58th
Annual
Production Sale

HH-ADVANCE-3107L-ET

MONDAY, MARCH 11, 2024

LUNCH 11:30 • SALE AT 12:30

AT THE RANCH IN VALIER, MONTANA

LiveAuctions.TV
2.0

View Holden Hereford's Sale Live on Bid.SuperiorLivestock.com

VIEWING THE AUCTION The auction will be broadcast online at Bid.SuperiorLivestock.com and the pre-recorded videos will also be hosted there. You do not need an account just to watch the auction or view videos of the sale offering.

Livestock Auction

ALL NEW PUREBRED PLATFORM

Bid.SuperiorLivestock.com

ONLINE BIDDING Go to Bid.SuperiorLivestock.com for Superior's new online bidding platform. If you have not registered there before you will need to create an account. The first time you register an account you will receive a confirmation e-mail that you must click on. Once you have completed this, select the auction you would like to bid on and click the "Request a Buyer Number" button. The first time you request a buyer number you will be sent a confirmation code via text. Enter that code in the login portal and you will receive a buyer number. This 2-step verification process will only have to be done once and in the future you will be able to simply login and request a buyer number and receive it instantly for any auction. Once you have successfully registered and received a buyer number it will show your name and buyer number on both the video preview page and the online bidding page when you are logged in. If you have an account at LiveAuctions.tv you may skip the registration process and use those login credentials to request a buyer number as LiveAuctions is a division of Superior Livestock. For more details on registering an account and also how to bid, you may watch a tutorial at Bid.SuperiorLivestock.com/how-it-works

TURN IN BIDS OVER THE PHONE This is Superior's traditional method of buying cattle and is the suggested process for anybody who does not have consistent, high-speed internet. You still must register an account at Bid.SuperiorLivestock.com and request a buyer number. Once you receive a buyer number you will see the bid line phone number. Just watch the auction online and call in at least 2 lots ahead of the lot you are looking to bid on. A Superior Livestock representative will be with you on the phone and will assist you in placing bids.

**IF YOU NEED ANY
ASSISTANCE CALL
SUPERIOR AT
1(800) 422-2117**

Buyers will be contacted by the ranch after the sale for payment and delivery details.

LiveAuctions.TV
2.0

View and Bid Live on the Internet

Go to www.LiveAuctions.tv Please note that you do NOT need an account to watch the auction, but you do need to register an account and request a buyer number if you wish to bid. If you have not created a new account since September 1st, 2020 you will need to click "Register" in the top right corner of the homepage and create a new account. Once you have completed the form on this registration page and hit the "Register" button you will receive an e-mail with a place to click on to verify you have entered a valid e-mail address. Once you have completed this registration process, find the auction you are interested in on the homepage and click on it (sales are listed in chronological order). You should then see a box that says Login. Now that you have an account with LiveAuctions just type in your E-mail Address and Password. You will now see a hyperlink at the top that says "Request a Buyer Number". The first time you request your first buyer number on LiveAuctions it will send you a text message with a verification code in it. Type the code from the text message into the area requiring it and you will then see your name along with a buyer number listed at the top of the webpage where the live video is and you will be able to bid. You will only have to complete this two-step verification process one time. After that you will be able to immediately request a buyer number on any auction without verification through an e-mail or text message again.

LiveAuctions no longer requires an app. If you wish to view/register/bid on a smartphone just type LiveAuctions.tv in whatever web browser you use. The registration process is the same as it is on a desktop computer, but the website is built mobile friendly. Click on the three lines in the top right corner to access the menus.

Buyers will be contacted by the ranch after the sale for payment and delivery details.

