Welcome,

Our families would like to invite you to our 45th Annual Production Sale. We are so grateful to all our past customers for your patronage and do welcome any new interest in our program.

We are striving to produce cattle that will perform, stay sound, and go out to your ranch be productive. We raise our stock with emphasis on calving ease, fertility, phenotype and natural performance. The mother cow is a definite priority to breed back, stay in good rig, and milk. We do not creep feed or supplement our mother cows on grass.

The bulls have been fed a ration that will sustain soundness and longevity. The offering represents a complete test from birth to sale day. We are offering some new blood lines as well as bloodlines that are continuing to provide excellent cattle for today's market.

Join us for lunch on Saturday, April 9th, 2022 and look over one of the better offerings we will sell. The Hereford bulls include both horned (dehorned) and polled bulls with continued emphasis on structure, pigment, fertility, and performance. The Angus bulls could be the best yet...disposition, muscle and performance. The replacement heifers include an outstanding group of registered Hereford heifers right from our replacements. The Angus replacements are probably the best we will have sold! We have scrutinized all heifers for structural correctness, udder excellence, disposition, and they are all tested to be breedable.

Thank you for your friendship, patronage and interest in our cattle. Feel free to look at our offering anytime. See you on Saturday, April 9, 2022.

The Bill Thorstenson Families

Sired by 25L and out of one of our best cow families. Thor is a sire that is better than breed average in many measureable traits and is a trait leader in six different traits. This unique tabulation puts him in a category of only a few select sires in AHA. His sons and daughters indexed the highest in our herd of the sires we used. Co-owned with Frederickson Ranch and ABS.

Domino 6107 is a herd bull we purchased from Pyramid Beef. He is really attractive, long, muscular herd bull sired by one of the leading sires for many years in the Hereford breed. His dam is one of their leading cows on the ranch and is now in their flush program. A very strong maternal sire and just really good all-around useful sire.

Bravo 319 is another BAR JZ herd bull that is sired by the Bruiser Herd bull. The 319's are small at birth, have good growth with thickness and performance. His first calf crop averaged 100 for birth and 107 for weaning weight ratio. A heterozygous polled bull and Don remarked if he was homozygous, they would have kept him. His dam is one of Don's favorites.
