Cliff, Wyatt, Kim and Austin Olson

Welcome to our 47th annual sale. In 1961, our Patriarch and Matriarch Ralph and Helen Pederson, purchased their first Red Angus females from Becton Stock Farm. A little over six decades have gone by but we still have the same philosophy of raising cattle and Quarter Horses. We also have been fortunate to have repeat customers that date back to the beginning.

We have enjoyed producing Registered Red Angus all our lives and have met many producers and have made lifelong friends. We are very proud of the fact that our genetics have played a role in commercial programs that are recognized for top selling replacement quality females and steers that push the scale to the limit. Your success is what drives us to select and produce cattle that are exceeding industry average. The Red Angus breed just keeps growing in popularity and doesn't show any indication of slowing anytime soon. Heifers are out selling their steer mates and more and more breed associations are using Red Angus females for their crossbreeding selections. With the advancement of technology there are numerous tools to help with herd bull selection.

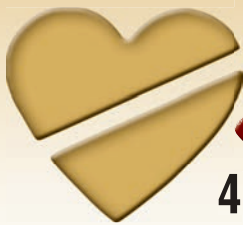

Feel free to visit with us anytime and we can use our decades of experience to answer questions that will assist you in fine tuning your herd. Our philosophy hasn't changed any about raising cattle. "Staying consistent" and selecting for a balanced set of traits. We simply focus on females that are feminine, highly maternal, with outstanding feet and leg structure, with level udders. We strive to have these qualities combined with cattle that are deep sided, long bodied and have plenty of muscle wrapped up in a quiet and easy to handle package.

The bulls were weaned in the first part of October. They weaned great and did well during the cold spells and negative windchills. We will have them carcass ultrasound evaluated late February and will have Oahe Vet palpate and scrotal measure all the bulls. That information will be available through a supplement sheet sale day or on our website www.pedersonredangus.com We will not have the bulls semen tested due to their younger age, but we do stand behind them when that time arrives prior to breeding. This year, the entire offering is parent verified with GGP testing for enhanced EPDs.

We would like to thank everyone for attending and considering using our genetics in your program. Bull selection is never an easy task and feel free to ask us any questions about the bulls. We will help you select bulls with the traits that you would like to improve and help you get to your end-product goal.

The Pederson Broken Heart Ranch crew

Sale Information

DELIVERY:

It is our policy to assist in delivery to your ranch or to central locations on major highways within 300 miles. Bulls picked up within three or four days will receive a \$50 hauling refund. We will keep the bulls until April 1 at no charge but we will not be responsible for sickness or injury. However, we will keep you informed if anything turns up. We would like to start delivering bulls as soon as weather permits. We're giving a 5% discount on 5 or more bulls to the same ranch and a 10% discount for 10 bulls to the same ranch.

HEALTH:

All cattle are on a complete vaccination program and are BQA Certified. Oahe Veterinary Clinic, (605) 845-3634, is our primary veterinarian and will also be available on sale day. None of the cattle have had creep feed.

INSPECTION OF CATTLE:

Cattle will be available for inspection at any time prior to the sale.

LIABILITIES:

All persons who attend the sale do so at their own risk. The owners assume no liability, legal or otherwise, for any accidents which may occur.

BREEDING GUARANTEE:

We guarantee all bulls to be breeders although we recommend you have the bull's semen tested a couple of weeks before turn out time. If after two tests a bull is found to be a non-breeder, we will replace the bull or allow credit toward next year's sale. This guarantee is void if there is evidence of improper management in caring for the animal, or the bull's inability to breed is due to sickness or injury which was incurred after being sold. The bull shall be returned by the purchaser or other arrangements made with us. Scrotal measurements and ultra sound data on the bulls will be available on sale day. All bulls are born and raised on this ranch.

SEMEN INTEREST:

Broken Heart Ranch is retaining a 1/3 semen interest in all bulls and selling full possession, full salvage, plus 2/3 semen revenue. This means any semen sold on any of the bulls, Broken Heart will receive 1/3 the selling price per unit. We also reserve the right to collect semen on any of the bulls, for our own use. This semen will be collected at our expense and the buyer's convenience.

GENOMICS:

All bulls have been DNA tested and have genomically-enhanced EPDs.

