

9th Annual Production Sale

SIDWELL RANCH & FRANK HEREFORDS

Monday, March 31, 2025

1:00 PM (Mtn.) • Sidwell Barn • Columbus, MT • Lunch at noon

SIDWELL RANCH

FRANK HEREFORDS

Dear Cattlemen,

Welcome to the 9th annual Sidwell Ranch and Frank Herefords Bull Sale. We are again excited to offer a set of bulls from both ranches that stand by our three “P” philosophy ... Performance, Precision, and Productivity.

Whether your cattle graze on the plains, dryland range, irrigated meadows, or at the base of the mountains, both ranches feel we are offering a set of yearling, long yearling Hereford bulls that will work for the registered and commercial cattleman alike. We have listened to our previous customers and we have not pushed or added extra polish to this year’s offering. They were raised on native grass that was extra lush last summer and fall and developed on a 13% high roughage grower ration. This set is currently some of our favorite bulls that we have offered to date. If you are basing your selection around maternal, carcass, or baldy influence traits, we have your bases covered. In addition to the registered bulls, we are also offering a few crossbreds, to provide our customers with some additional genetic flexibility. We will have both polled and horned genetics that were bred specifically for your needs. As you flip through the catalog, you will find multiple paternal sibs being offered to increase consistency of the end goal ... your calf crop.

As of February, the cattle business is bright. The U.S. beef cow inventory is the lowest since 1951. With the projected fall calf prices on the rise, 2025 presents a unique opportunity to salvage some older bulls that are past their prime and replace them with younger, higher performing bulls, with more future, longevity, and fresher genetics.

In most cases, the dams and grandams of these bulls are still in production in both herds. We stress longevity, functionality, and soundness coupled with performance and the “front pasture” cow that you can enjoy looking at on each trip across the range. We hope that you’ll look through the offering, scrutinize their pedigrees, examine their genetic profiles, give us a call with questions, or stop by the ranch for your personal inspection. We hope to see you March 31st at the Sidwell Sale barn in Columbus, MT. A smoked brisket catered lunch with all the trimmings will be served at noon, with the sale starting at 1:00pm.

See you on sale day,

- We think so much of this bull's dam that we are currently using a maternal brother in our herd.
- He's thick, deep ribbed, sound footed and should add pounds to your calves.

While we were building this catalog we were fortunate enough to receive the results of the 2023 Olsen born National Reference Sire Program cattle. When we first purchased Harvest H033 (the sire of the bulls in the following lots) we immediately enrolled him in the program to gain as much information for us and also our bull customers.

After all, there is no such thing as too much information. Below is the feed efficiency data results from birth through harvest. Harvest H033 was used as one of the AI sires on the heifers for this program. He did NOT disappoint!
