THE POWER OF **BLACK.**
ONLY BETTER.

HEREFORDS—THE EFFICIENCY EXPERTS

Adding Hereford genetics to your herd makes perfect business sense in a cost-driven economy. Excellent conversion, hardiness, fertility, longevity and even disposition can help reduce input costs. These Hereford efficiencies are ideal for your herd, your business and your plans for the future. Low-maintenance cattle, long-term profit. Now that's power.

American Hereford Association • P.O. Box 014059, Kansas City, MO 64101 • (816) 842-3757 • www.hereford.org

A Common Sense Approach to Genetic Excellence

Fellow Cattlemen,

It is with pleasure that we invite you to our 16th annual production sale. We've expanded our embryo transplant program which has allowed us to include an additional 30 bulls to our 2016 offering. This growth in numbers is based on front end genetics resulting in more, higher-quality bulls. The 2016 offering is designed with over 60 calving ease bulls, as well as several performance-oriented sire groups.

The females selling are backed by some of the most elite donor cow families TH has to offer. These females are off the front end with nothing held back. The pairs are the 1st 11 females with heifer calves due in 2016. This was the simplest way to offer an "uncut" version of our genetic base. The 2016 female lineup provides donor-quality pedigrees out of prominent cow families that can be cornerstone-type building blocks for your operation.

The demand for Hereford-influenced cattle is as strong as ever. It has become clear that leaving pay-weight on the table isn't optimal. There is a growing spread between marginal cattle and quality cattle in the market and because of the squeeze on margins, feedlots are demanding healthier, thriftier, better cattle. Crossbreeding provides that type of cattle. The longevity, efficiency and fertility of the Baldie female, coupled with the health and vigor of their calves, are causing replacement Baldie females to top markets around the country. Hereford-influenced cattle are working hard for your bottom line.

With all of that said, TH understands that the success of your breeding program is heavily reliant on your marketing and management options. So we work hard to deliver more than just progressive Hereford genetics. We offer several outlets for your feeder steers, including a Forward Contracting option available through SB&B. What this year has taught us is that the tools offered are progressive but effective only when utilized. We are in year 3 of our Alliance with the Lerwick & Petsch families which resulted in LT Premium LLC. More and more of our progressive producers are opting to take advantage of these marketing tools to their benefit as well.

The relationship with the Lerwick & Petsch families involved in LT Premium heifer sourcing & development has been a tremendous experience. The desire to produce the best possible F1 female out there has challenged everybody from TH to TH clients to only provide their best. The integrity based on quality is certainly becoming a benchmark that is unparalleled. LT Premium has now added Angus heifers bred Hereford to their arsenal. These Angus genetics are sourced from some of the most elite Angus outfits that we have found. LT Premium has, without question, raised the bar on bred heifer production.

In closing, we invite your attendance at our sale on Friday, February 12th. We have always said that the sale is just the beginning - Purchase a Topp Herefords bull and you become part of the Program. Your TH bull purchase is a simple start to an excellent set of marketing tools. Plan on joining us Thursday evening for a social and informal question and answer meeting about your marketing options, followed by our annual cattlemen's banquet. We look forward to visiting with you and learning more about your operation.

- A famed pedigree of low birth, above average growth and exceptional maternal traits. 520X is a full brother to one of the most popular bulls of the modern Hereford era, 719T. 520X also has several full sisters that have been big hitters as lead donors for some of the most elite purebred ranches in the country such as 436X, a donor for Sierra Ranches, Calif., and Express Ranches, Okla.; and 512X, a lead donor for Bushy Park Farms, S.D. Prior to her sale to Bushy Park, 512X raised two of the last three high selling bulls for TH. Consider the exceptionally accurate, proven EPDs on 520X, or study his actual ratios of 99 BW, 104.3 WW and 103.4 YW.
- Selling full interest and full possession.

BECOME A
TH CUSTOMER AND
ENJOY THE BENEFITS
OF MARKETING YOUR
REPLACEMENT HEIFERS
THROUGH THIS UNIQUE
PROGRAM.

LT Premium LLC is a company introduced at the 2014 Topp Herefords sale. It is a collaborative effort of the Lerwick Family of Southeast Wyoming, Y6 Feeders, and the Petsch Family of Meriden, Wyoming, and Topp Herefords and their customers.

The synergistic enhancement of returns to all participants captures the benefits of crossbreeding and specialization efficiencies. The genetic advantages developed by Topp Herefords applied to quality herds produces excellent F1 females. The expertise and facilities of Y6 Feeders and the surrounding grasslands accommodate the efficient development of these heifers for sale to terminal cross beef producers and the return of purebred replacement stock to the F1 producers.

The first year of the program enjoyed the tremendous optimism of the beef industry allowing growth. Bred heifers were sold to producers from North Carolina through Missouri to Oregon and Texas through Nebraska to the Dakotas. The second year brought the development of Angus heifers for F1 producers and designated Angus herds to produce them. We also established a recipient program to serve purebred needs. The price adjustment in the industry was a challenge in fall marketing but has been managed by satisfied customers and risk management focus.

