INSURANCE:

We offer to pay 1/2 of your insurance premium on any Bull purchases you make. You pay 2%, we pay 2.315% for a 6 month policy. For a 1 year policy, your share is 4.685%. We highly recommend this. The self-haul rebate goes a long way to paying for your insurance.

HEALTH:

All cattle are sold in good health and breeding condition on sale day. 2-yr-old Bulls: poured with Dectomax, semen tested, and scrotal measured. Buyer will receive semen papers after the sale. Yearling Bulls: buyers have option to leave your purchases for us to semen test and tip horns as soon as possible. Heifers: bangs vaccinated, have not been exposed to a bull, and ready to go to any state.

VOLUME PURCHASES:

5% off on purchases of 5 or more bulls.

PHOTOS and VIDEOS:

Photos taken Dec. 13 by Kristian Rennert.
Videos taken Jan. 2-3 by The Livestock Link.
Sale cattle pictures were taken on a snowy day so we were only able to photograph two groups of bulls.

EPDs current as of 12/8/2025

Every effort has been made to produce a mistake-free catalog. Announcements from the block will trump catalog notes.

CALVING EASE

We've ranked our bulls as follows:

- ★★★ Foolproof
- ★★ Extremely desirable
- ★ Recommended

This year over half of our yearling bulls are ease of birth specialists,
And all of our bulls can be used on mature cows.

Calving ease does not mean "little". It means the heifer or cow can calve without difficulty because the shape of the calf is appropriate and the birth weights are manageable. Chasing smaller birth weights only gets you smaller heifers and cows with smaller pelvises. The beef business is one of payweights - so calving ease is critical.

The averages of our Actual BW for:

- 3 ★ is 68 pounds
- 2 ★ is 76 pounds
- 1 ★ is 79 pounds

Very good in comparison to any breed!

Dams of Distinction / GrandDams of Distinction:

Every year the American Hereford Association announces its Dams of Distinction. To be a DOD, a cow must calve as a two-year-old, have produced at least three calves, have superior calving intervals and have progeny with an average 205-day adjusted weaning weight ratio of at least 105. DOD's and GrandDOD's go deep in our cow herd. This year we were ranked #12 on the U.S. list with 24 DOD cows.

We provide:

- ★ Actual BW, Adjusted WW and Adjusted YW performance weights.
- ★ BW, WW, YW, Milk, REA and IMF EPDs.
- ★ Calving Ease ratings (see below left).
- ★ Carcass information including numbers and ratings (see below).
- ★ Dam's record WW and YW Ratios.

Supplement sheet on Sale Day will include:

- ★ Sale Day weights on all cattle.
- ★ Scrotal & Pelvic measurements on all bulls.

CARCASS RATING

- ★★★★★ Top of the Breed (top 20%)
Most genetic improvement attainable.
- ★★★★ Breed Leader (second 20%)
Provide excellent genetic improvement.
- ★★★ Excellent (third 20%)
Good genetic improvement.
- ★★ Good (fourth 20%)
Average for all ultrasound Hereford cattle, thus upper part of the breed.
- ★ Acceptable
Herefords that still rank above U.S. beef population for carcass value.

HELLO CATTLEMEN AND WOMEN-

2025 has been a great time for cattle producers, and with the expectation of cow numbers remaining low in 2026, cattle prices will continue to be pressured upwards.

We are a no-frills outfit. That doesn't mean we cut corners; it means that we don't do things excessively, particularly in feeding. Our Bulls are well grown out - they are not fat. Our good disposition cattle mean we can safely work with our cattle and so can you.

Taking care of the details is what makes for great communities and great cowherds, and we really do focus on the details daily.

We encourage you to buy insurance on your Bull purchases. Your self-haul discount will be more than enough to pay the bill.

We also want to thank our volume buyers so this year we will offer 5% off to those of you who purchase 5 or more Bulls.

You're always welcome at our ranch, and we look forward to working with you January 29th!

Sincerely,

John & Mary Ridder and Family

Dam's record or ratio

Measures individual performance, plus the Dam's and Grandam's progeny. A good predictor of how an animal will produce. A 100 means she is average in this herd only - she is above average for the breed. These numbers will always be above and below 100 - even in very high performance herds.

Calving Ease - CE

After pelvic measuring our Heifers for a few decades, we learned you can have a good-sized, vigorous calf and NO calving problems by paying attention to the shape of the Sire, particularly his head and shoulder shape. You do not have to downsize your cattle to achieve CE. That's why many of our customers trust our Calving Ease and actual birth weights.

We recommend our 1-, 2- and 3-Star Bulls for first service based on several factors including their sire, their dam and their own BW plus their BW ratios on their progeny. ANY of these Bulls can be used on all sizes of cows.

Other numbers we provide you: Actual Birth Weights, Adjusted Weaning Weights and Adjusted Yearling Weights. It can be a challenge to consider all of these along with the Bull or Heifer standing in front of you. Using our Calving Ease and carcass ratings, and the Dam's record is useful along with how we categorize carcass by 5 ranges for REA & IMF, not just predictive EPD #'s.
