Guarantee

Lehrkamp Livestock guarantees bulls for their first breeding season (60 days from turn-out) provided the bulls are managed properly and are kept in acceptable nutritional and physical health. Should death or injury occur to the bulls, it should be documented and verified by a licensed DVM, and all claims must be made by September 1 of the current year. Lehrkamp Livestock will either give credit to the buyer or replace the injured bull at their discretion, if a comparable bull is available.

Performance Records

CE (Calving Ease Direct) is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first calf heifers.

BW (Birthweight EPD), expressed in pounds is a predictor of a sire's ability to transmit Birthweight to his progeny compared to that of other sires.

WW (Weaning Weight EPD), expressed in pounds, is a predictor of a sire's ability to transmit pre-Weaning growth to his progeny compared to that of other sires.

YW (Yearling Weight EPD), expressed in pounds, is a predictor of a sire's ability to transmit post-Weaning growth to his progeny compared to that of other sires.

Pedigree

Extreme care has been taken in copying each pedigree to avoid errors. We are not to be held responsible for any error which might appear and which is beyond our control in the printing of this catalog.

Dear Friends,

It is with great pleasure that we extend an invitation to join us for our annual production sale on Saturday, March 26, 2022 at 1:00PM (MDT).

The bulls and heifers in this year's offering are out of returning sires Raven Bonanza, Deep Creek Reckon 712, LL Next Generation 630, Reisig Authority 5605, Raven Aviator E362, Musgrave 316 Stunner, LL Gun Powder 600, Werner Flat Top 4136, and Stevenson Premium 60374. The new sires are Deep Creek Sidekick, LL Knockout 914, LL Whitlock 921, Ellingson Ribeye 3195.

We hope there is something that works for you in the new and returning sires. The Flat Top and Premium sons are looking to be very good heifer bulls.

We struggled with all the rest of agriculture in our area without enough moisture and excessive heat this summer. The calves had a rough start last spring with a virus in the soil that hit calves hard, setting them back. We were finally able to get ahead of it with the help of DVM Scott Cammack. With all that said the bulls and heifers look surprisingly good for everything that they went through.

The bulls and heifers were summered without creep feed. The calves were weaned in October and have been on a cracked corn/DDG pell let/R.O.C. pellet ration, along with mixed hay ration. Dr. Scott Cammack, DVM semen tested the bulls March 11, the scrotal measurements and final weights will be available sale day.

We invite you to visit anytime and look at the bulls and heifers and go through the cow herd. Please feel free to stop anytime and look the bulls and heifers over. We appreciate your interest and invite you to give us your input on how we can help meet your cattle's needs.

On Saturday, March 26 come early and have lunch with us..... we are looking forward to seeing you.

Mike, Jodie

Carl, Taylor, Kelon and Landrie