Quality and integrity will always be the foundation of the program as it grows. Evaluation of growth opportunities and the necessary organizational and capitalization issues will be the focus for 2016-2017. We are all appreciative of the relationships being developed and look forward to enhanced thinking, driving the program towards more efficient and profitable U.S. beef production.

Thank you for your interest and help.

- 475Z, without question, is the performance sire of the 2016 sale offering. 475Z's progeny are larger framed, very sound cattle with a bountiful amount of substance. Twenty-nine bull calves had an average BW of 92 lb. and 12 heifer calves had an average BW of 88 lb. Twenty-nine pure bred calves had an impressive actual WW of 851 lb. to ratio 102. His notable dam, 89T, has had an impressive impact on the breed in both the commercial and purebred segments. 89T has been one of the highest earning females at TH. Her 2010 bull calf, TH Untapped 425X, went on to be crowned the 2011 Canadian National Champion Bull. His progeny have proceeded to top sales around the country. Curtis Castle's recent success with 89T progeny is a continued tribute to her dependable genetics. 475Z's sons, selling as Lots 6-37, will only add to the history of what potentially may be one of the most proven Hereford females to date.

- 361C is a genetic combination of calving ease, performance and phenotype. 361C carries an explosive look along with massive rib shape and is extremely powerful in terms of his hip structure. He is large scrotaled, tight-sheathed and travels with ease. His stellar EPD profile is built on facts of time-tested genetics that actually prove their value. He had an amazing actual WW of 960 lb., touting himself as the #1 WW bull of his class. 361C's dam is sired by 11X that has made tremendous females of consistent udder type and can wean off a heavy calf. His second generation dam, 49U, is also the dam of the popular Select Sires bull TH 49U 719T Sheyenne 3X who is surfacing as one of the breed's most potent low-birth sires that also produces standout females. 49U displays lifetime ratios of 91.2 BW, 103 WW and 102.7 IMF. As one studies this pedigree, great females stand out such as 223, 89T, 16G, 71U, 49U and 23S. 361C covers all the bases in a very proud fashion.

- Retaining in-herd semen interest.

- Lots 7 and 8: 358C is an individual that intrigues us from both a physical and genetic standpoint. 358C is exceptionally long-sided, square-hipped and has a look of power and prominence. Another tremendous EPD profile that is backed by generations of proven cow families that validate his EPD tabulation. 358C's full brother, Lot 8, was raised on an average recip at best, but is also doing his part in holding his own with his full brother. Consider the \$ valuation of this pedigree. The two most profitable females in the history of TH, 89T and 71U, appear in this pedigree. Their dam is a full sister to the 2013 high seller, TH Mountaineer 420, who sold to Grassy Run, W.Va. The predictability of this pair of full brothers should prove to be a valuable asset to the most astute cattlemen.

- BW 81 lb.; Adj. 205-day wt. 846 lb. Eye pigment: LE 0/RE 100
- Retaining in-herd semen interest.

- This trio of full brothers stems from one of the finest uddered 17Y daughters to calve in 2015. It's hard to explain the detailed perfection that 17Y produces in the udder design and teat size of his females. Without question 17Y is the most potent female producer we have ever used in the past 20+ years. Lots 9-11's second generation dam, 702T, was ahead of her time in terms of udder type and performance.

- Retaining in-herd semen interest.

- 509C is a massive structured ET product of the popular 4A female that was purchased by Blair's Ag in our 2015 sale. 4A is a very tidy uddered daughter of Mr Hereford 11X with the very popular T90 behind her. The T90 female has produced numerous elite progeny for Sierra Ranches, Calif. The combination of calving ease and maternal makes 509C a very interesting prospect.

- 17Y is, without question, one of the most potent sires of all times to be used at TH. 17Y has impressive breed rankings, leading the breed in the top 1% for CE, CEZ\$ and MARB and top 9% for both UDDR and TEAT. Lambeau 17Y progeny also excel in terms of feed efficiency while doing a fabulous job raising their calves. 17Y male progeny are very aggressive breeders while also maintaining condition. 17Y has been used extensively on first calf heifers the past few years with great success. Progeny are born easy and are very aggressive at birth. As you analyze 17Y's EPD profile, note that 35 of 17Y's bull calves weaned off at an average of 751 lb., nearly 50 lb. higher than two other outside sires we used here at TH with higher WW EPDs but lower actual WW in their progeny. With the combination of EPDs and his actual performance in his calves, it's difficult to ignore the total package in 17Y.

- Recommended for use on heifers.

