PAVING THE WAY SALE

Bull Sale
ANGUS & HEREFORD

Welcome to Blacktop Farms 2023 Paving the Way Sale. The past year was filled with many challenges. From serious drought to the extreme snow fall we received after the new year, God has blessed us with moisture. Maybe not the kind we wanted, but maybe just what we needed. The cattle industry can certainly be challenging, and we are producing bulls to help you meet those ranch goals.

We spend many hours researching information and collecting data to create this set of bulls. The time we have spent utilizing all the tools available in the beef industry, will give you greater accuracy in their progeny. The combination of EPD's and phenotype we are offering, will improve your herd at a friendly price. We have been artificially inseminating every female for nearly 30 years. Good reliable genetics!

Please feel free to stop by anytime to view the bulls and ask questions. We hope most of the snow will be pushed or melted by sale day! Please mark February 17 off on your calendar and plan to attend in person or bid online using Livestock Link. We look forward to seeing you.

TO HELP YOU IN YOUR SELECTION WE HAVE ADDED THE FOLLOWING EPDS:

RADG

Residual Average Daily Gain (RADG), feed efficiency expressed in pounds per day, is a predictor of a sire's genetic ability for postweaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed.

DOC

Dolality (DOC), is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility in a sire's offspring compared to another sire.

CLAW

Claw Set (Claw), is expressed in units of claw-set score. A lower EPD is more favorable, indicating a sire will produce progeny with more ideal claw set, which is toes that are symmetrical, even and appropriately spaced.

FOOT SCORE

ANGLE

Foot Angle (Angle), is expressed in units of foot-angle score. A lower EPD is more favorable, indicating a sire will produce progeny with more ideal foot angle, which is a 45-degree angle at the pastern joint with appropriate toe length and heel depth.

THE BALD-FACED TRUTH ABOUT HEREFORD GENETICS

It's obvious – Hereford-sired calves deliver a \$51 increase in net profit per cow, per year.* Hereford genetics bring legendary hybrid vigor, improved fertility, feed efficiency and easy-handling docility to your program. Read the research, and see why Hereford heterosis pays off, at [Hereford.org/genetics](https://hereford.org/genetics).
