Catalog layout & production by Hereford America

Welcome...

Welcome to our 2012 sale. The efficiency that we spoke of last year is the reason that this herd is successful even in a trying year. I am ecstatic at the disposition and performance of this crop. There are several new young stars emerging out of the bull and cow side of this program. A picture is worth a thousand words and this year a video is priceless. We have made the decision to have these cattle available on video as well as available for your inspection sale day at the ranch. Auction will be broadcast live on the internet at the same time with live bidding capabilities for those utilizing the online service. We have culled this offering extremely deep to provide you only the best in a year that demands wise choices be made. We think these are cattle you will want to own next spring and be glad you already have them.

Efficiency and hybrid vigor. No matter what your cow herd is I think you will find a great representation of the Hereford advantage here. We are still on the same load of corn that we were on last year, so these bulls have been developed on a high roughage bull developer with you in mind. We have never seen a year when these cattle had the opportunity to calve themselves as easily as they did this year. It made it so we didn't have to get up at night! If you look at the birth dates you can see what an important part timed A.I. is in our program. The udder improvement in 295, 461 and 763 is refreshing. For the second year in a row our two year olds are raising many of the big, powerful calves out there. Notice the large number of bulls in this sale out of first calf heifers. We continue to select bulls with balanced carcass traits, not selecting for only ribeye or only marbling, but a combination of both, all the while keeping the growth traits as high as possible without getting these cattle too big. It is not always easy to measure calving ease, but this group of cows has it right now.

These cattle are limit fed, and none of them get all the feed they want unless it is grazing. The performance here is as real as we can make it. I hope these cattle move well to your home. We stand behind them, so let us know. This year has presented an unusual set of challenges for us on the human side of the equation. I have had two operations to repair my heart, the second one only three weeks ago. They were successful and the results are encouraging that I will return to normal health in time. I can't tell you how many ways things changed in how we had to do things around here, but we have two new great employees that have helped make the difference by stepping up and helping out. Needless to say my family was invaluable. We hope a change of heart will breed new life into a program we believe so strongly in. We do it because we love it. Thanks for coming.

Free delivery up to 300 miles on purchases of \$4,000 (each) or more.
Will cooperate on all deliveries.

\$100 off purchase price if you pick your bulls up within two weeks of the sale.

We now have four calf crops and as you go through the pasture, both bull and heifer calves demand your attention. Outstanding carcass and growth numbers are his trademark. They are long bodied, short marked cattle, with pigment. His dam is a herd bull mother and his sire dominates marbling in the Hereford breed. Dam's average on seven calves at weaning 108 index and four calves at yearling averaged a 109. Progeny excel in both REA and IMF.

This bull has brought a fresh pedigree and an old proven sire (King Ten) to our herd. He is backed by a great Lowell Fisher cow and that program. Used in four herds he already has credible data after two calf crops. The heifers are predictably fabulous and there are sons in this offering that demand a second look. Balance in every trait with good marbling numbers. He was used successfully on heifers AI two years by us. We knew the heifers would be good, but this crop belongs to the bulls. These cattle will not get too big, but will perform and have great balance. We have used him three years AI.

He is a very powerful L18 grandson we have raised. His mother was an extremely productive 108J daughter that was a Dam of Distinction and really bred performance. Besides the extreme growth performance, this bull breeds the most pigment of our herd bulls. His first calves will be available this fall. Trust your eyes. The shape and performance you see in these cattle is real. This is a pay weight sire we used one year and sold to Haythorns and will be replaced by B Excel 20.

This bull had me from hello with his easy manners. It might take two horses to move if he thinks his cows have gone far enough or you can walk up, halter him, and lead him to the trailer at the end of the season. All three sons from this flush were used on heifers, one by his breeder, and his dam was kept until she was 15. We use him with confidence to follow 763 and with the way he is bred the numbers coming out of Canada are stronger than listed. He breeds a lot more growth than his yearling weight numbers would indicate.