- Lots 38 and 39 are out of one of the most potent, maternal, growth cow families at TH. Express Ranches, Okla., purchased ½ interest in 3Y as a bred heifer. Although early in her production, 3Y produced the high selling female in their fall production sale. 67W, the second generation dam to Lots 38 and 39, has produced some exceptional offspring through the years as well. 67W has impressive lifetime ratios of 108 WW, 104 YW, 106.5 REA and 107 IMF. Lots 38 and 39 will be calving ease, while maintaining adequate growth and performance. We expect their daughters to be exceptional.

- BW 74 lb.; Adj. 205-day wt. 869 lb. Eye pigmentation: LE 100/RE 100
- Recommended for use on heifers.

- Lot 40 made history at Topp Herefords by recording the highest WW ever recorded by a first calf heifer. Not only did he wean off at 920 lb. to ratio 115, but he started with only an 81 lb. BW to ratio 93. 43C is truly a spread bull that has the ability to honestly lay down impressive low birth, matched with outstanding weaning weight.

- BW 68 lb.; Adj. 205-day wt. 827 lb. Eye pigmentation: LE 100/RE 100
- Recommended for use on heifers.
- Retaining in-herd semen interest.

- Lot 41 is yet another 17Y that offers low birth and high growth. 22C recorded the second heaviest weaning weight of all the first calf heifers, yet had an actual BW of 68 pounds to ratio 82. With the combination of 17Y and 3X in his pedigree, the genetics certainly back the high-end merit of this individual.

Shared Pedigree for Lots 52-55

- Lots 52-55 are genetically engineered for calving ease. Several generations on both the top and the bottom of their pedigree ensure these full brothers to be sleep-at-night heifer bulls. Consider the power of their dam, 143X, who records lifetime ratios of 95.2 BW and 102 WW.

Shared Pedigree for Lots 63-69

BOYD HOLLY 901 — DAM OF LOTS 63-69

- Lots 63-69 are out of 901, the very popular full sister to Boyd Masterpiece 0220. The predictability of this pedigree reads a wealth of low birth along with efficiency and maternal. 901 records lifetime ratios of 91 BW and 102.3 WW. TH has invested a substantial amount of stock in this cow family because we believe in their ability to infuse low birth, maternal traits that positively affect our bottom line.

SINNER BROS. & BRESNAHAN

Fellow cattlemen,

The last couple years have been difficult for us (feedlots) to buy cattle. The only way to buy the cattle was to pay the going rate and hope the market would go up, because if the market didn't go up, we'd lose money on the cattle and long term that just doesn't work. It surely doesn't mean we aren't interested in Topp sired calves. It just means it has to financially make sense. In 2015, when the market for cattle was so high, it didn't make sense.

We tried to be up front with producers, and in many cases suggested they might be better off going someplace else. Many producers commented that why buy Topp bulls when you aren't paying a premium? We responded that they were getting a premium; in fact the premiums were HUGE. In addition to the crazy upward moving market, heterosis, CHB markets, heifer options, extra growth and Topp Herefords genetics all added to increase the premium. Having Topp Herefords bulls added value to your operation.

In more typical markets, SB&B provides options that can be helpful to producers. A perfect example is forward contracting which protects you from when the market turns down. Sometimes forward contracting doesn't seem to make sense. Often times you have to give up something because the deferred contracts are lower than the nearby contracts. I wished I had forward contracted more corn and beans but I didn't for the same reason many of you didn't forward contract your calves. We thought it would get better. I had always hoped that when I was 60 I'd be smarter than I was when I was 30, but I'm not sure I am. Each year we have to decide if we should forward contract part or all of our crop/cattle.

At SB&B, over the years, we've done quite a bit of for-

ward contracting of producer's cattle. It isn't for everyone. Forward contracting is pulling the trigger early and being able to not kick yourself if the market goes up. If it does it's always painful in the bar or the coffee shop when others tell how well they did. But often times each business has different cost structures and profitability levels and being able to pull the trigger might mean the difference of making a profit or not. For us forward contracting producers' cattle is pretty simple: we run breakevens and add a small margin based upon the future live cattle contracts. We factor in some sort of slide for weight variation, trucking, etc, and give a bid. It works for us because normally we hedge using futures or options. It secures that our feedlot will be full and that we will have a margin. For you, it's knowing what you will get. It's defining if it works for you. It's being in control.

If you see the market moving the way you want and want to forward contract your calves, give me a call.

Tom Bresnahan

- 420A has greatly surpassed our expectations. His progeny are born with tremendous growth and eye appeal. 420A's progeny are short-marked with an abundance of eye pigment. They are deep-ribbed and loose-hided cattle that appear to be very easy feeding cattle. The actual avg. WW on 420A bull calf progeny was 818 lb., making him the #2 sire for actual WW. Rest assured these cattle will perform with the best of them with calving ease as the bonus.

- TH retained partial possession on this calf in our 2014 sale. 102A's ability to work on both heifers and mature cows is certainly an added bonus. 102A displays an exceptional look with tremendous fleshing ability. 102A's dam, 143X, is a tremendous milking donor female at TH with lifetime ratios of 89.7 BW, 103 WW and 103 YW.

