57th
Annual
Production Sale

Wynne Davis
HH-ADVANCE 2054K-ET

MONDAY, MARCH 13, 2023

LUNCH 11:30 • SALE AT 12:30

AT THE RANCH IN VALIER, MONTANA

LiveAuctionsTV

View Holden Hereford's Sale Live on Bid.SuperiorLivestock.com

VIEWING THE AUCTION The auction will be broadcast online at Bid.SuperiorLivestock.com and the pre-recorded videos will also be hosted there. You do not need an account just to watch the auction or view videos of the sale offering.

ONLINE BIDDING Go to Bid.SuperiorLivestock.com for Superior's new online bidding platform. If you have not registered there before you will need to create an account. The first time you register an account you will receive a confirmation e-mail that you must click on. Once you have completed this, select the auction you would like to bid on and click the "Request a Buyer Number" button. The first time you request a buyer number you will be sent a confirmation code via text. Enter that code in the login portal and you will receive a buyer number. This 2-step verification process will only have to be done once and in the future you will be able to simply login and request a buyer number and receive it instantly for any auction. Once you have successfully registered and received a buyer number it will show your name and buyer number on both the video preview page and the online bidding page when you are logged in. If you have an account at LiveAuctions.tv you may skip the registration process and use those login credentials to request a buyer number as LiveAuctions is a division of Superior Livestock. For more details on registering an account and also how to bid, you may watch a tutorial at Bid.SuperiorLivestock.com/how-it-works

**IF YOU NEED ANY
ASSISTANCE CALL
SUPERIOR AT
1(800) 422-2117**

TURN IN BIDS OVER THE PHONE This is Superior's traditional method of buying cattle and is the suggested process for anybody who does not have consistent, high-speed internet. You still must register an account at Bid.SuperiorLivestock.com and request a buyer number. Once you receive a buyer number you will see the bid line phone number. Just watch the auction online and call in at least 2 lots ahead of the lot you are looking to bid on. A Superior Livestock representative will be with you on the phone and will assist you in placing bids.

Buyers will be contacted by the ranch after the sale for payment and delivery details.

View and Bid Live on the Internet

Go to **www.LiveAuctions.tv** Please note that you do NOT need an account to watch the auction, but you do need to register an account and request a buyer number if you wish to bid. If you have not created a new account since September 1st, 2020 you will need to click "Register" in the top right corner of the homepage and create a new account. Once you have completed the form on this registration page and hit the "Register" button you will receive an e-mail with a place to click on to verify you have entered a valid e-mail address. Once you have completed this registration process, find the auction you are interested in on the homepage and click on it (sales are listed in chronological order). You should then see a box that says Login. Now that you have an account with LiveAuctions just type in your E-mail Address and Password. You will now see a hyperlink at the top that says "Request a Buyer Number". The first time you request your first buyer number on LiveAuctions it will send you a text message with a verification code in it. Type the code from the text message into the area requiring it and you will then see your name along with a buyer number listed at the top of the webpage where the live video is and you will be able to bid. You will only have to complete this two-step verification process one time. After that you will be able to immediately request a buyer number on any auction without verification through an e-mail or text message again.

LiveAuctions no longer requires an app. If you wish to view/register/bid on a smartphone just type LiveAuctions.tv in whatever web browser you use. The registration process is the same as it is on a desktop computer, but the website is built mobile friendly. Click on the three lines in the top right corner to access the menus.

Buyers will be contacted by the ranch after the sale for payment and delivery details.

If you need help registering to bid or to view the auction please call

Technical Support at (682) 816-4900, Katie Colyer at 208-599-2962 or e-mail us at TechSupport@LiveAuctions.tv

SALE LOCATION

At the Holden Hereford Ranch in Valier, Montana. See map page 3.

TERMS AND CONDITIONS

- ♦ All sale cattle have been parentage verified and DNA tested to be IE Free, HY Free, Dilutor Free, and MSUD Free by Neogen Labs.
- ♦ Each animal will be sold to the highest bidder without reservation.
- ♦ The auctioneer will settle any disputes as to bidding and his decision will be final.
- ♦ Terms of all sales will be cash unless arrangements are made between purchaser and seller prior to sale.
- ♦ Individual health papers will be furnished with each animal permitting shipment to any state.
- ♦ In case an adjustment is required, it will be made with a replacement animal of equal value to the animal in question or credit on the purchase of another animal.
- ♦ No adjustments will be made after nine (9) months of sale day on any animals.
- ♦ The animal becomes the property of the purchaser as soon as sold but it shall be the responsibility of the seller to see that animals are properly cared for until delivered to the purchaser.
- ♦ Any death or injury after the animal is sold is at the buyer's risk.
- ♦ Anyone attending this sale attends at their own risk and without liability on the part of the owners or their employees.
- ♦ Corrections or additions of any information contained in the sale catalog will be announced from the auction stand and will take precedence over any printed material.

