MONDAY, MARCH 8, 2021

LUNCH 11:30 • SALE AT 12:30

AT THE RANCH IN VALIER, MONTANA

View Holden Hereford's Sale Live on Satellite TV with Superior

HOW TO PARTICIPATE AS AN ABSENTEE BUYER - We have made preparations to bid and buy livestock through Superior Productions' "Call or Click-To-Bid" service for those unable to attend in person on sale day. Please note that all of the lots in the sale will also be available for viewing online prior to sale day at www.superiorlivestock.com.

IF YOU NEED ANY ASSISTANCE CALL SUPERIOR AT 1(800) 422-2117

Turn in Bids Over the Phone. This is our traditional method of buying livestock and is the suggested process for anyone who does not have consistent, high-speed internet. To get started simply go online to www.superiorlivestock.com and click on the tab titled "Register for a Buyer Number". Select the registration form for Superior Productions and print the registration form. Fill it out and fax it in to Superior Productions at (817) 378-3380 with a signature on it. You can also mail it in to the address provided on the form. Upon receipt of this information Superior will call you with a buyer's number and the bid line phone number that you will use on sale day to place bids over the phone.

Click-To-Bid. This is Superior's online bidding program for cattle buying. Please note that high speed internet is required – this is not for dial-up or satellite internet. Registration is free, but you must become a member of www.superiorclicktobid.com to sign up. Becoming a member is easy – just go to the homepage of www.superiorclicktobid.com and follow the out-lined steps to get started. Input your information and select a username and password. You will receive an e-mail confirming you are a member. From that point forward you just have to sign in and select the sale you would like to register for and once approved by the ranch you will receive an e-mail confirming which sale you are now registered for.

Viewing the Auction. The sale will be broadcast via satellite on SLA-TV (DISH Network channel 997). Please note that there is a delay if you are watching the auction on television so be sure to call in a couple lots ahead of the lot you are interested in bidding on. The sale will also be broadcast live in Hi-Definition on the internet at both www.superiorlivestock.com and www.superiorclicktobid.com. The video feed on the homepage of www.superiorlivestock.com looks the same as the video feed on TV and can be watched over a smartphone or tablet. Remember you can call in to bid whether watching on the TV or on the internet, but you must be a member of www.superiorclicktobid.com to "click-to-bid".

Buyers will be contacted by the ranch after the sale for payment and delivery details.

View and Bid Live on the Internet

Go to www.LiveAuctions.tv Please note that you do NOT need an account to watch the auction, but you do need to register an account and request a buyer number if you wish to bid. If you have not created a new account since September 1st, 2020 you will need to click "Register" in the top right corner of the homepage and create a new account. Once you have completed the form on this registration page and hit the "Register" button you will receive an e-mail with a place to click on to verify you have entered a valid e-mail address. Once you have completed this registration process, find the auction you are interested in on the homepage and click on it (sales are listed in chronological order). You should then see a box that says Login. Now that you have an account with LiveAuctions just type in your E-mail Address and Password. You will now see a hyperlink at the top that says "Request a Buyer Number". The first time you request your first buyer number on LiveAuctions it will send you a text message with a verification code in it. Type the code from the text message into the area requiring it and you will then see your name along with a buyer number listed at the top of the webpage where the live video is and you will be able to bid. You will only have to complete this two-step verification process one time. After that you will be able to immediately request a buyer number on any auction without verification through an e-mail or text message again.

LiveAuctions no longer requires an app. If you wish to view/register/bid on a smartphone just type LiveAuctions.tv in whatever web browser you use. The registration process is the same as it is on a desktop computer, but the website is built mobile friendly. Click on the three lines in the top right corner to access the menus.

Buyers will be contacted by the ranch after the sale for payment and delivery details.

If you need help registering to bid or to view the auction please call

Technical Support at (682) 816-4900, Katie Colyer at 208-599-2962 or e-mail us at TechSupport@LiveAuctions.tv

Eric Lawver 406-600-3118

This is our invitation for you to attend our 55th Annual Production Sale. On behalf of our operation, we welcome you to come and see what we feel is an exceptional sale offering. We feel the depth of quality in this group is absolutely outstanding. It's hard to believe that it has been 55 years since the first Cooper-Holden Production sale that was held in 1967 in Great Falls, MT. We feel very blessed to still be involved in the Hereford business, and are very grateful for all the wonderful friends and customers we have had experiences with over these last 55 sales. The Hereford business has been great to us over the years, and it is exciting to see the interest focused back on quality Hereford cattle out in the beef industry today. The data is in and Herefords continue to excel in all research programs for both heterosis and extra profit for your operation. We have enjoyed our part in working to produce Hereford cattle that will perform well in all segments of the beef industry, and we look forward to many more years of raising the best Herefords possible. As always, we plan on laying out the welcome mat with great hospitality and top quality Hereford cattle on display, and we truly hope you can join us at sale time.

