## View and Bid on Holden Hereford's Sale Live Online

Go to [www.Live-Ag.com](http://www.Live-Ag.com) Click on the purebred tab at the top right of the screen and select the auction of choice. Log in or create an account. Once logged in, select the sale of choice and register to bid.

**For assistance, please call 817-533-6699 or Blake Tucker at 308-660-3963**

**ALL NEW PUREBRED PLATFORM**

[Bid.SuperiorLivestock.com](http://Bid.SuperiorLivestock.com)

**IF YOU NEED ANY ASSISTANCE CALL  
SUPERIOR AT 1(800) 422-2117**

View the auction and the pre-recorded videos at [Bid.SuperiorLivestock.com](http://Bid.SuperiorLivestock.com)

**ONLINE BIDDING** Go to [Bid.SuperiorLivestock.com](http://Bid.SuperiorLivestock.com). If you have not registered before, you will need to create an account. If you have an account at LiveAuctions.tv you may skip the registration process and use those login credentials as LiveAuctions is a division of Superior Livestock. Select the auction you would like to bid on and click the "Request a Buyer Number" button.

**TURN IN BIDS OVER THE PHONE** This is Superior's traditional method of buying cattle and is the suggested process for anybody who does not have consistent, high-speed internet. You still must register an account at [Bid.SuperiorLivestock.com](http://Bid.SuperiorLivestock.com) and request a buyer number. Once you receive a buyer number you will see the bid line phone number. Watch the auction online and call in at least 2 lots ahead of the lot you are looking to bid on. A Superior Livestock representative will be with you on the phone and will assist you in placing bids.

Go to [www.LiveAuctions.tv](http://www.LiveAuctions.tv) You do NOT need an account to watch the auction, but you do need to register an account and request a buyer number if you wish to bid. Find the auction you are interested in on the homepage and you will be prompted to login. You will now see a hyperlink at the top that says "Request a Buyer Number".

**If you need help registering to bid or to view the auction please call**

**Technical Support at (682) 816-4900, Katie Colyer at 208-599-2962 or e-mail us at [TechSupport@LiveAuctions.tv](mailto:TechSupport@LiveAuctions.tv)**

**Buyers will be contacted by the ranch after the sale for payment and delivery details.**

### TERMS AND CONDITIONS

- ♦ All registered sale cattle have been parentage verified, genomic tested, and tested free of all known genetic defects by Weatherbys Lab.
- ♦ Each animal will be sold to the highest bidder without reservation.
- ♦ The auctioneer will settle any disputes as to bidding and his decision will be final.
- ♦ Terms of all sales will be cash unless arrangements are made between purchaser and seller prior to sale.
- ♦ Individual health papers will be furnished with each animal permitting shipment to any state.
- ♦ In case an adjustment is required, it will be made with a replacement animal of equal value to the animal in question or credit on the purchase of another animal.
- ♦ No adjustments will be made after nine (9) months of sale day on any animals.
- ♦ The animal becomes the property of the purchaser as soon as sold but it shall be the responsibility of the seller to see that animals are properly cared for until delivered to the purchaser.
- ♦ Any death or injury after the animal is sold is at the buyer's risk.
- ♦ Anyone attending this sale attends at their own risk and without liability on the part of the owners or their employees.
- ♦ Corrections or additions of any information contained in the sale catalog will be announced from the auction stand and will take precedence over any printed material.

This is our invitation for you to attend our 60th Annual Production Sale. On behalf of our operation, we welcome you to come and see what we feel is another exceptional sale offering. We feel the depth of quality in this group is outstanding. When we weaned the spring bulls last fall, we all felt like this was the best set of bulls that we had ever weaned. This sale offering is right for the times, and they are loaded with all the traits the beef industry demands. The 2025 feeder cattle market was incredible. There has never been a better time to add quality genetics into your breeding program, and the breeders who invested in high quality genetics reaped the benefits consistently last year. All signs point to at least 2 more years of record prices, so don't miss this opportunity to add some elite Hereford genetics to your breeding program.