Red Allison Moonlight is a bull we purchased from Canada, and he has not disappointed us. We no longer than got off the phone after his purchase when we had interest in purchasing a share on him. His first year of breeding was quite impressive, registering 32 natural sired calves with six other bulls in the same pasture servicing around 130 cows. His second season he settled 44 in the same situation. He sires some thick, heavy muscled calves that are very impressive to look at. We are really excited for his future here at the BHR.

Pie Centerfire is a great addition to our herd. He is a dark red bull that not only can be used as a calving ease sire but also has the performance to add muscle and carcass to his progeny. This is the first year for his progeny and they stand out in the bull pen and in the heifer pen. His calves are clean made, stylish and carry themselves like they own the world. Watch for more calves by this junior herd sire.

Believe is a new addition to our herd and is a half paternal brother to Centerfire. He is a deep bodied bull that is extremely sound and functional. These two half brothers have sired some excellent calves that will turn some heads and add that extra pounds at weaning. We can't say enough great things about these bulls and their progeny.

Prairie Factor is a calving ease machine. We have used him for two years and have loved him for the calving ease aspect. He sires calves that can get up quick and never look back in the growth category. The maternal side of Prairie Factor goes back to the High Plains genetic line that we absolutely love as brood cows.

Guidance is a moderate framed bull that is easy keeping, deep bodied and sound made. His dam is the mother to the top selling bull and female at the 2023 Berwald Red Angus sale. Great cow families are the cornerstone for building solid foundation genetics that we strive to pass on to our commercial customers.

- Dark cherry red bull that is deep made with a quiet disposition
- His dam is an Impeccable bred commercial cow that we used for a recip in an embryo project
- We sent in DNA and he didn't qualify as the embryo, but was sired by BHR Promotion 197
- He stood out all summer and we double checked with another sample but came up with the same result

RED ANGUS GUIDE TO EPDS

RedAngus.org

ProS..... Profitability and Sustainability is an all-purpose index that predicts average economic differences in all segments in the beef supply chain. This index is a combination of the breeding objectives modeled in the HerdBuilder and GridMaster selection indexes. In this index, replacement heifers are retained from within the herd and all remaining progeny are fed out to slaughter and sold on a quality-based grid. Traits included in this index include calving ease, growth, HPG, STAY, Mature Weight, Dry Matter Intake and carcass traits. The resulting index is expressed in dollars per head born (Index/High Value).

HB HerdBuilder is a maternal selection index that predicts the economic differences of animals for traits that are important from conception through weaning. Expressed as dollars per head born, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained and all remaining progeny are marketed at weaning. Traits included in the HB index include Calving Ease Direct, Calving Ease Maternal, Weaning Weight, Milk, Mature Weight, Heifer Pregnancy and Stayability (Index/High Value).

GM..... GridMaster is a selection index that predicts the average economic difference of non-replacement calves through the post-weaning phase of production. GM places selection pressure on growth, feedyard performance and carcass traits. Expressed as dollars per head born, GM is calculated based on the scenario that progeny are fed out to slaughter and marketed on a quality-based carcass grid. Traits included in GM include Average Daily Gain, Carcass Weight, Dry Matter Intake, Marbling, Back Fat and Rib Eye Area (Index/High Value).

CED Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams. (Percent/High Value)

BW Birth Weight predicts differences in actual birth weight of progeny. (Pounds/Low Value)

WW Weaning Weight predicts differences in 205-day weaning weight. (Pounds/High Value)

YW Yearling Weight predicts differences in 365-day yearling weight. (Pounds/High Value)

ADG Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. (Pounds/High Value)

DMI Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the post-weaning period. (Pounds/Low Value)

MILK Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. (Pounds/High Value)

ME Maintenance Energy predicts the difference in maintenance energy requirements. (Mcal per Month/Low Value)

HPG Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding. (Percent/High Value)

CEM Calving Ease Maternal predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers. (Percent/High Value)

STAY Stayability predicts differences in the ability of an animals' retained daughters to remain productive in the herd – calve every year – through 6 years of age. (Percent/High Value)

MARB Marbling predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. (Marbling Score Units/High Value)

YG Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. (Yield Grade Units/Low Value)

CW Carcass Weight predicts differences in actual hot carcass weight. (Pounds/High Value)

REA Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib. (Square Inches/High Value)

FAT Fat predicts differences in the depth of backfat measured between the 12th and 13th ribs. (Inches/Low Value)