This is our new Canadian outcross sire that was big, easy moving, solid red and had a great E.P.D. profile. He was lost after one calf crop and certainly had a lot to offer us. He has a birth weight that is slightly below breed average and yet his weaning and yearling performance are way out there. We may keep a part of one or more sons in this offering because the outcross potential of this sire for the Hereford breed is huge. We gave him the top set of cows when we brought him here and this set of calves shows it. They are extreme in their length and extension and yet he still transmits an exceptional amount of muscling. They are a little younger, but deserve your consideration.

We were extremely excited to be able to purchase possession in this outstanding sire. He has bred true to his numbers and has been used successfully on heifers. He is a tremendous individual that moves out well, is strong topped, stands on good feet and legs and really carries his muscling down well into his lower quarter. He has the largest sire group of any bull. He also has averages on weaning and yearling of 102. His dam was a highly sought after cow in the Hirsche dispersion; she is truly a great cow with a perfect udder and tons of milk.

We went back to using this outstanding 4033 son because of his outstanding calf crop at Carl Shaffer's at Rock River. He is backed by one of our very best low birth weight and high milk families for three generations. First calves were born in 2010 and were good enough we bred more cows to him. It is very refreshing to see how these home raised sires stand up against the competition here.

What a great son of the 5001 bull. He is even more extreme in his total dimension than his sire in his performance and backed by one of the most productive cow families we have. There should always be a home for a big rugged range bull like this.

This bull ties with Lot 4 as heaviest bull in this sale. He is massive and out of the same cow family as lot 6. You can expect great things from this bull. This bull has the most red meat in an extremely attractive package, with full pigment. Number 2 in feed efficiency, number 6 in RFI with a -3 and an overall composite rank of 6. Clearly illustrates this bull is an elite efficiency performer.

Here is where the argument starts, this is a great Churchill Rancher son, he is out of an own daughter of L18, that produced a high seller to Rabou's two years ago. His full sister is easily the pick of the two year old heifers this year. Tremendous scrotal development and overall muscle and power. There might be more bull here than there is in the 21 bull, they are certainly a pair. I am not sure if this is a herd bull prospect for you, or for me. Will retain an interest. This was the only Rancher son born last year but he had seven sisters. Third in feed efficiency, 20th in average daily gain and a negative 2.3 RFI. A very balanced performer in the test, it gave him an overall ranking of number 9 at SAREC.

One of the two really big bulls in this sale for total pounds. It is hard to believe he is out of our strongest maternal sire, Kingpin, but this is the cow family that Homebuilder came out of and it is still breeding on. An outstanding prospect in his dimension, he can fill the slot of range bull or herd bull. He is long and rugged. He was our most efficient bull on SAREC test, and had our most balanced carcass profile. Feed efficiency seven, average daily gain six, and a negative RFI makes this high gaining sire very desirable.

One of the really outstanding 19T sons we have in this sale, going back to the legendary 061 cow and her dam who was flushed for export. Tremendously strong maternal pedigree, an outstanding range bull prospect with two red eyes and a tight sheath.

Perhaps the biggest and most rugged of the 19T sons, nice big red eye, lots of bone and mass. His grandmother is an exceptional red teated cow. The potential for expressing hybrid vigor and transmitting an exceptional udder make this bull a great candidate for a baldy maker.

This bull is straight up a powerhouse, if you are looking to add performance out of this calf crop, he is your bull. One nice red eye. His mother has as much volume as any cow we own, with a great udder. Yearling weight EPD, top 1% of the breed and top 5% for his yearling weight.

Another great 19T son out of one of our most prolific 767 daughters we have left. He has an extremely powerful maternal pedigree, headlined by an exceptionally powerful range bull. Lots of bone and substance in this bull. Take particular note of the birth weight, two pounds below breed average. This bull could be heifer safe and may be a great start on being a curve bender.

This is a 3/4 brother to the Lot 81 bull with just a little more stretch. He will be like all of the 230U sons and get thicker every day he gets bigger. They are carcass cattle.