- 86A was one of two 17Y sons that TH retained an interest in through the 2014 bull sale. 86A is from the same cow family as 755T and 409X. 86A's dam is a full sister to both Accelerated Genetics/Williams Hilltop sire 755T and Semex/Whispering Pines sire 409X. His dam has excellent performance ratios of 113 WW and 104.7 YW as well as 101 for IMF. Although small in numbers, the 86A group is high in quality.

- 400Z was used on specific donors in 2014 to produce specific results. Consider these breed ranking percentiles. 400Z ranks in the top 5% of the breed for both MM and MARB and the top 10% for BW. His well-known sire, 755T, ranks in the top 1% of the breed for MARB and CHB\$, top 2% for MM, top 5% for WW and top 15% for YW. His dam, 71U, who is also the dam of past sale toppers such as TH Mr Hereford 11X and TH Mountaineer 420A, just does so many things right.

- The pedigree on Lots 92-94 just tie so many great cow families into an exceptional blend of predictable BW, growth and maternal capabilities. These three full brothers will, without question, have a major impact on the future of TH genetics as we believe in the predictability of proven cow families.

- 3X has fast become one of the most popular low birth, high growth sires in the breed today. 3X ranks in the top 1% of the breed for CED, BW, WW, BMI\$, CEZ\$ and CHB\$. He ranks in the top 3% for MARB and SC and the top 5% for Milk & Growth (M&G). His first daughters in production were gorgeous-uddered with significantly above-average milk flow. His daughters are very easy feeding and their breedup was excellent. Very few bulls in the breed today put as many details together as well as 3X.

SIRE OF LOTS
105-115

- 145Y has served as the outcross, low birth, go to sire for TH for the past two breeding seasons. 145Y progeny were the #1 averaging sire group in the 2015 TH bull sale. His first daughters are coming into production and appear that they will be excellent producers.

- If you're looking to add pay weight, 14Z will do just that. 14Z has produced progeny that have been adequate on actual BW but outstanding on WW and YW performance. His exceptional dam, 512X, also the dam of last year's high selling bull TH 512X 145Y El Dorado 49B, has produced progeny that excel at every level. Consider her lifetime ratios of 87 BW, 108 WW and 102.5 YW. She now resides at Bushy Park, S.D., and will certainly write another chapter in her storybook career.

- 520X has been the #1 low birth-performance resident herd sire for the past two breeding seasons. His progeny are born easy with a world of performance. His progeny are short-marked and very easy on the eye. 520X displays lifetime ratios of 99 BW, 104.3 WW and 103.4 YW. 520X is a full brother to popular siblings 719T — Genex CRI herd sire, 504X — Select Sires, 521X — owned by an elite group of Canadian breeders, full sister 512X now owned by Bushy Park, S.D., and 436X now owned by Sierra Ranches, Calif. and Express Ranches, Okla.

- The dam of Lot 121 has most definitely been one of our most consistent producers over the past several years. TH has used both her 2013 and 2014 bull calves through our AI program. 191C's dam, 90U, records lifetime ratios of 97.3 BW, 105.6 WW, 101.8 YW, 104.3 REA and 106.5 IMF. Lot 121's second generation dam is a full sister to the well-known TH Tundra 63N. Lot 121 is short-marked, very attractive and will be an impressive female-maker with the added bonus of low birth and tremendous performance.

- 0220 has served TH as well as any outside sire used at TH over the past several years. His progeny are very dark and short-marked with an abundance of pigment. The growth on the 0220 progeny is excellent as well as their rib shape and muscle pattern. The first 0220 daughters are getting close to calving and appear to have phenomenal udder type and teat size.

LOT 133

- Lot 133 is one of the soggiest made bulls of the entire offering. 55C traces back three generations to the dam of 719T. His first generation dam, 455Y, has produced several significant male progeny that have been near the top of the last three sales. She records lifetime ratios of 107.7 WW, 106.5 YW and 108 REA. 55C recorded an impressive WW ratio of 105.

- Recommended for use on heifers.

Shared Pedigree for Lots 143-145

LOT 143

- Lots 143-145 are sons of the prominent donor 512X, now owned by Bushy Park Farms, S.D. 512X is a full sister to 719T and is responsible for two of the last three high selling bulls, TH Mountaineer 420A and TH Playmaker 14Z. Although a bit younger, this trio of full brothers should pose a very interesting package for the most astute cowman.

REGISTERED AND COMMERCIAL FEMALES

Dear Friends and Fellow Cattlemen,

Welcome to the third Topp Herefords Female Offering. I first want to take this opportunity to thank Ryan and Prairie and their entire crew for allowing me to be a part of their marketing team. The effort and passion that they put into this program is evident in the cattle they produce and I am excited to be involved in the merchandising of such an outstanding set of Hereford cattle and appreciate the friendship of Ryan, Prairie, and their family.