If you need help registering to bid or to view the auction please call

Technical Support at (682) 816-4900, Katie Colyer at 208-599-2962 or e-mail us at TechSupport@LiveAuctions.tv

Eric Lawver (406) 600-3118

This is our invitation for you to attend our 58th Annual Production Sale. On behalf of our operation, we welcome you to come and see what we feel is an exceptional sale offering. We feel the depth of quality in this group is outstanding, and this is definitely one of our best set of bulls ever for their combination of phenotype and EPDs. It's hard to believe that it has been 58 years since the first Cooper-Holden Production sale that was held in 1967 in Great Falls, MT. We feel very blessed to still be involved in the Hereford business, and are very grateful for all the wonderful friends and customers we have had experiences with over these last 58 sales. The Hereford business has been great to us over the years, and it is exciting to see the interest focused back on quality Hereford cattle out in the beef industry today. The data is in and Herefords continue to excel in all research programs for both heterosis and extra profit for your operation. We have enjoyed our part in working to produce Hereford cattle that will perform well in all segments of the beef industry, and we look forward to many more years of raising the best Herefords possible. As always, we plan on laying out the welcome mat with great hospitality and top quality Hereford cattle on display, and we truly hope you can join us at sale time.

Once again, we are pleased to offer an outstanding set of bulls that are uniform and predictable in quality, type, and breeding. This group represents the top 115 out of almost 150 bull calves born in our 2023 calf crop and over 40% of them are the results of our extensive ET program. In addition, we are selling a tremendous set of powerful 18 month old bulls from our fall calving program. They are the top 60% of the fall 2022 calf crop, and we feel this is the deepest set of 18 month old bulls we have ever offered.. They are a balanced trait set of bulls that combine thickness, performance, pigment, maternal strength, fleshing ability, carcass, disposition, eye appeal, and moderate birth weight. Over 90% of the sale offering qualifies as sires for the Hereford Advantage program by being in the top 50% of the breed on CHB\$ (\$117 and above), and over 65% of the sale offering ranks in the top 25% of the breed on CHB\$, MARB and Milk EPDs, and over 50% rank in the top 25% on WW EPD. Also, 100% of the sale offering have GE EPDs on them to improve the accuracy of their EPDs. We have embraced the use of Genomics in our herd to give our customers better EPD data on our cattle, and we have been genomic testing every animal since 2012. We are also proud to be recognized as a Platinum T.P.R. breeder by the AHA. The bulls will also sell with complete ultrasound and performance data and they have all passed a semen test by our vet. We also have a great set of elite Line One females in the sale again this year. There are 3 of our top donors from our fall program, 30 top quality Hereford heifers, and for the fourth year we will offer an extra fancy set of F1 black baldy open heifers in our sale. All registered sale cattle have been DNA parentage verified and tested free for all known genetic defects except for the MD and DB defects. These defects are not present in Line One cattle and are sale cattle are guaranteed to be free from them. As always, all sale cattle sell fully guaranteed.

Our cow herd is Line One in breeding. We purchased our first Line One cattle over 70 years ago. Since then we have purchased and used many top sires from the Miles City Research Station. We have also exchanged and purchased top herd sires from Cooper Herefords. We have also selected top herd sire prospects from our own herd every year.

We were one of the first members of the Montana Beef Performance Association when it was organized in 1956 and were very active in it until it was dissolved. We have been involved with the TPR program of the American Hereford Association and are active participants in the Whole Herd Reporting Program. These records have been very important in selecting and maintaining the performance and quality of our cattle. We have a severe culling program for our mother cows. We cull on performance, fertility, soundness, udder quality, and milk. Our cattle are the product of many years of selection for these traits. Our cowherd is our pride and many of the top cows in the breed have come from our ranch.

We have stayed with a strong performance, multitrait line breeding program to enhance the predictability of our cattle for our customers. Our focus has always been on stacking generation after generation of the traits that add value to our customer's bottom line. A line breeding program can only succeed if you continually add cattle with superior genetics to it. The advantage of our program is the uniformity and predictability it provides along with the heterosis that can be generated by an outcross within the breed or between breeds. These bulls have generations of bred in performance and will pass these traits on to their progeny consistently.

The sale bulls and heifers and the cowherd will be on display March 9, 10, and 11th for your inspection. Lunch and snacks will be provided on both March 10th and sale day. There will be a social hour and prime rib dinner at Buffalo Joe's Steakhouse in Dupuyer on March 10th from 6:00-8:30 p.m.

