The Berry's

Hereford Bull Sale

Monday, November 23, 2026

Selling 60 Bulls • 50 Hereford Cows

40 Baldy Bred Heifers

WHERE COWMEN BUY BULLS

Welcome!

Welcome back. New genetics are at the forefront of this year's offering. The Stanfield addition to our genetics was a giant step in the right direction for performance-oriented cattle. I was quite surprised when we opened the carcass data to see just how great they are. Our young sires have a significant impact on the offering as well. Coupled with the boost Sherman has injected into our program we have really moved our program in the right direction.

It is a huge task to AI a herd in a day. It has become our new normal to breed this way but it keeps us using progressive genetics and survive. We have had the opportunity and faced that challenge for the fourth year now in breeding one day and having trucked to Walden, CO, within four days. Two years in a row we have had 110 plus calves in eleven days. When the kids were in college, they came home and told me we could sync the cows and breed them all in a day. I was the tech that day and I refer to it as "the lesson." It is not easy but a powerful tool.

Every year we consider it a privilege to invite you to evaluate these cattle. They are survivors. Dry has been our theme for awhile and moving all the mature cows to the mountains was a necessity. I think of it as a real time whole herd PAP test. It is a "stress test." I am glad our cows don't complain. The yearling bulls and heifers were all we had at home this summer and we had to spread them out. 20 bulls per section was our stocking rate with mineral tubs as the supplement.

We have been extremely blessed to have found pasture and care for the cattle in Walden. We are going to offer 50 younger cows and the bred black baldy heifers for sale. The blacks will be here sale day and we hope to video the Hereford cows when we go up and wean early in November. The cows can be picked up in Walden, CO or later when they return to the ranch in December 2026. All cow lots sell at auction price and papers are $100 per cow. Breeding information individually will be provided. It has been a challenge, but we have started using one or more Hereford bulls as cleanup and there may need to be DNA work done on a few calves. The black heifers come from our cleanup bulls up there and are from our cows.

It speaks highly of this herd to go and perform in the tough environments we need to have our bulls go out and work in. Off test the bulls looked as uniform and good as they come. The raw performance and quality of the offering speak volumes about our genetic choices for you and what you can add to each calf. Balance is critical in all traits and sustainability is crucial proven by the way these cattle adapted and responded to staggering dry conditions.

These bulls were fed slowly to yearling weights this year and sent to GrowSafe testing at SAREC. Boot camp here starts after coming off test. We run them free range chicken (mineral and water) from July to September. No bunks no feed. They are very athletic from roaming a full section and should look great by video day and sale day. The bulls came in to be put on feed in mid-September. What really needs to be showcased is the uniformity and improvement in these cattle. This is about the progress of an entire calf crop, not an individual. When you milk you will get some cream and we have some exceptional bulls coming to the top. We have some top RFI scores and the value of this data and its impact are grossly understated. Our reference sires are competitive nationally and I think these bulls could do it anywhere.

We have been diligent in selecting calving ease, focusing on cattle that are shaped right. They can travel. Nature and good fortune had us summer over 200 females in beautiful Walden, Colorado. Wind and snow are death on bad bags; we must cull hard on it. Our udders are competitive anywhere and I don't like to milk. Dispositions are crucial here and they are gentle. We will sell the bulls on video instead of passing them through the ring. Weights and GrowSafe info available on sale day. We tested our new sire K7 LAD 2431 and we were ecstatic when he scored a 31.

All bulls have passed a breeding exam and our herd health is good. We stand behind these bulls to be sound breeders. Health papers will be provided to go anywhere. All cattle are trich tested and can move on sale day. Free delivery on purchases of $4,000 or more within 300 miles. We'll cooperate on any delivery beyond that distance. We will credit buyers $100 per head if they take their bull purchases home on sale day. We will cooperate on the female delivery. Internet bidding is carried by LiveAg in conjunction with The Livestock Link. See details on Page 21.

