Jake & Sasha Bare

Dylan ...Fence Perfectionist!

Emilee ...Calving & Bedding on a crisp Feb. day!

Ned & Boone!

Jan's Girls ...Rebel and Luna!

Sale cattle videos available at:
NJWHerefords.com

Welcome to NJW!

Our program and these cattle are the result of a passion and commitment to raising the most predictable, highest quality Herefords possible. We have developed these genetics by using bloodlines that fit our environment, selecting for balanced traits and culling! Buying bulls is a huge investment ...the genetics you choose today having tremendous long-term impact on your herd. Buying the RIGHT bull can transform your calves and their value in just one generation as well as affect your cowherd for the next 10 years. Again this year, in an attempt to offer you the most predictable, accurate EPDs, we have Genetically Enhanced each animal's EPDs. We believe these cattle are a forward moving set of "Genetic Tools" both to look at and on paper. The average EPDs at NJW are...

NJW Yearling Bulls:

CED	BW	WW	YW	MILK	M&G	SC	Udder	Teat	REA	MB	\$CHB
5.0	2.3	57	90	33	62	1.1	1.30	1.40	.56	.12	116

NJW Yearling Heifers:

5.4	2.1	56	87	33	61	1.2	1.30	1.40	.62	.13	120
-----	-----	----	----	----	----	-----	------	------	-----	-----	-----

Hereford Breed averages:

2.7	2.8	53	86	25	52	1.0	1.20	1.20	.40	.11	113
-----	-----	----	----	----	----	-----	------	------	-----	-----	-----

These cattle were raised on Northern Wyoming and Southern Montana Range and their Mother's Milk only ...no creep! The average actual BW on all sale bulls is 86 lbs. The average actual BW on all sale heifers is 81 lbs. We develop our bulls to improve longevity and winter them here at the ranch on a limited amount of 15% grower pellet and free choice grass hay.

Our goal is to produce easy doing, big bodied, thick and sound cattle with added performance that still maintain enough calving ease and high maternal traits. Our herd is very maternal and we demand our cows have good udders, are great mothers and calves be vigorous at birth! We expect our two yr. olds to raise bull calves to sell in the sale.

We make a special effort to get pictures of all sale bull dams, but keep in mind that most pictures were taken at Summer's end, a few days prior to weaning.

If you have questions or can't attend the sale, Ned and I are happy to help with selecting bulls to fit your program. The cow herd is located at our North Ranch and Bulls and Sale Heifers are at the South Ranch. Ranches are about 20 miles apart so allow extra time if you want to see both. If you are coming in on the 22nd, please plan to join us for Supper at the South Ranch sale location!

Ned & Jan Ward

AHA GE-EPD

The Power of Genomically Enhanced EPDs

The American Hereford Association (AHA) has embraced the use of genomics into their genetic evaluation by launching a first of its kind single step analysis that utilizes the marker effects of specific traits. Likewise, AHA is directly estimating accuracy values rather than approximating. The direct estimation of accuracy results in a more conservative value but a more accurate value than previous methodologies. The AHA is producing the most reliable genetic evaluation that is supported by Whole Herd TPR™ and genomics, which will give prospective buyers added confidence in purchasing young and unproven animals.

Buying animals that have a genomic profile incorporated into their Expected Progeny Difference (EPD) offers many advantages that allow for quicker breed and herd improvement. Below is a table showing the average increase in accuracy when buying a young animal with a Genomic Enhanced EPD (GE-EPD) versus an animal without a GE-EPD. Similarly, an effective progeny number increase is listed by trait that shows how many progeny equate to a genomic enhancement of a young animal (e.g. yearling). That's right, buying a young animal that has been genotyped is like having 2-17 progeny, depending on the trait. The proof gained on young, non-parent animals, through a genomic enhancement is valuable and greatly mitigates the risk and allows for more directed selection.

AHA Trait	Accuracy Improvement	Effective Progeny Number Increase*
Calving Ease	0.09	17
Birth Weight	0.12	8
Weaning Weight	0.14	12
Yearling Weight	0.16	9
Scrotal Circumference	0.17	6
Mature Cow Weight	0.12	4
Udder Suspension	0.17	7
Teat Size	0.17	7
Carcass Weight	0.11	3
Fat	0.08	2
Rib-Eye Area	0.07	2
Marbling	0.10	3

* Effective Progeny Number Increase (EPNI)- EPNI is the difference gained for genotyped animals versus non-genotyped animals.

All NJW Sale Cattle
Are Tested!

GENERAL INFORMATION

New Sale Location: NJW South Ranch, 888 Lower Prairie Dog Rd., Sheridan, WY ...off I-90 at Sheridan, WY take Exit 23, go East on Hwy. 336 for 3.5 miles, turn left on to Lower Prairie Dog Rd., drive 9 miles to sale barn on your left.

Airports: Sheridan, WY for private planes, served by United Airlines. Billings, MT...145 mi. from the ranch.

Motels: Sheridan, WY

Fairfield, 307/ 675-1280 ...NJW Bull Sale Rate \$89

Nelson Inn, 307/ 742-7637 (Airbnb, real nice, close to ranch)

...NJW Bull Sale Rate \$108

Hampton, 307/ 673-2734

Best Western Sheridan Center, 307/ 674-7421

Terms: Cash or check. Each animal to be sold to the highest bidder. The auctioneer shall settle any disputes as to bids. All cattle are to be paid for by the purchaser during or immediately after the sale and will not be released until settlement has been made. Each animal becomes the property of the buyer immediately after the animal is sold. Any death or injury thereafter falls upon the buyer. **Announcements concerning the cattle at the sale ring by the owners or the auctioneer will take precedence over statements in this catalog.** All persons attending the sale do so at their own risk. Neither the owners, nor any person associated with the sale, assumes any liability, legal or otherwise.