If you are unable to attend the sale we will have two different options for internet bidding. You will be able to view and bid on Superior Livestock and you can also view and bid online at LiveAuctions.tv. We will start selling cattle promptly at 12:30 p.m. to try and get through all the sale lots in our allotted time. Videos of the sale cattle will be viewable at The Livestock Link, bid.superiorlivestock.com, and www.holdenherefords.com. Thank you for your interest in our program. Please feel free to stop by and inspect the cattle at any time, and if we can help you out in any way, please give us a call.

Jack & Tresha Holden & family, Jay D. & Kelli Evans & family

www.holdenherefords.com

DELIVERY

We are offering free delivery to central points within 1,000 mile radius of our ranch on all purchases totaling \$5000 or more. Cattle will be delivered to anywhere in the continental U.S. but will be at buyer's cost after the first 1000 miles.

ABSENTEE BIDDING

Anybody wishing to bid that cannot attend the sale or participate through Superior Livestock or LiveAuctions may place a phone bid by calling any listed sale representative, Jack Holden, Jay D. Evans, Eric, or Brad. Please contact us if we can be of assistance in any way.

7143E is a proven sire that has done an all around great job for us.. The depth of rib, length of body, muscle expression and overall quality he is siring is outstanding. He has curve bending numbers with strong carcass and loads of cow power. His daughters are beautiful uddered and very fertile. 7143E ranks in the top 20% on CED, Scrotal, TEA, CWT, MARB and CHBS. **8 sons sell!**

883F was the high selling bull in Cooper's 2019 sale and had been a standout there all year. He has done an outstanding job here and has another exceptional set of sons to sell this year. We are using multiple sons in our herd and his daughters have proved to be phenomenal young cows. 883F is moderate framed, long bodied, and stout made and has exceptional EPDs that rank him in the top 1% on Milk and the top 7% on MARB, BMI\$, and CHBS, and the top 20% on WW EPD. **4 sons sell!**

0022H sold for \$75,000 for 1/2 interest in our 2021 Sale. He is goggle eyed, extremely long bodied, easy fleshing, and thick butted with extra eye appeal. He has superior calving ease with outstanding growth, maternal, and carcass strength. His dam was a top donor that sold for \$45,000 in our 2022 Female Sale, and he is a maternal brother to the 6317D donor and the dam of the 0270H bull that topped our 2022 Sale. He ranks in the top 15% or higher on 11 different traits. **8 sons sell!**

0074H was retained from our 2020 calf crop to carry on the Cooper 883F influence. He has been a fantastic breeding bull and is covering all the bases. He has our largest sire group in the sale this year and they are the right kind. Rugged, sound, performance and carcass cattle with eye appeal. He ranks in the top 1% for Milk, the top 5% on CW, and the top 10% on MARB, and CHBS. **25 sons sell!**

EXPLANATION OF BREED EPDS

CALVING EASE- DIRECT (CED)

CE EPD is based on calving ease scores and birth weights and is measured on a percentage. CE EPD indicates the influence of the sire on calving ease in females calving at 2 years of age. For example, if sire A has a CE EPD of 6 and sire B has a CE EPD of -2, then you would expect on average if comparably mated, sire A's calves would be born with an 8% more likely chance of being unassisted when compared to sire B's calves.

BIRTH WEIGHT (BW)

BW EPD is an indicator trait for calving ease and is measured in pounds. For example, if sire A has a BW EPD of 3.6 and sire B has a BW EPD of 0.6, then you would expect on average if comparably mated, sire A's calves would come 3 lb. heavier at birth when compared to sire B's calves. Larger BW EPDs usually, but not always, indicate more calving difficulty. The figure in parentheses found after each EPD is an accuracy value or reliability of the EPD.

WEANING WEIGHT (WW)

Weaning Weight (WW) WW EPD is an estimate of pre-weaning growth that is measured in pounds. For example, if sire A has a WW EPD of 60 and sire B has a WW EPD of 40, then you would expect on average if comparably mated, sire A's calves would weigh 20 lb. heavier at weaning when compared to sire B's calves.

