Welcome to NJW!

Our program and these cattle are the result of a passion and commitment to raising the most predictable, highest quality Herefords possible. We have developed these genetics by using bloodlines that fit our environment, selecting for balanced traits and culling! Buying bulls is a huge investment ...the genetics you choose today having tremendous long-term impact on your herd. Buying the RIGHT bull can transform your calves and their value in just one generation as well as affect your cowherd for the next 10 years. Again this year, in an attempt to offer you the most predictable, accurate EPDs, we have Genetically Enhanced each animal's EPDs. We believe these cattle are a forward moving set of "Genetic Tools" both to look at and on paper. The average EPDs at NJW are...

NJW Yearling Bulls:

CED	BW	WW	YW	MILK	M&G	SC	Udder	Teat	REA	MB	\$CHB
5.1	1.9	55	87	33	60	1.7	1.40	1.40	.57	.10	115

NJW Yearling Heifers:

4.5	2.1	54	84	32	60	1.1	1.40	1.40	.50	.17	118
-----	-----	----	----	----	----	-----	------	------	-----	-----	-----

While the Hereford Breed averages are:

2.5	2.9	52	84	24	51	0.9	1.30	1.30	.37	.10	111
-----	-----	----	----	----	----	-----	------	------	-----	-----	-----

These cattle were raised on Wyoming Range and their Mother's Milk only ...no creep! The average actual BW on all sale bulls is 85 lbs. The average actual BW on all sale heifers is 79 lbs. We develop our bulls to improve longevity and winter them here at the ranch on a limited amount of 15% grower pellet and free choice grass hay.

Our goal is to produce easy doing, big bodied, thick and sound cattle with added performance that still maintain enough calving ease and high maternal traits. Our herd is very maternal and we demand our cows have good udders, are great mothers and calves be vigorous at birth! We expect our two yr. olds to raise bull calves to sell in the sale.

We make a special effort to get pictures of all sale bull dams, but keep in mind that most pictures were taken at Summer's end, a few days prior to weaning.

We are again offering you the opportunity to invest in our program even further by selling a group of our registered yearling replacements as well as all of our Fall Bred Heifers. Also included in the sale will be two small lots of elite baldy yearling heifers from bull customers. All heifers will be at the ranch sale day and have videos plus all the bulls have videos.

If you have questions or can't attend the sale, Ned and I are happy to help with selecting bulls to fit your program. Our bulls and cowherd are available to look at anytime. **If you are coming in on the 23rd, please plan to join us for a CHB Steak dinner at the Ranch!**

Ned & Jan Ward

AHA GE-EPD

All cattle listed in our sale catalog have been GE-EPD tested and parentage verified.

The Power of Genomically Enhanced EPDs

The American Hereford Association (AHA) has embraced the use of genomics into their genetic evaluation by launching a first of its kind single step analysis that utilizes the marker effects of specific traits. Likewise, AHA is directly estimating accuracy values rather than approximating. The direct estimation of accuracy results in a more conservative value but a more accurate value than previous methodologies. The AHA is producing the most reliable genetic evaluation that is supported by Whole Herd TPR™ and genomics, which will give prospective buyers added confidence in purchasing young and unproven animals.

Buying animals that have a genomic profile incorporated into their Expected Progeny Difference (EPD) offers many advantages that allow for quicker breed and herd improvement. Below is a table showing the average increase in accuracy when buying a young animal with a Genomic Enhanced EPD (GE-EPD) versus an animal without a GE-EPD. Similarly, an effective progeny number increase is listed by trait that shows how many progeny equate to a genomic enhancement of a young animal (e.g. yearling). That's right, buying a young animal that has been genotyped is like having 2-17 progeny, depending on the trait. The proof gained on young, non-parent animals, through a genomic enhancement is valuable and greatly mitigates the risk and allows for more directed selection.

Each animal tested is recognized with the AHA GE-EPD logo.

AHA Trait	Accuracy Improvement	Effective Progeny Number Increase*
Calving Ease	0.09	17
Birth Weight	0.12	8
Weaning Weight	0.14	12
Yearling Weight	0.16	9
Scrotal Circumference	0.17	6
Mature Cow Weight	0.12	4
Udder Suspension	0.17	7
Teat Size	0.17	7
Carcass Weight	0.11	3
Fat	0.08	2
Rib-Eye Area	0.07	2
Marbling	0.10	3

* Effective Progeny Number Increase (EPNI)- EPNI is the difference gained for genotyped animals versus non-genotyped animals.