Guarantee: We guarantee all livestock sold as sound breeders. If an animal fails to breed, it must be reported to NJW or returned in good condition and in compliance with the Wyoming Health Regulations. If an adjustment is required, it will be made with a replacement animal of equal value (or) credit of another animal of equal value in our NEXT sale. No adjustments will be made after nine (9) months.

Health: All sale bulls have passed a Breeding Soundness Exam. All sale animals have been BVD ear notched and tested negative. **Health certificates will be furnished for shipment anywhere in the U.S. Since each State has different regulations on bulls coming from Wyoming, not all bulls will be able to get a Health Permit to go to every State on sale day!**

All NJW sale cattle have received a pre-breeding booster of Vira Shield 6 VL5 HB, a booster of our Autogenous Pinkeye / Footrot Vaccine as well as poured with Ivomec.

All NJW sale bulls and heifers have been DNA tested through the American Hereford Association and have been parentage verified and GE-EPD evaluated. All potential MD Carriers have been tested and results noted under their names. There is one (1) MSUD Carrier which is noted under her name. Otherwise, all sale cattle are free of other known defects recognized by the AHA as of March 23, 2022.

Delivery: Free delivery on Bulls and Registered Heifers within 400 miles; balance at cost. Receive a \$50 discount per Bull or Registered Heifer you pick up on sale day. We will assist you with long distance delivery to be done as soon as possible after the sale.

Sale Cattle Videos: Videos of sale cattle are available at www.NJWHerefords.com or www.TheLivestockLink.com.

Take Note:

- Each animal's Lot # is same as his ID #.
- **EPDs are current as of Feb. 14, 2022.**
- All cattle photos are untouched.
- In case of bad weather, please call or refer to website for any sale changes.

Catalog Printed by: Wes and Andie Fishel-Carpenter (Alphagraphics, Winston Salem, NC) • 336/403-7627

Mandibulofacial Dysostosis (MD): The American Hereford Assn. identified a new genetic defect marker called Mandibulofacial Dysostosis (MD). This genetic defect can cause deformation of the lower jaw. This is a simple recessive gene so the only way it can be a problem is if two carriers are mated to one another. This genetic marker does NOT have any negative affect for customers using carriers on cows of other breeds. We have tested our whole herd in an effort to identify any carriers and aid you in your selections and matings. Any sale animal that tested positive are noted with **MDCarrier** under their names.

The following lots tested positive as carriers of the gene: 28J / 34J / 138J / 165J / 199J / 253J / 258J / 272J / 275J • 50J / 78J / 88J / 154J / 258 / 265J / 285H.

MSUD Carrier: 195J

■ After four calf crops by Historic, we decided it was time to let another breeder enjoy and benefit from being able to turn out a mature herd sire like this with cows. He is an outstanding **All-Around Herd Builder** ...and a Hereford 11-Trait Leader! We have a tremendous set of two and three year old cows, yearling heifers and 2022 heifer calves from him to "Anchor Our Program" with and will continue to use him A.I.

■ Daughters are beautiful, young, big volume brood cows with really nice udders and plenty of milk! Sons are equally as good with two crops of bulls in our sales averaging \$10,335!

■ We used him successfully on both heifers and cows. Our average BW on three NJW crops: bull calves 84 lbs. and heifer calves 79 lbs.

■ Progeny are uniform and "Our Kind"!

■ **TERMS: Select Sires has his semen rights leased, so terms will be... Selling Spring Possession Only with buyer initially taking possession sale day 3/23/22 and then using for Spring 2022 season. At the end of that season, Select Sires will take possession for collection until 2023 Spring Breeding Season (with buyer stating the date they need by).**

■ Sells with 100 units of "In-Herd Use Only Semen" which is located at World West Sires.

THE NJW HEIFERS

We believe the cowherd is where it all begins! Our herd is an cumulation of cows and cow families that are based on sticking genetics that will, in turn, produce consistent, efficient, high income producing offspring.

We are again offering a a sampling of our genetics with a group of NJW registered replacement Yearlings and Bred Heifers. We tried to share a heifer from each of our ET matings and from a number of cow families.

■ One of my favorite 2020 born heifers and a copy of her dam 12A, one of my favorite cows on the ranch. This is a low birth cow family that has loads of body capacity with very small teats and level udders. This family topped by Long Haul is going to make some tremendous Herd Building Cow Power. We are using a full brother to 285H here on the ranch.

■ Bold, rugged, sound with added performance!

■ Homozygous Polled!

■ Super long sided, thick and eye appealing with low birth, lots of growth and high maternal value. His two yr. old dam did a tremendous job!

■ Avg. BW on two NJW calf crops 82.5 lbs.

■ BW 97 / Adj. WW/WR 756/115 / Adj. YW/YR 1236/109

- Loads of volume, thickness, capacity, body length and pigment.
- First daughters in production were beautiful with small teats and square udders. Best two year old at NJW 2020 was a 203D daughter.
- Dam 76S, one of our best and known for her great udder, is also dam of Beef 38W and Salute 201C!
- 2019 NWSS Reserve Champion Senior Bull and 2018 NILE Supreme Champion Bull.

- Full brother to NJW Ridge 103C herd sire.
- **A Powerful Breeding Tool!** Super long bodied with thickness and power! Use this bull to Build a Cowherd!
- Purchased in our 2016 sale by Glen Lees and Blair Athol, CAN. We liked how well he bred and what a beautiful set of cows he was making for our Canadian friends that we bought him back!
