330A may be the most complete and eye appealing sire we have ever owned. His first calves were our top indexing at weaning with better than a 105 index. They are thick, clean made and very correct. His dam, 617S, is the bonus: she's a big, roomy cow with a perfect udder. His sons are standouts, his daughters are eye openers.

Welcome Cattlemen and Women!

We have had a tremendous year in this part of the Nebraska Sandhills. Rain ended up coming just when we really needed it, and our pastures hung in there and rewarded us. Our 2016 calves are the heaviest we have ever weaned.

Our big yearling bulls have come off our native pastures weighing 121 pounds heavier than in the past, and as always here that is without extra feed - only grass - from mid-May through mid-October.

For this sale we are offering many of our top replacement heifers from each sire group. This is one of those great times when all Sires really seem to be clicking and the proof is in their sons and daughters.

We work 12 months of the year to provide this production offering to you, and we think about what you want during all those seasons. A sale preview was our stop on the September 2016 Nebraska Hereford Tour which proved to be one of the best Nebraska tours in many years.

Make a note to yourself and plan to come to our sale on Thursday, February 2nd. We'll eat at noon and start our sale at 1 pm Central Time. You are always welcome to come visit us and see our cattle any time - just call ahead and we'll be glad to show you around.

And if you make it to Denver for the National Western Stock Show, look us up in our Carload Bull pen. We look forward to seeing you soon.

Sincerely,

*John & Mary and family*

*Bred heifers last August.*

### Sale Day Ear Tags

We have again scored every bull in our production sale for Calving Ease and have placed this score on his ear tag and in this catalog by each animal's pedigree.

We believe this will help you in selecting for bulls to use on first service for your heifers.

Also, if the tag remains in, you can easily choose and remember these bulls at turnout time in subsequent years without referring to your catalog.

*Here are examples of the 4 types of tags a Bull will have. Page 2 also has our Heifer Bull explanation.*

2 Stars = Extremely desirable use on Heifers.

1 Star = Recommended use on Heifers.

No stars = Not a Heifer Bull.

## Regarding our sale cattle footnotes:

We are extremely particular in our comments about our cows being designated as **Dams of Distinction**.

SOD = Sire of Distinction  
CHB = Certified Hereford Beef  
DOD = Dam of Distinction

The long box at the bottom of each Sale Lot shows the Dam's respective progeny records, or ratios, by percentage and by the number of calves they have raised. A 97 index on Yearling means they are below average for Yearling Weight. A 102 index for Weaning indicates they are above average for Weaning Weight.

Photos were taken late November.  
Videos were filmed mid-January.
