Welcome to our 43rd annual sale. In 1961, our Patriarch and Matriarch Ralph and Helen Pederson, purchased their first Red Angus females from Beckton Stock Farm. This year marks the milestone of registering cattle with the Red Angus Association of America for 60 years. We are proud to carry a similar tenure of raising registered Quarter Horses and registering them with the American Quarter Horse Association. That's a lot of paperwork but through the years we have made a lot of great friends and have many cherished memories. We began selling bulls private treaty and at the local auction market in Timber Lake before hosting our first official cataloged sale 43 years ago. While the types of cattle we have raised has changed over the years, our unwavering commitment of raising honest, sound, hardworking cattle has not.

We have enjoyed producing registered Red Angus all our lives and have met many producers and have made lifelong friends. We are very proud of the fact that our genetics have played a role in commercial programs that are recognized for top selling replacement quality females and steers that push the scales to the limit. Your success is what drives us to select and produce cattle that are exceeding industry average. The Red Angus breed just keeps growing in popularity and doesn't show any indication of slowing anytime soon. Heifers are out selling their steer mates and more and more breed associations are using Red Angus females for their crossbreeding selections. With the advancement of technology there are numerous tools to help with herd bull selection.

Feel free to visit with us anytime and we can use our decades of experience to answer questions that will assist you in fine tuning your herd. Our philosophy hasn't changed about raising cattle. "Staying consistent" and selecting for a balanced set of traits. We simply focus on females that are feminine, highly maternal, with outstanding feet and leg structure, and with level udders. We strive to have these qualities combined with cattle that are deep sided, long bodied and have plenty of muscle wrapped up in a quiet and easy to handle package.

2020 was another great year for hay and grass. We were blessed with timely moisture. The bulls were weaned in the middle of October. They weaned great and did exceptionally well this mild winter. We will have them carcass ultrasound evaluated late February and will have Oahe Vet palpate and scrotal measure all the bulls. That information will be available through a supplement sheet sale day or on our website(www.pedersonredangus.com). We will not have the bull's semen tested due to their younger age, but we do stand behind them when that time arrives prior to breeding. This year, the entire offering is parent verified.

We would like to thank our hired man, Tim Johnson for his help through the past year. Tim is a valuable asset to our ranch, and we couldn't get everything done without him.

We would like to thank everyone for attending and considering using our genetics in your program. Bull selection is never an easy task and feel free to ask us any questions about the bulls. We will help you select bulls with the traits that you would like to improve and help you get to your end product goal.

TRAVEL UPDATE

Due to Covid, the Cheyenne River Sioux Tribe has restricted some levels of travel on the highways entering the reservation. Ag-related purposes are allowed but please give us a call so we can update you and help you travel on March 3. Thank you.

DELIVERY:

It is our policy to assist in delivery to your ranch or to central locations on major highways within 300 miles. Bulls picked up within three or four days will receive a \$50 hauling refund. We will keep the bulls until April 1 at no charge but we will not be responsible for sickness or injury. However, we will keep you informed if anything turns up. We would like to start delivering bulls as soon as weather permits. We're giving a 5% discount on 5 or more bulls to the same ranch and a 10% discount for 10 bulls to the same ranch.

HEALTH:

All cattle are on a complete vaccination program and are BQA Certified. Oahe Veterinary Clinic, (605) 845-3634, is our primary veterinarian and will also be available on sale day. None of the cattle have had creep feed.

INSPECTION OF CATTLE:

Cattle will be available for inspection at any time prior to the sale.

LIABILITIES:

All persons who attend the sale do so at their own risk. The owners assume no liability, legal or otherwise, for any accidents which may occur.

BREEDING GUARANTEE:

We guarantee all bulls to be breeders although we recommend you have the bull's semen tested a couple of weeks before turn out time. If after two tests a bull is found to be a non-breeder, we will replace the bull or allow credit toward next year's sale. This guarantee is void if there is evidence of improper management in caring for the animal, or the bull's inability to breed is due to sickness or injury which was incurred after being sold. The bull shall be returned by the purchaser or other arrangements made with us. Scrotal measurements and ultra sound data on the bulls will be available on sale day. All bulls are born and raised on this ranch.

SEMEN INTEREST:

Broken Heart Ranch is retaining a 1/3 semen interest in all bulls and selling full possession, full salvage, plus 2/3 semen revenue. This means any semen sold on any of the bulls, Broken Heart will receive 1/3 the selling price per unit. We also reserve the right to collect semen on any of the bulls, for our own use. This semen will be collected at our expense and the buyer's convenience.

