Sale Day Info | 1

**Herd Health:** We pasture weaned the bulls on August 29<sup>th</sup>. The bulls were transitioned over to a mixed ration of silage, ground hay, earlage and protein supplement where we targeted a 3.25 lb/day gain. We like to keep the bulls on a high roughage diet and grow them out to ensure sound feet, legs and longevity of the bulls.

# Welcome to the 20<sup>th</sup> Annual Millar Angus Bull Sale

Whether you're one of our repeat customers, neighbors and friends or if you're considering Millar Angus genetics for the first time, we thank you! We invite you to be our guest on February 17<sup>th</sup>.

When it comes to the family, it's never a dull moment around our household! Kids and cows seem to keep us busy. Ryle (14) would describe his perfect day as helping around the ranch, caring for his cattle and sheep followed by a little team roping. Kobi (11) loves to spend time making crafts, baking and chooses rodeo hands down as her favorite sport. We all find a little time to do some team roping with the family, throw in some auctioneering for Jon and chase the kids around to rodeos and that sums up our "free time".

When it comes to this past year...I don't think any one of us could've predicted a year like 2020! Our hope is that each of you remained healthy, but we know that's not always the case. For those families directly affected we pray you recovered fully with minimal complications. For those who have lost a loved one, we offer you our deepest condolences.

While some things came to a stand still last spring, the cattle never did get the memo on the pandemic and still wanted tended to. We were appreciative to have ample spring moisture to get the grass and crops started. The unusual year came with some ups and downs in the cattle industry. It just reminds us there's never a bad time to step up the quality of genetics in a herd because quality typically sells. We're proud to have seen many customers experience increased weaning weights off the cow and substantial gains in the feedlot. Expenses never seem to go down, so our goal has always been to produce cattle that will help your herd be as economical and profitable as possible.

All of our bulls have been raised with the rancher in mind: natural growth bred in, not fed on. If you're needing a bull to cover a little more country one of our two-year-olds should fit the bill. They are from our 2019 calf crop and have never before been offered for sale. All the bulls have been bred to add performance, length, thickness, carcass qualities and maternal strengths to your herd.

As always, we will keep the bulls until April and deliver them, free of charge. The bulls will be semen tested in March with scrotal measurements available sale day. All bulls sell FULLY GUARANTEED for the first breeding season with your satisfaction being our #1 priority. We invite you to stop by to view the bulls and the cowherd that produced them. We always love to talk cattle!

*Jon & Brezzy*