Eric Lawver (406) 600-3118

This is our invitation for you to attend our 57th Annual Production Sale. On behalf of our operation, we welcome you to come and see what we feel is an exceptional sale offering. We feel the depth of quality in this group is outstanding, and this is our best set of bulls ever for their combination of phenotype and EPDs. It's hard to believe that it has been 57 years since the first Cooper-Holden Production sale that was held in 1967 in Great Falls, MT. We feel very blessed to still be involved in the Hereford business, and are very grateful for all the wonderful friends and customers we have had experiences with over these last 57 sales. The Hereford business has been great to us over the years, and it is exciting to see the interest focused back on quality Hereford cattle out in the beef industry today. The data is in and Herefords continue to excel in all research programs for both heterosis and extra profit for your operation. We have enjoyed our part in working to produce Hereford cattle that will perform well in all segments of the beef industry, and we look forward to many more years of raising the best Herefords possible. As always, we plan on laying out the welcome mat with great hospitality and top quality Hereford cattle on display, and we truly hope you can join us at sale time.

Once again, we are pleased to offer an outstanding set of bulls that are uniform and predictable in quality, type, and breeding. This group represents the top 100 out of almost 140 bull calves born in our 2022 calf crop and 1/3 of them are the results of our extensive ET program. In addition, we are selling a tremendous set of powerful 18 month old bulls from our fall calving program. They are the top 60% of the fall 2021 calf crop. They are a balanced trait set of bulls that combine thickness, performance, pigment, maternal strength, fleshing ability, carcass, disposition, eye appeal, and moderate birth weight. Almost 90% of the sale offering qualifies as sires for the Hereford Advantage program by being in the top 50% of the breed on CHB\$ (\$115 and above), and over 65% of the sale offering ranks in the top 25% of the breed on CHB\$, MARB and Milk EPDs, and over 50% rank in the top 25% on WW EPD. Also, 100% of the sale offering have GE EPDs on them to improve the accuracy of their EPDs. We have embraced the use of Genomics in our herd to give our customers better EPD data on our cattle, and are one of a small group of herds in the U.S. that have been genomic testing every animal since 2012. We are also proud to be recognized as a Platinum T.P.R. breeder by the AHA. The bulls will also sell with complete ultrasound and performance data and they have all passed a semen test by our vet. We also have a great set of elite Line One females in the sale again this year. There are 20 top quality Hereford heifers, and for the fourth year we will offer an extra fancy set of F1 black baldy open heifers in our sale. All registered sale cattle have been DNA parentage verified and tested free for all known genetic defects except for the MD defect. MD is not present in Line One cattle and are sale cattle are guaranteed to be free from it. As always, all sale cattle sell fully guaranteed.

Our cow herd is Line One in breeding. We purchased our first Line One cattle over 70 years ago. Since then we have purchased and used many top sires from the Miles City Research Station. We have also exchanged and purchased top herd sires from Cooper Herefords. We have also selected top herd sire prospects from our own herd every year.

We were one of the first members of the Montana Beef Performance Association when it was organized in 1956 and were very active in it until it was dissolved. We have been involved with the TPR program of the American Hereford Association and are active participants in the Whole Herd Reporting Program. These records have been very important in selecting and maintaining the performance and quality of our cattle. We have a severe culling program for our mother cows. We cull on performance, fertility, soundness, udder quality, and milk. Our cattle are the product of many years of selection for these traits. Our cowherd is our pride and many of the top cows in the breed have come from our ranch.

We have stayed with a strong performance, multitrait line breeding program to enhance the predictability of our cattle for our customers. Our focus has always been on stacking generation after generation of the traits that add value to our customer's bottom line. A line breeding program can only succeed if you continually add cattle with superior genetics to it. The advantage of our program is the uniformity and predictability it provides along with the heterosis that can be generated by an outcross within the breed or between breeds. These bulls have generations of bred in performance and will pass these traits on to their progeny consistently.

The sale bulls and heifers and the cowherd will be on display March 11, 12, and 13 for your inspection. Lunch and snacks will be provided on both March 12th and sale day. There will be a social hour and prime rib dinner at Buffalo Joe's Steakhouse in Dupuyer on March 12th from 6:00-8:30 p.m.

If you are unable to attend the sale we will have two different options for internet bidding. You will be able to view and bid on Superior Livestock and you can also view and bid online at LiveAuctions.tv. We will start selling cattle promptly at 12:30 p.m. to try and get through all the sale lots in our allotted time. Videos of the sale cattle will be viewable at The Livestock Link, bid.superiorlivestock.com, and www.holdenherefords.com.

Thank you for your interest in our program. Please feel free to stop by and inspect the cattle at any time, and if we can help you out in any way, please give us a call.

Jack & Tresha Holden & family, Jay D. & Kelli Evans & family

www.holdenherefords.com

DELIVERY

We are offering free delivery to central points within 1,000 mile radius of our ranch on all purchases totaling \$5000 or more. Cattle will be delivered to anywhere in the continental U.S. but will be at buyer's cost after the first 1000 miles.