It's hard to believe it has been 60 years since the first Cooper-Holden Production sale that was held in 1967 in Great Falls, MT. We feel very blessed to still be involved in the Hereford business, and are very grateful for all the wonderful friends and customers we have had experiences with over these last 60 sales. The Hereford business has been very good to our families over the years, and it is exciting to see the interest focused back on quality Hereford cattle out in the beef industry today. The data is in and Herefords continue to excel in all research programs for heterosis, fertility, and extra profit for your operation. We have enjoyed our part in working to produce Hereford cattle that will perform well in all segments of the beef industry, and we look forward to many more years of raising the best Herefords possible. As always, we plan on laying out the welcome mat with great hospitality and top quality Hereford cattle on display, and we truly hope you can join us at sale time.

Once again, we are pleased to offer an outstanding set of bulls that are uniform and predictable in quality, type, and breeding. This group represents the top 140 out of almost 180 bull calves born in our 2025 calf crop and almost 50% of them are the results of our extensive ET program. There are 12 ET bulls born in early December in this group. This group adds a little extra age and maturity and will be a continuing part of our sale groups going forward. In addition, we are selling a small but very high quality group of 18 month old bulls. This will be our last set of 18 month old bulls in the sale, and we look forward to offering you an elite group of 2 year old bulls in our sale in 2027. They are a balanced trait set of bulls that combine thickness, performance, pigment, maternal strength, fleshing ability, carcass, disposition, eye appeal, and moderate birth weight. Almost 85% of the sale offering qualifies as sires for the Hereford Advantage program by being in the top 50% of the breed or higher on CHB\$ (\$125 and above), almost 60% of the sale offering ranks in the top 25% of the breed on MARB EPD, and over 50% rank in the top 25% on WW, Milk, and CHB\$. Also, 100% of the sale offering have GE EPDs on them to improve the accuracy of their EPDs. We have embraced the use of Genomics in our herd to give our customers better EPD data on our cattle, and we have been genomic testing every animal since 2012. We are also proud to be recognized as a Platinum T.P.R. breeder by the AHA. The bulls will also sell with complete ultrasound and performance data, and they have all passed a semen test by our vet. We also have a great set of elite Line One females in the sale again this year. There are 30 top quality Hereford heifers including some very elite ET heifers, and for the fourth year we will offer an extra fancy set of F1 black baldy open heifers in our sale. We are also proud to have Double Bit Ranch, Paul & Margaret Tisher, join us again with a great set of bulls. All registered sale cattle have been DNA parentage verified and tested free for all known genetic defects. As always, all sale cattle sell fully guaranteed.

The sale bulls and heifers and the cowherd will be on display March 7, 8, and 9th for your inspection. Lunch and snacks will be provided on both March 8th and sale day. There will be a social hour and steak dinner at Buffalo Joe's Steakhouse in Dupuyer on March 8th from 6:00-8:30 p.m.

If you are unable to attend the sale we will have three different options for internet bidding. You will be able to view and bid on LiveAg, Superior Livestock, and LiveAuctions.tv. We will start selling cattle promptly at 12:30 p.m. to try and get through all the sale lots in our allotted time. Videos of the sale cattle will be viewable at The Livestock Link and [www.holdenherefords.com](http://www.holdenherefords.com) along with LiveAg, Superior, and LiveAuctions.

Jack & Tresha Holden & family, Jay D. & Kelli Evans & family

**[www.holdenherefords.com](http://www.holdenherefords.com)**

## DELIVERY

We are offering free delivery to central points within 1,000 mile radius of our ranch on all purchases totaling \$7500 or more. Cattle will be delivered to anywhere in the continental U.S. but will be at buyer's cost after the first 1000 miles. There is no free delivery on the commercial females, but sellers will work with buyers to get delivered as economically as possible.

