WELCOME TO OUR SALE!

Hello and welcome to our 2025 Bull Sale! Whether you're new to our program or have been with us since the beginning, we are so thankful for you, and being able to work with you in the past and looking forward to in the future.

As I look back on the past year, I do so with a heavy heart! As I think about all the good friends and neighbors that have experienced the loss of close loved ones the past few years, it makes me think about how precious life is and sometimes how life seems to get cut so short! It's made me question what a "good long life" is anymore! It doesn't seem like you have to be "old" anymore to pass from this earth. So whether that happens in a tragic accident as a child, an unexpected medical issue, or when you're 100 years old in your bed, life here on earth is short compared to eternity. It's here today and gone tomorrow. 2 Corinthians 4:16-18 says "Therefore we do not lose heart. Though outwardly we are wasting away, yet inwardly we are being renewed day by day. For our light and momentary troubles are achieving for us an eternal glory that far outweighs them all. So we fix our eyes not on what is seen, but on what is unseen, since what is seen is temporary, but what is unseen is eternal."

I'm so thankful for God's perfect plan of salvation and making a way for those to turn to His son Jesus! Hebrews 12:2 says "Let us fix our eyes on Jesus, the author and perfecter of faith. For the joy set before Him endured the cross, scorning its shame, and sat down at the right hand of the throne of God."

Our goal at LaDue Angus Ranch continues to be breeding and developing well-balanced cattle that will function in our climate and work for you. On our ranch the main focus is the female. We select sires that will build the cow that works for us and doesn't demand that we work for them. We always have the commercial cattleman in mind. Every cow we have is expected to calve, mother, and raise her calf with minimal assistance from us. The bulls in this year's offering have been developed slowly on a roughage only ration as calves and summered on grass as yearlings. All bulls are virgin and have had a breeding soundness exam and passed a semen test. Production data and scrotal measurements are listed for each bull. Zoetis HD50K test results are also listed by each bull as well as a comprehensive list on pages 24-25 in order to easily compare.

If you are unable to attend the sale, please contact us and we can arrange for someone to assist you. You can register and bid online at www.DVAuction.com. Be sure to register in advance to be approved before sale day.

Whether you are a returning customer or looking for the first time, we THANK YOU for your interest in our program. As always, please reach out with any questions or concerns about the bulls.

Please join us at the sale facility for lunch before the sale, Thursday April 17, 2025 at the Meadow Sale Facility. Thank you again!

SEE YOU THERE!

Kent, Janet, and Brian LaDue, Brittney & Charlie Rossow, Bethany & Caleb Hunt

SALE INFORMATION

Contact Information:

Kent & Janet LaDue
 Brian LaDue
 14478 Rabbit Creek Road
 Meadow, SD 57644
 605-788-2969

 www.ladueangusranch.com

Sale Day Contacts:

Kent cell: 605-490-1004
 Brian cell: 605-890-1759
 Sale Day Phone: 605-788-2500

Auctioneer:

Seth Weishaar: 605-210-1124

Ringmen:

Dan Piroutek - 605-544-3316
 Beau Ravellette - 605-685-8155
 Donnie Leddy - 605-695-0113

Feed:

Our bulls are summered on milk and grass without creep feed. At weaning, they are fed a roughage ration and free choice hay and summered on grass as yearlings. They have been developed on a complete mineral program. Our desire is to ensure soundness and longevity and to condition them to work in your pasture.

Herd Health:

- At Branding and Pre-weaning: Vision 7 with Somnus, Vista Once SQ
- At Weaning: Inforce 3, Vision 7 with Somnus, Multi-Min
- In January & April: poured with Clean Up II
- April: Two shots of Fusoguard (foot rot) vaccine
- April: All bulls have passed a Breeding Exam/Semen test by Dr. Bleaux Johnson of West River Veterinary Clinic
- Zoetis HD50K Tested
- Tested BVD free

Delivery:

Receive a \$200 discount per bull if you haul on sale day, or we will deliver the bulls at the buyer's earliest convenience unless other arrangements are made. Free delivery within 300 miles.

Guarantee:

We guarantee all bulls against injury that would keep them from breeding for the 1st season. If injury occurs and the bull is returned to us, credit is given for next year's sale, or a replacement will be provided if available. It is the buyer's choice which option is more satisfactory. Please notify us as soon as possible should injury occur. Claims must be made by 10-1-25. This guarantee does not cover death. Buyer's satisfaction is our guarantee.

Why 2 Year Olds:

- Developed on grass, not pushed
- More mature at breeding = more years of service
- Structurally sound feet
- Able to cover more cows than a yearling bull

Zoetis HD50K Testing

What is it? - HD50K for Angus is a DNA genotyping technology from Zoetis designed for Angus producers and fully endorsed by the American Angus Association and Angus Genetics, Inc. Performing this test on each bull provides percentiles that compare over 1.3 million cattle in the Angus breed so we can continue offering the best cattle possible.