ABSENTEE BIDDING

Anybody wishing to bid that cannot attend the sale or participate through Superior Livestock or LiveAuctions may place a phone bid by calling any listed sale representative, Jack Holden, Jay D. Evans, Eric, or Brad. Please contact us if we can be of assistance in any way.

TRAVEL AND ACCOMMODATIONS

7143E is a proven sire that has done an all around great job for us. The depth of rib, length of body, muscle expression and overall quality he is siring is outstanding. He has curve bending numbers with strong carcass and loads of cow power. His daughters are beautiful uddered and very fertile. 7143E ranks in the top 10% on CED, Milk, M&G, TEAT and CHB\$, and the top 15% on UDDR, MARB, and BMI\$. **8 sons sell!**

883F was the high selling bull in Cooper's 2019 sale and had been a standout there all year. He has done an outstanding job here and has another exceptional set of sons to sell this year. We are using multiple sons in our herd and his daughters look fantastic. 883F is moderate framed, long bodied, and stout made and has exceptional EPDs that rank him in the top 5% on Milk, M&G and CWT, and the top 10% on MARB and CHB\$, and the top 15% on WW EPD. **14 sons sell!**

8146F is a long bodied, bigger framed bull that we purchased from Cooper's. He is a full brother to the 8138F bull that they are using and own with L Bar W Cattle Co. This is our first set of sons to sell out of him and they are a really nice set. He has curve bending EPDs with extra carcass and ranks in the top 5% on Scrotal, MARB and CHB\$, the top 15% on CED, WW, YW, M&G, CW, and REA EPDs. **8 sons sell!**

Well marked, big ribbed, soft made sire with extra pigment and out of a top notch donor dam. Maternal sisters to 9073G are some of our best donors and have exceptional udder quality. They include the 6169D donor that is one of our favorite cows on the ranch, and is the dam of the Lot 2025K bull. 9073G ranks in the top 10% on MARB EPD and the top 20% on all 3 Profit Indexes. Lots of functionality in this pedigree. **7 sons sell!**

0011H is proving to be a rockstar breeding bull that is siring exceptional progeny across the board. He is a calving ease sire with extra growth, maternal, and carcass. His progeny are well marked, extra long bodied, and thick. He posted in-herd ratios on his first progeny of BW 98.1; NR 103.4; YR 105.7; and IMF ratio of 116.4. He ranks in the top 20% or higher on 13 different traits including top 2% on MARB. This is an exciting first set of sons out of 0011H. **8 sons sell!**

0022H sold for \$75,000 for 1/2 interest in our 2021 Sale. He is goggle eyed, extra long bodied, easy fleshing, and thick butted with extra eye appeal. He has superior calving ease with outstanding growth, maternal, and carcass strength. His dam was a top donor that sold for \$45,000 in our 2022 Female Sale, and he is a maternal brother to the 6317D donor and the dam of the 0270H bull that topped our 2022 Sale. He ranks in the top 15% or higher on 13 different traits. **7 sons sell!**

EXPLANATION OF BREED EPDS

CALVING EASE- DIRECT (CED)

CE EPD is based on calving ease scores and birth weights and is measured on a percentage. CE EPD indicates the influence of the sire on calving ease in females calving at 2 years of age. For example, if sire A has a CE EPD of 6 and sire B has a CE EPD of -2, then you would expect on average if comparably mated, sire A's calves would be born with an 8% more likely chance of being unassisted when compared to sire B's calves.

BIRTH WEIGHT (BW)

BW EPD is an indicator trait for calving ease and is measured in pounds. For example, if sire A has a BW EPD of 3.6 and sire B has a BW EPD of 0.6, then you would expect on average if comparably mated, sire A's calves would come 3 lb. heavier at birth when compared to sire B's calves. Larger BW EPDs usually, but not always, indicate more calving difficulty. The figure in parentheses found after each EPD is an accuracy value or reliability of the EPD.

WEANING WEIGHT (WW)

Weaning Weight (WW) WW EPD is an estimate of pre-weaning growth that is measured in pounds. For example, if sire A has a WW EPD of 60 and sire B has a WW EPD of 40, then you would expect on average if comparably mated, sire A's calves would weigh 20 lb. heavier at weaning when compared to sire B's calves.

YEARLING WEIGHT (YW)

YW EPD is an estimate of post-weaning growth that is measured in pounds. For example, if sire A has a YW EPD of 100 and sire B has a YW EPD of 70, then you would expect on average if comparably mated, sire A's calves would weigh 30 lb. heavier at a year of age when compared to sire B's calves.

Scrotal Circumference (SCR)

Measured in centimeters and adjusted to 365 days of age, SC EPD is the best estimate of fertility. It is related to the bull's own semen quantity and quality, and is also associated with age at puberty of sons and daughters. Larger SC EPDs suggest younger age at puberty. Yearling sons of a sire with a 0.7 SC EPD should have yearling scrotal circumference measurements that average 0.7 centimeters (cm) larger than progeny by a bull with an EPD of 0.0 cm.