## ABSENTEE BIDDING

Anybody wishing to bid that cannot attend the sale or participate through Superior Livestock, LiveAuctions, or LiveAg may place a phone bid by calling any listed sale representative, Jack Holden, Jay D. Evans, Eric, or Brad. Please contact us if we can be of assistance in any way.

## TRAVEL AND ACCOMMODATIONS

Our ranch is 95 miles north of Great Falls, Montana. Great Falls has excellent air terminal service. Great Falls is served by Delta, United, and Alaska airlines.

1115J was the \$90,000 high selling bull in Cooper's 2022 Sale. He is a calving ease bull with curve bending numbers and extra maternal. His dam is a full sister to the 710E bull that has produced some of the top cows at Cooper's. He is proving to be a sire of daughters with cookie cutter perfect udders. He is a trait leader for CED, CWT, UDDR, TEAT, and CHBS.

1128J sold for \$65,000 for 1/2 interest to Van Newkirk Herefords in our 2022 Sale. He is deep ribbed, well marked, and has extra carcass. His dam 6169D is one of our favorite cows on the ranch and is a top donor. 1128J has one of our largest sire groups in the sale this year, and they are an outstanding set. His daughters in production are role model brood cows. Trait leader on CWT, REA, MARB, and CHBS.

Our pick from Coopers 2023 Sale. 241K is a thick butted, dark colored, well marked bull out of a top donor cow. Dam is a full sister to the 9100G bull they are using in their program. Maternal granddam is the 9119W cow that Coopers purchased from us and she is also the granddam of our 8120F and 0011H herd sires. Extra calving ease and maternal strength and he had our top sire group on YW this year.

## EXPLANATION OF BREED EPDS

**CALVING EASE- DIRECT (CED)**

CE EPD is based on calving ease scores and birth weights and is measured on a percentage. CE EPD indicates the influence of the sire on calving ease in females calving at 2 years of age. For example, if sire A has a CE EPD of 6 and sire B has a CE EPD of -2, then you would expect on average if comparably mated, sire A's calves would be born with an 8% more likely chance of being unassisted when compared to sire B's calves.

**BIRTH WEIGHT (BW)**

BW EPD is an indicator trait for calving ease and is measured in pounds. For example, if sire A has a BW EPD of 3.6 and sire B has a BW EPD of 0.6, then you would expect on average if comparably mated, sire A's calves would come 3 lb. heavier at birth when compared to sire B's calves. Larger BW EPDs usually, but not always, indicate more calving difficulty. The figure in parentheses found after each EPD is an accuracy value or reliability of the EPD.

**WEANING WEIGHT (WW)**

Weaning Weight (WW) WW EPD is an estimate of pre-weaning growth that is measured in pounds. For example, if sire A has a WW EPD of 60 and sire B has a WW EPD of 40, then you would expect on average if comparably mated, sire A's calves would weigh 20 lb. heavier at weaning when compared to sire B's calves.

**YEARLING WEIGHT (YW)**

YW EPD is an estimate of post-weaning growth that is measured in pounds. For example, if sire A has a YW EPD of 100 and sire B has a YW EPD of 70, then you would expect on average if comparably mated, sire A's calves would weigh 30 lb. heavier at a year of age when compared to sire B's calves.

**Scrotal Circumference (SCR)**

Measured in centimeters and adjusted to 365 days of age, SC EPD is the best estimate of fertility. It is related to the bull's own semen quantity and quality, and is also associated with age at puberty of sons and daughters. Larger SC EPDs suggest younger age at puberty. Yearling sons of a sire with a 0.7 SC EPD should have yearling scrotal circumference measurements that average 0.7 centimeters (cm) larger than progeny by a bull with an EPD of 0.0 cm.

**MATERNAL MILK EPD (MILK)**

The milking ability of a sire's daughters is expressed in pounds of calf weaned. It predicts the difference in average weaning weights of sires' daughters' progeny due to milking ability. Daughters of the sire with a +14 MM EPD should produce progeny with 205-day weights averaging 24 lb. more (as a result of greater milk production) than daughters of a bull with a MM EPD of -10 lb. (14 minus -10.0 = 24 lb.). This difference in weaning weight is due to total milk production during the entire lactation.