Hats off to the guys from JC Berry on up, to persevere with a vision and resolve, to let us be here today. My parents' love for the people and the cattle in this business gave us a foothold you can't buy. Marvin's eye for a great one was incredible. This is a humbling legacy to pursue, and Mother Nature keeps us honest. I am grateful for all the help it took to get back here again this year. Obviously, I have great support beside and behind me and thanks to Janice and the family for all of it. We intend to have these cattle look as good as we can and be honest about what they are.

We know you have many choices and thanks in advance for coming here. It is worth the drive.

See you on sale day!

Jay and Janice Berry & Family

PLEASE NOTE, REFERENCE SIRES HIGHLIGHTED EPDS SIGNIFY A TRAIT LEADER.
SALE BULLS HIGHLIGHTED EPDS SIGNIFY IN THE TOP 10% OF THE BREED.
EPDS WERE COLLECTED AS OF 10/19/2026.

These cattle have adapted and PAP-tested well in Burns, Big Piney, and Walden. If they can make it there, they can make it anywhere. Our current sires have all been tested. All bulls have passed a breeding exam and our herd health is good. We stand behind these bulls to be sound breeders. Health papers will be provided for transport anywhere.

Free delivery on purchases of $4,000 or more within 300 miles, and we're glad to cooperate on deliveries anywhere. Take your bulls home sale day and receive $100 off. All bulls have been trich tested and can travel sale day.

Internet bidding will be available through LiveAg, carried by The Livestock Link.

Internet bidding will be available through LiveAg, carried by The Livestock Link.
See inside back cover for more details.

Catalog produced by Hereford America

***WE WILL RETAIN PARTIAL OWNERSHIP IN SELECT BULLS TO BE ANNOUNCED SALE DAY**

Explanation of feed testing measurements – *April 14 to July 1, 2026. Pen size was doubled, and the bulls did better for it. Their facility was updated in 2025, and the data is reviewed by GrowSafe. Bulls were trained to feeders and evaluated on an 70-day feeding study where individual feed intakes were measured. A backgrounding/ growing diet was fed, consisting of cracked corn, ground alfalfa hay, corn silage and protein supplement. The ration was formulated for an estimated daily gain of 3.67 lb./day. Individual weight gain and feed intakes were collected on each bull.*

Calculations included:
Overall Weight Gain – *Average In weight - 826 lbs. They were 129 pounds lighter this year.*
Average end weight - 1,179 lbs. Weight gained - 353 lbs.

Average Daily Gain (ADG) – *3.78 ADG.*

DM Intake – *Actual feed intake measured for each individual bull, through the GrowSafe feeding nodes. Feed amounts provided in the table are adjusted to a 100% Dry Matter (DM) basis.*

Feed: Gain – *A measurement of feed efficiency, listed as the lb. of feed required to achieve 1 lb. of weight gain for each bull. This is calculated using the daily feed intake and ADG for each bull. A lower number indicates a more efficient bull (less feed required to achieve weight gain).*

Gain: Feed – *Also a measurement of feed efficiency, listed as the amount of weight gain achieved for each 100 lb. of feed consumed. In this case, a higher number indicates a more efficient animal. In other words, more weight gain was achieved per 100 lb. of feed consumed.*

RFI – Residual Feed Intake. *RFI is the preferred method of evaluating efficiency in seedstock animals because it is an efficiency measurement that adjusts for the size of the animal. Using traditional feed efficiency measurements (to select cattle) would cause you to indirectly select for larger animal size because larger frame animals tend to be more efficient. RFI is preferred because it is a feed efficiency index independent of animal size. RFI numbers refer to the comparison between actual feed intake vs. expected feed intake (based on the ration fed and animal size). A negative number is preferable, indicating a more efficient animal that consumed less feed than predicted. Positive RFI indicates a less efficient animal that consumed more feed than expected.*

Rankings and combined Ranking. *All bulls were ranked based on ADG, feed efficiency and RFI, with individual rankings provided. A combined ranking was also included, which equally weights the bulls ADG, efficiency and RFI ranking, with bulls ranked on their combined scores. The #1 combined ranking would indicate a bull that had the highest combined ranking in all three measurements.*