MATERNAL MILK EPD (MILK)

The milking ability of a sire's daughters is expressed in pounds of calf weaned. It predicts the difference in average weaning weights of sires' daughters' progeny due to milking ability. Daughters of the sire with a +14 MM EPD should produce progeny with 205-day weights averaging 24 lb. more (as a result of greater milk production) than daughters of a bull with a MM EPD of -10 lb. (14 minus -10.0 = 24 lb.). This difference in weaning weight is due to total milk production during the entire lactation.

TEAT SIZE (TEAT)

TEAT EPDs are reported on a 9 (very small) to 1 (very large, balloon shaped) scoring scale. Differences in sire EPDs predict the difference expected in the sires' daughters' udder characteristics when managed in the same environment.

For example, if sire A has a teat size EPD of 0.4, and sire B has a teat size EPD of -0.1, the difference in the values is 0.5, or one-half of a score. If daughters of sires A and B are raised and managed in the same environment, you would expect half a score smaller teat size in daughters of sire A, compared to sire B.

RIBEYE AREA (REA)

REA EPDs reflect differences in an adjusted 365-day ribeye area measurement based on carcass measurements of harvested cattle. Sires with relatively higher REA EPDs are expected to produce better- muscled and higher percentage yielding slaughter progeny than will sires with lower REA EPDs. Ultrasound measurements are also incorporated into this trait and have been shown to be highly correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

MARBLING (MARB)

MARB EPDs reflect differences in an adjusted 365-day marbling score (intramuscular fat, [IMF]) based on carcass measurements of harvested cattle. Breeding cattle with higher MARB EPDs should produce slaughter progeny with a higher degree of IMF and therefore higher quality grades. Ultrasound measurements are also incorporated into this trait and have been shown to be highly correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

BALDY MATERNAL INDEX (\$BMI)

The BMI\$ is a maternally focused index that is based on a production system that uses Hereford x Angus cross cows. Progeny of these cows are directed towards Certified Hereford Beef. This index has significant weight on Sustained Cow Fertility, which predicts fertility and longevity of females. There is a slightly positive weight on Weaning Weight, Mature Cow Weight and Milk which accounts for enough growth but ensures females do not increase inputs. There is some negative emphasis on Dry Matter Intake, but a positive weighting on Carcass Weight which is anticipated to provide profitability from finishing of non-replacement females and castrated males. Marbling and Rib-eye Area are also positively weighted to keep the harvested progeny successful for CHB. This index is geared to identify Hereford bulls that will be profitable when used in a rotational cross with mature commercial Angus cows.

Certified Hereford Beef Index (\$CHB)

The Certified Hereford Beef Index is a terminal sire index that is built on a production system where Hereford bulls are mated to mature commercial Angus cows and all progeny will be targeted for Certified Hereford Beef after the finishing phase. This index has significant weight on Carcass Weight to ensure profit on the rail. As well there is a positive weighting for Average Daily Gain along with a negative weighting on Dry Matter Intake to ensure efficient pounds of growth in the finishing phase. Keep in mind, this production system takes advantage of complimentary breeding with the commercial Angus cow. Although Marbling is weighted positively in this index, a positive weighting for Rib-eye Area and a negative weighting for Back Fat are a greater priority in this index to allow for optimum end-product merit. This is the only index that has no emphasis on fertility. Remember that no replacement heifers are being retained.

The Power of Genomically Enhanced EPDs

The American Hereford Association (AHA) has embraced the use of genomics into their genetic evaluation by launching a first of its kind single step analysis that utilizes the marker effects of specific traits. Likewise, AHA is directly estimating accuracy values rather than approximating. The direct estimation of accuracy results in a more conservative value but a more accurate value than previous methodologies. The AHA is producing the most reliable genetic evaluation that is supported by Whole Herd TPR™ and genomics, which will give prospective buyers added confidence in purchasing young and unproven animals.

Buying animals that have a genomic profile incorporated into their Expected Progeny Difference (EPD) offers many advantages that allow for quicker breed and herd improvement. Below is a table showing the average increase in accuracy when buying a young animal with a Genomic Enhanced EPD (GE-EPD) versus an animal without a GE-EPD. Similarly, an effective progeny number increase is listed by trait that shows how many progeny equate to a genomic enhancement of a young animal (e.g. yearling). That's right, buying a young animal that has been genotyped is like having 2-17 progeny, depending on the trait. The proof gained on young, non-parent animals, through a genomic enhancement is valuable and greatly mitigates the risk and allows for more directed selection.

Each animal tested is recognized with the AHA GE-EPD logo.

AHA Trait	Accuracy Improvement	Effective Progeny Number Increase*
Calving Ease	0.09	17
Birth Weight	0.12	8
Weaning Weight	0.14	12
Yearling Weight	0.16	9
Scrotal Circumference	0.17	6
Mature Cow Weight	0.12	4
Udder Suspension	0.17	7
Teat Size	0.17	7
Carcass Weight	0.11	3
Fat	0.08	2
Rib-Eye Area	0.07	2
Marbling	0.10	3

* Effective Progeny Number Increase (EPNI)- EPNI is the difference gained for genotyped animals versus non-genotyped animals.