**TEAT SIZE (TEAT)**

TEAT EPDs are reported on a 9 (very small) to 1 (very large, balloon shaped) scoring scale. Differences in sire EPDs predict the difference expected in the sires' daughters' udder characteristics when managed in the same environment.

For example, if sire A has a teat size EPD of 0.4, and sire B has a teat size EPD of -0.1, the difference in the values is 0.5, or one-half of a score. If daughters of sires A and B are raised and managed in the same environment, you would expect half a score smaller teat size in daughters of sire A, compared to sire B.

**RIBEYE AREA (REA)**

REA EPDs reflect differences in an adjusted 365-day ribeye area measurement based on carcass measurements of harvested cattle. Sires with relatively higher REA EPDs are expected to produce better- muscled and higher percentage yielding slaughter progeny than will sires with lower REA EPDs. Ultrasound measurements are also incorporated into this trait and have been shown to be highly correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

**MARBLING (MARB)**

MARB EPDs reflect differences in an adjusted 365-day marbling score (intramuscular fat, [IMF]) based on carcass measurements of harvested cattle. Breeding cattle with higher MARB EPDs should produce slaughter progeny with a higher degree of IMF and therefore higher quality grades. Ultrasound measurements are also incorporated into this trait and have been shown to be highly correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

**BALDY MATERNAL INDEX (\$BMI)**

The BMI\$ is a maternally focused index that is based on a production system that uses Hereford x Angus cross cows. Progeny of these cows are directed towards Certified Hereford Beef. This index has significant weight on Sustained Cow Fertility, which predicts fertility and longevity of females. There is a slightly positive weight on Weaning Weight, Mature Cow Weight and Milk which accounts for enough growth but ensures females do not increase inputs. There is some negative emphasis on Dry Matter Intake, but a positive weighting on Carcass Weight which is anticipated to provide profitability from finishing of non-replacement females and castrated males. Marbling and Rib-eye Area are also positively weighted to keep the harvested progeny successful for CHB. This index is geared to identify Hereford bulls that will be profitable when used in a rotational cross with mature commercial Angus cows.

**Certified Hereford Beef Index (\$CHB)**

The Certified Hereford Beef Index is a terminal sire index that is built on a production system where Hereford bulls are mated to mature commercial Angus cows and all progeny will be targeted for Certified Hereford Beef after the finishing phase. This index has significant weight on Carcass Weight to ensure profit on the rail. As well there is a positive weighting for Average Daily Gain along with a negative weighting on Dry Matter Intake to ensure efficient pounds of growth in the finishing phase. Keep in mind, this production system takes advantage of complimentary breeding with the commercial Angus cow. Although Marbling is weighted positively in this index, a positive weighting for Rib-eye Area and a negative weighting for Back Fat are a greater priority in this index to allow for optimum end-product merit. This is the only index that has no emphasis on fertility. Remember that no replacement heifers are being retained.

# THE POWER OF GENOMICALLY ENHANCED EPDS

The American Hereford Association (AHA) has embraced the use of genomics into their genetic evaluation by launching a first of its kind single step analysis that utilizes the marker effects of specific traits. Likewise, AHA is directly estimating accuracy values rather than approximating. The direct estimation of accuracy results in a more conservative value but a more accurate value than previous methodologies. The AHA is producing the most reliable genetic evaluation that is supported by Whole Herd TPR™ and genomics, which will give prospective buyers added confidence in purchasing young and unproven animals.

Buying animals that have a genomic profile incorporated into their Expected Progeny Difference (EPD) offers many advantages that allow for quicker breed and herd improvement. To the right is a table showing the average increase in accuracy when buying a young animal with a Genomic Enhanced EPD (GE-EPD) versus an animal without a GE-EPD. Similarly, an effective progeny number increase is listed by trait that shows how many progeny equate to a genomic enhancement of a young animal (e.g. yearling). That's right, buying a young animal that has been genotyped is like having 2-17 progeny, depending on the trait. The proof gained on young, non-parent animals, through a genomic enhancement is valuable and greatly mitigates the risk and allows for more directed selection.

