AUCTIONEER: Lynn Weishaar, Reva, S.D. 605-866-4670 or cell 605-641-6278

SPECIAL COMMENTS:

Spencer Hereford genetics are focused on cowboy logic to provide you with optimum returns, less labor and less maintenance. Our target is less birth weight and moderate frame with increased muscle and depth of body. Your #1 source for low and moderate birth weight bulls.

TERMS & CONDITIONS:

Terms of the sale are cash. Every animal will be sold to the highest bidder with the auctioneer settling disputes as to bids. Announced changes on catalog information on sale day take precedence over printed material in this catalog.

All cattle are the buyer's responsibility as soon as sold and will be cared for a reasonable length of time at the buyer's risk. The sale management, owners, nor any person connected with this sale do not assume any liability, legal or otherwise.

DELIVERY:

Free delivery on bulls within 300 miles. \$75 off per bull if you haul. No delivery on the heifers.

GUARANTEE:

Bulls guaranteed against first breeding season injury. All females guaranteed pregnant the day of the sale. No other guarantees are implied. Every animal in the sale is, to the best of our knowledge, free from any disease or defect. Any known defect will be called at sale time.

HEALTH:

Herd health is excellent. Individual health papers will be provided for shipment anywhere.

GENETIC DEFECTS:

The herd sires have been tested for IE (Ideopathic Epilepsy). All the sale bulls are out of negative IE parentage or were tested negative for IE.

ANNOUNCEMENTS:

Check our website for updated information at www.spencerhereford.com

LIABILITY:

Any person attending the sale does so at his/her own risk. The sale management, owners, nor any person connected with this sale do not assume any liability, legal or otherwise.

REGISTRATIONS/TRANSFERS:

Registration certificates will be transferred to buyer upon request at seller's expense. When making settlement, buyers must give complete written name and address.

INSURANCE: Jim Gies, Harding and Harding Insurance, 970-454-3836

VETERINARIAN: Chris Finney, DVM, 402-387-2311, Ainsworth, Neb.

SPENCER HEREFORDS

Hereford Average EPDs

BW	WW	YW	MM	M&G	FAT	REA	MARB
3.5	45	74	18	41	0.002	0.27	0.05

UNDERSTANDING HEREFORD EPDS

BW (Birth Weight): Derived from the actual birth weight ranking within the contemporary group where the calf was born. The first BW EPD issued for a calf is the average of the dam and the sire, with an adjustment made from that number to reflect the actual birth weight of an individual as compared to its contemporary group average. An actual birth weight that is exceptionally higher or lower than the average of its contemporary group will change that individual's BW EPD accordingly. The BW EPD is primarily changed when progeny have been recorded from the subject animal and the accuracy becomes much higher. The birth weight is adjusted according to the age of dam. The BW EPD has no correlation to an actual birth weight (an 85 lb. calf can have a BW EPD of 4.5 or 5.5 or 6.5 or even a 2.5 in different herds). A lower number is desirable and indicates less expected birth weight.

WW (Weaning Weight): An EPD to measure the growth genetics up to weaning age (205 days). This growth EPD is derived from the weaning weights turned in for contemporary groups. This EPD is generally very indicative of the growth up to weaning age, based on the genetic history of the animals in the pedigree. Actual weaning weights are adjusted for the age of dam. Weaning weights have been taken and recorded more than most any other EPD trait. The accuracy is important to the possible changes of this and all EPDs. The WW EPD has a significant effect on YW EPD as well.

YW (Yearling Weight): An EPD to measure the growth from weaning age to yearling age. The YW EPD is tied to the WW EPD; the growth of the individual through yearling is affected by weaning weight. This EPD

will be fairly indicative of the genetics in the pedigree as we in the industry have taken weaning and yearling weights as actual measurements longer than many traits measured and with fewer adjustments. The accuracy is important to the YW EPD as to the amount of possible fluctuation that may occur.

MM (Maternal Milk): An EPD derived from weaning weight to measure the milking ability of the individual. MM is that part of WW due to a dam's milking ability. A proven bull's milk EPD is derived nearly 100% from his daughters in production. When a bull is born, his MM EPD is the average of his sire and dam. The EPD has low accuracy and will change according to how his sire or dam may change. When his daughters go into production, the way they produce in their contemporary groups, either by being above average or below average, will change the sire's MM EPD accordingly. At this point the accuracy will go up, which gives a truer picture of the bull's actual ability to genetically pass milk to his progeny. A proven cow's milk EPD is derived from her own production and her daughters in production. A cow's own production contributes to less than 50% of her own MM EPD. Her daughters in production contribute over 50% to her own MM EPD. The MM EPD has much more meaning for bulls and cows old enough to have daughters in production.

M&G (Maternal Milk & Growth): This EPD is $\frac{1}{2}$ of WW plus MM = M&G. This EPD is sometimes referred to as Total Maternal or Combined Maternal. This is an EPD that reflects the combined WW and MM EPD. It reflects the growth to weaning age plus the milk production to weaning time. It is an estimate of daughters' progeny weaning weight.

2013

Welcome to our 54th annual sale. What a difference a year makes. A year ago we were feeling the effects of one of the worst droughts this area had seen in decades. In fact, here locally and in much of the Sandhills, even in late May this year we were preparing for another bad summer, and many producers were cutting numbers, preparing for the worst, and suddenly we were blessed with moisture.

Now in the fall of 2013, the forage situation has totally changed, feed prices have dramatically decreased and we are blessed by record cattle prices!

It's a good time to be in the cattle business and we should all be preparing for some good years ahead! As we prepare for this sale, I am extremely excited by the set of bulls we are offering. This set of bulls is uniform, sound and loaded with muscle and quality. They reflect our long-term commitment to carcass traits and productive and problem free females.

Additionally, we have focused on outstanding calving ease coupled with the best performance we can find! I am a strong believer in the value of hybrid vigor and our focus is on providing the genetics that benefit the Hereford breed, as well as those I feel best compliment the Angus breed. Hybrid vigor simply works and it adds value at every step of production. In addition our focus has been emphasizing moderate framed cattle that are easy fleshing and thick made with exceptional dimension, cattle that have the rib and capacity to convert forages without high input!

This set of bulls has had no silage, no corn and developed on a ration that ultimately sets up bull longevity, soundness of feet and the ability to adjust to whatever environment they are thrown into. Tim Iverson from Long Pine called me a couple of months ago and said it was time for new bulls. His three Spencer Hereford bulls were 9 years old! The reason we don't shove feed down our bull's throats is to benefit our customers!

Added value and reliability is one thing I aim to insure that our customers and friends get with Spencer Hereford genetics!

My fall has been consumed chasing Jacy's volleyball games, keeping track of Mitchell's first year at Lincoln, taking in Trey's graduation at MOS School in 29 Palms, Calif. and a small additional responsibility as President of Nebraska Cattlemen. Which was a year!

I thank my friends and customers for the steadfast support of my program and look forward to presenting this set of bulls to everyone! This offering is smaller in numbers, but visitors are impressed by the quality!

Thank you for your interest. Call me anytime!

Dale Spencer and Family

- Attractive, well marked bull that's behind due to his youth. Weaned at 120 days of age against much older cattle. Dam may be my favorite cow on the ranch!

NOTES

SPENCER HEREFORDS FALL CLASSIC 2013

PROFITABULL

Enough said.

There's no doubt about it, a registered Hereford bull pays in so many ways — a user-friendly package of docility, stronger fertility and calving ease that sires calves with hybrid vigor and feed efficiency that demand a premium. To learn more about the Hereford-sired advantage or to find a Hereford breeder near you, visit Hereford.org/profitabull.