YEARLING BULLS

This group of yearling bulls represents the top 75% of the bull calves born in our 2022 calf crop. We feel they are one of the best sets we have ever offered for sale when you combine EPDs, phenotype, performance, carcass, strength, and cow power and we are extremely proud of the quality and uniformity in this group from top to bottom. They are stout made, well marked, long bodied and have top notch performance and ultrasound data to back it up. They have all been semen checked and are ready to go to work for you. 100% of these bulls have AHA GE EPDs to increase the accuracy of their EPDs, and they also are all parentage verified. We invite you to look them over, and we feel that you will be very impressed with the consistency in type and kind in this powerful set of bulls. There are many full and 3/4 brothers in this group also, and almost 40% are ET calves from our extensive ET program.

The average EPDs on this group of bulls is

CED +4.0 BW +2.6 WW +60 YW +95 Scrotal +1.2 Milk +30 M&G +61 TEAT +1.3 REA +.43 MARB +.25 BMI\$370 CHB\$ 135

The average bull in our sale offering ranks as follows:

Top 40% CED, Top 25% WW, Top 30% YW, Top 25% Milk, Top 20% M&G, Top 40% TEAT, Top 15% MARB, top 30% on \$BMI, and top 15% on CHB\$

This consistent quality across the board on EPDs and Profit Indexes shows our commitment to multi trait selection. Combine this with 70 years of common sense, balanced trait selection, linebreeding, and selecting for strong maternal lines that are fertile and easy fleshing, well pigmented, and great uddered, and it adds up to bulls that will add tremendous value to your herd in all phases of beef production.

These bulls were again fed out on the CHS Feeds ration called Holden Bull Challenger. It is a high fiber, low fat pellet that we have fed for the last 20 years. The bulls gained over 3.5 lbs. a day on a 130 day gain test and have an average 205 day weight of 755 lbs., an average 365 day weight of 1365 lbs. and an average scrotal of 38 cm. They also scanned an average REA of 13.49, and an average IMF score of 2.92%.

Scrotal Measurements were taken on 1-10-2023

POWERHOUSE HERD BULL PROSPECT

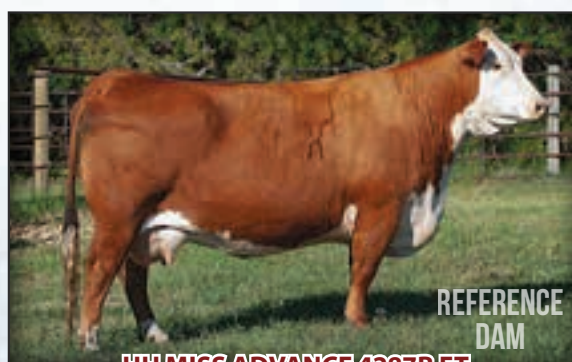

2018K is a scale crusher with extra length of body, dimension, pigment, and eye appeal. He is the heaviest actual weaning weight bull that we have raised. He is a maternal brother to the 0159H sire and his pedigree is loaded with great cows. Outstanding combination of growth, maternal, and carcass with the phenotype to go with it.

- ♦ Weaned at 1000 lbs. on Aug. 22, 2022 and weighed 1500 on December 28, 2022
- ♦ Top 1% on WW, YW, Milk, M&G, CWT, and CHB\$, top 2% on REA, top 10% on MARB EPD
- ♦ #2 bull in the sale on CHB\$ at 183
- ♦ Dam is an elite donor with a proven track record of producing top sires. Maternal granddam is the \$45,000 4287B donor cow that is the dam of our 0022H herd sire
- ♦ Full brother sells as Lot 2062K and maternal brother as Lot 2246K

PREMIER HERD BULL PROSPECT

One of the most complete patterned bulls we have ever raised, and out of one of my very favorite cows. 2025K is well marked, deep ribbed, big hipped, and beautiful through his front shoulder and neck. He has an outstanding EPD profile across the board, and he just looks like a bull that will sire top end sons and elite daughters. Here is a bull that we feel is a breed improver.

- ♦ Top 4% on Milk, M&G, UDDR, and CW, top 10% on BMI\$, top 15% on WW and REA EPDs
- ♦ Maternal brother to the 1128J herd sire that sold to Van Newkirk Herefords for \$65,000 for 1/2 interest
- ♦ Dam is as functional as you can make with extra fleshing ability, pigment, and a beautiful udder. She is a maternal sister to our 9073G herd sire and backed by generations of top donors.
- ♦ Selling 1/2 interest and 1/2 possession. Buyer has first choice on possession.

Freckle faced, extra thick, long bodied and absolutely loaded with carcass. 2052K is out of the 1045L bull that was born in 2001, and who is one of the most proven carcass sires in the breed. His dam is a perfect uddered 3297A daughter that goes back to the great 0121X donor cow.