The 2016 lineup is the deepest to date and features an outstanding set of Hereford females to complement the elite set of herd sire prospects. Ryan, Prairie and their crew have assembled a sound, functional group that excels in phenotype and individual performance while maintaining a strong genetic base with numerical balance and diversity. Whether you are simply adding to your herd, seeking an outstanding donor dam or looking for your next show ring champion or herd bull, you will find what you are looking for among this exceptional offering. The bred females are mated to some of the top AI sires in the industry as well as leading Topp Hereford resident herd sires and the exceptional pairs have unlimited earning potential when you consider the value of not only the cow, but also the calf at her side.

When you examine the pedigrees represented, you will see "household names" in the Hereford breed on both sides of the pedigree. The positive impact that this herd has had on the Hereford industry in terms of cultivating and improving the real world traits of udder quality, calving-ease, feed efficiency, fertility, and functional design is second to none.

For each transaction that is made, Ryan and Prairie want the customer to be satisfied. Everything they do is for the customer, and they strive to build lasting relationships.

I encourage you to evaluate the needs of your program, and join us Friday, February 12, 2016 for this great event. Please do not hesitate to call me with any questions or if I can help you in any way.

Sincerely,
Matt C. Sims

Registered and Commercial Female Sale Broadcasted at **LiveAuctions.TV**

Real-time bidding is available via the Internet for this sale. Live audio and live video will allow buyers to bid on animals just as if they were present at the sale.

Buyers must create an account prior to the sale. Please visit
www.LiveAuctions.tv to create an account and request a buyer number.

Instructions are available at www.LiveAuctions.tv to walk you through the account setup process.

Contact:

www.LiveAuctions.tv
brad@LiveAuctions.tv

**Buyers who would like to bid via the Internet must register with
LiveAuctions.tv two days prior to the sale.**

Internet bidding will only be available for the female sale. If you are unable to attend the bull sale and would like to place a bid, please contact Topp Herefords or any of the authorized marketing agents listed in the catalog.

- Lot 171 is a full sister to Lot 7, one of the popular bulls of the 2016 sale offering. Lot 171's dam is a full sister to the high selling bull in our 2014 campaign, TH Mountaineer 420A, selling to Grassy Run, West Virginia. Her second generation dam, 71U, is responsible for Mr Hereford as well as 420A. The cow families backing this heifer calf are endless. The marketability of her genetics is astounding and her phenotype is remarkable.

LOT 172

- Lot 172 will be the last progeny to sell by TH out of the famed 89T female. Lot 172 is exceptionally broody in her design and leaves very little doubt that she won't fall into the same category as her dam. 434C is very closely related to TH Stockman 475Z (sire of Lots 6-37). Her sire, 409X, has produced progeny with an abundance of performance and style. The 409X daughters did an excellent job in their first year of production with near ideal udder type and teat size. Lot 172 is an almost surefire bet to end up as an elite donor.

1.0	61	102	25	55	1.1	0.030	0.23	0.21	3

• Due March 20, 2016, to 148B.

- 508B is a full sister to the popular high seller in our 2015 sale. 508B is a daughter of 512X, who is also a full sister to breed notables such as 719T, 504X, 520X, 521X and is the dam of two of the last three high sellers. The guesswork is done here. She will definitely write a chapter in history well worth reading.

LOT 202

- Lot 202 is a product of the very consistent Gemini cow family. The Geminis are noted for their stunning phenotype, efficiency and longevity. The top side of her pedigree has produced several top sellers throughout the years in the Primrose line, which is responsible for breed notables such as TH Bismarck 243R as well as TH Bailout 144U.

- Due Jan. 5, 2016, to 17Y with a heifer calf.
- Lot 212 is a maternal sister to last year's high selling bull, TH 512X 145Y El Dorado 49B. Her maternal brother is the heaviest used sire at TH in 2015 and his first progeny will be on the ground come sale time. 263B is certainly a sight to see as she is ultra broody with a beautifully sculpted udder design. Her dam, 512X, is responsible for two of the last three high selling bulls and is a very important piece to the next generation of superior cow families at TH.

LOT 212

TH 122 711 DOMINETTE 512X ET —
DAM OF LOT 211

COMMERCIAL F1 AND HEREFORD BRED HEIFERS

The six groups of Angus heifers selling were sourced from a small group of Angus operations. The AI bred heifers were bred to Genex CRI calving ease standout, TH Lambeau 17Y. The bull bred heifers were serviced by some of the elite calving ease bulls that have been sold by TH the past few years and purchased by LT Premium. These heifers were preg checked on October 15th and will be rechecked the first week of February. All offspring qualify for both the Feedlot Alliance or replacement quality heifer calves going back to LT Premium. These groups will be refined after our second preg check. Check our website, www.toppherefords.com, for the updated listing on commercial bred heifers selling.

Retained Interest

TH will retain the right to utilize semen in herd on any lot in this sale. The interest retained will not affect your use or schedule.

Terms of Sale

Each animal will be sold to the highest bidder.