Once again, we are pleased to offer an outstanding set of bulls that are uniform and predictable in quality, type, and breeding. This group represents the top 110 out of almost 150 bull calves born in our 2020 calf crop and almost 50% of them are the results of our extensive ET program. In addition, we are selling a tremendous set of powerful 18 month old bulls from our fall calving program. They are the top 60% of the fall 2019 calf crop. They are a balanced trait set of bulls that combine thickness, performance, pigment, maternal strength, fleshing ability, carcass, disposition, eye appeal, and moderate birth weight. Almost 80% of the sale offering qualifies as sires for the Hereford Advantage program by being in the top 50% of the breed on CHB\$, (\$111 and above), and over 50% of the sale offering ranks in the top 25% of the breed on CHB\$, WW EPD and Milk EPD. Also, 100% of the sale offering have GE EPDs on them to improve the accuracy of their EPDs. We have embraced the use of Genomics in our herd to give our customers better EPD data on our cattle, are one of a small group of herds in the U.S. that have been genomic testing every animal since 2012. The bulls will also sell with complete ultrasound and performance data and they have all passed a semen test by our vet. We also have a great set of elite Line One females in the sale again this year. There are 4 outstanding ET heifers, fall pairs with heifer calves, a top quality set of 20 open yearling heifers, and for the second year we will offer an extra fancy set of F1 black baldy open heifers in our sale. All registered sale cattle have been DNA parentage verified and tested free for all known genetic defects except for the MD defect. MD is not present in Line One cattle and all sale cattle are guaranteed to be free from it. As always, all sale cattle sell fully guaranteed.

Our cow herd is Line One in breeding. We purchased our first Line One cattle over 60 years ago. Since then we have purchased and used many top sires from the Miles City Research Station. We have also exchanged and purchased top herd sires from Cooper Herefords. We have also selected top herd sire prospects from our own herd every year.

We were one of the first members of the Montana Beef Performance Association when it was organized in 1956 and were very active in it until it was dissolved. We have been involved with the TPR program of the American Hereford Association and are active participants in the Whole Herd Reporting Program. These records have been very important in selecting and maintaining the performance and quality of our cattle. We have a severe culling program for our mother cows. We cull on performance, fertility, soundness, udder quality, and milk. Our cattle are the product of many years of selection for these traits. Our cowherd is our pride and many of the top cows in the breed have come from our ranch.

We have stayed with a strong performance, multitrait line breeding program to enhance the predictability of our cattle for our customers. Our focus has always been on stacking generation after generation of the traits that add value to our customer's bottom line. A line breeding program can only succeed if you continually add cattle with superior genetics to it. The advantage of our program is the uniformity and predictability it provides along with the heterosis that can be generated by an outcross within the breed or between breeds. These bulls have generations of bred in performance and will pass these traits on to their progeny consistently.

The sale bulls and heifers and the cowherd will be on display March 6th, 7th, and 8th for your inspection. Lunch and snacks will be provided on both March 7th and sale day. There will be a social hour and prime rib dinner at Buffalo Joe's Steakhouse in Dupuyer March 7th from 6:00-8:30 p.m.

For those unable to attend the sale we will once again be broadcasting our sale live with Superior Productions on SLATV Channel which is Channel 997 on Dish Network. Live viewing and bidding will also be available with LiveAuctions.TV. We will start selling cattle promptly at 12:30 p.m. to try and get through all the sale lots in our allotted time. Videos of the sale cattle will be viewable at The Livestock Link, Superior Productions, and www.holdenherefords.com.

Thank you for your interest in our program. Please feel free to stop by and inspect the cattle at any time, and if we can help you out in any way, please give us a call.

Jack & Tresha Holden & family, Jay D. & Kelli Evans & family

www.holdenherefords.com

DELIVERY

We are offering free delivery to central points within 1,000 mile radius of our ranch on all purchases totaling \$5000 or more. Cattle will be delivered to anywhere in the continental U.S. but will be at buyer's cost after the first 1000 miles.