- ♦ Top 1% on TEAT and MARB, and #1 bull in the sale on CHBS at 187
- ♦ Top 15% on UDDR, CW, and REA EPD
- ♦ 2052K is the highest Milk EPD son of 1045L ever produced and also has a very moderate BW EPD
- ♦ Full brother sells as Lot 2085K
- ♦ Retaining a 1/4 in herd semen interest

Brayton says come to the sale and check out this great set of bulls.

ELITE HERD BULL PROSPECT

Outstanding combination of phenotype combined with an exceptional EPD profile and out of a top donor. 2054K checks all the boxes. He is a smooth moving, well marked, no holes bull that catches your eye in the pen every time. It's rare to have a bull with this much growth and still be top 15% on CED.

- ♦ Top 1% on WW, YW, and M&G, top 5% on Milk, UDDR, and CW, and top 20% on UDDR, BMI\$, and CHB\$
- ♦ Maternal brother to the 0043H bull that sold for \$100,000 in our 2021 Sale
- ♦ Dam is a top donor with a beautiful udder, loads of fleshing ability, and consistently produces high CED and low BW
- ♦ Maternal brother sells as Lot 2199K
- ♦ Retaining a full 1/4 interest

TOP NOTCH HERD BULL PROSPECT

It would be hard to check more boxes than this big ribbed, well marked, fancy fronted 0022H son does. I really like this bull, and look at the set of numbers he has. To top it off he is loaded with cow power. His dam is a beautiful uddered cow, maternal granddam is a full sister to our 8120F herd sire, and great granddam is the 2178Z donor cow that produced the 0011H and 8120F herd sires. There is no guesswork left in this bull.

- ♦ Posted a 79 lb. bw and a 808 lb. adj 205 weight.
- ♦ Top 1% on CW and CHBS, top 3% on WW and YW and M&G, top 10% on Scrotal and MARB
- ♦ Top 15% on Milk and REA and top 20% on BMI\$

If you do a search of the AHA database using 2116K's combination of CED, BW, and YW, there is only one other bull ever born that will match him. Adding in either his CHBS or MARB EPD puts him in a league of his own. Not only does he have incredible EPDs but look at the phenotype he displays. Well marked, big nuttied, thick butted, moderate framed, goggle eyed, and stylish. Here is a unique individual that should be a breed changer. The market to sell semen for breeding heifers to this bull has the potential to be outstanding, and with his carcass numbers just think what the steer calves from those will do in the feedlot.

- ♦ Top 1% on CED, BW, Mature Cow Weight, and MARB and top 2% on CHBS
- ♦ Top 10% on Milk and CW and top 20% on Scrotal and BMI\$
- ♦ Retaining a full 1/4 Revenue Interest

ELITE HERD BULL PROSPECT

Here is a bull that you just can't help but love in every way. The more you study him the better he gets. You admire him first for his outstanding phenotype, but then when you study his numbers and cow family it just adds to it more. This bull checks so many boxes and we feel he is a true top end herd bull that could improve any herd.

- ♦ Ratioed 130 on MARB and top 10% on MARB EPD

THE HEREFORD ADVANTAGE PROGRAM

An industry-changing program from the American Hereford Association and IMI Global to verify and add value to Hereford-influenced feeder cattle with superior genetics, health and management.

REQUIREMENTS

- Source & Age verification
- Genetic merit
 - Minimum of 50% Hereford genetics
 - Bull battery ranking in top 50% of breed for \$CHB index (bull battery average)
 - Bull ownership transferred (all bulls)
- Vaccination program - two rounds of vaccinations pre-weaning (minimum)
 - 1st Round: At branding or grazing turnout
 - 5-way respiratory modified live vaccine
 - 7, 8 or 9-way clostridial
 - 2nd Round: 2-4 weeks prior to weaning
 - 5-way respiratory modified live vaccine
 - 7-way clostridial with Histophilus
- BQA certification

Visit

HerefordAdvantage.com

to get started today!

BENEFITS

- Genetic improvement tool
 - Sire EPD and profit index ranking summary
- Added market exposure
 - Marketing information sent to a growing number of buyers
 - Free listing on AHA listing page
- Enrollment cost - \$3.00/hd. (verification + eID tag)
 - May be bundled with other verification programs through IMI Global

ELITE HERD BULL PROSPECT

2199K is a maternal brother to the Lot 2054K bull. He is extremely complete in his pattern with great pigment, extra spring of rib, a big hip and dep flank, and he is an eye catcher. He combines that with curve bending EPDs with added maternal and carcass, and is out of one of the top donors we have ever had. His dam is picture perfect with a beautiful udder and loads of fleshing ability and eye appeal.

- ♦ Top 5% on BW, TEAT, and MARB, top 10% on CED, Milk, and CHBS, top 15% on UDDR and CW
- ♦ Maternal brother to the 0043H bull that sold to Flying S Herefords in our 2021 Sale for \$100,000

This bull is long as a freight train. If you believe that more length adds pounds like us, this bull proves the point to a tee. Look at the individual performance numbers posted by this well marked, smooth shouldered, clean fronted curve bender. The spread on this bull from BW to YW is fantastic. Look at his milk and carcass numbers also. Here is a bull that adds value to all segments of the beef industry.