The auctioneer will settle any disputes.

Phone bids

If you would like to place a bid on any lot but will not be able to attend, we would be happy to assist you. Please feel free to call the office or sales staff to review the bulls.

Internet bidding will only be available for the female sale. If you are unable to attend the bull sale and would like to place a bid, please contact Topp Herefords or any of the authorized marketing agents listed in the catalog.

TH Bull Delivery

Within 300 miles – FREE

300-400 miles: \$75/bull

400-500 miles: \$125/bull

500 and over: \$175/bull

Free delivery on three or more bulls regardless of distance. We will also be offering \$50 per head rebate if you take your bull home on sale day. Topp Herefords will either deliver your bulls personally or we will work with reputable trucking firms. TH will make every effort to deliver bulls within 20 days after the sale. Bulls will be dropped at central delivery points that will be determined shortly after the sale. If you would like to have your bull delivered, please be sure to leave both a home and cell number with the clerking staff to ensure that we can reach you for delivery arrangements.

Guarantee

Bull calves will be guaranteed breeders. If failing to be satisfactory, they must be reported to TH by August 1, 2015. Each animal becomes the responsibility of the purchaser as soon as sold. REPLACEMENT bulls will be located at TH or you can choose to receive 100% credit.

Wintering

We will winter your bull for a fee of \$3.00/head/day to be paid when the bulls are delivered. Please be prepared to choose one of the following delivery dates when arranging to have your bulls wintered: April 15, May 1st and May 15. All bulls wintered must be insured.

Genetic Defects

All bulls have been tested for known genetic defects and results are listed in the catalog. No further claims for any unknown defects are the responsibility of TH as of Dec. 1, 2014. Feel free to contact Topp Herefords or any of the sale staff with questions.

Cattle Viewing

A great benefit to having the sale here at the ranch. Gates will be open to view all the cow families at the ranch. Contact TH personnel to arrange a tour.

Insurance

Insurance will be available at the clerk's desk. We strongly recommend insurance. Any bulls wintered at the TH facility must be insured.

DIRECTIONS TO TOPP HEREFORDS

FROM JAMESTOWN, ND

Go north on Hwy. US-281/US-52 to Carrington, N.D. Just past Carrington turn east (right) on Hwy. ND-200 to 81st Ave. N.E. (about 14 miles - you will see a cell tower at the top of the hill to your left as a landmark). Turn north (left) on 81st Ave. N.E. to Grace City. 1 1/2 miles north of Grace City turn east (right) onto 11th Street N.E. Go 1 mile east on 11th Street and take the first left (north) onto 83rd Ave. N.E. at the Topp Herefords sign.

FROM GRAND FORKS, ND

Go south on I-29 S. to Thompson Exit #130. Turn west (right) at Exit 130. Go through Thompson and stay on ND-15 W. until you reach U.S. Hwy. 20. Turn south (left) onto ND-15 W/ND-20 S. Stay on ND-20 S. until you reach McHenry. Immediately south of McHenry turn west (right) onto 11th St. N.E. Turn north (right) at the Topp Herefords sign (83rd Ave. N.E.).

FROM FARGO, ND

Head west on I-94 S. to Oriska Exit #302. Turn north (right) onto ND-32 N. Continue to follow ND-32 N. 37 miles, then turn west (left) onto ND-200 W. Stay on ND-200 W. until you reach Glenfield. At Glenfield, turn north (right) onto ND-20 N. Stay on ND-20 N. until you reach McHenry. Immediately south of McHenry turn West (Left) onto 11th St. N.E. Turn north (right) at the Topp Herefords sign (83rd Ave. N.E.).

FROM MINOT, ND

Take US-52 east to Fessenden. Turn east (left) onto ND-15 E. Turn south (right) onto US-281. Stay on US-281 until you reach the Barlow exit. At Barlow, turn east (left) onto 11th St. N.E. Continue on 11th St. N.E. for 16 miles (part of the road will be gravel). Continue until you reach the Topp Herefords sign (83rd Ave. N.E.). Turn left at the sign.

CATTLEMEN'S BANQUET

CHIEFTAIN HOTEL & CONFERENCE CENTER
CARRINGTON, ND

THURSDAY, FEBRUARY 11, 2016

NO CHARGE TO ATTEND • NO PRE-REGISTRATION REQUIRED

LT PREMIUM INFORMATION MEETING

TO BE HELD AT THE CATTLEMEN'S BANQUET AT 4:30 P.M.

Meeting highlights will include:

- How it works: The process of purchasing your TH-sired females.
- Positioning your ranch towards profitability.
- The purchase of straight bred females through the LT Premium Heifer Program.
- What does the future hold for LT Premium and its clients? See page 141 for more details.