AHA TRAIT	ACCURACY IMPROVEMENT	EFFECTIVE PROGENY NUMBER INCREASE*
<b>CALVING EASE</b>	0.09	17
<b>BIRTH WEIGHT</b>	0.12	8
<b>WEANING WEIGHT</b>	0.14	12
<b>YEARLING WEIGHT</b>	0.16	9
<b>SCROTAL CIRCUMFERENCE</b>	0.17	6
<b>MATURE COW WEIGHT</b>	0.12	4
<b>UDDER SUSPENSION</b>	0.17	7
<b>TEAT SIZE</b>	0.17	7
<b>CARCASS WEIGHT</b>	0.11	3
<b>FAT</b>	0.08	2
<b>RIB-EYE AREA</b>	0.07	2
<b>MARBLING</b>	0.10	3

\* Effective Progeny Number Increase (EPNI)- EPNI is the difference gained for genotyped animals versus non-genotyped animals.

Each animal tested is recognized with the AHA GE-EPD logo.

## YEARLING BULLS

This group of yearling bulls represents the top 75% of the bull calves born in our 2025 calf crop. When we weaned this set of bulls last fall, we felt like they were the most even set that we had ever put on feed. They have continued to excel since then and are a fantastic set of bulls. They combine EPDs, phenotype, performance, carcass, strength, and cow power, and we are extremely proud of the quality and uniformity in this group from top to bottom. They are stout made, well marked, long bodied and have top notch performance and ultrasound data to back it up. We have continued to add more carcass quality into our bulls while maintaining a proper phenotype and structure while always keeping a strong focus on economically important traits for our customers. They have all been semen checked and are ready to go to work for you. 100% of these bulls have AHA GE EPDs to increase the accuracy of their EPDs, and they also are all parentage verified. We invite you to look them over, and we feel that you will be very impressed with the consistency in type and kind in this powerful set of bulls. There are many full and 3/4 brothers in this group also, and almost 50% are ET calves from our extensive ET program. **The group this year also includes a set of early December born bulls with an extra age advantage.** All but one of these bulls are ET's from some of our best matings. As we wind down our fall program, we decided to add this calving group for any customers looking for a little older bull. This will be a continuing part of our program going forward.

The average EPDs on this group of bulls is

CED +4.1 BW +2.3 WW +61 YW +93 Scrotal +1.25 Milk +31 M&G +62 TEAT +1.4 REA +.46 MARB +.28 BMI\$ 382 CHB\$ 141

The average bull in our sale offering ranks as follows:

Top 45% CED, Top 40% on BW, Top 35% WW, Top 45% YW, Top 25% Milk, Top 20% M&G, Top 14% TEAT, Top 20% MARB, Top 45% on BMI\$, and Top 25% on CHB\$

This consistent quality across the board on EPDs and Profit Indexes shows our commitment to multi trait selection. Combine this with 70 years of common sense, balanced trait selection, linebreeding, and selecting for strong maternal lines that are fertile and easy fleshing, well pigmented, and great uddered, and it adds up to bulls that will add tremendous value to your herd in all phases of beef production.

These bulls were again fed out on the CHS Feeds ration called Holden Bull Challenger. It is a high fiber, low fat pellet that we have fed for the last 20 plus years. The bulls gained over 3.5 lbs. a day on a 130 day gain test and have an average 205 day weight of 730 lbs., an average 365 day weight of 1325 lbs. and an average scrotal of 37 cm. They also scanned an average REA of 13.49, and an average IMF score of 2.92%.

Scrotal Measurements were taken on 1-8-2026 before most of these bulls were a year of age.

Goggle eyed, stout made, carcass bull with extra rib shape and fleshing ability.

