Welcome Cattle Producers,

We would like to invite you to the ranch to view the Hereford bulls and F1 Black Baldy replacement females that we will offer in our 68th Annual Production Sale.

It is an exciting time to be in the cattle industry. All time low cattle numbers, and great demand have prices at levels never seen before. Even with a good market, we can do better by making sure our operations are always improving. Efficiency is the key to a successful operation, so you need to get the most for your dollar. Hereford-sired cattle provide efficiency and longevity, as well as carcass merit. One can't dismiss the value of heterosis in the crossbred program, it just makes sense. Hereford bulls provide so many traits that just don't come through on EPDs, like libido, adaptability, fertility, and docility.

Again, this year we will be offering our home-raised F1 Black Baldy replacement heifers. These heifers will be the top end and are extremely fancy. They have been through the working chute several times to be screened for disposition. All the twins have been removed. They will be Bangs vaccinated. They will all make excellent brood cows. The baldy cow is one of the most desired cows on the market, we are selling our F1 Black Baldy replacement heifers or buy one of our Hereford bulls and make your own.

You will notice that there are missing lot numbers throughout the catalog. The bulls are tagged in May before they go out on their summer range. We are constantly culling so you can buy with confidence that they will perform. Many of the bulls are sold sight unseen and they need to be what one expects. We feel that every bull offered up for sale is good enough that we would use it in our operation. After the sale closes, we will retain some of the bulls if they do not sell in the sale. The bulls are very consistent from first to last. All of the sire groups are a little different and yet all of the bulls have a similar look and are very even. In our program, we put an emphasis on quality, trouble-free females with length, muscle, good disposition, sound feet & legs, good hair, excellent bags, and that will raise a quality calf. These bulls are an extension of that program.

We believe bulls that aren't fed hard, but have the opportunity to grow, will have longevity. The bulls were never creep fed. We feel that not creep feeding allows the best opportunity for evaluating the cows. They were raised on a high roughage ration then turned out on grass for the summer as yearlings.

Our auction will be the same as last year. There will not be a sale order and we will be using a horse race style format. We know that it may be new to some, but we feel that not being restricted by a sale order will benefit our customers. How often have you said "Who made this sale order anyway?" The bidding will still occur over a several day time frame, which gives our customers more time to compare the bulls. You can come view the bulls at your convenience. If anyone does not feel comfortable with the bidding format, please let us know and we will have help available.

Thank you, *The Jerry Knippling Family*

CED: +2.7 BW: 2.6 WW: 69 YW: 121 M: 45 MG: 80

50B was the top selling bull in Ridder's 2016 sale, out of one of their top cows. He has it all, great carcass, moderate birth weights, great disposition, longevity, exceptional females, explosive growth, and unmatched depth and thickness. 50B is now a Sire of Distinction, which is not easy to do in a non multi-breeder program. We have used him a lot and will continue to do so.

UU KINGSTON 0244H - #44134869

CED: +0.6 BW: 2.9 WW: 66 YW: 95 M: 49 MG: 83

A bull at Van Newkirk Herefords that we just fell in love with and used to AI. He sires pigment, length, and thickness. We did not use on heifers, but we sure could have.
