### THE **NED & JAN WARD QUALITY PROGRAM**

Ned, Jan & Bell Ward

**307/672-3248**

247A Decker Road • Sheridan, WY 82801  
[njwardherefords@gmail.com](mailto:njwardherefords@gmail.com)

### Welcome to NJW!

Our program and these bulls are the result of a passion and commitment to raising the most predictable, highest quality Herefords possible. We have developed these genetics by using bloodlines that fit our environment, selecting for balanced traits and culling! Buying bulls is a huge investment with the genetics you choose today having tremendous long-term impact on your herd. Buying the RIGHT bull can transform your calves and their value in just one generation as well as affect your cowherd for the next 10 years. Again this year, in an attempt to offer you the most predictable, accurate EPDs as possible, we Genetically Enhanced each bull's EPDs (as noted by the GE-EPD symbol next to each pedigree). We believe the bulls in this sale are a forward moving set of "Genetic Tools" both to look at and on paper. The average EPDs of NJW Yearling Bulls are...

BW	WW	YW	MILK	M&G	SC	Udder	Teat	REA	MB	CHB
<b>2.2</b>	<b>55</b>	<b>85</b>	<b>30</b>	<b>57</b>	<b>1.1</b>	<b>1.32</b>	<b>1.31</b>	<b>.57</b>	<b>.17</b>	<b>\$29</b>
<i>While the Hereford Breed averages are:</i>										
<b>3.2</b>	<b>50</b>	<b>81</b>	<b>22</b>	<b>47</b>	<b>0.9</b>	<b>1.17</b>	<b>1.17</b>	<b>.34</b>	<b>.07</b>	<b>\$24</b>

These bulls were raised on Wyoming Range and their Mother's Milk only ...no creep! They posted an Actual avg. BW 85 lbs. (scale weighed). We develop our bulls to improve longevity and winter them here at the ranch on a limited amount of 15% grower pellet and free choice grass hay.

Our goal is to produce easy doing, big bodied, thick and sound cattle with added performance that still maintain enough calving ease and high maternal traits. Our herd is very maternal and we demand our cows have good udders, are great mothers and calves be vigorous at birth! We expect out two yr. olds to raise bull calves to sell in the sale and feel this year's rival the mature cows' calves.

We make a special effort to get pictures of all sale bull dams, but keep in mind that most pictures were taken at Summer's end a few days prior to weaning.

If you have questions or can not be here for the sale, Ned and I are happy to help with selecting bulls to fit your program. Our bulls and cowherd are here at the Ranch and available to look at anytime. If you are coming in on the 28th, we will have supper (at dark) here at the Ranch and would love to have you join us!

**— Ned, Jan, Bell Ward**

## GENERAL INFORMATION

### Sale Location:

Sale located at Ward Ranch ...2.5 miles North of Sheridan, WY ...off I-90 Exit 20, turn right on Hwy. 338 for 2.5 miles to the ranch on the right.

### Airports:

Billings, MT ...125 miles from the ranch; Sheridan, WY for private planes and served by Charter Alliance Group, go to: [FlySheridan.com](http://FlySheridan.com).

### Motels: Sheridan, WY ...ask for NJW Bull Sale Rate

Fairfield • 307-672-8931 (\$79 NJW rate)

Hampton • 307-673-2734

Historic Sheridan Inn • 307-674-2178

Best Western Sheridan Center • 307/674-7421

**Terms:** Cash or check. Each animal to be sold to the highest bidder. The auctioneer shall settle any disputes as to bids. All cattle are to be paid for by the purchaser during or immediately after the sale and will not be released until settlement has been made. Each animal becomes the property of the buyer immediately after the animal is sold. Any death or injury thereafter falls upon the buyer. ***Announcements concerning the cattle at the sale ring by the owners or the auctioneer will take precedence over statements in this catalog.*** All persons attending the sale do so at their own risk. Neither the owners, nor any person associated with the sale, assumes any liability, legal or otherwise.

**Guarantee:** All animals in the sale are guaranteed breeders. If any adjustment is required, it will be made with a replacement animal of equal value to the animal in question or credit will be given on the purchase of another animal.

**Health:** All sale bulls have passed a Breeding Soundness Exam. They have been BVD ear notched and tested negative. ***Health certificates will be furnished for shipment anywhere in the U.S. Since each State has different regulations on bulls coming from Wyoming, not all bulls will be able to get a Health Permit to go to every State on sale day!***

All sale bulls have received a pre-breeding booster of Vira Shield 6 VL5 HB, a dose of Vibrin and a booster of our Autogenous Pinkeye / Footrot Vaccine as well as poured with Ivomectin.

All bulls have been DNA tested through the American Hereford Association and are free of all known defects recognized by the AHA as of March 29, 2017 and have had parentage verified and been GE-EPD tested.