- ♦ Top 5% on Scrotal and CHB\$
- ♦ Top 10% on Milk, CWT, and MARB EPDs

This set of flush brothers is probably the best flush from end to end that we have ever produced. Look at the phenotype, muscle, pigment, eye appeal, and type in these full sibs. To top it off they all have breed leading growth, carcass, and maternal with top end profit indexes. The 0003H donor is one of our favorite cows we have ever produced. She consistently throws progeny with style, performance, and all around balance. Help yourself to a set of bulls that are right for the times and will bring profit to any operation.

### TOP SHELF HERD BULL PROSPECT

5234N is an absolute stud that gets better every day. He looks fantastic on the stand and moves out like a cat. This pedigree combines a ton of elite donor cows. Great all around combination. Here is a breeding bull that should do great things.

- ♦ Ratioed 104 on REA and 112 on IMF and top 20% on REA, MARB, and CHBS
- ♦ Top 15% on Milk and top 20% on UDDR
- ♦ Maternal brother to the 0022H herd sire and also to the Lot 5007N bull
- ♦ Full brother sells as lot 5185N
- ♦ Retaining a 1/4 in herd semen interest.

5235N and 5236N are twins out of the 8237F donor cow.  
Look at the carcass and maternal EPDs on these two.  
Buy them both and make a great set of  
females and steers that will do it all.  
Both rank high on TEAT, UDDR, and CHB\$

Goggle eyed bull out of a solid producing 10 year old cow. Lots of longevity and top females stacked in this bulls pedigree.

**KA-CHING.**

MORE POUNDS. MORE CALVES. MORE PROFIT.

Hereford bulls increase net profit by \$51 per cow per year.

That's \$20,000 in additional revenue for a typical 400-cow outfit, thanks to increased fertility and herd size.

Herefords are also the efficiency experts, proven to add value to calves in the feedyard — \$30 per head in profitability.

That's real money and real results.

COME HOME TO HEREFORD.

**PREMIER HERD BULL PROSPECT**

Here is a bull you could write a footnote on until you got tired of it. So to condense it let's just call him an all around stud. This bull will stop you in your tracks and he has all the bells and whistles. We sure wish we had gotten a full sister or two to these two full brothers. The 0132H donor does it again and her legacy continues to grow.

- ♦ #1 bull in the sale on BMI\$ and top 2% of breed
- ♦ Top 5% on Milk, top 10% on CHBS\$, top 15% on WW, YW, and MARB
- ♦ Ratioed 123 on %IMF
- ♦ 3/4 brother to the 4137M bull that topped our 2025 Sale at \$110,000 for 1/2 interest
- ♦ Retaining a full 1/2 interest including possession. Buyer has first choice on possession

5266N is another bull with the 2 B's. Lots of body and butt in this bull and he is out of one of our very favorite donors. He is the only son of the 3007L bull that sold for \$60,000 to Baumgarten Cattle and Ryan and Tina Hermann in our 2024 Sale. The genetic potential in this bull is huge and he has the look to back it up.

- ♦ Top 15% on CHBS and top 25% on WW and YW EPDs
- ♦ Dam is a flushmate to the 1222J donor that is the dam of Lots 5085N and 5103N
- ♦ Retaining a ¼ in herd semen interest

5332N is an April calf out of the 0183H donor that has one of the top average nursing ratios on the ranch. Don't overlook this bull because of his age. He has outstanding EPDs and a great future ahead of him.

- ♦ Top 5% on Milk and top 15% on WW
- ♦ Dam has an average NR of 111 and an average YR of 110

**DOUBLE BIT RANCH BULLS**

This set of bulls was raised at the Double Bit Ranch in Libby, MT until weaning time this fall. Double Bit is owned by Paul and Margaret Tisher, and they have a small select herd of top end Holden bred cows. They are also partners with us on the 0132H Cooper donor cow. This set of bulls are all sired by the HH Advance 2031K sire that they purchased from us in our 2023 Sale for \$32,500. This set of bulls are almost all calving ease bulls with extra carcass and maternal strength. Take a look at the performance and scan data on this set of bulls. It is impressive. These bulls have been managed and ran with our bulls since early September. They sell with the full Holden guarantee.