COORDINATED SPECIALIZATION AND THE EFFICIENCIES OF SIMPLICITY BEEF PRODUCTION

The challenges of internal replacement in a single breed herd:

1. Calving ease sires too often lack proper performance, structure and maternal traits to merit longevity in the bull battery and can create unnecessary cost to the production system.
2. Growth bulls produce pounds but possibly less than desirable replacements.
3. Marketing groups of the calf crop become limited in uniformity and sort creates discounts reducing profit of entire herd.

Overcoming the challenges:

Single purpose herds operating within a designed cross-breeding system produce animals which capture genetic flow efficiency and the following results:

1. Uniformity of the calf crop reduces discounted segments.
2. Genetic consistency increases performance and appearance.
3. Sire selection is balanced to match entire cow herd resulting in better returns to dollars invested because of average stay in herd.
4. Offsite heifer development allows for 10% more cows in herd and corresponding increase in gross sales.
5. Efficiencies of offsite development of replacements reduces costs per animal and captures opportunities of meeting various desired calving dates at diverse customer herd locations.
6. Potential capital gains tax advantage on purchased animals may reduce tax burden of animals leaving the herd at the end of productive term.
7. Enhanced revenues from seed stock premiums, maximum performance feeder cattle and efficient female development drive profits in the system.

EXAMPLES OF SINGLE PURPOSE HERDS WITHIN A DESIGNED CROSS-BREEDING SYSTEM

1) Maternal Angus Herds (red or black)

- A. Produce premium replacement females for themselves and F1 producers.
 - Gain premiums for quality females.
 - Bear the opportunity cost of rejecting excessive growth genetics.
- B. Buy highly maternal and structurally sound registered sires and possibly use advanced technologies such as A.I. and embryo transfer.

2) Hereford X Angus Herds

- A. Produce quality F1 females.
 - Buy purebred replacements.
 - Sell heifers into development centers serving terminal system.
 - Sell enhanced performance feeder steers.
 - Capture hybrid vigor on entire calf crop.

3) Terminal Herds

- A. Purchase uniform F1 bred heifers.
- B. Purchase terminal sires to produce product desired by feeders.
 - Capture maximum heterosis and resulting performance in entire calf crop.
 - Enjoy elevated cow performance and longevity.
 - Market maximum production of forage converted to beef.

TH/SB&B FEEDLOT ALLIANCE

Offers off-the-farm pricing of your feeder cattle to ultimately improve your bottom line.

The sale is just the beginning...

Purchase a Topp Herefords bull and you become part of the Alliance.

Ask us about the benefits of marketing your feeder cattle direct.

TH/SB&B Alliance Will Provide:

Off the farm appraisals • Forward contracting

Deferred payment options • Delivery options

Carcass data & conversion results

Carcass data evaluation & consultation (if desired)

"Our ultimate goal is to improve uniformity, productivity and quality."

Off Farm Feeder Calf Pricing FAQ

Where will my calves be weighed?

- We have a certified scale at our feedlot; however we can weigh anywhere both parties agree on.

How does the slide work?

- We set a base weight (estimate of expected average weight) and a base price slide (to adjust for the difference in the actual average weight). Example: 800 lb. base weight and a \$0.05 slide. So if the cattle end up weighing 790 lb., then the price of the cattle increases by \$0.05/cwt. ($800 - 790 = 10$ lb. difference $\times$ \$.50). If the cattle are heavier, then the price would decrease. Most slides only work to the buyers' advantage; therefore we like to use the slide both ways so each party is treated fairly.

Who pays the trucking?

- Trucking is negotiable and should be decided prior to placing a bid. We work with qualified truckers, but realize that some producers do their own hauling or have relationships with other truckers.

Isn't bidding and competition going to get me more \$\$\$?

- If the question is "Aren't I better off going to a sale barn and getting the best bid for the day?" my answer would be, "At times." We've purchased and sold cattle in sale barns. I've had good experiences and bad experiences. The difficult part is in the question, "... best bid for the day?" You end up being put in a position that you take what you get, on the day. I'd personally rather be in a situation where I know what I'm going to get and can adjust my risk management on my timeline rather than rolling the dice for that given day. Obviously, some of the other consideration would be additional shrink, additional trucking, commission, extra stress and will you get any additional closeout information or carcass data.

How do sale barn shrink and direct marketing shrink compare?

- Every sale barn is different, every day is different. If there are 250-head being sold vs. 4,000 head being sold, I assume there would be a difference or if it's raining or 95 degrees and humid. And if the cattle are being sold at 2 p.m. or 12 hours later at 2 a.m. I'd think every day would be different. Most of our customers like to have cattle weighed right off of the truck, so that is usually the way we do it.

If I take pay weight at the delivery point, how much shrink is there?

- Shrink varies. It can depend upon distance, the condition of the cattle, time of day and weather conditions. Each delivery point may be different and each transaction may be different. Discussing this prior to making a deal would be appropriate.

Will my calves be co-mingled?