ABSENTEE BIDDING

Anybody wishing to bid that cannot attend the sale or participate through Superior Livestock or LiveAuctions may place a phone bid by calling any listed sale representative, Jack Holden, Jay D. Evans, Eric, or Brad. Please contact us if we can be of assistance in any way.

In 2019 we decided to find an older proven sire to bring back into our program that could cross on all the 215Z and 3297A influence cattle. 286M became our selection due to the exceptional females he has sired for udder quality and overall functionality and for the fact that for a bull born in 2002 his EPDs are still really strong. We have a great set of calves to offer this year and will have another set in our 2022 Sale. 286M ranks in the top 2% on Sustained Cow Fertility, the top 10% on UDDR, and the top 15% on CED and TEAT EPDs. He also in the top 2% on BMI\$. **4 exceptional sons sell!**

3297A has proven to be one of the best breeding bulls we have ever used, and his influence will carry on in our program for generations. This is his last set of sons to sell but there will be many grandsons and great grandsons that will be a major part of our herd going forward. He sires extra pigment, rib shape, muscle expression, length of body, and loads of eye appeal. He is a big time performance, maternal, and carcass bull whose progeny are full of red meat and the daughters are outstanding females. He ranks in the top 15% on MARB, the top 10% on WW and Milk, and the top 2% on YW, and REA EPDs, and the top 1% on CWT EPD and CHB\$. **2 powerhouse, well marked sons sell along with many grandsons!**

Goggle eyed, big ribbed, long bodied, and thick made bull out of the great 3006A sire. This is our second set of sons to sell out 5018C and they are outstanding. His dam was a top donor cow that we purchased in the Baker Dispersal. She was perfect uddered, high volume, and very easy fleshing. The 6092D bull used in our program is a maternal brother to 5018C also. His progeny are the right kind! **8 big ribbed, well marked sons sell!**

5107C was the \$160,000 high selling bull from our 2016 Sale and is also a maternal brother to the 3297A sire. He is a son of the popular 215Z Cooper bull and is breeding the same curve bending numbers as 215Z. He throws extra muscle, thickness, eye appeal, growth, length of body, and carcass. He ranks in the top 10% on BW, WW, YW, M&G, MARB, and REA, and the top 1% on CWT EPD and CHB\$. We are very impressed with the job he is doing in our herd. **8 extra fancy sons sell!**

We retained 7088E from our 2017 calf crop and extremely pleased with the job he is doing. He sires well made, short marked, high performance carcass cattle with extra eye appeal. The first two sets of 7088E calves have averaged 117.6 on IMF ratio. His dam is a top donor out of 0132X and a maternal sister to the 8120F bull that topped our 2019 Sale. Maternal grandam is an elite donor with exceptional carcass, udder, and teat EPDs and she is a maternal sister to the 710E bull in use at Cooper Herefords. 7088E ranks in the top 5% on all profit indexes, the top 1% on MARB, and the top 20% on WW EPDs. **11 powerful, high carcass sons sell!**

EXPLANATION OF BREED EPDS

CALVING EASE- DIRECT (CED)

CE EPD is based on calving ease scores and birth weights and is measured on a percentage. CE EPD indicates the influence of the sire on calving ease in females calving at 2 years of age. For example, if sire A has a CE EPD of 6 and sire B has a CE EPD of -2, then you would expect on average if comparably mated, sire A's calves would be born with an 8% more likely chance of being unassisted when compared to sire B's calves.

BIRTH WEIGHT (BW)

BW EPD is an indicator trait for calving ease and is measured in pounds. For example, if sire A has a BW EPD of 3.6 and sire B has a BW EPD of 0.6, then you would expect on average if comparably mated, sire A's calves would come 3 lb. heavier at birth when compared to sire B's calves. Larger BW EPDs usually, but not always, indicate more calving difficulty. The figure in parentheses found after each EPD is an accuracy value or reliability of the EPD.

WEANING WEIGHT (WW)

Weaning Weight (WW) WW EPD is an estimate of pre-weaning growth that is measured in pounds. For example, if sire A has a WW EPD of 60 and sire B has a WW EPD of 40, then you would expect on average if comparably mated, sire A's calves would weigh 20 lb. heavier at weaning when compared to sire B's calves.