Steve Price was at the 2024 Churchill bull sale. He told me there was a horned bull as rugged and thick as any prospect he had seen. I took his advice and joined a syndicate to purchase him. Roger Stuber a principal owner, best describes him. Really a top prospect that "covers all the bases."
Stanfield is bred differently with some really big-time numbers. Massive in hip and loin into a deep, wide, well-muscled quarter . He walks wide and is free moving. Perfect pigment and a great hair coat. Smooth made with elite eye appeal. Calves have an outstanding profile, marked perfectly and exhibit an ideal look.
Injured, this bull will only have sons available the next two years.

Thanks for the memories. Good friend Steve Price pictured on the seats here sale day a few years back.

Sherman has taken the breed by storm, and Churchill's dispersal proved it. He is money. Banking great sons and daughters to continue his legacy. He was a syndicate purchase with big implications for our polled program. From birth weight to marbling, he can really ring the bell. For an easy calving bull to have top 1% marbling and 4% ribeye data is a direct correlation on a top 3% CHB sire. We feel fortunate to use a sire with these credentials. His mom is one of the great cows in the breed, and she has an ideal udder! The real deal.

I first saw 1235 out of the pasture from Lowell Fisher's herd in Denver as a coming two-year-old bull. He was too thin to be competitive, but had a laser straight top, lots of capacity, and his feet were perfect. Darker in color, he breeds lots of pigment, and the daughters are spot on. He is a natural calf by Cooper's 6162 super cow of this generation. She is a cow that crosses extremely well on our genetics. She produces herd bulls by almost any sire at Cooper's. These daughters are quickly rising to the top.

He was advertised as a Line One powerhouse and he delivered. An acceptable heifer bull, the added performance in his calves makes an impact (7 sons). His daughters are going to be the ace in the hole here. The dam of this bull was described as "an ideal cow in every way" so we were able to join W4 Ranches in his purchase. Top 18% BW, 15% Milk, and 7% CHB. We like him and think you will too.

345 had the top BMI (527$) at Cooper Herefords sale in 2024. He was #2 for BW, #6 for CED and had carcass to boot. Sylish patterned bull with as low BW numbers we could buy. Pigment the way you like it, good natured and he will have an impact here. Top 20% in 14 traits. REA per 100 was 1.12 cwt. He has and breeds pigment. Out of a heifer, his Mom has gone on to prove herself at Cooper's.

One of the deepest, biggest bodied, thickest herd bulls Ward's have ever raised and turned out. He is easy fleshing and was in good condition when I sold him at age nine. 100% pigment with a brockle face, top 11% YW and BMI index, and 2% SC. Sons are high weaning and big yearling performers. How valuable could that be? The daughters are beautiful. Dam 76S was a landmark cow. Great feet, extremely sound, and incredibly good-natured.

Commercial bull that is scurred, not dehorned. Bargain sale day for somebody that wants to raise some growthy calves. Mother has a textbook udder. I apologize for not taking the time to define his parentage. I would keep replacements out of this bull without hesitation. He is a heifer's calf and safe for heifers.

Ridge son grades prime.

Deep body carries down well into his flank. This bull has a lot of mass close to the ground and will weigh quite a bit by sale time. Consistent with the type of this pen, he has a good eye set with full pigment. This bull stands out on all four corners and reminds me a little bit of a shorter butcher block table.

Genetically this bull carries all the markers and numbers that you would hope to find in a heifer bull prospect. He will certainly be an outcross sire for us. He was on test so he didn't get turned out with our heifers, but that would've been a logical place to send him. Stylish and moderate bull, there is plenty of quality here. Top half at SAREC his RFI is -4.02.

Can't miss calving ease head and well balanced in his phenotype. Bull that carries himself exceptionally strong down the top and moves out easily. He is so smooth that you can't tell just how good the parts are. It will be easy to put together an awesome set of Sherman sons sale day.

