Welcome...

Welcome to our "Real Data" 2021 sale. We have been anxiously awaiting the marketing of this set of calves since they were born. We have spent almost two years collecting the data. The real/raw data can speak no louder than what you will see sale day. In those very short moments when the auctioneer describes your cattle, their care, and your reputation you need an animal that looks like these bulls. These are cattle successful from the critical stage of a live calf, can hustle at 6000 feet, breed back and perform in a feedlot. These are cattle that can get it done. We had one steer from the freezer beef yield 64%. We fed and sent a half load of steers to Cargill. Our mature cows bred back at 98% and it was not on plenty of green grass or with a lot of supplements. I wish I knew what did it. I am sure fertility was part of it. The endpoint is to have quality cattle and let the genetics do the heavy lifting.

We calve out as much as possible and with the wind that is limited on some days. We do not see all of these calves born but do try to get birth weights for you to see sale day. We have owned some really well shaped cattle and it is paying off. We do not have great big calves that need help. Our udders are competitive anywhere and I don't like to milk. The milk cow was gone by my second year in college. We are running more cows and able to select more critically than ever before and it is helping greatly.

These bulls were weaned and developed at home and then sent to UW SAREC to collect high forage feed efficiency data. Scanned at the end of test we are getting these bulls to reveal their true performance for REA and IMF. All that info is here sale day. The bulls are summered out in big pastures and small bunches until late November. Traveling big pastures all summer is in your best interest. We did not get this set halter broke, however they are gentle and easy doing cattle. These cattle have adapted and PAP test well in Big Piney, Rock River, and Walden. If you make it there you can go anywhere. Our current sires have been tested. All bulls have passed a breeding exam and our herd health is good.

We stand behind these bulls to be sound breeders. Health papers will be provided to go anywhere. Free delivery for \$4,000 purchase up to 300 miles. We cooperate on any delivery and \$50 off on bulls picked up in a week. Internet bidding is carried by The Livestock Link who do our video and catalog as well.

Our second January sale it is not as scary as last year but the ground is not white yet. We trailed one group of cows 20 miles home in two days and it is a relief to have them back. I hope you can make it or bid remotely sale day. We will try to take appropriate health precautions sale day.

It has been a good year for us. One inch of well-timed moisture in June was critical for us. The herd performance in dry conditions speak volumes about these cattle and the power of our range. Janice and I have been blessed with one more grandchild and are grateful our family is close. We get great support from them. Our moms have stayed well. Love to see you all sale day!

He has rewritten the Hereford history his sire made for calving ease and shorter gestation. His progeny are exceptionally long and are giving far more pay weight than his sire. His dam had 2 calves index BW 105.5, WW 107 and YW 106. Her 24 calves scanned REA 104.4 and YW 102.3. You can read his numbers left to right and the EPDs are a direct hit for the commercial industry. He is the choice for baldy females. Our replacements are full of great ones. He commanded the top price at the 2018 NJW sale for \$55,000 and a heifer calf at Dales brought \$20,000 last year. Worth it. I am glad Lander called and to be partnered with Churchill, Lerwick, and Nicodemus on this one. He is known as the Lerwick bull in this county.

This bull resides in Canada and we were fortunate to buy US rights. Outcross 18U has sired several really prepotent individuals (like the dam of 6008). We were pleased when we branded and going onto grass this spring it was clear we had something that would work in this cowherd. His grandam is the famed 5139 cow who has a gold standard reputation and 134 offspring. 5 head indexed fat depth 122, REA 106.8 and IMF 104.6. That was the power we needed on these calving ease cows. Heifers are to die for and we only let one go. He breeds the pigment we were looking for and semen is for sale. 5 sons sell.

He was selected as an AI sire because of the extra mass and volume he had. Progeny are consistent and that's important to us. REA and CHB is top 10% and he breeds it. They are quite thick. Top sons last year to Shaffer and Holton with three in the sale this year. We will use several of these sons.

We bought this bull because of his mass, outstanding hind leg and bone. He is a large-framed bull with calving ease and really travels freely. His dam is a big impact cow with 188 progeny and I would buy another son. He is a full brother to Churchill Redbull 200Z. We bought him to cover some big pastures and he has really gotten it done. Seven sons sell and more to come.

Top notch straight line one herd sire. Disposition in general is excellent and the bulls have been big heavy boned top performing individuals. Four quality sons sell. The heifers we calved this spring had them easy and gave plenty of milk. He breeds lots of red. He now works for Allnuts and Wade says he is rideable.

Cheyenne has several good motels:

We shared this sire with Morell Ranch in California and he spent his time traveling I-80 and hence his nickname the same. Progeny are moderate framed with thickness throughout. He sires cattle with superior muscle pattern and his sons have a big pair of pants and are deep bodied. Females perform equally well and the udders this spring were great. His dam is also a prolific donor with 66 progeny. Use him to moderate frame without giving up performance. Nine sons sell.

He is a big growthy sire with nice full pigment in both eyes. We lost him this spring after two calf crops. On 21 calves we had just five bulls last year. Use him to push up the yearling weights and for cattle that need structure improved. They are bigger cattle with good dispositions and really travel well. 5 sons sell.

Not responsible for accidents.

Catalog layout & production by Hereford America.

This is what the ultimate heifer bull pedigree looks like. Pi and Long Haul together lower your BW, shorten gestation and, in this case, add the extra muscle. You have to appreciate the bulge to that quarter and expression of muscle down the top in a curvebender. Grandam was our Cinnabear cow and her influence in the pigment and pattern is evident. If he can't sire replacement heifers it won't happen.

This bull is our super sleeper. This is the last calf out of the Cinnabear cow. Her sons, Little Bear, Tater and his Pi brothers have left a "red meat and quiet disposition" legacy. Youngest bull in the sale he has one of the most expressive muscle patterns and stands on a lot of timber. He had 13.45 inch ribeye at 1,046 lb. That is not exceptional it is historic. His IMF was over 3 and he may be the best carcass bull in the sale.
Pigment Scores: LE Coon RE Coon • Scrotal 100%