YEARLING WEIGHT (YW)

YW EPD is an estimate of post-weaning growth that is measured in pounds. For example, if sire A has a YW EPD of 100 and sire B has a YW EPD of 70, then you would expect on average if comparably mated, sire A's calves would weigh 30 lb. heavier at a year of age when compared to sire B's calves.

Scrotal Circumference (SCR)

Measured in centimeters and adjusted to 365 days of age, SC EPD is the best estimate of fertility. It is related to the bull's own semen quantity and quality, and is also associated with age at puberty of sons and daughters. Larger SC EPDs suggest younger age at puberty. Yearling sons of a sire with a 0.7 SC EPD should have yearling scrotal circumference measurements that average 0.7 centimeters (cm) larger than progeny by a bull with an EPD of 0.0 cm.

MATERNAL MILK EPD (MILK)

The milking ability of a sire's daughters is expressed in pounds of calf weaned. It predicts the difference in average weaning weights of sires' daughters' progeny due to milking ability. Daughters of the sire with a +14 MM EPD should produce progeny with 205-day weights averaging 24 lb. more (as a result of greater milk production) than daughters of a bull with a MM EPD of -10 lb. (14 minus -10.0 = 24 lb.). This difference in weaning weight is due to total milk production during the entire lactation.

TEAT SIZE (TEAT)

TEAT EPDs are reported on a 9 (very small) to 1 (very large, balloon shaped) scoring scale. Differences in sire EPDs predict the difference expected in the sires' daughters' udder characteristics when managed in the same environment.

For example, if sire A has a teat size EPD of 0.4, and sire B has a teat size EPD of -0.1, the difference in the values is 0.5, or one-half of a score. If daughters of sires A and B are raised and managed in the same environment, you would expect half a score smaller teat size in daughters of sire A, compared to sire B.

RIBEYE AREA (REA)

REA EPDs reflect differences in an adjusted 365-day ribeye area measurement based on carcass measurements of harvested cattle. Sires with relatively higher REA EPDs are expected to produce better-muscled and higher percentage yielding slaughter progeny than will sires with lower REA EPDs. Ultrasound measurements are also incorporated into this trait and have been shown to be highly correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

MARBLING (MARB)

MARB EPDs reflect differences in an adjusted 365-day marbling score (intramuscular fat, [IMF]) based on carcass measurements of harvested cattle. Breeding cattle with higher MARB EPDs should produce slaughter progeny with a higher degree of IMF and therefore higher quality grades. Ultrasound measurements are also incorporated into this trait and have been shown to be highly correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

BALDY MATERNAL INDEX (\$BMI)

The BMI\$ is a maternally focused index that is based on a production system that uses Hereford x Angus cross cows. Progeny of these cows are directed towards Certified Hereford Beef. This index has significant weight on Sustained Cow Fertility, which predicts fertility and longevity of females. There is a slightly positive weight on Weaning Weight, Mature Cow Weight and Milk which accounts for enough growth but ensures females do not increase inputs. There is some negative emphasis on Dry Matter Intake, but a positive weighting on Carcass Weight which is anticipated to provide profitability from finishing of non-replacement females and castrated males. Marbling and Rib-eye Area are also positively weighted to keep the harvested progeny successful for CHB. This index is geared to identify Hereford bulls that will be profitable when used in a rotational cross with mature commercial Angus cows.

Certified Hereford Beef Index (\$CHB)

The Certified Hereford Beef Index is a terminal sire index that is built on a production system where Hereford bulls are mated to mature commercial Angus cows and all progeny will be targeted for Certified Hereford Beef after the finishing phase. This index has significant weight on Carcass Weight to ensure profit on the rail. As well there is a positive weighting for Average Daily Gain along with a negative weighting on Dry Matter Intake to ensure efficient pounds of growth in the finishing phase. Keep in mind, this production system takes advantage of complimentary breeding with the commercial Angus cow. Although Marbling is weighted positively in this index, a positive weighting for Rib-eye Area and a negative weighting for Back Fat are a greater priority in this index to allow for optimum end-product merit. This is the only index that has no emphasis on fertility. Remember that no replacement heifers are being retained.