**Delivery:** Free delivery within 300 miles. Receive a \$50 discount per bull that you haul home on sale day.

### Take Note:

- Each bull's Lot # is same as his ID #.
- Bulls sell in catalog order unless changes announced Sale Day
- All sale bull photos are untouched.
- In case of inclement weather, please call or refer to website for any sale changes.

Catalog Prepared by: Lezlie Moore, Vivian, SD • 605/683-4800

Catalog printed by: Wes and Andie Fishel-Carpenter (Alphagraphics, Winston Salem, NC) • 336/403-7627

**NJW P606 72N DAYDREAM 73S** ...the dam of Trust, 8Y, 10Y, Hutton and numerous other herd bulls around the country. At age 11 this year, she is raising her ninth natural calf with 80 progeny to her credit all the while maintaining a 364-day calving interval. She is in the pedigree of half of this year's sale bulls!

In an effort to improve the accuracy of their EPDs, every sale bull has had theirs Genetically Enhanced as indicated by the GE-EPD logo. Each bull has also been DNA tested for parentage and known defects.

#### **Genomic Enhanced EPD**

Over the past few years, the American Hereford Association has worked with Hereford breeders and the scientific community to develop and incorporate Genomic information into National Cattle Evaluation (NCE) to enhance the predictive power of EPDs. Genomic Enhanced EPD (GE-EPD) allows commercial and seedstock producers the opportunity to make selections and mating decisions based on the most current and accurate information of Hereford Genetics. The AHA utilizes a 77K, High Density (HD) panel that was built off of high accuracy Hereford sires. Each animal that is tested has an updated set of EPDs and corresponding accuracy. For some traits, the added accuracy will increase by 100%, and moving from .15 to over .30 means you would be adding from 5-10 progeny to a pedigree before an animal has any progeny analyzed. Using this information reduces your risk when buying, and helps to plan matings based off of all information available.

---

Hubbard is proud to provide nutrition for Ned and Jan Ward's developing program for the past several years. The pelleted 15% protein ration is made from all natural products. Their ration is customized to provide moderate growth and conditioning while maintaining soundness. **For more information on a program customized for you, call 605-342-6172.**

These coming two year old bulls had very minimal care and feed until this Winter so have less data. They are the product of embryos planted out of our usual calving season so would have a few older bulls to sell!

• We're really high on this "Next Generation" herd sire prospect! He is just so well balanced and smoothly made, but still has so much thickness and power. The Hutton daughters do a superb job with great udders and his sons are full of power and easy to sell. 267C would be a great way to bring in the Hutton influence plus add the cow power of his deep, broody, consistent producing dam U33. We're using a full brother to 267C and there is an exceptional set of full sisters in production at Upstream Ranch so you can be confident of his breeding potential! He sports excellent personal data as well as a very balanced set of EPDs.

• **Homozygous Polled.** This standout Whitmore son is sure to get your attention! He is upstanding, proud and powerful with tremendous length, big top and width. He has excellent testicles, is clean sheathed and easy tempered with exceptional data and EPDs. He and his two yr. old dam were a standout pair all summer. We've used Whitmore for five seasons for his calving ease, short gestation, pigment and ability to sire good, stout bulls and beautiful, excellent uddered, problem-free females!

• **Homozygous Polled.** One of the most exciting herd sire prospects we have raised. He captures your attention with his "herd bull" presence, unmatched style, superb structure, extreme length and overall solid thickness and depth with personal performance and carcass data to match. His pedigree blends two of the breed's maternal icons ...73S, dam of Trust, 10Y, 8Y, Hutton and numerous other herd bulls across the country. At age 11, she just had her ninth natural calf, has 80 progeny to her name and maintained a 364-day calving interval. 112D's paternal granddam 1353 is known for her longevity, udder quality and son 3027.

• *Retaining  
an interest.*

• You couldn't put one together any better than this guy is! Made much like his sire 27A, this calf has a huge stifle that holds that back leg perfectly and allows him to look great no matter how or where he stands. He is marked perfectly with a deep eye set, is heavily muscled and deep in the twist. We have admired him since birth and enjoyed watching him develop. You won't find a better udder than what his dam displays and just study his "herd building" pedigree!

- The sale's youngest bull, but a top herd sire prospect that would be a super asset to many programs. Extremely well put together, square hipped with a wide pin set, big stifle, deep flanked and deep in the twist. He is the natural calf of one of the best cows to walk this ranch and mother of our two 2016 high sellers. Sire 54B was our 2014 high seller!

- Scan data will be available by sale day.

# HEREFORDS FOR TODAY'S CATTLEMEN

It is our firm belief, when Breeding Cattle, the "Balanced Trait Approach" is the right one! We want as much performance as we can get while maintaining that "Critical Balance" of calving ease, cowherd and feedlot efficiency and proven carcass value. All the while, never forgetting the "Unmeasured Traits" of structural soundness, udder quality and attachment, mothering ability, strong vigor at birth, disposition, fertility and longevity.
