam. They have been BVD ear notched and tested negative. **Health certificates will be furnished for shipment anywhere in the U.S. Since each State has different regulations on bulls coming from Wyoming, not all bulls will be able to get a Health Permit to go to every State on sale day!**

All sale bulls have received a pre-breeding booster of Bova-Shield Gold FP L5 HB, a dose of Vibrin and a booster of our Autogenous Pinkeye / Footrot Vaccine as well as poured with Dectomax.

All bulls have been DNA tested through the American Hereford Association and are free of all known defects recognized by the AHA as of March 31, 2015.

Delivery: Free delivery within 300 miles. Receive a \$50 discount per bull that you haul home on sale day. For delivery assistance, call John Chaffee 406-855-5821 or Bob Woolsey 406/671-0228.

Take Note:

- Each bull's Lot # is same as his ID #
- Bulls sell in catalog order unless changes announced Sale Day
- Birth weights are actual and calves are scale weighed
- All sale bull photos are untouched
- The CSC Prefix bulls are owned by Cody & Shawna Chabot and are managed as part of our program.
- In case of inclement weather, please call or refer to website for any changes.

- A big, powerful performance herd bull that we retained possession of in our 2013 sale. With extra length, performance, muscling, style, balance and loads of body depth, he was chosen for the flawless udders his sire 28M offers as well as the extra depth and efficiency from his maternal grandsire 4037. His modest-sized, super deep ribbed dam knows how to work and still take care of herself. His 2014 calf crop had an avg. BW 87 lbs., adj. WW 618/ NR 104 and his yearling bulls adj. YW 1113/ YR 100, scrotal 37.9/ ratio 104. We have a beautiful set of yearling daughters with one chosen as "The Pick of our 2014 Heifer Calves."

• A Progressive Genetic Tool and full brother to Hometown 10Y and Homegrown 8Y! The 73S x W18 mating left us with the strongest, most consistent group of offspring we have ever had. Every one has been a standout with that extra shape, style, substance and power, yet not too rugged a bone or too much birth. Another plus, the 8Y and 10Y daughters are calving and doing just what we hoped for!

This is one of my favorite bulls, the kind we are striving to raise. Like his brothers, he is balanced on paper and balanced in the flesh!

NJW

POLLED HEREFORDS

**PERFORMANCE BEEF CATTLE
FOR THE BREED AND
INDUSTRY!**

**BULL SALE ...TUESDAY
MARCH 31, 2015**

AT THE RANCH • SHERIDAN, WY

It is our firm belief, when Breeding Cattle, the "Balanced Trait Approach" is the right one! We want as much performance as we can get while maintaining that "Critical Balance" of calving ease, cowherd and feedlot efficiency and proven carcass value. All the while, never forgetting the "Unmeasured Traits" of structural soundness, udder quality and attachment, mothering ability, strong vigor at birth, disposition, fertility and longevity.