AHA GE·EPD

The Power of Genomically Enhanced EPDs

The American Hereford Association (AHA) has embraced the use of genomics into their genetic evaluation by launching a first of its kind single step analysis that utilizes the marker effects of specific traits. Likewise, AHA is directly estimating accuracy values rather than approximating. The direct estimation of accuracy results in a more conservative value but a more accurate value than previous methodologies. The AHA is producing the most reliable genetic evaluation that is supported by Whole Herd TPR™ and genomics, which will give prospective buyers added confidence in purchasing young and unproven animals.

Buying animals that have a genomic profile incorporated into their Expected Progeny Difference (EPD) offers many advantages that allow for quicker breed and herd improvement. Below is a table showing the average increase in accuracy when buying a young animal with a Genomic Enhanced EPD (GE-EPD) versus an animal without a GE-EPD. Similarly, an effective progeny number increase is listed by trait that shows how many progeny equate to a genomic enhancement of a young animal (e.g. yearling). That's right, buying a young animal that has been genotyped is like having 2-17 progeny, depending on the trait. The proof gained on young, non-parent animals, through a genomic enhancement is valuable and greatly mitigates the risk and allows for more directed selection.

Each animal tested is recognized with the AHA GE-EPD logo.

AHA Trait	Accuracy Improvement	Effective Progeny Number Increase*
Calving Ease	0.09	17
Birth Weight	0.12	8
Weaning Weight	0.14	12
Yearling Weight	0.16	9
Scrotal Circumference	0.17	6
Mature Cow Weight	0.12	4
Udder Suspension	0.17	7
Teat Size	0.17	7
Carcass Weight	0.11	3
Fat	0.08	2
Rib-Eye Area	0.07	2
Marbling	0.10	3

* Effective Progeny Number Increase (EPNI)- EPNI is the difference gained for genotyped animals versus non-genotyped animals.

YEARLING BULLS

This group of yearling bulls represents the top 75% of the bull calves born in our 2020 calf crop. We feel they are one of the best sets we have ever offered for sale when you combine EPDs, phenotype, performance, carcass, strength, and cow power and there are several individuals in this offering that are as good as any bulls we have ever raised. The quality and uniformity in this group from top to bottom is outstanding. They are stout made, well marked, and have top notch performance and ultrasound data to back it up. They have all been semen checked and are ready to go to work for you. 100% of these bulls have AHA GE EPDs to increase the accuracy of their EPDs, and they also are all parentage verified. We invite you to look them over, and we feel that you will be very impressed with the consistency in type and kind in this powerful set of bulls. There are many full and 3/4 brothers in this group also, and almost 50% are ET calves from our extensive ET program.

The average EPDs on this group of bulls is

CED +4.4 BW +2.6 WW +58 YW +91 Scrotal +1.2 Milk +29 M&G +58 TEAT +1.4 REA +.38 MARB +.21 CHB\$ 127

Compare this to these breed averages and you will see how strong this group is on all traits across the board

CED +2.4 BW +2.9 WW +52 YW +84 Scrotal +.9 Milk +24 M&G +51 TEAT +1.24 REA +.37 MARB +.1 CHB\$ 111

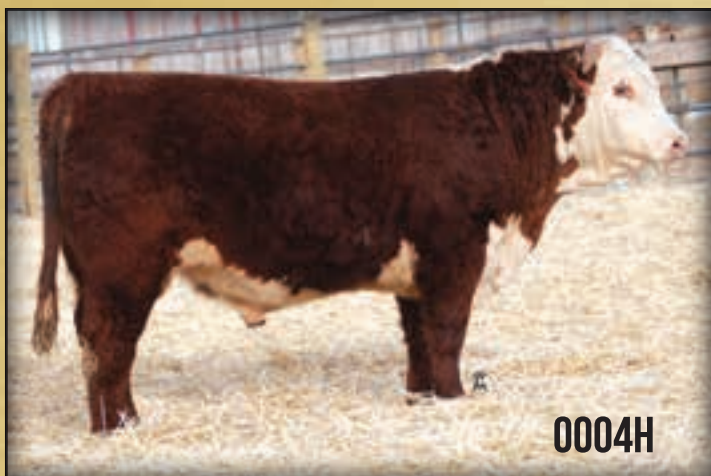

The average bull in our sale offering ranks as follows:

Top 35% CED, Top 25% WW, Top 30% YW and BMI\$, Top 20% Scrotal, Milk and M&G, Top 15% TEAT, Top 15% MARB and CHB\$

