Dear Cattlemen:

Welcome to our "Building with the Basics", 38th annual, production sale. As to our past customers, thank you, to those looking for the first time we think you will find something that will fit your program. Our number one goal is to build better Angus cattle. It's your success and sustainability that drives our operation and there has never been a time when the right genetics were worth so much. We feel there is a bull for everyone in the lineup with a nice offering of both Hybrid, Commercial Angus and Registered Angus bulls. The rapid changes in genomics and EPD's make bull selection a constantly evolving process and an interesting time to be in the cattle business. We welcome any comments, suggestions, or concerns you may have and will go to great lengths to make your experience of owning a Gaaskjolen bull a profitable and enjoyable one.

Our 2023 sale offering will consist of popular proven bloodlines as well as some fresh young genetics. You can put together half brothers for consistency, moderate birth weights for calving ease, bulls with substance, bone, eye appeal, and easy fleshing. The choice is yours. Whatever helps your program succeed.

The bulls have been through a complete vaccination program, poured with Ivermectin followed by CleanUp. In addition to the normal protocol for respiratory diseases they have been vaccinated and given a booster for foot rot. As in past years they have been fed a complete commercial CHS feed called Bull Challenger, a feed designed with growing young bulls in mind.

This year's bulls are a tough set of survivors. Historic April blizzards, dry summer, and a bitter cold December all had an impact on performance. The genomics prove this is a very high performance set of bulls. Again this year the birth weights are a mixture of being weighed on a digital scale, a spring scale, taping a foot, and a few are an educated estimate. In all cases they were born unassisted and calving ease shows up in almost every pedigree. Some are recommended for heifers.

This is a strong set of bulls and represents roughly a third of our bull calf crop. They will be sold as commercial bulls with the exception of the registered angus. They are registered and have genomic enhanced EPD's. We invite you to browse through the catalog and find the right bulls for your operation. If we can be of any assistance just give us a call and thanks for considering our bulls. Stay safe and have a better 2023!

The Gaaskjolen Family

Sale Day Phone: (605) 374-3877

Auctioneer: Scott Weishaar

You can view the sale on the internet at:

www.lemmonlivestock.com

Volume Discounts:

Volume discounts are available to a single buyer.

- Purchase 5-9 bulls deduct 5%
- Purchase 10+ bulls and deduct 10%

Breeder's Guarantee:

First Breeding Season Guarantee: All bulls will be sold as guaranteed breeding animals and will have been semen tested by Dr. Jenny Meyer prior to the sale. Bulls will be kept at our risk until delivery and then the risk will be shared with the buyer until the end of breeding season. In the case a bull is injured and loss of use occurs prior to Sept. 1, 2023 a replacement bull will be offered providing one is available. If a satisfactory bull is not available, the bull will be covered for 50% of the purchase price minus the salvage value and given as a credit at next year's sale. This is NOT a mortality guarantee and it is recommended that anyone needing that coverage buy mortality insurance.

Trucking and Yardage:

We will deliver the bulls free within 250 miles or you can haul your bulls home sale day and deduct \$50 per head. Bulls will be kept free of charge until April 15th and then delivered.

991 (PC Genetics by Design)

A note about Igenity profile comments:

This year Igenity has added 3 new Igenity Indexes. Indexes allow for selection pressure on multiple traits at the same time, depending on a producer's breeding objectives. The bulls ranked highest in these indexes have been noted in the comments.

Igenity Maternal Index - This index places emphasis on fertility, weaning weight, and calving ease, with a negative emphasis on residual feed intake. This index is designed for producers wanting to keep their own replacement females and market calves at weaning.

Igenity Production Index - This index balances maternal traits with gain and carcass characteristics, placing a large emphasis on stayability, marbling, and hot carcass weight, with a negative emphasis on residual feed intake. This index is designed for producers wanting to keep their own replacement females while either marketing calves with superior carcass potential or retaining ownership and harvesting on a grid.

Igenity Terminal Index - The Igenity Terminal Index is specialized to identify animals with superior carcass performance. It places the most emphasis on hot carcass weight, followed by marbling and rib eye area. There is, however, a negative emphasis placed on residual feed intake and fat thickness to control feed costs. This index is designed for producers who retain ownership of progeny to identify calves who are likely more profitable as feeder calves compared to replacement heifers.

Homozygous Black!

Third highest weaning weight, backed by big growth Igenity numbers. The 7114 cow always does her job well.

Frequently Asked Questions:

Q: What Igenity numbers should be high and which ones should be low?

A: Lower numbers are generally more desirable for **BW**, **RFI**, and **Fat**. Higher numbers are more desirable for the rest.

Q: Which bulls are recommended for heifers?

A: We try to suggest which bulls we would use on heifers in the comments. We usually base this on a low actual birth weight, Igenity BW score 5 or lower, and CED of 6 or higher.