YEARLING WEIGHT (YW)

YW EPD is an estimate of post-weaning growth that is measured in pounds. For example, if sire A has a YW EPD of 100 and sire B has a YW EPD of 70, then you would expect on average if comparably mated, sire A's calves would weigh 30 lb. heavier at a year of age when compared to sire B's calves.

Scrotal Circumference (SCR)

Measured in centimeters and adjusted to 365 days of age, SC EPD is the best estimate of fertility. It is related to the bull's own semen quantity and quality, and is also associated with age at puberty of sons and daughters. Larger SC EPDs suggest younger age at puberty. Yearling sons of a sire with a 0.7 SC EPD should have yearling scrotal circumference measurements that average 0.7 centimeters (cm) larger than progeny by a bull with an EPD of 0.0 cm.

MATERNAL MILK EPD (MILK)

The milking ability of a sire's daughters is expressed in pounds of calf weaned. It predicts the difference in average weaning weights of sires' daughters' progeny due to milking ability. Daughters of the sire with a +14 MM EPD should produce progeny with 205-day weights averaging 24 lb. more (as a result of greater milk production) than daughters of a bull with a MM EPD of -10 lb. (14 minus -10.0 = 24 lb.). This difference in weaning weight is due to total milk production during the entire lactation.

TEAT SIZE (TEAT)

TEAT EPDs are reported on a 9 (very small) to 1 (very large, balloon shaped) scoring scale. Differences in sire EPDs predict the difference expected in the sires' daughters' udder characteristics when managed in the same environment.

For example, if sire A has a teat size EPD of 0.4, and sire B has a teat size EPD of -0.1, the difference in the values is 0.5, or one-half of a score. If daughters of sires A and B are raised and managed in the same environment, you would expect half a score smaller teat size in daughters of sire A, compared to sire B.

RIBEYE AREA (REA)

REA EPDs reflect differences in an adjusted 365-day ribeye area measurement based on carcass measurements of harvested cattle. Sires with relatively higher REA EPDs are expected to produce better-muscled and higher percentage yielding slaughter progeny than will sires with lower REA EPDs. Ultrasound measurements are also incorporated into this trait and have been shown to be highly correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

MARBLING (MARB)

MARB EPDs reflect differences in an adjusted 365-day marbling score (intramuscular fat, [IMF]) based on carcass measurements of harvested cattle. Breeding cattle with higher MARB EPDs should produce slaughter progeny with a higher degree of IMF and therefore higher quality grades. Ultrasound measurements are also incorporated into this trait and have been shown to be highly correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

BALDY MATERNAL INDEX (\$BMI)

The BMI\$ is a maternally focused index that is based on a production system that uses Hereford x Angus cross cows. Progeny of these cows are directed towards Certified Hereford Beef. This index has significant weight on Sustained Cow Fertility, which predicts fertility and longevity of females. There is a slightly positive weight on Weaning Weight, Mature Cow Weight and Milk which accounts for enough growth but ensures females do not increase inputs. There is some negative emphasis on Dry Matter Intake, but a positive weighting on Carcass Weight which is anticipated to provide profitability from finishing of non-replacement females and castrated males. Marbling and Rib-eye Area are also positively weighted to keep the harvested progeny successful for CHB. This index is geared to identify Hereford bulls that will be profitable when used in a rotational cross with mature commercial Angus cows.

Certified Hereford Beef Index (\$CHB)

The Certified Hereford Beef Index is a terminal sire index that is built on a production system where Hereford bulls are mated to mature commercial Angus cows and all progeny will be targeted for Certified Hereford Beef after the finishing phase. This index has significant weight on Carcass Weight to ensure profit on the rail. As well there is a positive weighting for Average Daily Gain along with a negative weighting on Dry Matter Intake to ensure efficient pounds of growth in the finishing phase. Keep in mind, this production system takes advantage of complimentary breeding with the commercial Angus cow. Although Marbling is weighted positively in this index, a positive weighting for Rib-eye Area and a negative weighting for Back Fat are a greater priority in this index to allow for optimum end-product merit. This is the only index that has no emphasis on fertility. Remember that no replacement heifers are being retained.

