Scott Dirk, *Tri-State Livestock News* .....605-380-6024  
Justin Stout, *The Stock Exchange*.....913-645-5136  
**AUCTIONEER:** Lynn Weishaar, Reva, S.D. 605-866-4670 or cell 605-641-6278

**SPECIAL COMMENTS:**

Spencer Hereford genetics are focused on cowboy logic to provide you with optimum returns, less labor and less maintenance. Our target is less birth weight and moderate frame with increased muscle and depth of body. Your #1 source for low and moderate birth weight bulls.

**TERMS & CONDITIONS:**

Terms of the sale are cash. Every animal will be sold to the highest bidder with the auctioneer settling disputes as to bids. Announced changes on catalog information on sale day take precedence over printed material in this catalog.

All cattle are the buyer's responsibility as soon as sold and will be cared for a reasonable length of time at the buyer's risk. The sale management, owners, nor any person connected with this sale do not assume any liability, legal or otherwise.

**DELIVERY:**

Free delivery on bulls within 300 miles. \$75 off per bull if you haul. No delivery on the heifers.

**GUARANTEE:**

Bulls guaranteed against first breeding season injury. All females guaranteed pregnant the day of the sale. No other guarantees are implied. Every animal in the sale is, to the best of our knowledge, free from any disease or defect. Any known defect will be called at sale time.

**HEALTH:**

Herd health is excellent. Individual health papers will be provided for shipment anywhere.

**GENETIC DEFECTS:**

The herd sires have been tested for IE (Ideopathic Epilepsy). All the sale bulls are out of negative IE parentage or were tested negative for IE.

**ANNOUNCEMENTS:**

Check our website for updated information at [www.spencerhereford.com](http://www.spencerhereford.com)

**LIABILITY:**

Any person attending the sale does so at his/her own risk. The sale management, owners, nor any person connected with this sale do not assume any liability, legal or otherwise.

**REGISTRATIONS/TRANSFERS:**

Registration certificates will be transferred to buyer upon request at seller's expense. When making settlement, buyers must give complete written name and address.

**INSURANCE:** Jim Gies, Harding and Harding Insurance, 970-454-3836

**VETERINARIAN:** Chris Finney, DVM, 402-387-2311, Ainsworth, Neb.

**ACCOMMODATIONS:**

**BREWSTER:**

**Uncle Bucks Lodge**..... 308-547-2210

## Hereford Average EPDs

BW	WW	YW	MM	M&G	FAT	REA	MARB
3.6	43	71	17	38	0.002	0.23	0.03

### UNDERSTANDING HEREFORD EPDS

**BW (Birth Weight):** Derived from the actual birth weight ranking within the contemporary group where the calf was born. The first BW EPD issued for a calf is the average of the dam and the sire, with an adjustment made from that number to reflect the actual birth weight of an individual as compared to its contemporary group average. An actual birth weight that is exceptionally higher or lower than the average of its contemporary group will change that individual's BW EPD accordingly. The BW EPD is primarily changed when progeny have been recorded from the subject animal and the accuracy becomes much higher. The birth weight is adjusted according to the age of dam. The BW EPD has no correlation to an actual birth weight (an 85 lb. calf can have a BW EPD of 4.5 or 5.5 or 6.5 or even a 2.5 in different herds). A lower number is desirable and indicates less expected birth weight.

**WW (Weaning Weight):** An EPD to measure the growth genetics up to weaning age (205 days). This growth EPD is derived from the weaning weights turned in for contemporary groups. This EPD is generally very indicative of the growth up to weaning age, based on the genetic history of the animals in the pedigree. Actual weaning weights are adjusted for the age of dam. Weaning weights have been taken and recorded more than most any other EPD trait. The accuracy is important to the possible changes of this and all EPDs. The WW EPD has a significant effect on YW EPD as well.

**YW (Yearling Weight):** An EPD to measure the growth from weaning age to yearling age. The YW EPD is tied to the WW EPD; the growth of the individual through yearling is affected by weaning weight. This EPD

will be fairly indicative of the genetics in the pedigree as we in the industry have taken weaning and yearling weights as actual measurements longer than many traits measured and with fewer adjustments. The accuracy is important to the YW EPD as to the amount of possible fluctuation that may occur.

**MM (Maternal Milk):** An EPD derived from weaning weight to measure the milking ability of the individual. MM is that part of WW due to a dam's milking ability. A proven bull's milk EPD is derived nearly 100% from his daughters in production. When a bull is born, his MM EPD is the average of his sire and dam. The EPD has low accuracy and will change according to how his sire or dam may change. When his daughters go into production, the way they produce in their contemporary groups, either by being above average or below average, will change the sire's MM EPD accordingly. At this point the accuracy will go up, which gives a truer picture of the bull's actual ability to genetically pass milk to his progeny. A proven cow's milk EPD is derived from her own production and her daughters in production. A cow's own production contributes to less than 50% of her own MM EPD. Her daughters in production contribute over 50% to her own MM EPD. The MM EPD has much more meaning for bulls and cows old enough to have daughters in production.

**M&G (Maternal Milk & Growth):** This EPD is  $\frac{1}{2}$  of WW plus MM = M&G. This EPD is sometimes referred to as Total Maternal or Combined Maternal. This is an EPD that reflects the combined WW and MM EPD. It reflects the growth to weaning age plus the milk production to weaning time. It is an estimate of daughters' progeny weaning weight.

# 2012

Welcome to our 53<sup>rd</sup> Annual Fall Sale. I'm sure many of you are just like me, chasing kids' activities and events. It's amazing the distance many of us cover going to volleyball, football and other activities. In a challenging year, it's a welcome distraction from daily work.

As cow-calf producers, we are blessed by strong cattle prices, but for many of us this year's events have caused us to think how to better take advantage of genetics, efficiencies, and the biggest advantage there is in cattle production, hybrid vigor. It's a well-known fact that hybrid vigor offers weaning weight advantage, calf health advantages, and the ability to get more for less.

An added advantage is many more pounds of lifetime production, fertility, and longevity gained with crossbred females. Many of our customers also volunteer that they get longer service from our bulls without headaches!

Our family is still committed to raising quality Hereford genetics and maintaining a strong commitment to our customers and friends. Ultimately, our highest goal has always been to provide dependable bulls that are positioned to take your herd forward.

High feed prices and higher input costs are everywhere. That's why for the last 15 years I have bred our cattle in a direction that focuses on moderate framed, easy fleshing genetics that balance growth, calving ease and desirable carcass traits. I have always felt that to be profitable, input management is critical and that feed prices would be a severe challenge at some point in time! And we are there.

In addition, many of you are also thinking about the baldie female. A key reason I focus on moderate frame is that hybrid vigor also affects mature cow size. I don't want my customers to have 1,700 pound mature females, as that's not very efficient.

As always, the bulls were wintered and grown on a ration that promotes slower gains, not the fast gains pursued by so many that sacrifices structural soundness and longevity. Their mothers are challenged to be thrifty, hardy and make a living in the hills, not waiting at the gate. Overtime, I believe that environment and emphasis provide an animal programmed to be hardier and more dependable.

This offering is our deepest and most uniform set of bulls ever. And as always our guarantee is simple. If you aren't satisfied or something happens, we have a no questions asked guarantee! Another feature is 84 Black and Red Baldie bred heifers from Britt and Brock Anderson, Gothenburg. Nothing was held back and these heifers are sweet!

Welcome to our 53<sup>rd</sup> annual sale. We welcome your appraisal of our genetics.

Please join us Friday night, Nov. 16 at Uncle Buck's for a social and dinner.