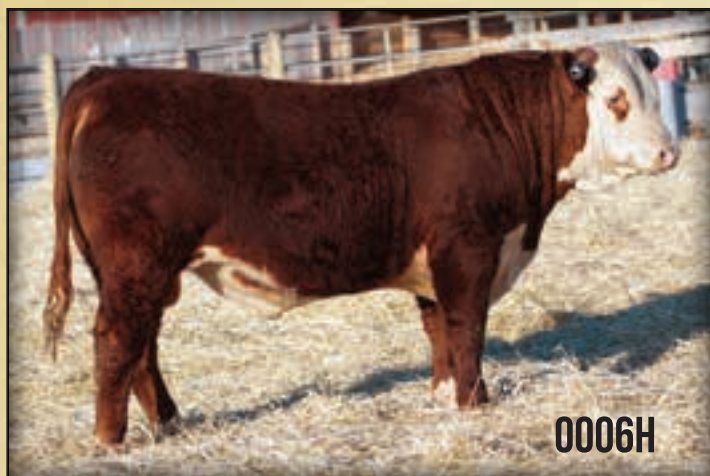

Combine this with 60 years of common sense, balanced trait selection, linebreeding, and selecting for strong maternal lines that are fertile and easy fleshing, well pigmented, and great uddered, and it adds up to bulls that will add tremendous value to your herd in all phases of beef production.

These bulls were again fed out on the CHS Feeds ration called Holden Bull Challenger. It is a high fiber, low fat pellet that we have fed for the last 20 years. The bulls gained over 3.5 lbs. a day on a 130 day gain test and have an average 205 day weight of 725 lbs., an average 365 day weight of 1325 lbs. and an average scrotal of 36 cm. They also scanned an average REA of 13.56, an average IMF score of 3.33%, and an average REA per 100/wt. of 1.07.

Scrotal Measurements were taken on 1-8-2021

UNMATCHED EPDS & UNLIMITED POTENTIAL

Here is a bull that you could write footnotes about all day long. 0043H is UNMATCHED by any bull in the breed for his combination of CED, BW, WW, and YW EPDs. He is very complete in his pattern, well marked, big testicled, smooth made through his front end, and double bred to the \$175,000 5139R donor cow. His dam will be a donor for us this year and scored a 9-9 on TEAT and UDDR as a 3 year old. 0043H has breed changing potential and has everything in line to be a replacement for bulls like Sensation and 215Z.

- ◆ Top 4% on MARB EPD and ratioed 144 on IMF
- ◆ Top 10% on CHB\$ and BMI\$
- ◆ Top 3% on CED, Scrotal, and M&G EPDs
- ◆ Top 1% on WW and YW EPDs
- ◆ Retaining a full 1/4 semen revenue interest

POWERHOUSE HERD BULL PROSPECT

If you like them long bodied, well marked, full of red meat, and a little more frame then here is a bull to really look over. This bull has exceptional individual performance and a huge ribeye. Dam is a top donor with a great udder and sold to Laprath Ranch in our 2019 Sale. Here is a bull with a little different pedigree that would sure work on the 215Z and 3297A lines of cattle.

- ◆ 16 inch REA and 114 ratio
- ◆ #2 bull in the sale on adj. 365 wt. at 1545 lbs.
- ◆ Top 5% on Scrotal, SCF, and BMI\$ and BIH\$
- ◆ Retaining a 1/4 in herd semen interest

TOP SHELF HERD BULL PROSPECT

0054H has been a stud from day one. He is good from every angle and one of the best we have ever raised. He has extra spring of rib, depth of flank, muscle expression, and always catches your eye. He is bold made with extra bone and substance and just has that herd bull presence. To top it off he has an incredible EPD profile across the board and is out of a granddaughter of the \$175,000 5139R donor cow. This bull has the look, pedigree, and numbers and is destined to be a breed changer!

- ◆ Top 2% on CHB\$ and top 1% on BMI\$ and BII\$
- ◆ Top 5% or higher on WW, YW, Scrotal, Milk, M&G, SCF, CWT, and REA EPDs
- ◆ Top 15% on TEAT EPD and well below breed avg. on BW EPD
- ◆ Weaned at 930 lbs. in August and posted a 1509 lb. adj. 365 day wt. with 40 cm Scrotal
- ◆ 15.5 inch REA and ratio of 111
- ◆ A 3/4 sister is one of our best young donors and the dam of the Lot 0159H bull

PREMIER HERD BULL PROSPECT

Here is a no holes prospect that checks all the boxes. 0159H just gets better every day. He is thick from end to end, long bodied, soft made, classy fronted, and just has that herd bull look. He has flawless structure, extra bone, big testicles, loads of pigment and is out of a great donor cow. His individual performance and EPD profile is off the charts good. He covers all segments of the beef industry, and I truly believe he is a breed changer.