AHA GE·EPD

The Power of Genomically Enhanced EPDs

The American Hereford Association (AHA) has embraced the use of genomics into their genetic evaluation by launching a first of its kind single step analysis that utilizes the marker effects of specific traits. Likewise, AHA is directly estimating accuracy values rather than approximating. The direct estimation of accuracy results in a more conservative value but a more accurate value than previous methodologies. The AHA is producing the most reliable genetic evaluation that is supported by Whole Herd TPR™ and genomics, which will give prospective buyers added confidence in purchasing young and unproven animals.

Buying animals that have a genomic profile incorporated into their Expected Progeny Difference (EPD) offers many advantages that allow for quicker breed and herd improvement. Below is a table showing the average increase in accuracy when buying a young animal with a Genomic Enhanced EPD (GE-EPD) versus an animal without a GE-EPD. Similarly, an effective progeny number increase is listed by trait that shows how many progeny equate to a genomic enhancement of a young animal (e.g. yearling). That's right, buying a young animal that has been genotyped is like having 2-17 progeny, depending on the trait. The proof gained on young, non-parent animals, through a genomic enhancement is valuable and greatly mitigates the risk and allows for more directed selection.

Each animal tested is recognized with the AHA GE-EPD logo.

AHA Trait	Accuracy Improvement	Effective Progeny Number Increase*
Calving Ease	0.09	17
Birth Weight	0.12	8
Weaning Weight	0.14	12
Yearling Weight	0.16	9
Scrotal Circumference	0.17	6
Mature Cow Weight	0.12	4
Udder Suspension	0.17	7
Teat Size	0.17	7
Carcass Weight	0.11	3
Fat	0.08	2
Rib-Eye Area	0.07	2
Marbling	0.10	3

* Effective Progeny Number Increase (EPNI)- EPNI is the difference gained for genotyped animals versus non-genotyped animals.

YEARLING BULLS

This group of yearling bulls represents the top 75% of the bull calves born in our 2023 calf crop. We feel they are one of the best sets we have ever offered for sale when you combine EPDs, phenotype, performance, carcass, strength, and cow power, and we are extremely proud of the quality and uniformity in this group from top to bottom. They are stout made, well marked, long bodied and have top notch performance and ultrasound data to back it up. They have all been semen checked and are ready to go to work for you. 100% of these bulls have AHA GE EPDs to increase the accuracy of their EPDs, and they also are all parentage verified. We invite you to look them over, and we feel that you will be very impressed with the consistency in type and kind in this powerful set of bulls. There are many full and 3/4 brothers in this group also, and almost 40% are ET calves from our extensive ET program.

The average EPDs on this group of bulls is

CED +3.4 BW +2.9 WW +64 YW +98 Scrotal +1.2 Milk +32 M&G +64 TEAT +1.35 REA +.42 MARB +.27 BMI\$ 384 CHB\$ 137

The average bull in our sale offering ranks as follows:

Top 49% CED, Top 20% WW, Top 30% YW, Top 20% Milk, Top 17% M&G, Top 20% TEAT, Top 15% MARB, Top 33% on \$BMI, and Top 17% on CHB\$

This consistent quality across the board on EPDs and Profit Indexes shows our commitment to multi trait selection. Combine this with 70 years of common sense, balanced trait selection, linebreeding, and selecting for strong maternal lines that are fertile and easy fleshing, well pigmented, and great uddered, and it adds up to bulls that will add tremendous value to your herd in all phases of beef production.

These bulls were again fed out on the CHS Feeds ration called Holden Bull Challenger. It is a high fiber, low fat pellet that we have fed for the last 20 years. The bulls gained over 3.5 lbs. a day on a 130 day gain test and have an average 205 day weight of 735 lbs., an average 365 day weight of 1325 lbs. and an average scrotal of 37 cm. They also scanned an average REA of 13.49, and an average IMF score of 2.92%.