Why is it useful? - It provides us as a seedstock producer with information to use to make culling decisions on bulls that just don't meet the mark and it can help producers more accurately choose the right bull that will best fit in with their herd. It helps to provide comprehensive genetic and management solutions for beef producers. Select, mate, and market cattle with more confidence by using this data.

By each bull, you will find 20 data points listed as percentiles to help with your selection decisions. There is also a side by side chart in the back of the catalog to serve as a quick reference and to compare bulls side by side with ease.

We provide you this information so as to help you make decisions, not to confuse you so if you have questions, please let us know and we will do our best to explain!

If you are unable to attend the sale, please visit www.DVAuction.com to bid. Be sure to register in advance to be approved before sale day.

Videos of each of the bulls will be available for viewing approximately two weeks prior to sale day on www.theLivestockLink.com and www.DVAuction.com

We trust enough in our own genetics that we have decided to keep some of this year’s bulls back and use as herd sires in the years to come. There are three pairs of bulls in this year’s offering that you will get to choose one bull from each pair. All of these bulls are from our most proven cow families and are equally as good from first to last. Lots 306 and 308 will sell choice... you pick one and we will keep the other and use him as a herd sire on our ranch.

Bulls that can be Registered

This is a good offering of registered bulls this year. Each bull is heavily influenced by Dunlouse, OCC, and N Bar genetics. These bulls are truly adapted to our tough northern environment and continue to impress me on how they perform on grass. Will transfer registration papers upon buyer's request. Retaining half semen interest on all registered bulls.

Term	Description	Percentile Rank	Observation
Calving Ease Direct (CED)	Describes differences in genetic merit for the likelihood of unassisted births in first-calf heifers, expressed as a trait of the progeny.	1%	More unassisted calvings
Birth Weight (BW)	Quantifies genetic differences in birth weight, with lower and moderate values and ranks generally desired for ease of calving.	1%	Lighter
Weaning Weight (WW)	Measures difference in genetic merit for adjusted 205-day weaning weight	1%	Heavier
Yearling Weight (YW)	Indicates differences in breeding value for adjusted 365-day weight	1%	Heavier
Yearling Height (YH)	Describes genetic differences in adjusted 365-day hip height	1%	More hip height
Mature Weight (MW)	Quantifies differences in genetic merit for mature cow weight at a constant body condition	1%	Larger cow weight
Mature Height (MH)	Measures genetic variation in mature cow height	1%	More cow height
Foot Score Claw (FSCLaw)	Indicates a sire will produce progeny with a more ideal claw set defined as toes being symmetrical, evenly, and appropriately spaced	1%	More ideal claw set
Foot Score Angle (FSAngle)	Indicates a sire will produce progeny with a more ideal foot angle defined as a 45 degree angle at the pastern joint with appropriate length and heel depth	1%	More ideal foot angle
Dry Matter Intake (DMI)	Quantifies genetic differences for feed intake while on feedlot finishing rations	1%	Eat less
Pulmonary Artrial Pressure (PAP)	Predicts progeny with lower pulmonary arterial pressure which decreases the risk of contracting high altitude disease (HAD) and right sided congestive heart failure	1%	Lower pulmonary arterial pressure
Hair Shed (HS)	Indicates the favorability of progeny who shed their winter hair coat earlier in the spring (putting less energy into thermoregulation)	1%	Earlier hair shed
Heifer Pregnancy (HP)	Predicts the probability of ability of heifers to become pregnant	1%	Increased pregnancy probability
Calving Ease Maternal (CEM)	Indicates differences in genetic merit for the likelihood of unassisted births in first-calf heifers, expressed as a trait of the heifer.	1%	More unassisted calvings
Milking Ability (MILK)	Evaluates differences in genetic merit for the maternal component of calf weaning weight, predominantly due to milking ability of dams (or daughters).	1%	More maternal milk
Scrotal Circumference (SC)	Describes genetic differences in age at puberty as indicated by adjusted yearling scrotal circumference.	1%	Larger size
Docility (DOC)	Quantifies genetic differences in the probability of acceptable (calm) versus unacceptable (wild) temperament.	1%	More docile
Carcass Weight (CW)	Measures differences in breeding value for pounds of carcass weight at a constant age.	1%	Heavier
Fat Thickness (FAT)	Communicates genetic differences in fat thickness measured adjacent to the ribeye between the 12th and 13th rib, at a constant age.	1%	Leaner
Ribeye (RE)	Describes genetic variation in carcass muscularity as measured by ribeye area between the 12th and 13th rib, at a constant age.	1%	Larger area
Marbling Score (MARB)	Quantifies genetic differences in USDA marbling scores at a constant age	1%	Greater marbling
Tenderness (TEND)	Evaluates differences in genetic merit for tenderness based on the amount of shear force required to slice through cooked steak samples.	1%	More tender