- This is a difficult question: we don't like to co-mingle cattle. However, it all depends upon the number of head in a group, how much range in size of the group and how much feedlot capacity we have. We like to keep cattle separate as much as we can so we can do closeouts and determine how valuable each group of cattle are. But oftentimes, yard capacity does become an issue.

Is it a problem to split my calf check with more than one owner?

- This is not a problem. We've had cattle deals that split checks 10 ways.

Can I defer payment into the next year? (Calves delivered in Dec. with check cut in Jan.)

- We do this quite often.

If my cattle convert above average and have high carcass quality, will I be paid more next year?

- There are many factors that dictate what we bid for cattle. Cattle futures price, projected basis, projected cost of gain, interest rates, lot space and very importantly, proven history. Obviously the better the proven history, the more valuable your cattle are, the more we are willing to pay.

In the Alliance program, what is really being assessed when you look at my calves?

- The market is continuing to ask for quality. The demand for branded products keeps growing. We are trying to identify uniformity, predictability and quality. Consistent genetics will help us get there. We look for producers whose direction is similar.
- Other assessments are proven history (if we have any) along with positive changes. Those assessments are conversions, average daily gain, death loss percentage, vaccination history, vet bills, carcass data as a group, and the determining factor as to whether cattle are profitable or not. As an example, we had a bunch of straight Angus cattle that graded 60% Certified Angus Beef (CAB). You'd think that would be fantastic. But what if at the time of slaughter, the CAB premium was zero. Sort of changes the picture.
- If we don't have any proven history, the assessment becomes visual, genetic history, vaccination history, uniformity and many of the other factors listed above.
- It is important to remember what the Alliance is for. We have tried to help all players improve their operation from vaccination practices, marketing awareness, risk management, nutrition, culling procedures and herd quality. The goal is long-term improvement of everyone's bottom line.

NOTES

TOM & SONYA COOLAHAN SELECT CONSIGNMENTS

Tom and Sonya Coolahan have been TH clients and friends for several years. It became evident early in our business relationship that they take their horse business as seriously as they take their cattle business. Tom is originally from Broadus, Montana, and Sonya originates from Hermosa, S.D., where she and Tom now ranch together with Sonya's parents. While Sonya also works as a Certified Nurse Practitioner in Rapid City, both Tom and Sonya work with their horses extensively on their ranch.

In addition to ranching and competing, Tom and Sonya have been instrumental in all horse events at the Black Hills Stock Show and Central States Fair for nearly a decade. Tom is a co-chairman of the Black Hills Stock Show horse committee and a board member at Black Hills Stock Show and Central States Fair.

Tom and Sonya's goal is to offer limited numbers of high quality ranch and performance horses. They stand behind the horses offered and are responsible for both the sale offering and the guarantees after the sale. No revenue from the sale of the horses will go to Topp Herefords and sales will be backed by Tom and Sonya Coolahan.

It is with the utmost confidence that we invite you to visit with Tom and Sonya about the horses and about their program offered for your evaluation on February 12th.

Ryan Topp

TERMS AND CONDITIONS

TERMS OF SALE

- Each animal will be sold to the highest bidder.
- The auctioneer will settle any disputes.

PHONE BIDS

- If you would like to place a bid on either lot, but will not be able to attend, please call Tom at (605) 430-0714 to review sale day options.

GUARANTEE

- Horses guaranteed as represented by Tom & Sonya Coolahan.

- Popcorn is a 4-year-old gelding that we have owned since he was a colt. Popcorn has been a using ranch horse since he was started early in his 2 year-old year. He has doctored cattle outside, drug his fair share of calves and trailed a lot of cattle. He is extremely safe and gentle, fun to trail ride on too, but real handy when there is work to be done. He has gotten along well with many different levels of riders and also handles long periods of time off. Last spring he was my main calving horse and was exceptional in all the storms and bad weather plus real handy for sorting pairs. Popcorn was the RQHBA Ranch Horse Champion as a 3-year-old and won cash and a buckle. He crosses water and rough ground with ease and is easy to catch and shoe. With his pretty buckskin color, gentleness and ability, this is an outstanding young gelding. For video, search YouTube "Popcorn Coolahan." For more info call 605-430-0714.

- Boonlight is a 6-year-old gelding that we have owned since he was a colt. He is very gentle, safe and easy to get along with. Boonlight has done all the ranch chores, gathered cattle all over the badlands of South Dakota in all kinds of weather and he handles long periods of time off very well, he rides the same every day! Boonlight has doctored all ages of cattle in the pasture, drug many calves to the fire for branding, been on many trail rides and sorted lots of pairs and AI cattle. He also was the CSF Ranch Horse Champion as a 3-year-old, winning a buckle and cash. He is great with inexperienced riders. Boonlight has done it all and has also started really nice in the barrels, showing great potential. We do not own a dart gun. We treat and doctor cattle with a strong dose of nylon first, our horses definitely get roped on. He crosses water with ease, rides in rough country safely and is easy to shoe, easy to catch. For video, search on YouTube "Boonlight Coolahan."