Scrotal measurements were taken on 2-1-2024. Semen evaluation by Dr. Maddie Comes.

TOP HERD BULL PROSPECT

You could write a long footnote on this goggle eyed stud and still not cover all his strong points. Here is a bull that will keep you in the cow business. Extra pigment, phenotype, outstanding EPDs and backed by a top proven donor with extra longevity and udder quality.

- ◆ #2 bull in the sale on BMI\$ at 543 and very top 1% of breed
- ◆ Ratioed 107 on REA and 104 on %IMF. Top 5% on Scrotal, Milk, UDDR, TEAT, and CHB\$ and top 10% on WW and MARB EPDs
- ◆ Maternal brother to our 2137K herd sire that sold to Mrnak Herefords for \$52,500 for 1/2 interest in our 2023 Sale
- ◆ Full brother sells as Lot 3044L
- ◆ Retaining ½ interest and ½ possession. Buyer has first choice on possession.

3087L is one of 11 sons by 4 different sires that will sell out of the 6169D donor. 6169D has long been one of my favorite cows ever produced on the ranch. She is a role model brood cow with a great udder, massive rib shape, femininity, and power. 3087L is a stud with extra thickness, pigment, eye appeal, and outstanding EPDs. There are 3 full brothers in this flush out of the \$100,000 0043H sire and they are all exceptionally good.

- ♦ Top 5% on UDDR, TEAT, and CWT, top 10% on WW, YW, Milk, and CHBS, top 15% on CHBS
- ♦ Maternal brother to the 1128J sire that we own with Van Newkirk Herefords, and the 2025K bull that sold for \$55,000 for 1/2 interest in our 2023 Sale
- ♦ Full brothers sell as Lots 3090L and 3100L

CL 1 DOMINETTE 456B ET
Dam of Lots 3086L and 3133L and feature heifer Lot 3011L

3088L AND 3089L

These two well marked, goggle eyed full brothers are peas in a pod. Moderate BW, easy doing, soft made bulls with extra functionality and production built in. Dam is a beautiful 1098Y daughter that still has a near perfect udder at 10 years of age. A full sister sells as Lot 3028L and is one of the most exceptional heifers that we have ever offered for sale.

ELITE HERD BULL PROSPECT

HH MISS ADVANCE 5139R
 Dam of Lots 3107L, 3184L, AND 2319K

Quite possibly the best bull to ever walk through the sale ring at our operation. The phenotype on this bull is exceptional, he has outstanding EPDs, individual performance, and scan data, and he is out of one of the best cows ever produced in the Hereford breed. It shows the strength of the 5139R cow that a female born in 2005 can still produce bulls that compete with the best there is out there today. She has already produced close to \$1.5 million in progeny sales, and was still in embryo production until almost 18 years of age. Her lineage includes the 1263V, 7003T, 2022Z, 4287B, 6317D, and 8046F donors along with multiple herd sires used in our herd and around the country. Here is an opportunity to own the next great one out of her!

- ◆ Ratioed 108 on REA and 107 on %IMF. Top 5% on WW, top 15% on YW and Scrotal, top 25% on MARB and CHBS
- ◆ Full brother sells as Lot 2319K. He is one of the top bulls in the fall group
- ◆ Maternal brother sells as Lot 3184L
- ◆ Retaining a full 1/4 semen revenue interest

PREMIER HERD BULL PROSPECT

Walk around behind this goggle eyed bull and look at the set of pants he has on him. Then look at the volume and capacity and eye appeal he has. 3184L has herd bull stamped all over him. Here is another own son of the famous 5139R cow that just puts it all together in one great package. 5139R continues to put her stamp on the Hereford breed, and can still produce progeny that will compete with the best 19 years after she was born. 3184L is double bred to 5139R, and is a true statement of the value she has had for our herd and the breed.