## 18 MONTH OLD FALL BULLS

This set of 6 fall bulls will be the last set we will have in our sale. Next year we will have a powerful set of 2 year olds to sell that will be almost exclusively ET bulls. These 6 bulls are a powerful set that are very well marked, have exceptional EPDs with lots of calving ease and carcass. They are big, stout, and ready to go breed a lot of cows. Lots of quality in this set!

## YEARLING HEIFERS

Once again we are opening the doors to a great set of our replacement heifers. This set is top notch with several ET heifers in that have definite donor potential. Here is a group of females to build a herd around. Help yourself to an opportunity to put together a great young foundation female or females. We feel this is the best set of heifers as a group that we have offered in our spring sale.

We don't offer many heifers out of the 1128J herd sire, so here is a great opportunity to get your hands on one. 5274N is a broody female with a great look and extra power. With 6169D and 0121X up close in the pedigree, there is a ton of added udder quality and carcass merit.

**Take advantage of hybrid vigor by capitalizing on Hereford genetics.**

**MA+ MATERNAL ADVANTAGE**

- Maternal Advantage program rates females with added longevity, fecundity, increased fertility and more per year.
- Can be utilized by producers using Hereford bulls on British-based cows or Brahman-based cows in their breeding program.
- Producers utilizing the program will receive access to a sire EPD summary, added sire, replacement selection tools, genetic tools and access to AHA resources, staff.

**Requirements:**

- Producers must verify that eligible females are sired by Hereford bulls with transferred ownership.
- Hereford bull batteries must rank in the top 50% for Baldy Maternal Index (BMI) if used on British-based cows or the top 50% of the breed for Brahman Influence Index (BI) if used on Brahman-based cows.

If this heifer wasn't a March baby, there is no chance she would be leaving. Dam is an incredible donor out of the 0234X donor and maternal sister to the 2137K and 3037L Herd sires. For how young this heifer is, she absolutely mashed our scale, posting a 105 nursing ratio. 5331N has good pigment with extra red on her neck and legs. She is angular and very sound structured. This female has a very bright future.

All of these sets of heifers are the top cut of their F1 heifers with no replacements being kept. Once again we are pleased to offer a few outstanding sets of true F1 black baldy open yearling heifers. These heifers have lots of pigment, are feminine, deep bodied, and the right kind. They all will be sired by Holden bulls and should make a great set of cows. There is no free delivery on any of these heifers, but we will work with buyer to get delivered as economically as possible.

## HOLDEN

7 HEAD

Powerhouse set of F1 heifers from cleanup on our Angus recipients after embryo transfer. These heifers were born in February and March and will average 850 lbs at sale time. They will have their first pre breeding shot, be bangs vaccinated, and poured.

## KING

30 HEAD

Extra fancy set of heifers out of a powerful set of bulls. Kings have been longtime customers and friends, and they know how to pick out bulls. This set of heifers are born in late March and April. The Angus heifer mates to these topped the sale in Valentine right off the cows this fall. They will sell in 2 groups of 15. Tags 1-15 will average around 825 lbs. at sale time. Tags 16-30 are a little younger and will average 775 lbs. at sale time. They will be bangs vaccinated, first shots, and poured. **NO BRANDS.** They are located in Winner, SD and will sell F.O.B. from Winner. For more information call Greg King at 406-945-3076

## VANDENBOS

20 HEAD

This set of heifers was raised on the Billy VandenBos ranch right next door. This is the 5th year we have sold these heifers, and everyone who has bought them in the past has had great success. These are March and April born heifers that will average around 775 lbs at sale time. They have been developed out on pasture on hay and protein tubs. They are out of a great set of bulls and will be well pigmented and fancy. They will be bangs vaccinated, first shots, and poured. No brands. Contact Billy VandenBos for more info 406-576-1230