GENERAL INFORMATION

Sale Location: The Ranch, 247A Decker Road ...2 miles North of Sheridan, WY off I-90. Take Exit 20 to Hwy. 338, go left (north) on 338 for 2 miles to ranch on the right.

Airports: Sheridan, WY for private planes, served by United Airlines. Billings, MT...125 mi. from the ranch.

Motels: Sheridan, WY

Fairfield, 307/ 675-1280 ...*NJW Bull Sale Rate \$89*

Nelson Inn, 307/ 742-7637 (Airbnb, real nice, close to ranch)

...*NJW Bull Sale Rate \$115*

Hampton, 307/ 673-2734

Best Western Sheridan Center, 307/ 674-7421

Terms: Cash or check. Each animal to be sold to the highest bidder. The auctioneer shall settle any disputes as to bids. All cattle are to be paid for by the purchaser during or immediately after the sale and will not be released until settlement has been made. Each animal becomes the property of the buyer immediately after the animal is sold. Any death or injury thereafter falls upon the buyer. **Announcements concerning the cattle at the sale ring by the owners or the auctioneer will take precedence over statements in this catalog.** All persons attending the sale do so at their own risk. Neither the owners, nor any person associated with the sale, assumes any liability, legal or otherwise.

Guarantee: All animals in the sale are guaranteed breeders. If any adjustment is required, it will be made with a replacement animal of equal value to the animal in question or credit will be given on the purchase of another animal.

Health: All sale bulls have passed a Breeding Soundness Exam. All sale animals have been BVD ear notched and tested negative. **Health certificates will be furnished for shipment anywhere in the U.S. Since each State has different regulations on bulls coming from Wyoming, not all bulls will be able to get a Health Permit to go to every State on sale day!**

All *NJW* sale cattle have received a pre-breeding booster of Vira Shield 6 VL5 HB, a booster of our Autogenous Pinkeye / Footrot Vaccine as well as poured with Ivomec.

All *NJW* sale bulls and heifers have been DNA tested through the American Hereford Association and are free of all known defects recognized by the AHA as of March 24, 2021, **UNLESS** listed as MD Carriers in this catalog or on the supplement sheet. They have also been parentage verified and been GE-EPD tested.

Delivery: Free delivery on Bulls and Registered Heifers within 400 miles; balance at cost. Receive a \$50 discount per Bull or Registered Heifer you pick up on sale day. Long distance delivery will be done by:

Tanner Jensen, Jensen Cattle Service 406/ 239-0302

Bob Woolsey, Woolsey Trucking 406/ 670-1877

Sale Cattle Videos: Videos of sale cattle are available at www.NJWHerefords.com or www.TheLivestockLink.com.

Take Note:

- Each animal's Lot # is same as his ID #.
- **EPDs are current as of Feb. 8, 2021.**
- All cattle photos are untouched.
- In case of bad weather, please call or refer to website for any sale changes.

Catalog Printed by: Wes and Andie Fishel-Carpenter (Alphagraphics, Winston Salem, NC) • 336/403-7627

Mandibulofacial Dysostosis (MD): The American Hereford Assn. identified a new genetic defect marker called Mandibulofacial Dysostosis (MD). This genetic defect can cause deformation of the lower jaw. This is a simple recessive gene so the only way it can be a problem is if two carriers are mated to one another. This genetic marker does NOT have any negative affect for customers using carriers on cows of other breeds. We have tested our whole herd in an effort to identify any carriers and aid you in your selections and matings. Any sale animal that tested positive are noted with **MDCarrier** under their names. The following lots tested positive as carriers of the gene: 17H / 20H / 30H / 54H / 85H / 116H / 117H / 173H / 219H / 244H / 264H / 341H / 355H / 127H / 353G / 354G

We believe the cowherd is where it all begins! Our herd is an cumulation of cows and cow families that are based on stcking genetics that will, in turn, produce consistent, efficient, high income producing offspring.

We are again offering a sampling of our genetics with a group of NJW registered replacement heifers. We tried to share a heifer from each of our ET matings and from a number of our cow families. **New This Year ...we are offering a group of Fall Bred Heifers.** Instead of continuing a Fall program, we chose to offer the entire group. These heifers are all ET from our top cows! They are all bred to Ridge 254G bull.

THE NJW HEIFERS

■ **Homozygous Polled!** The Ridge son we've been waiting for ... dark red, goggle-eyed and homozygous polled! His dam is a favorite 88X daughter and top producer here! Excellent balanced data with low birth and very high maternal traits. Used heavily here on both cows and heifers. His first calf crop is coming easy and looking impressive!