- ◆ Maternal brother to the cover bull 3107L
- ◆ Top 10% on Scrotal and Mature Cow Weight, top 15% on WW and UDDR, top 20% on Milk, TEAT, REA, and MARB EPDs
- ◆ Maternal brother sells as Lot 2319K

TOP SHELF HERD BULL PROSPECT

Here is the last of the 3 full brothers out of the 4287B donor and 0011H and he is a brute. 3203L is well marked with extra volume and substance. He carries his depth threw his lower flank and is a sound structured easy moving bull. He scanned his eyeballs out also. No guesswork in this pedigree and it is loaded with elite donor cows with longevity. His dam is 10 and the dam of his sire is 12 and they both look fantastic.

- ♦ Scanned a 103 on REA ratio and a 120 on %IMF. The 3 flush brothers averaged 104 on REA and 113 on %IMF. Top 10% on WW and Milk, top 15% on YW EPD
- ♦ Maternal brother to the 0022H, 0054H, and 1054J bulls used in our program
- ♦ Full brothers sell as Lots 3007L and 3010L

2023 Montana Pro Rodeo Wall and Hall of Fame Honored as Great Montana Ranches

18 MONTH OLD FALL BULLS

This group of fall bulls is the top 34 out of 55 bulls born in our fall 2022 calf crop. There is exceptional depth of quality in this big, stout, well marked set of bulls. There are some definite top end herd bull prospects in this group. The average EPDs of this group are

CED +4.6 BW +2.6 WW +58 YW +91 Scrotal +1.2 Milk +29 M&G +59 REA +.41 MARB +.17 CHB\$ 122

Please note that the adj. 205 and adj. 365 day weights on these bulls are not comparable to the yearling bulls. They are raised in a totally different environment with no green grass while they are on their dams and a lot of winter weather. They are also developed after weaning out in big pastures on grass and fed for a lower gain. They are bulletproof, sound, and ready to go breed a lot of cows and cover the country.

All of these bulls also have GE EPDs, are parentage verified, and semen checked. They are a great combination of pigment, eye appeal, performance, carcass, and maternal with many ET bulls in the group.

THE HEREFORD ADVANTAGE PROGRAM

An industry-changing program from the American Hereford Association and IMI Global to verify and add value to Hereford-influenced feeder cattle with superior genetics, health and management.

REQUIREMENTS

- Source & Age verification
- Genetic merit
 - Minimum of 50% Hereford genetics
 - Bull battery ranking in top 50% of breed for \$CHB index (bull battery average)
 - Bull ownership transferred (all bulls)
- Vaccination program - two rounds of vaccinations pre-weaning (minimum)
 - 1st Round: At branding or grazing turnout
 - 5-way respiratory modified live vaccine
 - 7,8 or 9-way clostridial
 - 2nd Round: 2-4 weeks prior to weaning
 - 5-way respiratory modified live vaccine
 - 7-way clostridial with Histophilus
- BQA certification

BENEFITS

- Genetic improvement tool
 - Site EPD and profit index ranking summary
- Added market exposure
 - Marketing information sent to a growing number of buyers
 - Free listing on AHA listing page
- Enrollment cost - \$3.00/head. (verification + eID tag)
 - May be bundled with other verification programs through IMI Global

Visit HerefordAdvantage.com to get started today!

YEARLING HEIFERS

Hands down the best set of heifers as a group that we have ever offered in a spring bull sale. The quality, phenotype, and EPDs in this group is outstanding. There are several ET heifers in here as feature lots. Lots of future donor potential in this group, and females to build a herd around.

Where to even start with this female. She could possibly be the best heifer to ever sell at our bull sale. She is dark red with goggle eyes and is ideally marked all the way around. She is extremely long, with a square hip, and she is extremely feminine with a clean front end. Endless maternal strength in this pedigree. This heifer is the real deal and her dam has a gorgeous udder at 10 years of age. There is no doubt this female has extreme donor potential. Don't miss out on this one!

Check out this absolutely stunning daughter of the 1115J herd sire. We noticed her early this spring and she has held our attention every day since then. She is extra cowy with a good top. Look at the structure, femininity, and rib shape this future donor exhibits. Her dam, 8123F, needs no introduction. All she does is produce donor prospects and 3053L is no exception. This heifer is going to find a lot of friends.