0171H has that herd bull look and style. He is well marked, complete in his pattern, soft made, and loaded with carcass. Dam is a full sister to the 8120F herd sire that topped our 2019 Sale at \$55,000 for 1/2 interest, and she was the pick of our herd that sold in Denver in 2019 to TD Angus Ranch. She has a great udder and is an ideal type female.

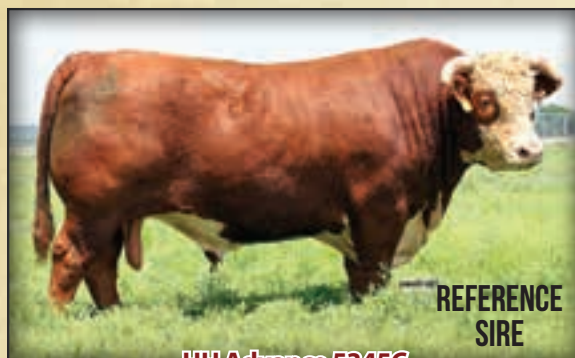

- ♦ Ratios of 111 on REA and 114 on IMF and ranks in the top 5% on REA and top 15% on MARB
- ♦ Top 10% on CED, top 5% on WW, top 15% on TEAT, and top 10% on CHB\$
- ♦ Exceptional genetic potential here.

Look at the exceptional curve bending numbers posted by this well marked, big ribbed, stout made bull with extra calving ease. 0175H has an outstanding phenotype, incredible EPDs, and his dam is perfect uddered. It's tough to get this much growth and maternal in a bull with a negative BW EPD.

- ♦ Top 4% on BW, Milk, and M&G EPDs
- ♦ Top 10% on CED and top 15% on WW EPDs

18 MONTH OLD FALL BULLS

This group of fall bulls is the top 25 out of almost 40 born in our fall 2019 calf crop. There is exceptional depth of quality in this big, stout, well marked set of bulls and some definite top end herd sire prospects also. The average EPDs on this group are CED +4.5 BW +2.2 WW +60 YW +92 Milk +30 M&G +60 REA +.35 MARB +.18 CHB\$124

Please note that the adj. 205 day weights and adj. 365 day weights on these bulls are not comparable to the yearling bulls. They are raised in a totally different environment, and this set of bulls went through one of the worst fall and winter season that we have had in a long time. They are developed out in a big pasture and fed a little lighter than our yearling bulls also.

All of these bulls also have GE EPDs and are parentage verified and semen checked. They are a great combination of pigment, eye appeal, performance, carcass, and maternal. They are big and stout and ready to go cover a lot of country and breed a lot of cows.

8349H is a goggle eyed, big ribbed, perfect uddered female that has big time donor potential. She is a maternal sister to the Lots 0054H and and 0022H feature bulls. Her pedigree is loaded with elite donor females. 0348H is a goggle eyed, eye catching heifer with excellent EPDs. This pair would be a great foundation for any operation. Sells as a pair.

LOTS BB1 - BB5

Once again we are pleased to offer an outstanding set of true F1 black baldy open yearlings heifer. These heifers have lots of pigment, are big ribbed, feminine, and should make a great set of cows. They are bangs vaccinated, had all pre breeding shots, unbranded, and are ready to breed.

They will sell in groups of 5 with the buyer having the option to take as many lots as he would like.

BB1 & BB2

TAGS 0389-0399

These are home raised heifers out of our top set of Angus recipis. They are averaging over 850 lbs. right now and were born in February and March.

BB3 BB4 & BB5

TAGS 0360-0375

These heifers were raised on the Billy VandenBos Ranch right next door and are out of a great set of young Angus cows and some top bulls that he got from us including a maternal brother to our 4105B herd sire. They were born in March and early April and will average over 750 lbs. at sale time.

Our operation is very blessed to work with a lot of talented people through the year. We thank them all and appreciate all that they do to help make our operation successful. We also have a great crew of friends and neighbors that show up to help get ready for the sale and pull off everything that it takes to make sure that everything goes well on our big day. Our hats are off to them all!!

Thank You!