- ♦ #3 bull in the natural calves on NR at 118 and posted an 868 lb. adj. 205 weight
- ♦ Top 3% on WW, YW, Milk, M&G, top 10% on Scrotal, CW, and MARB, top 15% on CHBS, and still in the top 20% on CED and BW
- ♦ One of 7 bulls in the entire sale offering to post an adj. 365 day weight of over 1500 lbs.

ELITE HERD BULL PROSPECT

I don't even know where to start with the footnote on this bull. 2246K is easily the most impressive March bull we have ever raised. Look at the rib shape, bone, thickness, and substance in this fancy fronted bull. He weighed over 1300 lbs. at 9 months of age and passed semen test before he was 10 months of age. He would have had NR and YR's of 115-120 if he would have been able to have been ratioed with the older bulls. He has the 6317D and 2178Z donors up close in his pedigree. That's cow power deluxe with carcass.

- ♦ Top 1% on CW and REA, top 3% on CHBS, top 5% on YW
- ♦ Top 10% on BMI\$, top 15% on WW, top 20% on Milk and TEAT EPDs
- ♦ Maternal brother to Lots 2018K and 2062K
- ♦ Maternal brother to the 0159H herd sire that could be the best carcass bull we have ever raised
- ♦ Retaining 1/2 interest and 1/2 possession

SHHH.

THERE'S A LOT OF VALUE IN A QUIET, GOOD-DISPOSITIONED COW.

HEREFORD

No broken fences. No busted gates. No injured people.

Herefords lead the way when it comes to the silent traits — and increase profitability by more than \$55 per cow per year at the same time.

7%	\$51	\$20	\$30
Higher pregnancy rates	More Per Cow, Per Year	Advantage in Feed Efficiency	Advantage in Product Profitability

COME HOME TO HEREFORD.

*Based on a comparison of Hereford cattle to other breeds. Data is based on a comparison of Hereford cattle to other breeds. Data is based on a comparison of Hereford cattle to other breeds.

18 MONTH OLD FALL BULLS

This group of fall bulls is the top 31 out of 55 bulls born in our fall 2021 calf crop. There is exceptional depth of quality in this big, stout, well marked set of bulls. There are some definite top end herd bull prospects in this group. The average EPDs of this group are

CED +4.6 BW +2.6 WW +58 YW +91 Scrotal +1.2 Milk +29 M&G +59 REA +.41 MARB +.17 CHB\$ 122

Please note that the adj. 365 day weights on these bulls are not comparable to the yearling bulls. They are raised in a totally different environment with no green grass while they are on their dams and a lot of winter weather. They are also developed after weaning out in big pastures on grass and fed for a lower gain. They are bulletproof, sound, and ready to go breed a lot of cows and cover the country.

All of these bulls also have GE EPDs, are parentage verified, and semen checked. They are a great combination of pigment, eye appeal, performance, carcass, and maternal with many ET bulls in the group.

1389J is the natural calf out of the 325A donor that came from Flying S Herefords. This big testicled, soft made powerhouse is loaded with maternal characteristics. 1389J is fairly young in this pen of bulls, but that hasn't stopped him from keeping up with these guys. He has really come on strong since September. 325A is a maternal sister to the 2137K and 2224K bulls out of the 0234X donor.

- ♦ Top 1% on TEAT, top 4% on Milk and UDDR
- ♦ Top 15% on Scrotal, CW, and BMI\$

ELITE DONOR FEMALES

These two donors are a real sale feature. They are a mother and daughter duo that led off Cooper's 2019 Female Sale. They have been outstanding donors for us. We have some embryos frozen on them, so decided we would let them contribute to another top Hereford herd. They will sell with calves at side and be ready to flush.

7111E is the dam of our 917G herd sire, and 7111E and 4136B were two of the main reasons we purchased him. She is deep ribbed, great uddered, well marked, and look at her TEAT and UDDR EPDs. Calving ease, maternal, and a nice package in this powerful donor.

- ♦ Top 1% TEAT, top 5% Scrotal, top 10% BW, and top 15% UDDR and BMI\$
- ♦ Maternal sister to the CL 1 Domino 995G herd sire owned with Helbling Herefords
- ♦ Ready to flush for early January ET calves
- ♦ Sells with a stellar bull calf by 0159H at side born 1/7/2023. Tag #3050

YEARLING HEIFERS

This is one of the smaller groups of yearling heifers that we have offered in a spring sale, but there is a lot of cow power stacked in this group. The depth of quality in this group is outstanding and there are truly some elite donor prospects in this group. Help yourself to some females that you can build a herd from.

 MONTANA MISS 753T

Here might be the sleeper heifer in the group. 2236K has a little extra chrome and is a little behind but was orphaned last summer when her mother got hurt. She is out of the 5334C donor cow that topped our 2020 Female sale at \$22,000, and is a maternal sister to the 0044H herd sire. Lots of potential here.