- ♦ Owned with Marvin Harding

Once again we are pleased to offer a couple of outstanding sets of true F1 black baldy open yearling heifers. These heifers have lots of pigment, are big ribbed, feminine, and should make a great set of cows. They are bangs vaccinated, fully vaccinated, unbranded, and ready to breed this spring.

BB2 18 HEAD • 7281 - 7299

These heifers were raised on the Billy VandenBos ranch right next door to us. We have sold his heifers the last 3 years, and they have worked out really well for the buyers. They are out of a top set of young Angus cows with a lot of Fleisch Angus genetics in them and a really top set of our bulls. This is the top end of his F1 heifers with no replacements kept. They should weigh 775 lbs. at sale time

Can be purchased in groups of 6. Buyer has option to take all.

BB1 5 HEAD • 71 - 75

This is a set of home raised heifers out of our recip herd. They are big and powerful and should average 850 lbs at sale time.

Our operation is very blessed to work with a lot of talented people through the year. We thank them all and appreciate all that they do to help make our operation successful. We also have a great crew of friends and neighbors that show up to help get ready for the sale and pull off everything that it takes to make sure that everything goes well on our big day. Our hats are off to them all!!

HETEROISIS PAYS

Economic and production benefits associated with heterosis are documented by decades of industry-wide research in commercial crossbreeding systems.

DIRECT HETEROISIS

Increased performance of the crossbred calf relative to the average of the straightbred parental breeds.

- + 1.9% Survival to weaning
- + 3.9% Weaning weight
- + 2.6% Post weaning gain
- + 3.8% Yearling weight
- + 2.2% Feed conversion

MATERNAL HETEROISIS

Increased performance of the crossbred cow relative to the average of straightbred females of the parental breeds.

- + 3.7% Calving rate
- + 3.8% Weaning weight
- + 38.0% Longevity
- + 17.0% Number of calves
- + 25.3% Cumulative weaning weight

Primary crossbreeding advantages are improvement of lowly heritable traits, such as those associated with reproduction, which are difficult to impact through direct selection pressure. Small, net-positive effects in multiple traits affecting commercial cow-calf profitability — pregnancy rate, calf livability, calf health, etc. — yield significant returns that are difficult to measure. Crossbreeding value is most visible in the increased number of calves (lifetime), cow longevity and cumulative weaning weight (lifetime).

HEREFORD HETEROISIS PAYS MORE

Hereford genetics offer more crossbreeding power because they are the least related to other Bos Taurus breeds, as documented by the U.S. Meat Animal Research Center (USMARC) 2000 Bull Project. Plus, Hereford's unique, inherent genetic advantages compared to other breeds offer added breed complementarity, especially when crossed with Angus. Hereford advantages include: docility, fertility, feed efficiency in the pasture and feedlot, longevity, and production efficiency.

HEREFORD-SIRED BLACK BALDY FEMALE ADVANTAGES:

- 7% higher pregnancy rate
- More calves weaned per cow exposed

- \$51 more per cow per year in net present value (2009 calculation)
- 3.5% more average rate of return on assets
- 2 pounds less pasture forage per day while maintaining more body condition¹

Black baldy cows require 1 acre less of moderate-quality forage per year compared to straightbred black Angus peers, according to Oklahoma State University research.¹

HEREFORD-SIRED BLACK BALDY STEER ADVANTAGES:

- Heavier weaning weights
- Increased feed efficiency
- Lower cost of gain
- Lower feedlot breakeven
- \$28 per head less feed cost across finishing period

Based on feed efficiency alone — breed differences documented by the USMARC — Hereford has a \$51 per head advantage over the finishing period, when compared to Angus.² Hereford's economic advantage increases as feed costs rise.

¹On average, Oklahoma State University researchers measured about 2 pounds per day less moderate-quality forage (Oklahoma pasture) intake in the black baldy cows. On an annual basis the black baldy cows would be expected to consume about 725 pounds less forage.

²Calculation based on breed differences for feed efficiency documented by the U.S. Meat Animal Research Center, using current feed costs (Oct. 2022).