Great head and eye placement. Conservative frame but will be able to get all the work done that you need without having to add a lot of extra stature to your mature cows. Up headed and very long sided. He carries his width from end to end.

Extra circumference to his forearm on a big stout bull. Thicker, he stands wide in front and behind, is deep bodied, and carries down deep into his flank. Carcass work is superb. Can you imagine feeding the set of calves out of this one? Beautiful, moderate, feminine dam.

Read the data and say, "Oh boy, oh boy." At SAREC he finished #1 ADG and Feed to Gain ratio and number 5 overall. His individual performance was really big. He is not as pretty as the stats, but we need to focus on what it cost to get here. Big bulls with the big numbers sometimes don't always please our eyes. He is worthy of your consideration. Man, is he going to grow. Different pedigree, great attitude and that's something you should not overlook.

Nearly ideal pigment with deep set eyes and a curly head makes the performance profile of this bull an understatement. Top shelf WI and YI are secondary to the carcass reads. Huge rib fat and marbling indexes are going to get this prospect marked easily. He's not fat. Tremendously long sided, framey bull out of a very high producing cow (WI 106 YI 103 on three).

He is a stout hombre. Extra bone rugged, tremendous muscle expression from any angle he is the dude. Black tail, beautiful head, eye set, and tight sheath certainly should be one of the top purchases sale day. Best ultrasound we have to offer. First son of a new sire group.

I recommend no bull higher as a heifer service sire or as a replacement heifer sire. Kingdom improves udder quality consistently for us and the maternal credentials are solid. Great big spread from birth to yearling here.

Big red eyes, extra rib, extra length of body and straight and true up front. Long strided and he looks like he could really travel. Awesome BW to YW spread that's really valuable. This mating has been very successful for us and sure to give you a great prospect. Who doesn't like pigment?

Red to the feet and nice full pigment. Long hip and loose made he has good bone and scrotal development. BW to YW spread is tremendous. He is out of a great cow that is also the grandam of Lot 16. Her ratios were both 109 and her averages on her progeny were WR 108 on 7 head and YR 104.3 on 6 head. His individual data wasn't computed. He has two Long Haul sisters in the herd as good as they come.

One of the tallest framed bulls we've got out of one of the most consistent (WR 108 on 4 head) smaller dams. This bull may outgrow everybody in the sale. Strides out good and shows excellent definition and rippling of muscle when he walks. Dam has an incredible udder and is a great producer.

50 Bred Hereford Cows

The cows can be picked up in Walden, CO or later when they return to the ranch in December 2026.
For registration papers add $100 per head.

40 Baldy Bred Heifers

These are all home raised heifers. Average weight is about 980 lbs. and every heifer bred. They will be sorted into smaller groups after they are weighed and preg checked. That information will be available ahead of sale. They are out of our registered cows and wintered with our replacements. They have had full calfhood/weaning protocol.

Heifers had MGA lutylase and were AI bred here 6/30/26. AI sire was SQUARE B TRUE NORTH 8052. Pasture sires were CL 1 DOMINO 5115N (horned) and AFH 901 1604 DEVIANT 25109 ET (polled) run in two separate bunches. This is a special opportunity to buy into our program at ground level.

Thank you for attending our sale!

BID FROM ANYWHERE *with* LiveAg PUREBRED

1. VISIT LIVE-AG.COM

Navigate to the **"Purebred"** tab, located in the main menu. Select the auction of choice.

2. LOG IN / CREATE AN ACCOUNT

Select the **"Login or Create an Account"** button. Fill out the required fields to bid online. Agree to the terms of service, and finish with the **"Register"** button." An account is not necessary to watch an auction.

3. REGISTER TO BID

Once logged in, find your sale of choice and click **"Register to Bid"**. Agree to the terms and conditions, and click the **"Register"** button. Your request will be approved in a timely manner.

*** CALL OUR TEAM WITH ANY QUESTIONS**

We're dedicated to ensuring you have a positive bidding experience. Please call **817-533-6699** with any questions.