Watch & bid online for FREE at

DVAuction
Broadcasting Real-Time Auctions

View the Auction Live!
Bid Online... you're ringside
right at your desk!

Buying online is as easy as 1, 2, 3...

1. Create an account at www.dvauction.com under the "register" tab
2. Apply for bidding approval by clicking on the "details" tab at least 24 hours prior to the auction-a DV representative will notify you once you have been approved
3. Tune in for the sale and make your purchases!

High speed internet is required for successful bidding-be sure to check the lag-time monitor in the top left corner to ensure real-time broadcasts.

Proxy Bidding-if you can't make time to watch the sale, register a proxy bid and let our system represent your bid while you're away. Look for the "proxy bid" tab on the auction listing, and fill in your maximum bids. We'll handle the rest!

Having troubles? During the auction, you can type a message to the operator at any time for assistance. Our full-time support team can also always be reached at (402) 474-5557.

Top Dollar Angus Feeder Calf Program

Promote Your Verified Genetic Investment

Top Dollar Angus is the industry leader in third-party genetic verification and marketing assistance for superior Angus and Red Angus-based feeder cattle. Our program stamps a unique identity on the 'best of the best' by verifying and then showcasing their genetic merit. The Top Dollar Angus team works directly with a large number of feedyards and buyers to provide them with documented superior

feeder cattle, coupled with genetic risk mitigation and the precision understanding they need to pursue your cattle with absolute confidence.

Top Dollar Angus enables cow-calf producers to benefit from the genetic value already built into their herds. Producers that invest in high-end genetics, as well as strong health and nutrition programs, need a means of positively differentiating their calves from average cattle. Top Dollar Angus does that. Industry demand is strong for genetically superior feeder calves with the right supporting documentation. Don't make buyers guess, let them know by putting the Top Dollar Angus badge of honor on your premium genetic investment.

- Dark red bull that is smooth made and long bodied
- One of the younger rock stars that will be used heavier next year
- Really liking the uniformity of this herd bull

RED ANGUS GUIDE TO EPDS

RedAngus.org

ProS..... Profitability and Sustainability is an all-purpose index that predicts average economic differences in all segments in the beef supply chain. This index is a combination of the breeding objectives modeled in the HerdBuilder and GridMaster selection indexes. In this index, replacement heifers are retained from within the herd and all remaining progeny are fed out to slaughter and sold on a quality-based grid. Traits included in this index include calving ease, growth, HPG, STAY, Mature Weight, Dry Matter Intake and carcass traits. The resulting index is expressed in dollars per head born (Index/High Value).

HB..... HerdBuilder is a maternal selection index that predicts the economic differences of animals for traits that are important from conception through weaning. Expressed as dollars per head born, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained and all remaining progeny are marketed at weaning. Traits included in the HB index include Calving Ease Direct, Calving Ease Maternal, Weaning Weight, Milk, Mature Weight, Heifer Pregnancy and Stayability (Index/High Value).

GM..... GridMaster is a selection index that predicts the average economic difference of non-replacement calves through the post-weaning phase of production. GM places selection pressure on growth, feedyard performance and carcass traits. Expressed as dollars per head born, GM is calculated based on the scenario that progeny are fed out to slaughter and marketed on a quality-based carcass grid. Traits included in GM include Average Daily Gain, Carcass Weight, Dry Matter Intake, Marbling, Back Fat and Rib Eye Area (Index/High Value).

CED..... Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams. (Percent/High Value)

BW..... Birth Weight predicts differences in actual birth weight of progeny. (Pounds/Low Value)

WW..... Weaning Weight predicts differences in 205-day weaning weight. (Pounds/High Value)

YW..... Yearling Weight predicts differences in 365-day yearling weight. (Pounds/High Value)

ADG..... Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. (Pounds/High Value)

DMI..... Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the post-weaning period. (Pounds/Low Value)

MILK..... Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. (Pounds/High Value)

ME..... Maintenance Energy predicts the difference in maintenance energy requirements. (Mcal per Month/Low Value)

HPG..... Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding. (Percent/High Value)

CEM..... Calving Ease Maternal predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers. (Percent/High Value)

STAY..... Stayability predicts differences in the ability of an animals' retained daughters to remain productive in the herd – calve every year – through 6 years of age. (Percent/High Value)

MARB..... Marbling predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. (Marbling Score Units/High Value)

YG..... Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. (Yield Grade Units/Low Value)

CW..... Carcass Weight predicts differences in actual hot carcass weight. (Pounds/High Value)

REA..... Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib. (Square Inches/High Value)

FAT..... Fat predicts differences in the depth of backfat measured between the 12th and 13th ribs. (Inches/Low Value)