## VANNOY

35 HEAD

This set of heifers are AI sired by 2116K and cleaned up with as good a set of bulls as you can buy. These cattle summer in big ranch country on the west side of the mountains. They are out of a very functional, high powered set of Angus cows sired by top end bulls also. They will be poured, have current shots, and be ready to go. They are March and April born heifers that will average around 800 lbs at sale time. They will be bangs vaccinated, first shots, and poured. These heifers have been developed at Veltkamp Feedlot in Manhattan, MT and will sell F.O.B. from there. Sell in Lots of 10 or more. Gate cut.

For more information call Zeph Schultz at 801-637-0047.

# HETEROSIS PAYS

Economic and production benefits associated with heterosis are documented by decades of industry-wide research in commercial crossbreeding systems.

## DIRECT HETEROSIS

Increased performance of the crossbred calf relative to the average of the straightbred parental breeds.

- + 1.9% Survival to weaning
- + 3.9% Weaning weight
- + 2.6% Post weaning gain
- + 3.8% Yearling weight
- + 2.2% Feed conversion

## MATERNAL HETEROSIS

Increased performance of the crossbred cow relative to the average of straightbred females of the parental breeds.

- + 3.7% Calving rate
- + 3.8% Weaning weight
- + 38.0% Longevity
- + 17.0% Number of calves
- + 25.3% Cumulative weaning weight

Primary crossbreeding advantages are improvement of lowly heritable traits, such as those associated with reproduction, which are difficult to impact through direct selection pressure. Small, net-positive effects in multiple traits affecting commercial cow-calf profitability — pregnancy rate, calf livability, calf health, etc. — yield significant returns that are difficult to measure. Crossbreeding value is most visible in the increased number of calves (lifetime), cow longevity and cumulative weaning weight (lifetime).

### HEREFORD HETEROSIS PAYS MORE

Hereford genetics offer more crossbreeding power because they are the least related to other Bos Taurus breeds, as documented by the U.S. Meat Animal Research Center (USMARC) 2000 Bull Project. Plus, Hereford's unique, inherent genetic advantages compared to other breeds offer added breed complementarity, especially when crossed with Angus. Hereford advantages include: docility, fertility, feed efficiency in the pasture and feedlot, longevity, and production efficiency.

### HEREFORD-SIRED BLACK BALDY FEMALE ADVANTAGES:

- 7% higher pregnancy rate
- More calves weaned per cow exposed

- \$51 more per cow per year in net present value (2009 calculation)
- 3.5% more average rate of return on assets
- 2 pounds less pasture forage per day while maintaining more body condition<sup>1</sup>

Black baldy cows require 1 acre less of moderate-quality forage per year compared to straightbred black Angus peers, according to Oklahoma State University research.<sup>1</sup>

### HEREFORD-SIRED BLACK BALDY STEER ADVANTAGES:

- Heavier weaning weights
- Increased feed efficiency
- Lower cost of gain
- Lower feedlot breakeven
- \$28 per head less feed cost across finishing period

Based on feed efficiency alone — breed differences documented by the USMARC — Hereford has a \$51 per head advantage over the finishing period, when compared to Angus.<sup>2</sup> Hereford's economic advantage increases as feed costs rise.

<sup>1</sup>On average, Oklahoma State University researchers measured about 2 pounds per day less moderate-quality forage (Oklahoma pasture) intake in the black baldy cows. On an annual basis the black baldy cows would be expected to consume about 725 pounds less forage.

<sup>2</sup>Calculation based on breed differences for feed efficiency documented by the U.S. Meat Animal Research Center, using current feed costs (Oct. 2022).

Our operation is very blessed to work with a lot of talented people through the year. We thank them all and appreciate all that they do to help make our operation successful. We also have a great crew of friends and neighbors that show up to help get ready for the sale and pull off everything that it takes to make sure that everything goes well on our big day. Our hats are off to them all!!

# Thank You!

Joe Goggins, Auctioneer