The following heifers came from Double Bit Ranch in Libby, MT. Paul and Margaret Tisher have a small but elite cowherd all based on Holden Herefords genetics. They have grown in numbers so have decided to sell this set of outstanding yearling heifers to keep their herd size where they can manage it. These heifers are all sired by the 9111G herd sire they bought from us in 2020. He is a son of the 4050B donor and a full brother to the 9035G bull in use at Sadler Ranches. Here are a nice set of heifers to build a herd around.

Here is a powerhouse out of the dam of the 9214G bull that had the high selling sire group at Van Newkirk's sale this year. Dam is also a full sister to the 5148C sire that produced our 8123F and 8046F donor cows. Lots to like in this heifer. Curve bending EPDs with added maternal and carcass.

This heifer is an April but sure doesn't look it. Massive bodied, well marked, and broody as can be. She is a granddaughter of the 2022Z donor so is triple bred to the 5139R donor. Add in the 055X Cooper cow and that is no miss maternal genetics.

♦ Top 10% MARB, top 20% Milk, UDDR, and TEAT EPDs

Once again we are pleased to offer an outstanding set of true F1 black baldy open yearling heifers. These heifers have lots of pigment, are big ribbed, feminine, and should make a great set of cows. They are bangs vaccinated, had all of their shots, unbranded, and are ready to breed.

BB1 15 HEAD • WHITE TAGS 2334-2348

These heifers were raised on the Billy VandenBos ranch right next door. They are out of a great set of young Angus cows and some top bulls that he got from us including a maternal brother to 4105B. They were born in March and early April and will average over 725 lbs. at sale time. These heifers are the top sort out of his replacements.

Can be purchased in groups of 5. Buyer has option to take all.

follow us...  

Our operation is very blessed to work with a lot of talented people through the year. We thank them all and appreciate all that they do to help make our operation successful. We also have a great crew of friends and neighbors that show up to help get ready for the sale and pull off everything that it takes to make sure that everything goes well on our big day. Our hats are off to them all!!

Thank You!

HETEROSIS PAYS

Economic and production benefits associated with heterosis are documented by decades of industry-wide research in commercial crossbreeding systems.

DIRECT HETEROSIS

Increased performance of the crossbred calf relative to the average of the straightbred parental breeds.

- + 1.9% Survival to weaning
- + 3.9% Weaning weight
- + 2.6% Post weaning gain
- + 3.8% Yearling weight
- + 2.2% Feed conversion

MATERNAL HETEROSIS

Increased performance of the crossbred cow relative to the average of straightbred females of the parental breeds.

- + 3.7% Calving rate
- + 3.8% Weaning weight
- + 38.0% Longevity
- + 17.0% Number of calves
- + 25.3% Cumulative weaning weight

Primary crossbreeding advantages are improvement of lowly heritable traits, such as those associated with reproduction, which are difficult to impact through direct selection pressure. Small, net-positive effects in multiple traits affecting commercial cow-calf profitability — pregnancy rate, calf livability, calf health, etc. — yield significant returns that are difficult to measure. Crossbreeding value is most visible in the increased number of calves (lifetime), cow longevity and cumulative weaning weight (lifetime).

HEREFORD HETEROSIS PAYS MORE

Hereford genetics offer more crossbreeding power because they are the least related to other *Bos Taurus* breeds, as documented by the U.S. Meat Animal Research Center (USMARC) 2000 Bull Project. Plus, Hereford's unique, inherent genetic advantages compared to other breeds offer added breed complementarity, especially when crossed with Angus. Hereford advantages include: docility, fertility, feed efficiency in the pasture and feedlot, longevity, and production efficiency.

HEREFORD-SIRED BLACK BALDY FEMALE ADVANTAGES:

- 7% higher pregnancy rate
- More calves weaned per cow exposed

- \$51 more per cow per year in net present value (2009 calculation)
- 3.5% more average rate of return on assets
- 2 pounds less pasture forage per day while maintaining more body condition¹

Black baldy cows require 1 acre less of moderate-quality forage per year compared to straightbred black Angus peers, according to Oklahoma State University research.¹

HEREFORD-SIRED BLACK BALDY STEER ADVANTAGES:

- Heavier weaning weights
- Increased feed efficiency
- Lower cost of gain
- Lower feedlot breakeven
- \$28 per head less feed cost across finishing period

Based on feed efficiency alone — breed differences documented by the USMARC — Hereford has a \$51 per head advantage over the finishing period, when compared to Angus.² Hereford's economic advantage increases as feed costs rise.

¹On average, Oklahoma State University researchers measured about 2 pounds per day less moderate-quality forage (Oklahoma pasture) intake in the black baldy cows. On an annual basis the black baldy cows would be expected to consume about 725 pounds less forage.

²Calculation based on breed differences for feed efficiency documented by the U.S. Meat Animal Research Center, using current feed costs (Oct. 2022).
